

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n			
Naomi T	21-May-20	9	You have to play around with the phone settings a lot to make this app function properly	done this many times but it doesn't work most of the time. This would be a nightmare to set up for anyone that isn't tech savvy.				
Ben Woodford	19-May-20	121	This app causes MAJOR connectivity issues between my device and Bluetooth audio devices	such as headphones or speakers. I have seen and spoken to many other people reporting a similar issue; I have attempted to contact support on 3 separate occasions but have yet to receive any response	and the la			
John Frost	19-May-20	54	I have tried several times to install the app without success! I am 77 years old with very poor computer/phone skills & U have NOT made it obvious or simple! I just want a simple form to fill out NOT BLOODY RATINGS or other questions about what the app does or what impact it has on what's left of my					
Romane Takkenberg	12-May-20	22	Poorly designed	badly implemented Have it on my phone just in case the so-called developers actually get it right	and it works as intended. Great idea	but At least can turn off Bluetooth when having the app running is useless		that is
David Kaye-Smith	10-May-20	19	Excellent app ! However	my phone has an annoying habit of constantly turning off the Bluetooth function (with no input from me). Extremely irritating	but I will try and sort it out. Not sure if anyone else having similar problems ???? Still having problems with my Motorola / Lenovo Moto G4+ an			
J R Jackson	5-May-20	211	Seems okay. To turn off the constant notification: Settings	Apps	CovidSafe	Notifications. Tap the A to gain control. Set it to the second level. (You can force stop it from here	too	
Iain Hunter	21-May-20	2	The concept is a good idea in theory. I only turn my wifi on when I leave home so I have not experienced any battery issues with my Galaxy S10 5G device. I don't believe any state or territory has been able to read any data being produced by this app yet	therefore it's difficult to know if the app				
Francisco Piragibe	7-May-20	64	The use of Bluetooth is disruptive in this version: if you're listening to music using a Bluetooth speaker	for instance	there's a 2 to 5 seconds pause every 30 seconds or so	or	it seem	
Matt Muirhead	6-May-20	150	Many people don't understand their security settings. Location includes capability to use bluetooth (seeing surround bluetooth devices can be used to determine your location). The app functions are expected. The permanent notification is somewhat annoying but a small price to pay. Having also reviewed t					
TheAdventurer24	19-May-20	1	I installed this app immediately after seeing the ads that tells me to. It's so sad to see that only a handful number of people have this app installed in their phone and it has been a long time since this app was announced. People are coming up with all sorts of excuses to not installed this app an					
Blue Gum	20-May-20	1	The app is causing a much faster battery drain on my Samsung A70. It also causes my Bluetooth speaker to constantly drop connections for 30 seconds. This app completely takes over control of Bluetooth preventing me from turning off Bluetooth at night when I am home to save battery. These are things					
Joanna James	27-Apr-20	165	I thought this app would use a lot of battery due to Bluetooth	but it uses only 1% per hour	which is very reasonable. I also was concerned that the app would track my location	but it works on Android even with location settings turned off	which i default have lo on). Fo	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Colin Forster	27-Apr-20	293	Edit - Found a review that said to turn your wi-fi off and then try and get your pin. It worked. I'll leave my original review below. I bumped up the star rating. Keeps saying my phone number is invalid when I try to get a pin. Tried with and without leading "0" as it has +61 at the start. Not holdi				
Peter Ellis	27-Apr-20	46	Wouldn't let me register	saying my mobile phone number was invalid. But it definitely works	is an Australian phone number	and I checked it from another phone. Edit: I see lots of other reviews had my problem on day it was launched	then it \ fixed
Annemarie May	19-May-20	2	Can't fairly assess it yet. Seemed to work OK until I installed Malwarebytes to protect my device from malware attacks. Now the COVIDSafe icon is map of Australia keeps disappearing from top of my screen and is replaced by the Malwarebytes app symbol. If I go into the COVIDSafe app	it reappears and			
philip warnes	5-May-20	107	Works well and no real issues running on Mate 9. This is a 3 year old phone	so seems OK on phones that are if this vintage or younger	providing the operating system is kept reasonably up to date. I can't vouch for anything older. I heard that it only works on Android 6 and above. That would mean t		
Chris	16-May-20	19	Unsure of value of app until it's required but it's seriously detrimental to Bluetooth connectivity. Can't steadily stream music to my headphones etc	Can't connect my fitbit for exercise	Can't hotspot internet for my tablet. Poor effort really	if it was any other app	no one right mi
John Mountjoy	21-May-20		The app worked for 3 weeks on my android phone version 6.01 Then it stopped working. It says it is not active .I have disabled power saving specifically for this app . Bluetooth location and notifications are all working. I tried reinstalling app 3 times to no avail. It seems like the problem started				
Howard Ong	1-May-20	107	The app does not track your location. It keeps a log of all the phones you have been near for last 21 days. It does not upload this information unless you give the permission; and you are only asked to do so in the event someone you had contact with is infected. When you uninstall the app	all the d			
Martin Budden	26-Apr-20	67	The app is great and easy to register and it will really help trace who's caught the disease and it will help me if I've been exposed to someone with the disease. BUT the always-on notification in my status bar is super annoying	I don't need to be constantly told that I turned it on because I alrea			
Martin Green	29-Apr-20	172	My phone (Samsung 8) keeps displaying the following notification after installation of the app: "Google assistant for headphones is running in the background". There have been many reports of this on various platforms in Australia. Seems to be because the app keeps Bluetooth turned on	and the phone			
Nic Roberto	5-May-20	253	Most of The reviews here seem to be missing the point. This app is NOT a game	information source	coffee machine	etc. It's a tracking app to help stop the spread of covid so I can finally get back to the pub to be the drunk nature intended! But really	the app
Ian McG	5-May-20	154	For those complaining & worried read on. 1. 'Android'	not the HealthDept/Govt. require location initially to access Bluetooth. Leave it on in the app	just turn off location after you've installed it in your Android settings. 2. Only turn Bluetooth on when you leave your house	otherwise leave it o	
Ben Parker	13-May-20	104	Trying to do the sensible thing	but Android keeps disabling the permission for "battery optimisation"	which stops the app running in the background. It's not much use if it doesn't run or I don't realise the app has closed. How come I know of small start-up companies than can build more complex ph		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n	
Andrew Caslick	26-Apr-20	737	It's a great concept. I'd recommend everyone do this. Keep your phone charged and bluetooth on SIMPLE! Those concerned about piracy... This app doesn't store you bank account details. It doesn't store your exact age. It does store your location	but really would that be an issue? It stores others		
Tony Eckert	29-Apr-20	42	My first impression is very positive. One thing I believe needs amending is where it says 'has a health official asked you to upload your data' the first button should have a 'yes' or 'no' answer. If you press 'yes' then it takes you to next permissions page otherwise a 'no' response will tell you t			
Paul Calnan	26-Apr-20	137	Works really well	haven't seen a single bat since activating! ☺ Jokes aside	the ability to track and trace the virus is a very clever and worthwhile use of technology	this will definitely save lives. I really don't think this app would exploit anyone's privacy considering most people willingly g
Graeme Craig	28-Apr-20	83	Using an android	22 hours after app going live	cannot get the app to validate my mobile number of some years. I know that this was a problem yesterday. My patience is now wearing very thin after several hours trying. Getting to the stage where I just ditch the app. Useless to me	or the govies if
Bill Donald	26-Apr-20	31	Average implementation. You can't find it by searching for it by the correct name in the app store! You have to insert a space. The name field should not be one. When finished there is an option to upload data which people may think is required	but it's meant for people that test positive. Just lit		
Byron Mulvogue	26-Apr-20	217	App signup was simple enough	though it wouldn't let me paste in my pin number	but there's something that doesn't add up. Location services is claimed to be required for Bluetooth	but I had no trouble giving the app Bluetooth access without location services being enabled. Combined with the refusa
Michelle Peart	26-Apr-20	206	So far so good. 4 stars because I would prefer the option of being able to turn off the bluetooth and location permissions whenever I'm not out in public. I have turned Bluetooth off but there is a constant notification telling me it's turned off and I can't clear the notification off the screen. Co			
Alley Baba	3-May-20	459	I dont leave my house often	so I want to leave Bluetooth off except when I go out. But a constant notification (which can't be cleared) tells me to turn it on	and I have no choice but to disallow push notifications (which is more complex than simply turning off Bluetooth)	and the whole busines
Steve	4-May-20	72	No problem with installation on Android 9. However I strongly object to the alert message "COVIDSafe is scanning to keep you safe." This is misleading (it's a tracing tool	not PPE) and may encourage some users to be less cautious than they may be otherwise. I also abhor some messaging out of Canberra		
Jon Smith	10-May-20	141	My workmate and I both have Oppo Reno Z phones. This App doesn't work on either of our phones. The battery optimisation keeps switching itself off. Turn it back on	and within 10 mins	it has switched off again. App is not active without this on. Happy to install to try and help keep myself and othe	
Suzie Gaynor	27-Apr-20	42	Says my number is invalid	and it is Monday night - 24hrs+ since go live ... yet I just phoned my number and it works perfectly... what's the fix please...such a demotivator when the app falls over at the very first step! I've tried - mutie times. That's it. Hopeless. Won't be trying again. Waste of		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Greg W	27-Apr-20	96	Great initiative. Just a note to those that don't understand how this works. This app is based on proximity. It does not track or know your location. All it knows is if you've come close to someone with COVID-19. Imagine walking blindly around town but having to raise a flag if you encounter someone		
Lincoln Crawley	27-Apr-20	32	I'm sure it's a great app but I cannot complete the registration process. I left it to now in case they had traffic / capacity problems which would have been understandable. The app returned an invalid number error message each time I input my mobile number this evening - and I have tried more than		
Trae Williams	2-May-20	82	Doesn't work without giving explicit location permissions	the whole point is that it shouldn't need direct location tracking. Also shouldn't use AWS - it's not like a text file containing a contact list is a lot of data	just send it straight to the state's public health authority rather than through
Cassandra Nock	3-May-20	227	Drains the battery and interferes with other Bluetooth connections (e.g. headphones/speaker constantly cuts in and out as this app scans for other devices). Would be better if this app could be put to sleep manually when not needed	like when at home. I'll give it a bit longer to see if you resolve	
Adam Cheng	5-May-20	23	Nice and simple app. reminds you when you forgot to turn on Bluetooth	which is good. I only turn it on when I leave the house	since there's no point in having it running at home while draining my battery. You can force stop the app to 'turn it off' so it won't drain your battery. Just re-open the
Mark Micallef	5-May-20	10	Does seem to drain the battery a little more than usual but at least on my phone (Pixel 3) it does not cause issues with Bluetooth connectivity to other devices. I have a smart watch and listen to music on a bluetooth headset regularly and it all works fine. I'm also satisfied with the security meas		
Anthony Bennett	18-May-20	7	Causes all other app updates to fail. Have tested numerous times with multiple reboots and then uninstalling. When I have this app installed	all of my Play Store app updates stall and fail. As soon as I uninstall this app	everything works perfectly again. Hope this can be fixed. Tried again with 1
Shane Sadler	11-May-20	56	Doesnt work properly with my phone. It doesnt keep running in background (Notification that its on doesnt stay). It closes itself (maybe when i use other bluetooth stuff like earphones). It doesnt start up with the phone. I need to re-start it everytime i go anywhere. Its a pain to keep using and i		
Iori vee	28-Apr-20	23	I'm happy to do my bit	but I hate the screen clutter	the message that gets stuck on my notification bar "CovidSafe is scanning to keep you safe". Can't you get rid of this? I hate clutter on my screen and this will make me delete the app sooner than you would like. I will still turn Bluetooth on w
Will Woods	26-Apr-20	32	Very happy to have this installed. For me the one drawback is the icon in the notification bar at the top of the screen	which is always there to indicate the app is running. It is a small green square. When I get a new WhatsApp message notification	it is also a small green square - and the same al
A N	28-Apr-20	13	Works flawlessly without bugs but very heavy on battery. Battery usage at home about 4% but went up to 8-9% after I went to busy mall for shopping. I love the app as we need it for our community safety and economy. It is our civic duty to run it	but if battery drain remains high	I will consider de
Ner Klus	27-Apr-20	31	Invalid Phone Number - can't get past the phone number screen. Looks like a bug that's a showstopper for the app's take-up and success. No change to app	but phone number accepted now. I suspect that the app had to call an external database to verify the phone number. The external db had a problem w	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Hilary Gunn	27-Apr-20	53	Didn't work on my Motorola G3 (Android 6.0.1). Works after initial install but then at some point losses the Bluetooth connectivity. Has an infinitely reoccurring popup notification about lost Bluetooth connectivity. When this happens the rest of the phone is not usable since the system focus is on	
S P	28-Apr-20	34	Works fine. But why not make it completely anonymous so people with privacy concerns would also download it. Could have easily been an app that gave a unique ID and then sent out notifications to other unique id's that were within range if there was an issue. Unfortunately many people are not d	
Margot Scott	27-Apr-20	50	Not sure what is wrong with it	but I can't sign up. It keeps telling me the mobile number I have had for 27 years is not valid! No matter what format I put it in
Glenn Spence	5-May-20	11		it says it's invalid. Talk about frustrating! I'm trying to do the right thing here
Nadia Jose	26-Apr-20	739	Everyone giving it 1 star reviews at this stage are upset that they cannot register - don't be deterred	so stuff it! I won't sign up because I can'
Martyn Saunders	28-Apr-20	39	Error "Invalid phone number"... I've tried dropping and including the leading zero	and waited overnight. I still get the same error and I'm unable to register. You need to explain the errors better instead of wasting our time; "not enough numbers"
Kelvin Woods	27-Apr-20	22	App installed fine for me	"incl
Michael Katalinic	29-Apr-20	12	Great idea	and my daughter gets the dreaded "invalid phone number" error on her phone. The number she enters is correct. Tried both with and without a leading zero. Tried installing on wifi and 4g. Uninstalled and reinstated multiple times. Not working. Judging by the pages of people
Ib Ross	4-May-20	325	No problems with sharing my information. but i have big problems with the design of this app. persistent notifications to turn on the app are pretty annoying. No one in their right mind is going to want blue tooth draining their battery 24/7. I mean really!!! The app is clearly designed to take away	but it seems to be crashing my phone. I am using a Samsung Galaxy Note 10 5G
Ross Buchanan	1-May-20	18	I had some fun getting this installed to begin with.. The app didn't like my mobile phone number	and every hour or so
Dianne Botcher	4-May-20	12	Very confusing to install. Made many attempts	but then I had a sudden brain wave and removed numbers from my user nick name. Then everything was smooth sailing. This app is an incredibly important corner stone of our country's response to COVID 19.
				with screen freezing and having to return to beginning to try again. Had to turn on BlueTooth
				something I have never previously needed. May be OK for some applicants
				but please remember that not every Australian citizen is computer literate nor posses

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Symonie Thompson	6-May-20	12	TBH if its going to notify me while at work that someone has tested positive	then great stuff! I work customer service and have people from everywhere still coming thru the doors (service station) so that to me is a huge positive! No issues with this app	having Bluetooth on its not that much of an		
Luke Turner	11-May-20	41	Using Samsung S9 and finding very big battery drain issues (way more than the phone's reported daily battery use stats) and interference with Bluetooth speakers. I'm all for helping to contain the virus	but these issues will prevent a lot of people from downloading the app. I hope developers are ti			
Mac Rats	11-May-20	6	The app disappears from the background or deactivates automatically after some time. I realize this happened many time... I had to start the app again manually. I may have went out without realizing the app has died and it would not record my movement. I found out that when my phone connected to my				
Petra Hansen	14-May-20	3	Would love to do anything extra to help with tracing and controlling the spread of the virus but this app sucks the guts out of my battery and majorly interferes with other Bluetooth connections I have to my phone which are non negotiable so unfortunately I'll be uninstalling until I read these issu				
Paul Wilson	13-May-20	2	To promote confidence in this app	it should be able to report its activity	in terms of how many connections it has registered recently and over time	and (with permission) how many it is currently registering	in real t That w also pr some ir and cur among
Steven TREWIN	19-May-20	6	Seems ok	easy to set up and use	on android 9. Can easily turn off bluetooth at home etc if want to save some battery	turn on when go out. However the within 1.5m and for 15 min to record any interactions for 21 days ? Why 15 mins ? Is that a tradeoff ? Could it be say 5 mins or less ? Less time t	
Nick Forde	28-Apr-20	77	SOLUTION - INVALID PHONE NUMBER - If you get the "invalid phone number" error do the following - 1) Close the app (don't just minimise it) 2) Turn off WIFI 3) Turn off bluetooth 4) Open the app again and follow the instructions. It should work this time. I entered my full mobile number including the				
Nick Hiscock	26-Apr-20	40	This is an excellent idea. I downloaded it at 11am on Sunday 26th April and was able to register right away but an hour later I couldn't register my fathers phone. However it was able to be registered later in evening without any issues. As to privacy the app only uses Bluetooth it does not use any				
Renjit Oommen	28-Apr-20	45	Why does the app need location permissions on the device ? As per the description of this app here as well as in the news and other media	this app works on bluetooth technology to detect contact of 2 users within 1.5 meters for more than 15 minutes. It also says that the location is NOT recorded. T			
Vivienne Langham	27-Apr-20	16	Really WANT to use the app	think it's a good idea but am unable to register. The app doesn't reject my mobile phone number - it tells me it's sent the PIN to my number	which is shown correctly on the screen	but the PIN does not arrive. I've tried multiple times	via wifi mobile
Geoff Andrews	27-Apr-20	15	THIS NEEDS FIXING The developers need to get Google Play Store to list this app when searching! Typing "COVIDSAFE" should bring the app to the top or at least close! But it doesn't show at all. Even as "Covid safe" it doesn't actually pop up until you press enter. But the actual app name is one word				

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Antony Denahy	27-Apr-20	17	An app developer accessed the source code of this app	and found it to be just as described by the government - nothing of concern security/privacy wise. It is very sensible to install this	so we can reduce heavy handed distancing rules. Not that I want to give up the flexibility of working from ho
M Hutchings	27-Apr-20	54	So far	so good. No effect on my phone's battery! And no concerns about privacy - this is a well designed app with intelligent features to protect privacy. Everyone in Australia who can use this app MUST use the app. You need to know if you've been close to an infected person & as a nation	we need
Alex Edwards	27-Apr-20	10	I'm an Australian living overseas (NZ). I downloaded the app because as soon as it is possible again	I intend to travel to Australia to see family. The problem is	I can't register when I am overseas because you need an Aus mobile number to receive the confirmation code. I know people like me are n
James Turner	26-Apr-20	25	Those who's phone numbers are invalid....enter your phone number without the first 0. Otherwise probably a heap of people trying to sign up at once. My partner had this issue then it worked a few mins later. The app is a great idea	information is destroyed at the end and the app does not ask for al	
John Park	29-Apr-20	17	My phone becomes very unresponsive eg zooming in taken pictures	slow to move between screens	the screen had poor sensitivity to swiping etc. I rebooted my phone 3 times in one day... never had to do that before other than an occasional restart from time to time as a matter of habit. Tonight I unin
Chris Norton	3-May-20	86	This app performs an important public function so I've installed it myself. However it's unable to be installed on my mother's phone - a Samsung J1 Mini. The phone runs Android Marshmallow and has all issued updates but Play says the app is not compatible with this phone. She's not going to buy a ne		
John Hay	2-May-20	11	Too complicated..if last effort of 5 attempts failed again I would not have registered. Surely there is a version of no more than one page-- Who needs a PIN when name	age range AND phone number has been supplied. I predict this Govt initiative will not reach its target number and will I be a waste	
Teruo Arai	4-May-20	9	It completely destroyed other bluetooth connections (e.g.	switch other bluetooth devices off). I deleted this app initially	but since I visit my clients often recently
Russell Page	6-May-20	9	UPDATE: You can turn this app off and on! To turn off: Settings->Apps->CovidSafe->Force Stop->Ok To turn it on again before you go out: Start app like any other. Hanging out for the source code. Sampling theory suggests it only needs to check once every minute and record a contact if it can ping the		
Easy Irish Dance	11-May-20	2	Good. Except that the Google " Find My Device" does not work to locate an Android phone when CovidSafe app is on. I have tested this and now not wanting to turn CovidSafe app back on because if I lose my phone again	may be unable to find it. Which renders the point of the app ineffective	either wa
Sean Williams	13-May-20	7	Great idea to get things back to normal faster. Besides Facebook, Google, Siri. Etc etc And most of our apps know much much more information about us than then basic app. Note. ðŸ‘“ battery optimisation is off as needs to run in your pocket when you're not using your phone. It does this for you on set		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Carol Walker	19-May-20	Works great as far as I know. Downloaded and registered it with no probs. The whole thing only took a couple of mins. Doesn't seem to affect battery life much on my Android phone. Apart from the cute Aussie logo	I'd never know it was on the phone. I just leave it running.				
Gaetan Menager	15-May-20	3	Does exactly what it states. No issues with listening to music over Bluetooth. I turn the Bluetooth off when home to save on battery	only turn on when outside. Mostly staying Home anyway	so all good battery wise. Would have liked to access to some statistics on how many contacts it picked up	per	
Dave Brooks	6-May-20	12	Originally gave this a high review. Since then I have had a lot of issues with my phone maintaining connection with other Bluetooth devices. The worst instance was when it unpaired with my car which rendered my navigation and voice control unusable until I rebooted and re-paired it. Also suffering s				
mark etherington	27-Apr-20	25	Have installed the app and it now asks for location (GPS) to be active and constantly shows a warning notification. Why is this required? Bluetooth permissions have been granted which	based on all information made available to the public	should be all that is required. Will be uninstalled if this		
Bill Whiting	27-Apr-20	10	Only issue is my wife has an overseas Apple phone and cannot download despite having an Australian sim. DEVELOPERS pse put it in the Apple International store. I see other comments with the same problem!! The app is very important to assist contact tracing. We must stamp out this terrible virus or a				
Ashley Harris	27-Apr-20	11	Was able to run app. Seems to be working. The constant notification is a real pain	have to hide notifications	which defeats the point. No source code? Was that an election promise or a real promise? Dont cull parts of the source code either. I want to be able to build it from source and step throu		
Charlotte Mills	28-Apr-20	29	Easy to install	register and use (although not a huge fan of notification on my lock screen). Great initiative	however I am concerned as my father (in age risk group) cannot install the app as his phone runs on Android 5.1 and the app requires 6 or later. I imagine this will be a common problem an		
fraz	26-Apr-20	27	I actually did bother trying to read the privacy assessment	and it appears quite genuine. They allow a pseudonym	but you have the use a mobile phone number to activate it (rather than an anonymous email address)	and so that's a bit pointless. But it should make contact tracing easier (which happe	
Paul Johnson	28-Apr-20	30	App interferes with other bluetooth applications that I use on my phone. Has caused it to crash once and dropout on another app. I have installed and uninstalled it twice after the failures	and have installed it a third time but now it wont register my phone with a new code at all. It is now saying			
Mike Sebel	27-Apr-20	14	I agree this App is important for all Australians for the short term. What I did NOT allow was permission to access my location! I was lead to believe that users were not tracked and only Bluetooth required to 'handshake' with others. A friend also installed at the same time using an Apple device bu				
John Floyd	3-May-20	508	So much for the security issues. If it does not need location data why does it need location permissions active on android! We are still waiting for the source code ... the app is only a very small part of the overall system. In particular the real security issues are at the database end which I exp				
Soy Fish	5-May-20	23	Happy to be helping my community stay safe. In my experience the app does not drain my battery with responsible use. And it does not interfere with my Bluetooth headphones. I cannot believe people who complain about the ease of use	security or privacy. I'll give it all up in a heartbeat for even on			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n	
Lauren Archer	5-May-20	2	App seems to have an issue with battery optimisation settings...even when I give the app permission to override and the little notification comes up on my phone saying it's scanning	it disappears eventually and I have to give permission to override again...kind of stupid if I have to constantly mak		
holdengirlone	13-May-20	15	This app is annoying. Yes i've downloaded it and let it take control of my settings. Unfortunately it wants control of battery optimization. I allowed as its the only way it will turn on but it constantly turns off all day and i have to reset the battery optimization again even with a full battery it			
drayzen	14-May-20	56	v1.0.17 - Permanent notification blank when app in Active state. It only shows a time	which appears to be the last time it was set to Active. Using it on the train with the rapid circulation of air	a 1.5m radius requiring a 15min exposure is insufficient to detect all possible exposures. I would a	
Alisha Hendrick	16-May-20	98	Pointless having installed	turns inactive after a short period of time	tells you to activate battery optimizer then tells you that you cannot use the app with it on even though it warns it uses a lot of battery to run in the background. Please fix this app to be more effective if it turns off afte	
Keith Miller	17-May-20	81	A great concept but it needs all of us to use it to help keep us all safe. Note oppo users will need to lock the app so the phone doesn't close it down. To do that	start the app	tap the square menu thing at the bottom of your phone	swipe the app down (you should then see a padlock at the top left)
Mick Graham	28-Apr-20	26	Cant complete the installation of this app. Keeps saying that my mobile phone number is invalid. I've tried about 9 times since this was first released. My wife has just tried to join via her phone and she is getting the same results	invalid phone number. Yes	we have tried dropping the zero as wel	
Lee Mazengarb	28-Apr-20	18	I installed it. I don't 100% like it. It should be set to collect contacts over 5 minutes rather than 15. Don't like its involvement with Amazon. Data is big business & big money so that data is not guaranteed to be deleted..I expect it sold or released to developers & investors as per normal. But I did			
Tina Goodwin	27-Apr-20	16	Will not accept my mobile number. I have tried with and without the 0. I have uninstalled and reinstalled the app and still won't accept my number. Not sure if this is an issue with certain phones - I own a Nokia. Won't get a great uptake if it says your number is invalid when had the same number fo			
Kevin Coleman	27-Apr-20	5	I support this app fully but some constructive criticism. The send data is confusing everyone	also using the international number structure should be removed as many are clearly entering the leading zero causing rejection (it is only for Australia)! Battery usage is also compromised with bluetooth		
Noel Lewis	27-Apr-20	19	I tried to install the app via my mobile phone. I got to the part where it asked for my mobile phone number and got the +61 and the 0 usually used for local numbers and failed. It then asked me to get a pin number and I had to back out of the installation to get the number. Then I could not get back			
Filbert Sim	13-May-20	9	For those with Oppo phones	if you keep getting the battery optimisation notification	try this. Click settings - battery - and turn off "smart power saver". Also	click "custom power saver" - scroll down to the "COVDSafe" app and click it and then click "allow background running". Hope this helps
Michael O'Keefe	7-May-20	8	Great app that will help us save lives and help the health officials decide on the restrictions. I strongly suggest that people read the help page on the app. Android/Google requires all apps that request access to Bluetooth® to also obtain location permission. As a result	COVDSafe on Android asks		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
CJC Enterprises	29-Apr-20	140	On...Off problem. If anyone else is having the problem this should help. When you first install the app	it requests certain permissions	these I gave	and this should then override any general app permissions on your phone and treat this app as an exception because you agreed to allow them	
Richard Ellis	27-Apr-20	8	Works fine. Excellent design re security	private data etc. It doesn't ask special permissions	and it doesn't send anything to the Govt unless you are exposed to or have the virus and they ask you to press a button on the app to send them the phone numbers of people near you for a while	and no loca	
Jayden MacKenzie	3-May-20	37	The app is good and easy to use jnnut get rid of the permanent notification! It's so annoying always being there and the only way to get rid of it is to turn off notifications	but that ruins the point of the app. With notifications off I can't get notifications if I have been near someone with Covi			
Timm	6-May-20	6	Great app. Works on Bluetooth. Every Aussie should download it. To all the dummies in the comments who believe their rights are being infringed: security agency's around the world have ALWAYS been able to access your data	whether you approve or not. At least this way it's helping something	stop yo		
Harrison	6-May-20	1	To all the people saying that they don't want to be 'tracked'	that is just ridiculous. For one	you are already being tracked far more by services such as Facebook	Google	Instagr via you card. T compar legally forfeit c a court
Lachy T	18-May-20	27	It was painful at first	tried to enter phone number and it kept saying it was invalid - eventually fixed itself. Got it going and its using more battery than usual but not outrageous. It does cut out the bluetooth on my cars speakers as I drive past others - I guess they have it? It's a little clun			
Adam JH	14-May-20	45	Works in theory only IF 1) the whole population has downloaded this app 2) actually has a phone and has it on them when they are out and about	and 3) all users would have to be screened. Unfortunately these criteria severely limit the effectiveness of the app. In terms of the app itself... Doesn't			
Rajesh Anantha Raman	19-May-20	1	Since I have installed this app	my phone keeps getting disconnected from my cars hands free device. It is a bit annoying. I have to unpair my phone and cars hands free and again pair them up. An urgent fix is needed for this issue. Some of my friends and colleagues also are having the same problem.			
Jeff D	4-May-20	10	Great idea however... Left arm doesn't agree with right arm. Gov and health minister stated on the news it doesn't track your location. Guess what it does. Doesn't like you denying access to your location. Nothing to hide nothing to worry about however when it's lied that it doesn't track location				

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Jason Hobart	27-Apr-20	11	Phone battery runs down quicker with the bluetooth constantly scanning. They should put some code in for your home location and a switch so it turns the bluetooth function in the app (just in the app) on and off when you leave and arrive to your home location. Have capability for 2 home locations fo				
Tony FORSYTH	28-Apr-20	24	Good concept but Poor execution. I am unable to Register using my phone	when others with the Same model and Version of the Software can. Reinstalled several times	Cleared all Caches and Settings Bluetooth On and Off....tried everything but you have NO Help options either Here or on your Website.		
Julie Fehon	26-Apr-20	25	Downloaded & installed without a hitch. The more people install the app	the quicker outbreaks are identified. It is not tracking you	simply a tracing tool which records via Bluetooth to the phone others you have been in contact with (if they have app as well). Think of others and protect yourself.		
Linda Lasser	27-Apr-20	11	Installed the app. Unable to get the security code to confirm the phone number. App returns: "invalid phone number". I assure you that I entered my number correctly. I always expect problems when using a government online facility. And guess what	here we go again.			
Chris Bennett	26-Apr-20	15	Was extremely straightforward to install and register the app. People who seem to be struggling are confused as why the "+61"	even though people with roaming plans from other countries might have a different country code. I suspect that the phone number they entered includes the first zero. I recom			
Lew Cody	27-Apr-20	19	People use Siri	Alexa and Google Assistant without a second thought and have thrown their privacy out the window but an app that is going to help control the spread of Covid19 should be accepted and installed by everyone. I had absolutely no problem installing and registering it at 6:15pm in Perth.			
Michelle Peck	27-Apr-20	9	It's no different to all the other Apps. Hasn't the Aus GOV already got SS number TF number	Address	REG'os of you name it and apps watching us closer	via our use	
Karen Rigden	29-Apr-20	13	This is a great idea. To anyone who's paranoid about privacy	you likely give away much more info on a regular basis through games	social media	shopping & other online activity - suck it up	princes anyone had the "INVAL PHONE NUMBER error
Brian Lyster	26-Apr-20	15	I'm 65 and not great with Technology but I downloaded the App 1st go. No problems whatsoever. Also for all those worried about loss of Privacy	if you sign up for Loyalty programmes	Facebook	Google	Apple
David H	27-Apr-20	46	Why does this app require access to my GPS location. It says it uses Bluetooth technology should not need to access GPS location if that is the case. COVIDSafe Australian Department of Health Showing permissions for all versions of this app This app has access to: Location precise location (GPS and				

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n	
Sam C	28-Apr-20	3	SMS process on Android needs work. Having entered the phone number	I need to get the PIN to complete the process. No problem with that but when you press the back button it takes you to the list of SMSs not back to the app. Other apps	such as Microsoft and banks don't seem to have that problem.	
Van K. Nguyen Evers	26-Apr-20	75	Easy to install and easy to use. All info are stored encrypted on phone. Great initiative! People should be less sensitive about giving this a go. Facebook and google track our every moves and yet everyone voluntarily give them a green light. Give this a chance to work! Not every app will be perfect			
Ian Bissett	27-Apr-20	5	I was sceptical at first... However this app requests less private information than a social media or online shopping site. The premise is sound and the app appears to be very configurable and you get plenty of control over how your personal data is shared with the government. Looking forward to hea			
Robert Barton	10-May-20	8	In phone settings I needed to setup a custom power profile to enable this app to run in the background. Otherwise the app will stop due to the phones default power saving profile. It didn't restart automatically. It didnt restart if I rebooted the phone. App info says "There is nothing else to do ex			
Richard XD	3-May-20	10	HORRIBLE APP What a ludicrous that the app are made by government not even work properly. This mainly referred to the phone number section as it kept telling me the phone number is invalid for some reason. I even tried the suggestion on the government Web pages to turn off my wifi and use my cellula			
Jaime McCarroll	2-May-20	44	Downloaded	no problem with it. Have noticed my battery not lasting as long but only slightly	maybe 1% per hr. If by downloading the app the restrictions are lifted or loosened then definitely happy with a bit of battery loss. Only asks for about 4 bits of info from you	i thought it would ask for
Desh Mobile	12-May-20	3	Great app considering it may actually save your life! The fact that app stores so little data compared to lots of other apps	data is stored locally on your phone	government needs your consent to upload your data to server and privacy is protected legislation means the risk of data loss/loss of pri	
Lesley Rogan	26-Apr-20	10	Please get on board to keep each other safe. Easy to load and setup. Just be aware I had to scroll down - for example to see I had to tick consent - and it wasn't always that clear I needed to do so. For the developer... What happens if I don't have my Bluetooth turned on for a period (I low battery			
Paul gelfius	26-Apr-20	15	A great concept and it will hopefully save lives	but I don't need to see the app on my home screen notifications. I'm happy for it to work in the back ground but not front and center. If this isn't changed I'll unfortunately have to delete it	as the way in which I use my phone is conducive of t	
Phil Stainthorp	28-Apr-20	8	Super simple. Doesn't ask for permissions that it shouldn't. Very happy to install it (it knows far	far less about me than the dodgy Facebook's and Google's of this world so no privacy issues from me) - hopefully we can save lives and get back to work more quickly! Tell your friends	install	insta
Ellen Graetz	28-Apr-20	4	Number invalid - turn off WiFi. Follows other's advice on forums and turned off WiFi and Bluetooth while putting in phone number and requesting PIN. Finally worked but help page needs advice like this so users can get it functional. The notification bar is super annoying and realistically it needs a			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n	
Nick Esat	28-Apr-20	15	Won't recognise my phone number. I've tried both with and without the zero (like really	was there a need for the country code??). Making me worried that I may have creeping dementia	forgetting the number I've had for 20 years... Will try a couple more times later in the day but if not I'm going to	
Rachelle Smith-Pedler	26-Apr-20	47	Registrations open at 6.00pm so PLEASE no complaints about being unable to register before then. Very important app. UPDATE: Easily registered at first attempt after 6pm. Received PIN immediately. Didn't drop the first '0' from my number in the registration process. Now running quietly in the backgr			
Ross Macpherson	27-Apr-20	8	Installed without issue. However	please minimise constant notification to a small single line like LinkedIn or Android fast charge unless something urgent. Contact is defined as 1.5m for 15min duration (re help info)	that's ineffective & will reduce the usefulness of the app	although minimising d
Paul Atkins	26-Apr-20	22	Great initiative and no battery drain so far. For all those people that go on about privacy and it is surveillance and the government tracking people	just have a think. This is installing on a Google phone and Google know far more about you	where you go	places you visit and the speed you go to ge
Des Lytle	30-Apr-20	4	When I unlock my phone the app's icon in the notification area is a triangle with an exclamation mark in it then after about a second it changes to the shield with the Bluetooth symbol in it	this is suggesting to me that the app may not be running when my phone is locked.		
Craig Brown	1-May-20	12	How do you even log in? When you first open the app it asked you for your name and age range followed by sending you a PIN to your SMS. When you go to your SMS to get the pin and go back into CovidSafe app the pin no longer works because you start from the beginning again which is an endless cycle.			
Brett McCartney	1-May-20	76	refuses to send the pin. have tried with and without preceding zero	turned off wifi	uninstalled/reinstalled. android 9	nokia. now the real question: how many registrations have been successful compared to the number of downloads (not including reinstalls)? it will eventually need an app notificat
Viktoria Sollmer	3-May-20	11	Needs to allow option of Bluetooth switching from home allowing to be off without being reminded to switch on	that in idle mode so to speak . Then once on move outside interaction then reactivate Bluetooth . It seems if in isolation that its not an option to advise data imput of who is doing the sa		
Amy Meredith	6-May-20		The app is draining my battery at a rate that is unexpected. I usually make it through the day using around 67% by the time I recharge at 10 pm. I have had to plug the phone in at around 1pm as it's totally flat..... perhaps you can work on this.			
Jerrod Kelly	7-May-20	27	I like the idea of this app	but it's draining my battery to fast	I have a Samsung note 9	which normally lasts 12hrs with heavy use
Vishnu Pratim Goswami	27-Apr-20	8	Very easy to install. Only bug I faced was - getting an Invalid Phone No. msg many many times	was starting to get frustrated. However	reading through the reviews	found one that said you have to deactivate WiFi so that you get direct access to Mobile data
						from fu at 7.30: 3% ren at 12.3!

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Paul Killeen	27-Apr-20	6	TURN OFF WiFi or you will be told your phone no. is invalid and the app wont register. This app would not accept my mobile with or without the leading 0. Tried 4 times and told every time my number is not valid. This was attempted 24 hrs after registrations were enabled. My wife tried same app with		
David Young	27-Apr-20	27	Sadly as expected on previous experience with federal government apps ie, Centrelink this app that the government are recommending is not working It appears it won't let you request a code? What ever that means, someone should of taken the time to bug check it rather than rushing it live. currently		
Greg Parker	27-Apr-20	5	I'd love to trust it. But when all written info points to "it will not use GPS or geolocation" yet it will not work without having permission to "location services" in Android	and there's no source code to review why - well	it's tough to trust a government who can't lie straight in bed.
David McKenzie	10-May-20	5	Works as advertised. Data stays in the device until you personally authorise upload of information. Can't fault this app to help get us back to normal life. Contrary to what some are saying	it had almost zero effect on battery. I can only assume that people complaining about battery are trying to p	
Stephanie Leahy	29-Apr-20	36	Super easy to install. Google Pixel 3 phone - works perfectly with my device and phone number. Shield icon has been constant and no restarts required yet to make sure it's still running. Not sure why people are concerned about their non-existent privacy when it comes to this app. So far	it hasn't t	
wwixards	27-Apr-20	7	Anyone concerned with their privacy and this app should be more concerned about having apps like Facebook/snapchat/tinder installed. This app does not ask for a long list of access permissions like you are asked when installing other apps and games. Just Bluetooth and location which you can turn off		
Nik Donovan	27-Apr-20	19	Since installing the app my phone has become very warm to touch. Hopefully it's just a glitch that will be fixed and my device isn't now being constantly attacked by local script kiddies with a copy of Kali Linux. I have had to disable it while at home to prevent my phone overheating. Disabling the		
Rory Spears	27-Apr-20	32	By default the app puts an icon at the top of the screen when it is running that I find hugely distracting. It can be disabled by going into Android notification settings for the app	and switching off "foreground service". But I'm not sure if this just disables the annoying icon	or actually stops
Armal George	1-May-20	29	No option to turn the app off for some time. Would like to turn it off while at home playing some games and this app makes trouble by running in the background. No big ram usage however always on notification	Bluetooth and background running memory with no option to turn it off manually is a negati	
Peter Lewis	30-Apr-20	5	I want to have this app installed but it chews through battery so much so that it's not tenable.. I use Bluetooth on the phone for many other functions like running speakers etc and nothing burns thru the battery like that.. Installed this morning with full batt and I'm down to 20% by 2pm.. Sorry fo		
Robert Langdon	1-May-20	22	I had no trouble installing the app and recommend everybody doing it. BUT it isn't compatible with my wife's Samsung running Android 5.1.1. I'll bet there are millions of people in that position. Unless the app is capable of working on those phones there's not much chance of us reaching the number o		
Shaun Buss	1-May-20	13	I take a 10 minute bus ride to the train station	then 13 minute train ride to the office... it seems like the app would be ineffective at helping myself or others in tracing Covid-19 exposure. Worse yet	I'd have no clue which bus route i was on or which train or carriage i would have been in as t
A Google user	4-May-20	5	I downloaded the app even though I am pretty much house bound. My partner is an essential worker and in and out of numerous businesses all day long	but his phone wasn't compatible with the app so he can't download it	even though he would be more at risk of contracting covid-19 than I would because

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n	
Thomas	5-May-20	12	It doesn't use much battery for Bluetooth pings	so it would be nice to see people stop complaining about their precious battery life. Everyone has car chargers and backup batteries these days. Other than that	your phone battery is probably old anyway	a newer phone will use less battery and have a
Kirsten Steel	6-May-20	5	The older I get (I'm 30) the more I realise us Australians just love to complain about 'everything'. The app is fine	simple	easy and those who are complaining about notifications you can turn them off and those complaining about battery usage I'm pretty sure your phone came with a charger. My Blue	
Miss Anonymous	6-May-20	1	I'd like to be able to turn the app off while I'm driving alone in my car as the Bluetooth pings off other people's app and it causes interruption to my music or GPS sounds. I can't turn off the app through Bluetooth as this is how my phone connects to the car. Its irritating in that way.			
Nick Hill	12-May-20	2	Bug identified! This interferes with mobile hotspot and repeatedly causes dropping of signal. Have to turn bluetooth off and therefore disable covid safe to be able to use mobile hotspot function which is how I access internet. Not too bad as I mostly tether at home	but it then relies on me rememe		
David Rosson	27-Apr-20	26	Useless app. Keeps telling me my phone number is invalid. Numerous tries. Makes no difference. If it cannot accept a simple phone number I have no interest in why. I expect an easy error free process and have no interest spending any time to fix any of problem this abysmal app needs. Piece of junk.			
Andrew Leong	28-Apr-20	4	Was stuck at the mobile number verification stage but then I 1. Dropped the 0 at the start of my phone number and 2. Turned off Wi-Fi It immediately worked. This should be written into the app	otherwise too many frustrated people will ditch it. Developers need to ensure the process is easy for ever		
Chris Wells	27-Apr-20	57	Won't work on any Android below 6.0 (And a lot of them are out there). I suspect a lot of older	vulnerable people will not be able to use this app. The Singapore version needs 5.1. Come on. A 6 year old phone which can still do 4G is hardly out of date.		
Luke Hyland	27-Apr-20	49	Simple & private. This app does all its intended for	and from what I can tell by reading the detail	covers my security. If anyone's wondering	no location services are used (though because of android the permission must be granted along with Bluetooth)
Jonathon B	26-Apr-20	21	App was simple to install...maybe 2 mins	and is an important tool to protect society. Not sure why so many people are having trouble with their phone numbers...possibly forgetting to drop the zero from the front. Also	people complaining about gps/location being needed don't seem to understand how	and onl encode informa after "h
Ting Ting's World	27-Apr-20	19	Easy download and registration process. Good FAQ section in the app explaining how it works and how long data is stored for. I have no concerns over my privacy using this app as it stores very minimal data (and I'm happy to hand over what it's asking given that it's good for our society). I think it			
Tony Petrucci	28-Apr-20	15	The main purpose of this app is to detect proximity to Covid positive participants. So this app is yet to prove itself. This is a proactive application and I am all for it. I'm for anything that will help. I was one of the first to install this app and I was amazed at how many people gave this app a			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases.	That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n			
Petre Pan	27-Apr-20	5	The app works but it drains my battery extremely fast. I can only get 2-3 hours on a fully charged battery even if I don't use my phone for anything else. That is a problem. Hope this can be fixed or I will have to uninstall it to be able to use my phone					
Allan Bass	30-Apr-20	7	The PIN number for Verification never received so cannot verify and use this important App. Update 1 day later: still no verification PIN. The story of not registering yesterday is not applicable. Would like to use the app. Will uninstall and try again tomorrow.. :(Day 4 still no PIN. Heard from C					
Artificial	27-Apr-20	24	There's no need for a phone number to use the app this is still a privacy concern. Sick people are being tracked	and can be prosecuted for breaking lockdown 1.) The Australian Government is allowed to access your private personal information from your phone Number (Assistance & Access ACT 2018) 2.)				
Wally Tee	26-Apr-20	13	The app was simple to register for and will provide an enormous benefit for the community. Naysayers will try to derail this but ultimately it is for the common good. Not a fan of the continuing notification bar - or at least the 'keeping you safe' part. Because the app doesn't keep the user themself					
Marlene Massey	28-Apr-20	4	Easy to download	not so easy to connect. I kept getting "invalid phone number" - until I finally disconnected the phone from wi-fi and went straight to the mobile network connection. It accepted my phone number and gave me the PIN within seconds. Mission accomplished!				
Mirco Bortolozzo	2-May-20	6	The Bluetooth uses a lot of battery. There should be an option to have the app off when you are home like choosing one or more Wi-Fi network that when connected deactivate the app. I only turn on the app when I leave home and sometimes I forget.					
David Penington	1-May-20	1	Installed easily and no problems. The only contact tracing app we've got	so please install it. Could have been done with far better privacy and may not achieve much	but it's far less privacy risk than metadata retention or right to force backdoors and password release.			
Robbie Cappuccio	1-May-20	7	It's supposed to be an app running in the background. When turning it on the notification comes up and reads "restart the phone if this notification disappears". Guess what? I should restart my phone every 5-10 minutes. Looking forward to the next release					
Steve McFly	4-May-20	4	Goal is great	execution lacking. Or maybe testing. Crashes my Bluetooth every few hours. 'I'm Alive' notification disappears quickly. Have battery optimisation off for this app. Get to work debugging... I need to reboot Android every few hours at this rate. And I need to get out of this lockdown.				
biplab das choudhury	7-May-20	9	I am not sure if this app works but it definitely drains battery using Bluetooth. Requesting below updates for better performance: 1. Use location services to let user define home location. 2. If users are at home then Bluetooth and other app functions can take a break and give phone battery some re					

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Ivor Green	7-May-20	25	I like the idea of this app but it is buggy. First of all since installing the app my phone now gets very hot and the battery drains extremely quickly. Also the app interferes with my Bluetooth headphones and keeps interrupting it every minute or so for 5 to 10 seconds. That is very annoying. The bu	
Jake Francis	9-May-20	9	On my stock Pixel 2 XL	I've attempted to register using networks and multiple installations of the app and multiple phone number formats (as the app's help site advises) all multiple times per day since launch and instead sending activation
Jack	13-May-20	This app messes with my microsoft bluetooth mouse and keyboard	so I have to switch it off when charging my phone at home. I turn on bluetooth and run the app only when I go out from now on. Please fix this problem ASAP. Also Android keeps nagging about its power use.	
David J Kelly	18-May-20	46	Fantastic app! A. Maze. Zing. I use it 24/7/365. This sequel is wayyyyy better than the developers first effort	Pokemon Go! I'm avoiding these AR COVID-19 monsters like well a virus. So fun. The crowny little bad boys are displayed on screen walk ar them
Andrew Perry	26-Apr-20	248	Great idea in principle	but given the Australian government's poor record on data security and privacy including the tendency to promise data will be used for one purpose but change the terms once data is collected I would hold off on this at least until the actual legislation is passed in May a
Bernard Sheppard	27-Apr-20	15	The first recommendation of the privacy impact assessment commissioned by the department of health was to release the source code. Until the department follows that advice	I can't give this more stars. The second issue is that there is no way to remove stored information from within the app. You ne
pippa Pippa	26-Apr-20	30	Happy to download . I think it's a great app and if everyone downloads it. South Australia Health Dept will be able to protect an outbreak and prevent what is happening in other countries . I personally would want to know if I have been near someone at the shops that has been diagnosed with the virus	
Neil Spencer	20-May-20	4	Everyone in Australia should get the app	let's protect each other... however weeks later I have had to down rate as it just doesn't stay on. I have tried locking the app on my Oppo phone and changing battery permission but the next time I look it has been disabled automatically because of the 'hi
Andrew McDonald	26-Apr-20	7	Works fine. Easy install	but an example of what the requested mobile phone number should look like when the +61 prefix is showing would help those who don't know not to include the starting zero of their mobile number. Don't forget to use the friends invite at the end of the install.
David Varley	27-Apr-20	3	Easy install and so far no adverse effect on battery life. Time will tell! Now I can't see me ever being within 1.5m of another person for >15 minutes given the current social isolation	but perhaps that will change and this app will come into its own. I only hope I never have to use it!!
michelle gooding	28-Apr-20	4	Mobile number is invalid. I've only had the number for 15 years or so :) Disappointing that there's a glitch. Update: 30 April success at last. If you're having probs registering. Uninstall the app	turn off WiFi use mobile phone data to download and register the app instead. Make sure you've compl
Michelle Deschamp	28-Apr-20	8	Super Easy to install and register. Should be compulsory. No impact on privacy or data usage. Gobsmacked at the people who are peeved with the icon or that they couldn't register prior to 6pm or that the FBI will get their data (despite them using every other social media platform)	or that having B

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Ashleigh Grace	27-Apr-20	2	Great app	easy to register for. Only downside is the persistent notification. This is quite annoying and very much not needed. Maybe instead of having a persistent notification	just send a notification when the app is no longer tracking	reminding the user to restart to app or restart their phone.	
Shaharin Yussof	27-Apr-20	32	Installed on the first go because I installed it when it was ready to be installed. Great initiative. I hope enough people download and install it so it can do its job to reduce the spread. Too many detractors are worried about 1984 type surveillance. It's already too late for that	and too many big			
Kevin Holmes	29-Apr-20	3	App was easy to install. Unfortunately since installing the app I have issues connecting to devices via Bluetooth. I'll give it a couple of days to see if there is an update to rectify this	if not then unfortunately I'll have to delete the app.			
Angela Whitehead	3-May-20	6	All very simple and straightforward	no noticeable drain on my battery so far. However	having a permanent notification that the app is running which cannot be dismissed is very annoying	especially for those who like to keep their notifications to a minimum. Please rethink this feature team!	
Eduardo Klein	4-May-20	1	It is a good app. My phone did not slow down its performance. I will trust the government on this. If they fail us they will certainly pay. The app needs a "turn off" button as I don't need it running in the background when stayin at home.				
Ben MacCormack	10-May-20	1	If there is a chance the app can save lives it's worth the bugs. Yes it compromises other Bluetooth connections and battery usage slightly increases	but both are preferable to death. And to those concerned about 'giving away' your location; you gave that away when you bought a mobile phone.			
Jonathan Handojo	8-May-20	3	I actually like the idea behind this app	it's ingenious. However	can I have the notification to display all the time to know that it's actually working? If it disappears	I start to think that it's not working. I've also tried restarting my phone to	but still disappear I'd say more than
Dan Dempsey	14-May-20	Buggy. (Motorola G 3rd Gen) Seems to work ok for 4 - 5 hours	but time is uncertain as phone rarely leaves my pocket. Then gives error message "Unfortunately bluetooth share has stopped" Phone is then locked and must be restarted to get any functionality. Bluetooth is active on restart. No other app				
Amanda Levick	20-May-20	1	I know this is important so will keep it but it drains battery excessively. Almost to the point it's unusable. I've had to start carrying a portable charger when I'm out. I think I'm going to have to disable it when I'm at home. I can't carry a portable charger around the house. Ridiculous.				
Mark Grima	27-Apr-20	5	Invalid phone number. With or without the 0 at the start "invalid phone number". It's been pretty valid for quite a number of years now. Meh	I tried...good luck getting your 40% Has been launched for about 24 hours now. δÝ™„			
Col Walker	28-Apr-20	3	I would score this higher however	my Wife	who has had the same phone number for 13 years	cannot download the app as her "phone number is not valid". Come on app designers	sort this You won't take up everyone's access
Amit Dubey	26-Apr-20	16	This app access less of your information. Most of the Google app/Facebook/youtube/Twitter etc asked to get access to your contacts	camera	message	and many more. This covidsafe required only location track so it's one of the app that require less information from end user. Google and Facebook tr	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
James Lee	27-Apr-20	4	The app install and registration was very smooth for me	and as far as I can tell the app seems to be working fine with no obvious impact on battery life. Great to see the government get this out of the door so early compared to most other countries - I hope it gets used by enough people!			
Susan Lafferty	19-May-20	4	I have tried 3 times to log in. Every time I try to see the code they sent	I lose the page and have to start again. Unless I can see the code without losing the page	I can't sign up. Now that I have downloaded it	it constantly turns off the battery permissions.	
Jasmin Tinjak	26-Apr-20	35	Great concept to keep us safe. Signing up was easy and I don't feel like it's actually tracking me to the extent some of you make it. Just hooks up to other Bluetooth devices I've been near and informs if they do get infected. I'll do anything to help stop the spread and keep my family safe.				
Stephan S	26-Apr-20	40	The App will not accept my phone number -in the prescribed format or otherwise-	no matter what I try. I have attempted to un- and re-install a number of times to no avail. I have had this mobile number for at least 15 years and it is my main current number. Should have been properly pre-release tes			
Frank Paterson	29-Apr-20	4	On my 2 samsung S7 Edges	grey imports	flashed from Taiwanese to Aus Telstra firmware and subsequently updated twice OTA	it works flawlessly. The only reservation I have is American mega giant Amazon holding the data in its cloud	even if servers Aus. I c trust US busines
Harley Mc	2-May-20	6	I have no idea why this app needs my blue tooth on when I am isolating at home with my immediate family. I certainly don't need notification after notification of the fact I've turned permissions off when at home. I've deleted it. I'll reinstall after the app can be turned on and off with one click.				
Jeffrey Min	4-May-20	2	It keeps closing....not very useful when I get home and realise it hasn't been tracking. I make sure I reopen the app every morning but it closes within a couple hours. I have selected the not allowed option within battery optimisation	so it's not due to that.			
Shahram	11-May-20	4	Running this app after a couple of days made the GMail app stop syncing. The permanent notification on the screen is really annoying as well. With staying at home practice	I wish I could turn it on and off as required. Also settings to hide the notification would be helpful.			
Steve S	17-May-20	43	Great idea and service	execution not so good. My battery on a Samsung S10+ only lasts now to about 5pm (9 hrs) whereas it usually would last double that. I've installed the update today and will test again. /Update/ since updating to the newer release the battery is not badly affected. Increased to			
Craig Barwick	20-May-20	2	Great idea	but doesn't work. Battery optimisation keeps reverting to incorrect setting	meaning the app isn't active... Have tried locking the app on my oppo r11s	and turning the Background Freeze and Abnormal Apps Optimisation off	but it st the batl optimis and shu down t

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Farishta Nazari	26-Apr-20	6	I give this app five star	because it helping of our health improve.but when I am not in a public places	I should have free choice to turn off my Bluetooth or location because this app designed for public places. so some people have an issue with their phone battery life I hope see those option for		
Travis Nisbet	27-Apr-20	11	Can't get beyond the 'invalid phone number' message. I know my phone number is not invalid	yet it won't tell me what is wrong with my number or how I am entering it. I want to do the right thing	but the difficulty I am experiencing in trying to do this is quite dissuading.		
Sai Dhanankula	26-Apr-20	307	Waiting for registration to be brought online (ABC says it's going to be online at 1800 today). I like the following already: > Very little identifying information is being requested. > Data is stored on my phone till I or my contacts become positive for covid19 AND > Once enough people download the				
VERLOCI-REAPER	27-Apr-20	8	Installed and worked perfectly fine	sign up was a breeze and had no issues. I've read many reviews and there are a lot of concerns with mobile numbers not being valid so I hope that can get sorted for the few who get that issue	other than that the security depends on your privacy settings in your		
John Tolhurst	26-Apr-20	35	1. Data lives on my phone	not in a remote database. 2. 3 week old data is removed. 3. If I contract the virus	health officials can quickly reach those I've been near. Like it a lot	it breaks ALL the rules of commercial apps. Well done Aussie medical advisors. Well focused app.	
Nelson Cheney	26-Apr-20	48	So I downloaded this app cause I'm concerned about the ongoing pandemic. But a few issues. 1. Originally couldn't register to the app cause registering was not available 2. Even though the government says it won't track your current location	it still requires location permission	or else it doesn't		
Alexander Sharikov	28-Apr-20	5	Super easy to use. No concerns on privacy	especially in comparison to Google and Facebook. A couple of suggestions: 1. support older Android device as elderly people don't have latest phones. 2. An option to disable the notification.			
Jim Smythe	28-Apr-20	6	I've installed this app and so far haven't got Covid 19 (that I know of). Registration was easy	and can be done using a pseudonym. Battery usage is quite low. Ongoing notification to tell you that it is working	and will let you know if it stops working (eg. you turn off Bluetooth)		
Chippy Miller	27-Apr-20	8	Very frustrating... at first it was telling me that my mobile number is invalid	then I got to the pin. It accepted the pin the first time	then the second time said the pin was invalid. I have tried 5 times now... maybe I'll try for a 6th time	then forget it.	
joeyws89	27-Apr-20	3	The app is only for case tracking purposes	and if it helps us get back to work quicker	the better. People who are concerned about privacy need not worry	data is encrypted	stopped and del after 21 There are many other apps out which are more co
Leigh Wardle	26-Apr-20	73	Everyone Read This 3pm Sunday: Hi	Thank you for your report. While the COVDSafe app is available for download	we have currently disabled the registration process. At this stage we recommend that you uninstall the app until the registration process is brought back online. We expect this to be late		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Mike Redman	27-Apr-20	4	People need to help the system that supports them	consider they rely on the Government so payments. Relax and respect this application. Consider looking privacy settings of commonly used social platforms and realise what data you give away willingly to stay connected. Targeted ads are the tip of the iceberg			
Gary Higgins	27-Apr-20	1	Something's up... Entered my phone number as requested	but a PIN was never forthcoming	no matter how many times I attempted the last stage of registration	either in WiFi or outside Telstra. a bug	
Mark Westcott	29-Apr-20	6	Stops working after a couple of hours and rebooting is needed to get going again. Version 6.0.1 of Android. Err message flashes with description "Unfortunately"	Bluetooth Share has stopped". In this state I couldn't even answer a call. Very little usefulness for my Motorola Moto G 3rd generation.			
Kristina Hayward	4-May-20	1	So far easy enough. Downloaded and appears to be ok. Only know it's there as I have a message on my screen saying if that message disappears then I need to restart my phone. As long as I don't get spam or covid I'd give it a 5 star ⭐⭐⭐⭐⭐				
Glen Sim	8-May-20	66	It drained my battery	whilst on	my phone does not last a day. Everyone should uninstall it from your phone	if you want your phone to last all day, I'd rather use my phone as it was intended to be used	to send receive highly recommended that you do not download
Anne Gordon	27-Apr-20	11	Update - Turned off wi fi	mobile number now accepted. Maybe this info could be on registration page.... Downloaded app ok on 27/4. Tried to register	but app won't accept my mobile number	tried with and without leading zero. Says the number is invalid. Can't go any further	no trouble: opt-in
Emma Willis	26-Apr-20	6	Quick and easy to navigate the set up. No issues. A great way to notify you of a suspected/confirmed case of the virus in a place where you have been. That way you know to isolate immediately. Great work to all involved to get this app up and running. I hope more people sign up to this quickly. Well done!				
Salman Syed Mohammed	27-Apr-20	12	I have only installed them recently. My only doubt is that how effective this would be when there are people like myself who don't switch on Bluetooth unless you are driving. Perhaps question of less radiation emission or the fact that data collection through Bluetooth is in range limit of 10mtr mi				
Rob Burgess	26-Apr-20	193	Very easy. All the media reports said registration would be from 6pm. I just installed it (5:50pm) and can confirm that it registered very easily. Put in my phone number and received a confirmation code by text immediately. All set up in less than a minute!				
declan ryan	27-Apr-20	1	I can see this app being very useful eventually. However I cannot get past signing up as it tells me I have an invalid phone number	although I have entered in the correct phone number	hopefully this can be fixed soon...		
Lynda Lake	6-May-20	1	I successfully registered the app on my Android phone but partners iPhone rejects his details. Have uninstalled	switched off phone then reinstalled but still says problem with phone number even though it is entered correctly. Can't find any help on this topic. NB tried again next day and was successful			
Casey Poolman	27-Apr-20	So far so good. Personally would like to choose when to have it running as it does use battery. I'm at home a lot and would only need to have my Bluetooth and the app running when I am out getting groceries and such.					

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Stef C	26-Apr-20	10	Works well from what I can tell but searching COVIDSafe instead of Covid safe leads to other country apps. Also had to spend time reading privacy policy as to why location services (listed at the bottom of the page)are required for Bluetooth to work... Independent policy report isn't linked in priva				
Simon Noble	28-Apr-20	9	Easy to install	took under a minute	simple questions	you are asked permission again	if any o data ev needs t access plan to so we c get bac normal movem again & just del when t over. G
Brad Kirk	28-Apr-20	9	Look it very simple. Install it. Allow it. if you have been in close contact with a confirmed case you will be contacted. It won't let you know the person and you may not know them. Also you won't get informed if you just passed them. It works on Bluetooth	so on a 30min train with someone infec			
Melissa Kelly	27-Apr-20	6	Can't even register and get past entering the unique 6 digit code. I open my messages to retrieve the 6 digit code (because it is not visible from the preview on my screen) and then when I re-open the app to complete registration	I have to start all over again!			
Harry Grantham	26-Apr-20	7	Any amazing way to slow the spread of COVID-19. If you download this app	you are saving lives. This app uses bluetooth technology and not location tracking. If you are worried that the government is watching your location then turn off location services in settings for that app.			
Lowell Tischler	27-Apr-20	6	If you have hesitation regarding the privacy aspect or your location being shared. Please I beg you read the privacy section in the app. The app only needs access to your Bluetooth. It does not need location services. I turned off location services and only got alerts that my Garmin app needed locati				
Michael Green	29-Apr-20	5	I thought I had loaded it on 20th April but had some doubt if I'd done it properly as I had not been asked to enter personal info. I had opened a Google Chrome A/c to load this and thought it might use info from this as Google Maps records where I live (post code). On 21st as I fiddled with it and r				
Geoff Baird	29-Apr-20	1	When registering	it seems you cannot use numbers in your pseudonym. It doesn't reject it	but gives an "invalid mobile number" on the next step. Seems to be no "help" information for registering.		
Jonathan Denton	1-May-20	4	It keeps on shutting itself off after a few minutes. Could be because it's installed on an Oppo phone which has a manufacturer-customized version of Android	but the app's not really protecting anyone if it isn't running.			
David Holmes	4-May-20	3	Most important thing here is that it helps to keep us safe and allow things to start opening up - that's the top priority of this. Some feedback is that it's causing music and casting to stutter on a regular basis - concerned that some people might delete because of this.				
Geoff Chatfield	7-May-20	11	I have the same problem as Ben Parker. My Android keeps turning off the battery optimization setting so the app disables itself after approximately five minutes. Therefore the app is useless to me. I have reinstalled it to no avail. I have an OPPO A73 with up to date software version 7.1.				

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n	
Max	11-May-20	Many 1 or 2 star reviews are describing a negative experience. I have a Samsung galaxy S8 (Android phone). The app is not intrusive. It has a tiny icon to let you know it's active (which displays upper left of my screen). Notifications are very minimal! Bluetooth battery usage is small. The governmen			
Tony1652	28-Apr-20	2	For anyone still receiving an invalid phone number error message	try restarting your phone after downloading the App. This worked for me after a few frustrating minutes of trying to set it up. Don't forget to omit the zero when entering your mobile number.	
Andrew T	27-Apr-20	1	Initially wouldn't allow my phone number	but when you turn off Wi-Fi it accepts it. Thanks to the other reviewers who wrote that	if only that was written during the process it would save everyone a lot of grief!
Manish Kumar	5-May-20	1	Installed but there is a constant notification on which can't be disabled - ideally it should run in the background. And no additional information unlike similar apps being used in other countries with detailed hotspot/transmission information visible on map	to avoid such place or area. Very basic.	
Wayne Harper	28-Apr-20	13	If an app	which is govt sanctioned	written specifically for them likely by a respected and knowledgeable IT group who know their stuff & can't get something as SIMPLE as the mobile# verification process correct how could it possibly be trusted? Uninstalled. It will take a LOT to convince me NOW t
Mark T	27-Apr-20	8	Simple app	easy to activate and could save lives. Those worried about privacy might consider all the other myriads of data their smartphone sends out without their knowledge. You effectively forfeited your privacy when you bought the phone! Here you have the chance to save lives and the data has ve	
Andrew Osborne	26-Apr-20	3	This app looks very well thought out and the data collection is retained on your phone with a 21 day rolling deletion can only be shared with health officials by you. From a privacy standpoint	Google and Facebook will have far more of your private information than the Government will ever get from	
Brian Chen	27-Apr-20	205	Great idea but not a huge fan of how it constantly pings with Bluetooth. A much better solution would have been to use geo location or geofencing for those of us who don't keep Bluetooth on all the time. When as internet is something everyone always has on	whether mobile data or wifi. Also don't I	
Daniel Willets	28-Apr-20	2	Generally works just fine. Would like it if the notification saying its working wasn't there constantly. Also cant seem to get my phone to stay connected to my smart watch with this app pinging the bluetooth all the time. Should be a simple fix for devs.		
Lone Wolf	27-Apr-20	10	A lot of talk about privacy but if you use any social media apps no matter the security settings all the information is stored somewhere on a server	So unless you have none of these apps then argument over privacy is point less. Very fast to install and register not only to help others but also to	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Glenn Allan	27-Apr-20	3	No issues installing	also helped my elderly mother install over the phone. Sign up was only hindered by having to scroll to complete some answers and the difficulty mum had with the PIN code. Have had no issues with battery life	minimal impact and haven't noticed any other issues.
Francis Young	28-Apr-20	32	Because I'd prefer a timely phone call if I've been exposed to Covid-19. And the app doesn't know me	my phone number	or my location. It only has a unique ID that a Health Dept staffer can use to alert me to get tested. A no brainer for everyone to install
James N	28-Apr-20	Doesn't go far enough. Technically basic system. Should log your gps on phone like google maps timeline feature to assist recalling your whereabouts. Other counties' apps won't permit you to go certain places without scanning qr code from your phone screen. It works there because the populations the			so we can get this isolation lifted soone
Luke Glover	28-Apr-20	6	Can confirm through the Android settings the app doesn't send anything to a central server unless you explicitly allow it (Android reports 0 bytes sent over the network). And battery usage is reported as 0% even after the app has been running for 8 hours. Only complaint is the persistent notification		
Rick Williams	29-Apr-20	2			
Anish Weerasooriya	29-Apr-20	3	Weird hole in the App... There is no option on my device (S20 5G) to allow access to location information at all times. Even though the app primarily uses Bluetooth for positioning	what if the app is closed? I advise keeping the app running in the background just in case and adding it to your app w	
Simon Hallgath-Jolly	1-May-20	3	A well designed app that only collects the minimal data required if you choose to submit it. Set it up	leave Bluetooth on	and forget about it. I've had no issues with Bluetooth connectivity interruptions or battery drain. All good. Galaxy S9+ running up-to-date Android 10.
Alexander Wohlgemuth	1-May-20	3	Disappointment. Installed the app on my S8 phone. No dramas. Unable to install the app on my wife's S10 phone. She is health worker. Firstly half a dozen times "invalid number"	then finally accepted phone number but 6-digits PIN not coming at all. Tried with WiFi off	Bluetooth off. Gave up.
Colin Berg	3-May-20	4	Works well. It Sufficiently protects personal data and is stored on your own phone for 21 days. The permanent notification in the drawer is annoying. I guess they have to cater for all the old phones out there too. A setting to turn it off though would be great.		
sarah briant	7-May-20	2	Beware of app draining battery constantly getting notifications to turn my Bluetooth on is so annoying please make the app less intrusive and also who would want a app that sends your battery life from 100% down to 5% in less than 2 hours and that's caused by COVIDsafe notifications and Bluetooth be		
Matthew Coppen	27-Apr-20	5	Only rating poorly as registration was horrendous. Have Galaxy S10. Turned off wi-fi as suggested in a number of posts but still couldn't get PIN. Uninstalled and reinstalled	restarted twice	but still couldn't get PIN. Turned on "use mobile data only" in settings and finally worked.
Tom Luo	27-Apr-20	6	Overall like the concept. However	why should it need location permission when the government has continuously repeated that it won't track your location. Granted	most give Google and Facebook and a whole slew of other apps access to this information without a 2nd thought.

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n			
Ruben Morales	26-Apr-20	15	After waiting a while I was able to finish registration. Cutting Devs some slack since this was likely accomplished in weeks and no first day release for some thing like this is guaranteed no minor hiccups. Hopefully we can look forward to being able to defeat the spread and approach normalcy sooner				
Damien Rooney	27-Apr-20	8	Unfortunately as others have said you can't review something you don't have. This app absolutely will not accept my phone number saying it is invalid. I have tried the obvious uninstall reinstall	ad someone else suggested turn off WiFi but still no luck. Would be helpful if there was a helpline to			
Jen D	27-Apr-20	1	Once I enabled Bluetooth and turned off my Wi-Fi to use phone data the registration went straight through. Turned Wi-Fi back on and it's working perfectly. They should list these things for troubleshooting as I was getting the "please try again later" response until I did this.				
Mr Pogi	26-Apr-20	9	Working perfectly.. Registration straightforward and simple. Am concerned will eat battery.. After reading the reviews from singapore.. The number 1 complaint was it kills your battery life fast.. Some said recharge 3 times in 24 hours.. Time will tell.. Hope this works.. Anything that might help sa				
Graeme Williams	27-Apr-20	4	Great app but chewing battery power with bluetooth on	so leaving it off until actually going to be in close contact with someone for the required 15 minutes. We are still isolated in Victoria so cannot have visitors yet. Can stop notification in settings to stop the annoying screen alerts.			
Gavin R.	13-May-20	2	Works fine on Samsung S7. No conflicts with any of the 4 Bluetooth speakers and headsets I regularly use for music and calls. Battery drain is no worse than when I leave Bluetooth connected all day for other purposes. App permissions do not overreach and are as restricted as promoted by the Gov.				
Scotty Dave	26-Apr-20	9	Downloaded the app after 6pm	and had no problems registering. Just remember to omit the leading zero when entering your phone number. Hope the use of this app by as many people as possible will save lives and enable lockdown restrictions to be lifted sooner. Download the app and protect yourself	y		
Shakti Chittara	27-Apr-20	1	We need this app and we need everyone to use it. It works as promised. Please promote this app in your networks. One improvement that can be done is that we should be able to set a home address and whenever we are there it should automatically stop the Bluetooth to avoid battery.				
Henry Vindin	26-Apr-20	56	It would probably be smart to put something about registrations being unavailable until 6pm 26 Apr (as per other reviewer comments) in the description. Based on previous experience it probably won't be the play store that needs a staggering of new users downloading the app	more than likely the regi			
AmandaHarleyLouise CordialBurt	27-Apr-20	4	I need help. It won't let me put my phone number in to get the pin. It says invalid number. Is or has anyone ran into this issue and know how to fix it or what im doing wrong? I cant proceed without a start unfortunately i can only rate it one until i can get some help. Ive tried to find info everyw				
Keith Harvey	27-Apr-20	1	Great initiative. One little thing I've noticed is normally when I loose our house wifi signal the phone goes to mobile data. When I'm back in range the wifi auto connects again. Twice today this auto reconnect hasn't happened. Not sure if it's the covid app or something else. Motorola 5gs phone.				

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Tom Macnac	2-May-20	App works as described and doesn't use too much battery. If you are having trouble getting your phone number accepted try turning off your wifi and attempting it again. It seems to fix it for some users.		
GIRL _fromOz	3-May-20	Needs a tweek.. Can a user set the Bluetooth so it works when we leave the house? My phone battery is draining away while I stay home with no visitors. Let us turn it off while at home and activate as we leave and go into public places. If my battery goes flat this fast it will be gone.		
Rob Corke	2-May-20	3	Broke my Bluetooth connectivity. My phone (Moto G4+) will no longer connect to my car (Subaru). The car is adamant that there is no phone in vicinity	and phone won't find the car. Need a way to be able to temporarily disable the app for troubleshooting purposes without turning off Bluetooth.
Arvo Elias	5-May-20	4	No additional battery drain nor interference with 4 other Bluetooth devices. Operates even with lockscreen emergency app overlay. Simple to install and no privacy issues compared to many other country systems. Happy to recommend as a software engineer.	
Greg French	6-May-20	22	I agree with turning on bluetooth and giving my phone number. I do NOT agree with enabling Location which the app says is compulsory for it to work. This is being misrepresented. If it is only using bluetooth to trace contact with others then Location is not necessary. Enabling Location tells Google	
Shlomo Goldzweig	17-May-20	Used up the battery from first use. After a week of charging the phone frequently it stopped working. Had no issues until downloading the app. Would not use it. It was not a new phone but worked. Drains battery on older phones.		
Martin Trigg	26-Apr-20	20	Easy to register. Not worried about privacy. Using Facebook or doing a Google search gives away more of your privacy. At least this app has some real value for society. For some reason the Play store does not find app when searching for Covidsafe but does list it when searching for Covid safe.	
Rod Kendall	7-May-20	Phone number invalid. A half baked solution for a serious problem. Fortunately	at least the data are safe with Amazon... Update: finally allowed me to register my phone number. However	I am still uncomfortable with the Amazon connection. Three stars.
Paul Williamson	26-Apr-20	1223	This is such a great initiative and done in such a way as to make it only for one thing - keeping us safe. Please everyone install this and share it to high heaven. The phone number issue is solved now and was only because registration was not open. You should appreciate. There is an 'Upload my data'	
KyE Gee	27-Apr-20	13	Another LNP government fail.I have tried at least 20 times to register but every time I have been told I'm entering an 'invalid phone number' Rubbish. I will keep trying and if it does work I might adjust my stars but at this point it doesn't seem to be working at all for me. Note: tried my work pho	
Anthony Mcguigan	26-Apr-20	2	This is no different to signing you life away with any other app from a third party. I'm happy to sign up. It is still your choice to upload data when it comes the time when you find out if you have Covid 19 or not. I hope people do so everyone gets informed.	
Barbra Wilson	27-Apr-20	5	Would be better if it didn't chew through my battery life. Also while the 'oh no your bluetooth is off!' Warning is cute	it's annoying. Turning off my Bluetooth when at home because I prefer to only charge my phone once a day

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Vince Garrone	27-Apr-20	3	Suggestion. It would be useful if the application provided feedback to the user such as how many unique contacts were encountered during the last hour	the day and perhaps the week. This might alert people to the activities with most risk and provide feedback on their social distancing technique.			
James O'Neill	8-May-20	2	Easy	quick setup. Just uses Bluetooth (no connection) and sits in the background. Do your bit to help Australia beat this thing! Edit // Does cause the odd stutter when streaming music with bluetooth. Small price to pay for things to go back to normal.			
Amelia Dellit	28-Apr-20	7	This app is useless it seems to constantly switch off	I have to keep rebooting it. Perhaps it's my Bluetooth but if people download it and think it's working properly then it is giving the community a false sense of security and inaccurate information.			
Sasha T	27-Apr-20	Seems to work ok. Registration was not available after 2000hrs EST on initial release date which accounts for some of the negative reviews. Remains to be seen how many people install and run the app in terms of meeting the government's objectives.					
Ian Callander	2-May-20	1	5 days later	doing nothing different was finally able to register on the App. Whole family downloaded the App onto each phone and no one was able to register as the App wont accept your mobile phone number with or without the 0. Pointless if you cant register....			
Satha Sandrakumar	27-Apr-20	When you are at home or safe place you must have some on/off facility. When you turn off Bluetooth you need to restart the phone again which is annoying. I will recommend to download and hep the authority.					
Paul Kruger	29-Apr-20	2	Easy to install and does not really drain my battery. I have had no notifications or prompts to do anything so it does not bother me at all. I am all for this process and believe this can really make a difference. Thank you to the Government and the Health Services in supporting us.				
Norma Walsh	29-Apr-20	6	I cannot get through	keep saying my phone number is invalid.....I come back to get pin number go back my details are gone. I don't understand	could this be fixed	other people don't have this problem. There phone number they go straight through. Please help.....	
Frank Riley	29-Apr-20	1	I have tried several times to install the App without success. The first few times it would not accept my mobile phone number When it eventually accepted my number I did not receive the code to enter into my phone I will try again at a later time but if I still have problems I will give up				
James	29-Apr-20	1	There is a constant push notification 24/7 to tell you that the ap is running	quite annoying. The government is constantly tooting their horn about how many people have downloaded the app	but this doesn't reflect how many people are still using it.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Saul Mullen	1-May-20	1	The phone number detection cannot handle wifi-calling. Turn off your wifi	go outside or turn off wifi calling. Which is all a pretty poor start	really. Every single other app from banking to two factor authentication seems to manage this...
Peter Muir	3-May-20	1	I want to do my bit and despite misgivings downloaded onto Samsung Galaxy 10. Small issue. It is now making my Spotify skip every few minutes. Tried another device without the app and it worked perfectly. Same problem on my wife's phone.		
Michael Doran	5-May-20	14	Location tracking has been turned "on" in latest update (040520) - go to the app list in settings to turn location tracking off. If this reverts to "on" in future	I'm uninstalling the app as this detail is not necessary - and govt have said app will not track location. Trust betrayed??? - sure...	
Gordon Wakelin-King	4-May-20	2	Runs fine for me. I keep bluetooth off for battery savings while at home but turn it on when I go out for any reason. It reminds me to do that all the time	which is probably wise of it.	
Yan Z	9-May-20	13	It makes me feel worried when requesting location	although it claimed android needs location turned on for Bluetooth to work. I have downloaded it for quite a few weeks now	but never feel comfortable to fulfill the registration. I don't really trust Google/android for not collecting data from 3rd
Trevor Lawrence	26-Apr-20	6	Like others	I can't register. Says my phone number is invalid. News to me and those that contact me on this number. Edit: Apparently registration not available until 6pm. All ok now. Pity the back end wasn't ready when app released. On first go it interfered with Microsoft Your Phone app. Removed C	
Peter de Groot	28-Apr-20	4	Installed on a Samsung S7..... 1). Why does it ask for a phone number.. surely it can get it from my phone. This bit needs work..... 2) Cannot turn phone sideways to type with these fat fingers..... 3) Wanted me to enable location ... took them at their word that it does not use it..... 4) How		
Jason Wazza	27-Apr-20	13			
Catriona Lightfoot	8-May-20	6	The app causes other Bluetooth activities such as streaming music to cut out intermittently. Very annoying. It needs an off switch for when you are home and a notification to remind you to turn on when you leave the house or car.		
Kylie G	27-Apr-20	4	Edit: worked at 7.15pm. I switched from home wifi to mobile data and it worked instantly. Seems like a good idea	doesn't ask many permissions	will give it a go! Original: Says my phone no. is invalid .. can't complete registration 6.40pm 27/4/20 (Galaxy Note 9)
Ian Brennan	15-May-20	18	Update. Finally able to register the next day. Jan still not happy . You'd think they would of had the app bug checked by now. Considering the amount of time they have been talking about it. Not happy Jan...! So	I am a Muppet and an inpatient Troll! It now after 6pm and it still won't except my ph	
M	26-Apr-20	9	Easy download. Non invasive info. Runs in the background. Like the invite you can send others to encourage to download. Anything to track covid and stay safe is gotta be good and will help us all get back to some kind of normality. Like that the gvt are trying different things.		
Stephen Szalla	27-Apr-20	4	An app that might literally save my or my partner's life. Yes please! Small issue getting the PIN from the SMS then going back into the app to find I had to start the registration process again	but no major problems so far.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
AD Coupe	2-May-20	I believe this app is the key to easing restrictions! Premieres should ease rules for those with the app first! As these people will be contactable upon exposure. Those worried about privacy need to read the details; if they are still worried	then they are best indoors as that will help keep them p	
J j	29-Apr-20	4	Requests access to location data in addition to blue tooth. The app does NOT work on IOS apple phones. It may say its running in the background	but with reduced abilities due to the way IOS is set up
Phillip Reid	2-May-20	3	I don't mind using this app. It comes up with the message "COVIDSafe is scanning to keep you safe" and even includes a little smiley face. However	now I've found that it's not even operational! Thanks for lying to us guys.
Judy Yorath	4-May-20	2	I downloaded the app when it first came out but as yet I do not think I have registered my details... Stefan Kleynhans	10-May-20	Since installing the app my Bluetooth earphones seem to be a bit glitchy.. The sound is very broken with short pauses in between. A friend experiences the same (both Samsung	but different brands of earphones).. Would be great to get this fixed. It is pretty annoying.	
Kate A.	13-May-20	1		
GP McGee	19-May-20	2	Uninstalled due to not being able to turn off the notification bar. It interrupts the functionality of the drop down notifications of other other apps. Should be able to run covid app in the background without constant notification showing.	
The Bakers	20-May-20	1	The app doesn't recognise my phone number as being a valid Australian mobile number. I have had this number for nearly 20 years. It's definitely entered correctly. But is classed as "invalid"	
Mike S	2-May-20	4	FEEDBACK TO DEVELOPERS: You should have the number of downloads visible in the app (live) to motivate people to share and reach the 3 million then 5 million then 10million download goals - with a share option next to the live count. It would make people more keen to open the app and talk about it /	
Andrew Milton	27-Apr-20	2	If you get the Invalid Phone Number error	turn your Wi-Fi off and switch to mobile data and it should work... did for me anyway. Developers should either insert this instruction into the installation
steve	27-Apr-20	1	If you are getting an 'invalid number' error	don't try adding the leading zero it won't fix the problem INSTEAD turn off your WIFI and use cellular data. You can turn your WIFI back on once the registration is complete
Stefanovich R	27-Apr-20	Works as stated	smooth and concise. Bad reviews were just premature downloaders. Unlike facebook or instagram which you no doubt use and tag people in	this is not sharing that type of information with random companies. Delete it once this is over. Even for the safety of those around you friends f
A N	26-Apr-20	3	It's not going to compromise your privacy as you can put a pseudonym and it's just age range	not DOB. No more privacy invading than entering a lucky draw competition. The downside is it was my battery. My phone isn't crash hot so has less battery capacity.

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Larry	5-May-20	8	Not compatible with my mother's older model phone. I suspect this is going to be an issue for a lot of older people who need this the most	because they tend to have hand-me-down phones from their children. Mum's phone should be capable to handle the app. It's a Galaxy S5	
Jamie Good	27-Apr-20	2	Wont recognise my mobile number. Unable to find a help line or webpage to assist me with the issue. Update: Turn off wifi and verify mobile number in data mode. It wouldn't recognise either mine or my partners mobile numbers until we turned wifi off.		
Shayne Boswell	27-Apr-20	3	Obviously it's a good thing to have	but having Bluetooth on all the time is a battery drain	and on my S10 there is a constant notification on my lock screen? If it was using 4G or wifi that would be better and remove the notification it's distracting and unnecessary.
Noel Murrell	27-Apr-20	6	No problems downloading or registering. My only concern is that a lot of people may miss out as the phone must have Android 6 or higher. A lot of older (the ones you are trying to protect) or less tech savvy will have older Android phones.		
joe menta	27-Apr-20	31	Needs a "At home" button. App seems ok	still not sure of impact on battery but a simple I'm at home button would mean it doesn't need to stay on while I'm home. Even a message every hour asking am I at home would help people remember to turn it on if needed. Good idea just needs some refinement

Tried entering my mobile number with a 0 and without a 0 after the country code but both times	it won't generate a PIN. No spaces in my number either. Tried installing and reinstalling but no luck. Mobile number is with Telstra on a	
Vikki Mount	26-Apr-20	109		100% on board with the idea but this app shouldn't have been launched until registration could happen. Lots of frustration with people unable to register their phone number. This will cause a lot of users to dismiss the app with one star.

Sheldon Rautenbach	28-Apr-20	8	Works fine with no issues	my original review said it drained battery but after a few days of trying it	I can't see a massive issue especially considering my Bluetooth watch is paired to the phone all day anyway. No excuse to not have the app installed now.
Phelec59	27-Apr-20	2	Easy to Install - Great for All Not are you helping to stop the spread especially to the vulnerable	but you will be helping the unemployed get back to work again sooner. Frank S	27-Apr-20	2	Found	downloaded and installed OK	verified with phone number/pin etc. But the actual app does not show up on my Samsung Note9 list of apps. The Covid Safe icon is on my taskbar and notifications drop down. Clicking on notification opens App but actual App icon on my "Desktop" or homepage is not a

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Ricky Beca-Cherrett	27-Apr-20	2	For once the Gov has done a good job in creating an app which is actually privacy-friendly	with strong legal protections to back it up. Rob Adams	26-Apr-20	163	Unable to register	tells me my phone number is invalid	if your going to release an app you ensure that everything is ready to go before it happens. Not sure what kind of backend is missing that can't parse a phone number that's n done
Elizabeth Liang	29-Apr-20	Was quick and easy to create an account. They prompt you to read the T&Cs	which you should be going through anyway	and ask your phone for permissions. Whole process took less than 3 minutes	highly recommend others to install the app too
Peter Robson	29-Apr-20	2	Brilliant idea to restrict the spread of the virus. Is 15 minutes contact per event too long? The likelihood of virus transfer between passersby in a much shorter time is not insignificant . But then again it would be too intrusive. What we have is the best compromise. Peter Robson		
Les Kenna	29-Apr-20	2	No problem installing and going through the registration process was easy. I view using this app as being about protecting myself	family	friends and community. Privacy risk is meaningless when comes to a life and death situation.
Chun Man Tsui	30-Apr-20	3	Get it running people and join the community to fight against the virus. Taiwan and Singapore has been doing this for a long while	especially Taiwan and no one there is complaining about invasion to privacy while they have the virus all under control. George Eldon	2-May-20	2	Keeps closing by itself. I don't have any privacy issue with it but whenever I check to see if it is still open	usually many hours after having opened it	it is inevitably closed. Not good if it is a bug. I am absolutely not inadvertently closing it myself

Sapient Man	2-May-20	1	Installation easy on Android. App requests location access. Checked and information confirms it doesn't collect location. My GPS is always off anyway	and app works fine without it on. Forced stop for now as we are still in lockdown and I haven't been face to face with anyone for weeks oY'S	
Gerard Stainsby	14-May-20	6	Presumably working quietly in the background. Pleasing that the source code has been made available. A persistent	slightly irritating and presumptuous "keeping you safe" badge cannot be easily hidden but at least will remind me to delete the app when/if the need is passed.	
Robert Angus	7-May-20	12	Stupid system to load the app. I got a gov message on my mobile phone and followed the steps to download the app to my Samsung mobile. It is now downloaded to my iPad which does not leave the house and some equipment that was my iPhone about 6 months ago but now sits in a cupboard with no microchip.		
Steven Donnison	10-May-20	9	I installed this app	and through the setup process it informed me that for it to work	it is mandatory for me to give my permission for it to access my location. A major red flag for me so i like many others will be uninstalling this app immediately after i submit this review. They say that it's a
Tim Kojevnikov	15-May-20	1	Works as intended. Bluetooth doesn't drain the battery as badly as expected. I would come home with ~80% battery charge if I didn't use it for anything else (such as GPS	etc). It's worth the minor hassle in a exchange for our freedom	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Daniel Connolly	28-Apr-20	1	What's to dislike? It's an essential. My phone has a firewall feature and I just block it with a firewall anyway	though it doesn't seem to use any internet access at all - only GPS and Bluetooth. Battery drain is unchanged from what I notice	even after turning off battery saver to make sure it's a

JW Gator	26-Apr-20	4	If you're reading this on a mobile phone	you have already given away more personal information than this app will ever want from you. Do you use Google? Or Google Maps? Yes? Well they have much more personal information about you than this app. Help the medical staff conduct their tracing. Help Aus	
Rod Chandler	27-Apr-20	Pin number should be given at start of completion of Ap,if not familiar with op of smart phones elderly lose info when attempting to retrieve pin number. Too many assumptions are made without consideration of experience of user,took me 3 attempts to work it out. Finally got there but frustrating.			
Desmond Soares	27-Apr-20	2	The app bluetooth polling interested with my use of the phone as a wifi hotspot causing the internet to drop out every few minutes. I am using. Moto e5. This means I will turn off. Bluetooth when running a wifi hotspot. Please fix.		
Ian White	27-Apr-20	2	Tried installing multiple times gets to 97 percent then stops. What to do? Samsung s10 so i went into apps google play clear cache clear data and tried again. Same result stops at 97 percent downloaded. Latter google asked me to login again with my gmail address this appeared to clear the issue and		
Jean Haynes	27-Apr-20	1	I had multiple attempts to register my number (and to receive PIN) but it kept rejecting as "invalid phone number". As suggested by another review	I switched off wifi for this step and used mobile data instead - it registered instantly.	
Graham Johnstone	30-Apr-20	1	After entering my mobile number the log in process freezes. I dropped the 0 so I don't understand why this happened. Tried several times from scratch with the same results. Ok after another attempt	so now have the app	
t2d66 D	29-Apr-20	1	Bluetooth speaker connected to Spotify stopping. I press play & it stops again. This is the only new app I've installed. I think there a bug and this is the only different thing (new app) on my device. Had to clear memory to get Bluetooth speaker working. Galaxy Note 8.		
John Macdonald	14-May-20	2	Wording is better in the new version. App can get better. Still requires location access. Took 8 hrs to pop up. Not impressed. Only needs one phone in the immediate area to have location on	but..... We were told it didn't track. Semantics?	
sushi whisperer	9-May-20	3	In order to connect to a Bluetooth device all you should need is Bluetooth permission. The fact that some application may use the Bluetooth connection to determine location	should not force the user to give that app even more permissions. Forcing enabling location is wrong.	
Rob Sheridan	11-May-20	2	Have to turn bluetooth off to use wifi for some reason now when at home why I'm not sure. Will forget to turn on/off eventually. Have to allow my location which gives my home address. Been trying to avoid this ever since coroner spoliated evidence to cover-up how sister met her end but now this is op		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Ben Howell	13-May-20	Idea is good but it keeps interfering with my Bluetooth headphones	randomly it will cause them to cutout for a few seconds. Doesn't happen that often but enough to be annoying.	
Brad Hawkes	20-May-20	Has always been active and there hasn't been any noticeable change in battery life. I guess if I get coronavirus	or someone around me does	then I'll know if it's actually doing its job. No complaints from me though.
Matthew Wheatley	12-May-20	5	Unobtrusive and very small battery drain. Random shutdown on Android was traced to battery settings on my phone. Opened the App power-saver manager and turned off optimize and auto control. There might be some different answers but I haven't had a problem since doing that.	
Ram Ellimisetty	27-Apr-20	2	It is simple and think it is safe and does not breach privacy and not much information is sorted. Once the restrictions are relaxed this app will definitely speed up tracing the contacts. Hope many will download and help all to keep everyone safe.	
nick tait	28-Apr-20	Major issue with the covid app. When I need to use Bluetooth it starts auto calling the last number I rang. Like in the car. While driving. I can't stop it unless I turn the Bluetooth off on my phone.		
John Scolaro	27-Apr-20	3	For what it is	it's a well made app. The vibe I got from it was that privacy would be respected and user data will remain secure which is important
Simon Bellworthy	28-Apr-20	I've just downloaded the app and all good up until it asks for your phone number	I've entered a dozen times and says not valid. I've reinstalled it twice still nothing. Removed the zero. No point if it don't work	since all the app does is track people. Keep it up devs
Booboo Kittiefukk	26-Apr-20	19	Easy to set up. The only permission it asks for is location data and it makes sure your bluetooth is on	which is no problem. No data leaves your phone and it's easy to generate that information if you are ever asked to provide it by a health official.
Beth Masterson	27-Apr-20	1	Quick and easy to install. Great level of information provided to reassure me how the data will be used	if it helps save lives worth every download. I truly hope it works as intended
Terry Evans	4-May-20	2	Took me 3 days to get out to download. Kept saying my phone number was wrong. Now that I have it	I turned Bluetooth on but it keeps flashing on and off. I've tried deleting app and reloading it several times. Does anyone have this problem?
jeff Pethybridge	27-Apr-20	2	Easy install. Read the help for why it wants but don't need Location turned on. Also it explicitly states that Government and law enforcement can not use it to check social distancing or meetings. Annoyed that a warning notification stays active while the app is running.	
Edmond Stewart	27-Apr-20	2	Using this app is a small but important step we can take. Phone number not registering? Try turning off WiFi and using your mobile network. That solved my issue (also don't forget to leave the first zero of your phone number out)	
Andrea Piels	26-Apr-20	2	Very easy to register. Only supplied name	age group
Han-Wei Lee	5-May-20	1	I hope the Devs can fix the issue with this app killing Bluetooth headsets	I need my Bluetooth headset working as I'm on the phone for hours per day. Maybe even a pause button if the headset wireless issues can't be fixed.

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n	
Andrew McSeveney	5-May-20	3	This app does not kill your battery	it does not listen as you sleep at night	it does not even track your GPS data	nor does it sell your personal data to companies who want to market to you. What does it do then? Well it might just save your life
Leighton Davis	13-May-20	11	The Australia logo with the tick still appears in the status bar when Bluetooth is off	although the detailed text in the notification tray changes. Maybe a different icon to indicate that the app is not active would be easier to alert that the app needs to be checked?		or som you car Take 5
Andrew Graham	18-May-20	I've noticed the same issues too with my music too. Spotify was cutting out on my car speakers. I have updated the app today	so let's see if this fixes the issues. Apart from this the App has had no other faults with me.			
Tim Parker	16-May-20	1	The app is very asthetic! It really doesn't use that much battery and you can disable the permanent notification within Android. I had support for high refresh rate displays which is a nice touch. I'm impressed they made it so quickly. Download this app! □			
TheRealDrGiles	18-May-20	When I'm at home listening to music via Bluetooth	the app causes regular dropouts. I have to kill the app when home and reactivate it when out and about. It needs some work.			
Adam Thompson	27-Apr-20	10	Privacy policy says "No location data (data that could be used to track your movements) will be collected at any time." Then the app asks for permission to use location data. Not sure why it needs this permission if it does not use the data?			
Daniel James	6-May-20	1	Important application. Doesn't use as much battery as I was expecting. If you have an Oppo phone you need to go into phone settings	applications	COVDSafe to stop to phone from managing the applications power use.	
Alan C	27-Apr-20	2	How do I ensure only this application and no other I have on my phone access my location or uses my Bluetooth connection? Normally I keep location	Bluetooth	and phone data turned off to stop other applications I have using it for reasons they do not adiquity explain to my satisfaction. Some of the	
Rob Hampton	27-Apr-20	1	I kept getting invalid phone number. I turned off WIFI on my phone and then it worked/registered straight away. Should have better error messages. Should have Unable to verify phone number and turn WIFI off to register.			
Rachel Montgomery	27-Apr-20	I think this is a great idea	but the constant notification telling me that it's searching is really annoying! I don't like having notifications so if there were a way I could get rid of this I'd be so much happier!			
VT Mukundan	26-Apr-20	App is designed for minimum data / maximum privacy and control. Obviously the app increases our reopening options. Australia rise to the occasion once more and install now. Hats off to all parties for getting it ready	only wish it had been available sooner			
J -	26-Apr-20	12	This app could save my life. I'm more than happy to let others have a record of having come into contact with me if they become ill with COVID-19. If I get sick then others can be informed if they have been in contact with me. Not being able to tell other people I'm sick won't be on my conscience. T			
G Calkin	26-Apr-20	5	Works well	simple to install	and more than happy to help get rid of this awful virus. My husband is immunocompromised and it's given us some peace of mind knowing that either of us can be contacted if we've had any contact with it.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Erol Mintie	26-Apr-20	13	Updated review. All good. Easy to register and nicely developed. App notification saying it's running on home screen notifications which should be visible all the time so you know the app is running in the background. Well done! Let's hope we get greater uptake than Singapore (20%)!				
Darryl Ward	26-Apr-20	5	Such an easy sign up process	app is very straight forward to use and the amount of personal information being captured is negligible. People really need to understand the facts and give this a go before playing the usual anti government card.			
Michael Stuart	27-Apr-20	2	Very easy to set up. For those struggling with the phone number recognition	do not put in the 0	as it will not recognise your number with the +61 in front of it. Common sense		
Peter Gapp	29-Apr-20	2	I have tried to install it	I am told it is already installed I have no icons on phone to indicate installation. Too hard I give up. On the official site there is lots of information but no links	I used SA Govt site	incredibly frustrating	going ir Get it ri
Christophe Garrec	29-Apr-20	2	Same experience as many other when connected to audio devices. If CovidSafe is running the audio cuts off every 10 to 20 seconds. The app need to be killed before listening to music.				
MYEVENTIN AUSTRALIA	30-Apr-20	3	I don't have any experience yet. But 5 stars for the great app. The app lets users to use one mobile numbers on multiple devices that I had come across on the 26 of April. I don't know it still allows multiple users for a same number.				
Devin North	2-May-20	5	While the Covid Safe app is running	it interrupts music playing through Bluetooth every minute or so when in the car. Music stops and starts again constantly. This has happened in two different cars with two different phones.			
Jessie Lou	3-May-20	2	Battery lasts half a day. Haven't touched my phone all day. I took my phone off charge at 9am	now it's 1pm and I'm down to 50% battery. The only thing different was downloading this last night. Will have to uninstall.			
Zoe L	9-May-20	5	I open it and nothing happens. It just stays on the first screen. I see no buttons to push our no way to get out of the first screen. It also changes my top status bar to white and my bottom menu bar to white too. All my icons are white so everything stops being visable.				
Paul Smit	5-May-20	I am using a Samsung Note8. Battery power is not impacted	neither are issues found on my active Bluetooth devices with the COVIDSafe now installed. If notifications bother you	simply block the notifications from this app.			
Pat P	6-May-20	2	The unnecessary notification cannot be cleared for some reason and it keeps Bluetooth on all the time. There is no option to disable it when you are home. It just wastes battery life.				
sam affara	10-May-20	All was good till this last update. Now it says I'm not connected and to check permissions. I did and it still didn't work.. I restarted my phone but that didn't help either. I just uninstalled and reinstalled it seems to have worked					

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n	
Tommy Dennis	12-May-20	1	Trying to do the right thing	was happy to download but have had numerous issues with Bluetooth connectivity	especially handsfree in my car which i need for work randomly disconnecting. Have had to uninstall as this is dangerous and distracting while driving.	
Jaime Lancaster	13-May-20	No issue signing up but it's sucking the life out of my battery. Having to put phone on charge upto 3 extra times a day. Please fix this issue before life goes back to "normal".				
Christine Russell	26-Apr-20	1	Found it really easy to install and set up.Great initiative by the government to help us track and control this disease and help everyone get their lives back on track and ease restrictions.The more people sign up the more effective.As they say "We're all in this together "			
Maree Newhouse	27-Apr-20	2	Great application if turn off your wifi and use your mobile data to install. I had been trying all day and kept getting the message 'invalid phone number'. It wasn't until I turned wifi off and used mobile data that the PIN finally came through.			
Allan Eadie	26-Apr-20	4	Easy registration. Totally voluntary. Yes you have to provide a phone number but if you think about it how else will they contact you if you have come into contact with someone who tests positive. 4 stars as we just need to see if this is actually going to make a difference.			
David Thurlow	27-Apr-20	3	A very simple and important app. Most of my other apps collect my data so that it can be sold to advertising companies. This one will hopefully prevent and slow the spread of a global pandemic. Seems worthwhile to me.			
Bob Tomkins	28-Apr-20	3	Well intended idea	but won't accept my phone number in any way	shape	or form. Giving up! I assume the numbers of downloads the government are touting are from people uninstalling and reinstalling the app not act people the app
andystar	26-Apr-20	2	Enrollment was pretty easy	the app is always running in the background but so far doesn't appear to be using the battery at all. Would trust it more if they used the Google/Apple framework	but sounds like that's a few weeks away..	
Happy Traveler 99	26-Apr-20	4	Straight forward to install and register. App appears to capture a lot less than Google and Facebook so happy to play my part in helping to protect myself	my family and fellow Aussies and help us all get back to some form of normality sooner.		
Reg	26-Apr-20	3	Perfect. Blue tooth on is a bit of a hassle but it's free	simple	easy to register and really no issues at all about it running. Seems stable. Happy to use it. All these privacy freaks are a wart on the arse of progress.	
Federico Collarte	26-Apr-20	1	It asked me for accessing to my device location. I understood this would not be required	it would only track interactions based on proximity not location. But I was able to register without any problem	and most other functions work well	
Dev Hen	28-Apr-20	4				
Azrael Raven	26-Apr-20	204	Will not accept my mobile number in registration process... Had the same number for almost 20 years but apparently now it's invalid Plus why the +61 bit? We already know it's Australia all that does is confuse people who aren't familiar with that format... Clearly an app written by a government agen			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
L Innes	26-Apr-20	1	For anyone mentioning that they don't want Bluetooth on	this app uses Bluetooth to register other people (phones) that you have been in contact with. If you turn Bluetooth off	this app will not work how it's supposed to.		
Mark Agius	28-Apr-20	1	Great idea. It will filter out those that have come close to someone who later has been tested and found to have COVID19 and so these people will be notified as opposed to those who haven't been anywhere near someone who was later tested and found to have COVID19.				
Club Heat	28-Apr-20	9	Only downloaded because Scomo blackmail saying we won't open up until enough people download. It's dumb anyway	I could walk past someone and catch it in 2 seconds if the sneeze	and the app wouldn't register	it's doesn't take 15 min to catch	it takes right co
Rebecca March	26-Apr-20	62	When I entered my phone number and pressed the button to receive my code it said to try again later. If the government wants a large amount of people to cooperate and use this app it will not help if we encounter these kind of frustrations. Also it took a bit to find out what this app is called	tha			
Jeremiah Lim	27-Apr-20	2	No issues with privacy. But undismissable notification is really annoying. Work around is to go to settings and turn off Foreground notification and Notification Dot. Not sure if I will miss important alerts this way..

A Google user	28-Apr-20	3	The app won't accept my phone number when registering to receive the PIN	it keeps coming up that my number is invalid. I have tried dropping the zero from the beginning of the number and I have also tried including the zero and either way it won't accept it???			
Esther McLauchlan	2-May-20	2	I have tried several times to install this	but it won't send a PIN number. I have tried all the suggestions - turn off wifi etc tried to register at various times of the day... But the number just won't come through.			
Ian Bell	2-May-20	2	Apologies Mr PM I regard this as an important tool to assist in the control of Covid-19 but as the Bluetooth on my phone doesn't work and I have no intention of purchasing new phone for this purpose I won't be able to add to the number of installs. BTW. Apparently my wife's phone is too old so she i				
Rickson Philip Lewis	1-May-20	1	Better late than never! I sincerely wish this virus is exterminated asap	I am doing my part to keep us safe and get us up and running. Very well designed app	faced no issues whatsoever!		
Linda Lawrence	2-May-20	5	My samsung phone is pre 6.0 so it's not compatible. Support suggested checking the faq's page which I did and confirmed not compatible. If the govt wants approx 40% of the population to download	they'll need to make it compatible. I'm obviously not going to buy a new phone just for the app.			
Michael O'Keefe	17-May-20	1	took 4 attempts to install the app, the screen froze several times. After installing this app	my mobile connection regularly dropped out. There is not much use to having a locator app if there is no mobile connection. So I uninstalled the app from my phone			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
tony	8-May-20	Have to delete it on trips in my car where I use Bluetooth for music as it keeps unpairing with the stereo. Otherwise I assume it's doing what it's supposed to. Anything to get out of this lockdown mess.			
Liz Grimwood-Taylor	10-May-20	Simple	works in the background and haven't noticed any impact on my battery. Has been designed with data minimisation and privacy in mind. Everyone should be downloading this app to do their bit in the fight against Covid-19!		
Ray Bradbury	11-May-20	2	When in proximity of another phone running the app it causes interference with BT audio devices	causing music or podcasts to pause repeatedly for 2 to 5 seconds. Makes it unusable and force stopping it while listening is the only way to stop the interference.	
Harley D	15-May-20	Great idea	but I keep having issues with the battery optimisation on my Oppo Reno Z	even though I've turned my battery optimisation off and given the app full background running permission. If this is going to work it needs to work on all devices.	
Bianca Froggy	28-Apr-20	Won't validate my number	and yes I dropped the zero. Then I tried with the zero in case they changed it to help those who don't know you're supposed to drop the zero. Still didn't work.		
Arwen Ogilvy	27-Apr-20	3	I really want to do the right thing and have this app on my phone but the battery is draining so fast! Only had it unplugged for 40 mins and already down to 90%. I'm at home so not even coming in contact with phones other than my husband. I hope this is just a teething problem...		
The Equalizer 2014	28-Apr-20	1	I'm sick of the "We Need You!" NAG Notification when I switch off my Bluetooth when I'm at home for the same reason I switch off WiFi when I leave home – because it's not required and to conserve battery power.		
Ralph Ward	27-Apr-20	1	Works fine for me	easy to setup. Uses Bluetooth but can still use my headset and connect to the car fine. It has access to very little permission wise and Android hasn't recorded it sending any data. Can't see what the fuss is about	
tomshirvo1	26-Apr-20	42	I think you need to explain that the location permission is required for Bluetooth to be used. Maybe provide a link to the Android documentation showing why Bluetooth needs location permissions. I nearly deleted until I investigated more. Happy with the app and recommend people use it.		
Rob McCormack	27-Apr-20	44	Simple installation. Those who got the invalid phone number message (like I did) were trying to register before 6pm. Worked fine after that. This app makes sense and will help to protect me	my family	the community and our health workers as well as speeding up our return to normal life.
Charlie Ping	26-Apr-20	2	Worked flawlessly. For those that tried to activate before the government said it was ready	it would be nice if you updated your 1 star reviews. And yes	the government should have waited to launch it but it's fixed now.
Planet Saturn	26-Apr-20	6	Very easy to install. Just where it says 'wrong number?' (to confirm the number)	people might think they've put in a wrong number. It should say 'is this the correct number. do you want to change the number?'	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Chelsea Hantken	26-Apr-20	3	I'm happy to have the app on my phone	I'm not worried about any security risks. But I removed one star because Bluetooth is constantly running and there's an icon in my notification tray which won't disappear which is annoying.	
Chris Coughlan	26-Apr-20	18	An essential app for these times. For those complaining about the phone number - just don't use the 0 at the beginning of your number. It's not hard and that format has been around for decades. It's the international standard. Government doesn't get much right but this is fine.		
Richard Penfold	27-Apr-20	I fully support this app however unfortunately I can't register because it is telling me my phone number is invalid (this occurred to me after the registration process was opened after the initial delay).			
Adam Simic	2-May-20	1	A suggestion	please give us the ability to turn the app 'off' when not needed. I don't need the app running 24/7	especially considering I only go outside for an hour also everyday. I can't be the only one that would find this useful?
Samantha Perera	3-May-20	1	Should show the Name	Number of days it has been on the phone and if I am recorded as "infected or not". That way the "Lock Down" can be eased as long as people have the app. Also older versions of Oppo doesn't allow the installation.	
Paul BROWN	3-May-20	5	Was going to use but you also need to activate location info for google. I have never allowed location permission and won't now. Don't see why it is needed if bluetooth speaks to another phone with the covid ap and each has name and contact number. I dont let google track me.		
Chris Richardson	5-May-20	2	My phone battery is draining really fast since installing this. Have to recharge at least twice during the day with normal use. Plus my phone is running hot all the time.		
Rod Cunningham	4-May-20	Have installed the App on my wife's Samsung A20. When using the app with an Ultimate Ears Boom 3 (Bluetooth) speaker the sound cuts off every 2 or so minutes for 5 to 10 seconds. Have uninstalled the app and it's now OK..			
Cere Jewell	10-May-20	3	I understand it's purpose but it drains your phone's battery so fast that it's become an annoyance. It needs a 'home' option so that it isn't constantly searching for other's with the app and killing battery life.		
david yeo	12-May-20	2	Cannot install this app. although mobile has the required Android 6.0 and Bluetooth installed and switched on. After giving all the required details and retrieving the PIN for this app. and enter this into the app.	this does not successfully install this app. into my mobile.	
Ruben Sanchez Moragues	15-May-20	1	Downloaded and installed without any issue. It doesn't drain the battery. Safe and not tracking where one goes. No privacy concerns at all. I hope more people download it. This is a smart way to beat the virus all together.		
Leon Mand	16-May-20	The latest update (with the green Australia symbol) is chewing my battery at idle. It uses 10% per hour when my phone is idle. Was fine until the latest update. You need to fix this. UNINSTALLING.			
Liam Cahill	15-May-20	1	Great in concept however it doesn't appear to work on my phone. For some reason the app keeps turning the Bluetooth off on my phone. Will bump up to 5 stars when a fix is rolled out.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Christopher Woulfe	18-May-20	1	There are a few apps. Guess which one is the tracker. Most of us are not super enthusiastic about being tracked but we know what it is. If I can't control the Bluetooth	I will remove the tracker. The phone is useless with a flat battery.	
Vittoria L	17-May-20	I don't mind the app but I don't understand why displays how many minutes and the time when I pull down my home screen and it's running in the background what do the minutes mean? Eg: covidsafe 12m ??			
Kimble Young	27-Apr-20	Installation and configuration went smoothly. The only personally identifiable information it asks for is your phone number. You can use a fake name if you wish. More happy to give up that tiny bit of privacy vs what we give up to Google/Apple/FB etc.			
joanne gilbert	27-Apr-20	3	It will not let me register my number. Just has a pop up that says invalid number. Please fix as it seems from other reviews I'm not the only one with this issue. I'm an android user... not sure if that helps.		
Susan Bolvary	26-Apr-20	4	It downloaded perfectly and I was able to register. Remember to perhaps not include the first zero in your mobile number when you register. If you tried earlier today	it may not have worked as they did say from 6pm.	
Martin Truran	27-Apr-20	19	Happy with security	easy setup	let's face it- if it saves even one life then it's worth doing. Not a big ask for the potential benefits to us all. Please notice that most of the bad reviews are from people who didn't read the instructions regarding the start time for registration.
Michaela Truppel	26-Apr-20	25	Registration process was done in less than 3 min. Easy as..... All the 1 star comments	geez ppl give it some time. Looks like the issues were -mostly- sorted within a day. App is now running in the background as it's supposed to	let's see how my battery will like it.
Allan Bruse	27-Apr-20	2	Downloaded. Tried to register. Got as far as entering my phone number to send a code. Apparently I don't know my own phone number ('number invalid'). I can't be bothered despite all of the hype. Such a good idea wasted.		
Andrew Dobson	26-Apr-20	It's asking for location permissions. Got this response from the support team. "Android/Google requires all apps that request access to Bluetooth® to also obtain location permission. As a result	COVIDSafe on Android asks for location permissions because they are needed for Bluetooth® permissions. C		
Oxana Repina	26-Apr-20	2	The app is simple to set up and very carefully explains the privacy information. It collects a whole lot LESS info than most of the other apps on my phone (eg google). Happy to keep it running.		
Daniel Dunstan	26-Apr-20	3	Works well	easy set up	can change app permission preferences without breaking the app if you're concerned and it's a simple first name last name age range and phone number info required. So it's honestly nothing to stress about. Let's stay safe guys ☺™
Robert D	28-Apr-20	2	App states that I have been tested positive for covid19 immediately after download. I have not been tested and have no symptoms and self quarantined 4-2 weeks even though requirement to do so. Do not know what is going on with the App!!!		
Daniel M	27-Apr-20	1	So far	so good. No obvious battery drain. Saves on having to wrack my brain about whom I've met; if and when contact tracing becomes necessary.

Soren Cicchini	29-Apr-20	5	Incompatible with my mother's Samsung Galaxy J1 running Android 5.1.1. To be useful as a public health measure	this really needs to have broader compatibility to allow use by people other than those with the latest and greatest hardware.
Amanda Pryce	1-May-20	1	The constant notification in the notification bar is very annoying. Like... I think I might uninstall it because of that. It keeps trucking my thinking I have an actual notification	and shows up on my lock screen too.
Jian-Paul Nuzzo	1-May-20	2	Easy to install and use. Drains battery but small price to pay for safety. Suggest the developers consider a safe zone so that the app isn't working as hard when you're at home.	
Darren Grant	2-May-20	1	Everything was working fine until I needed to use bluetooth in my car. It wouldn't connect	then found it wouldn't connect on any other bluetooth device until I uninstalled tha app. I am using a Note 8.
Dean Lewis	2-May-20	Have not tested positive or seen how the app is used as yet	but thus far am extremely thankful that the government had the app written	flowing the Bluetooth to hand-shake approach to not location track individuals.
Ryan Crittenden	4-May-20	Easy to set-up	doesn't drain battery	does not have gas tracking like sheep believe. Seriously if you are an Australian citizen download the app. If the government wants your details there are other means..
Damien Brown	1-May-20	1	Absolute rubbish I've tried 6 different times doing all different combos with location	blue tooth Wi-Fi all on or off. The app says it is totally installed and running but I have no Covidsafe shield icon on the screen. Yes I've tried turning it off n on
Robin Brar	5-May-20	5	App isn't working it's stuck on my Samsung S10+ I was reading terms and conditions and after that it got stuck tried to clear app data and restart but still same it stuck on home logo and no idea what's up with it. Deb Barnes	7-May-20	5	This thing drains my battery. I used to only charge every second day	now I have to charge daily sometimes twice a day. And this is on a Samsung S20 so not an old phone at all
Glenn Thomas	13-May-20	1	Won't stay active on my Oppo phone	keep having to allow battery optimisation setting works for no more than 10 minutes and becomes inactive again so completely pointless even having it installed at the moment.
sara whitmee	14-May-20	2	Probably going to uninstall. The app has what is meant to have a permanent notification that sys if it disappears to restart your phone however with mine it turns battery optimisation off so I constantly have to go in to turn it back on to make the app work.	
Don Black	26-Apr-20	1	Good but the verification pin could have been automatically performed on Android (-1 star). Our company App puts the verification code in for you on receipt of the sms....so I would assume our government could do better. I will most probably update my review after a week.	
Lila CC	26-Apr-20	3	Excellent idea and I believe it offers far more privacy than a lot of my other apps. It's just running quietly in the background and there have been no noticeable effects on battery or performance as yet.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Stuart Whiteway	27-Apr-20	5	Simple	put your name and phone number in and just let it run in the background. The information is encrypted and stays on your phone until a healthcare professional asks for it in the case you test positive. It will go a long way to trace the disease... Approved			
Satya Prasad N	28-Apr-20	2	Relatively easy to setup. However the app doesn't provide any way to download the data that it is collecting about me. That would increase the transparency and let more people install it.				
Olivia Shields	27-Apr-20	3	Got as far as entering my name and postcode	but repeatedly received the error message "invalid phone number" when I tried to enter it. It's definitely my phone number but until the app recognises it I can't begin using it. Unhelpful.			
Darrell Roberts	27-Apr-20	1	Very happy to download this app. If needed by medical personnel	the information gathered will help to assist with contacting people that may have come into contact with a coronavirus carrier	and that can only be a good thing. The naysayers and scaremongers need to grow up and download this app to		
Andrew Heard	29-Apr-20	6	I've read 42+ reviews of people receiving an Invalid Phone Number error. One mentioned problems if registering before 6pm. One mentioned needing to "waiting a while". Michael Stanton	26-Apr-20	2	Quick & Easy. Doesn't require any personal information that isn't already in the wild. Please download this app. Very good reviews from everyone who realises that it only went online just before 6. Very easy.				
Chris Lamming	27-Apr-20		Easy to install and security is not a concern with data stored only for 21 days. A great concept to help with public health and safety. Download and install uptake also a key KPI to ease restrictions.				
Paul	6-May-20	2	Easy to install and setup. Close it and it sits in the background. Minimal battery use. Tin foil hat not supplied. Pay no attention to partisan paranoid armchair software engineers.				
Andrew Fionik	26-Apr-20	18	The program looks okay. We are yet to see its efficiency. However	one serious drawback - it is available in Australia only. This means that many migrants may not even be able to see it as their Google accounts are linked to their respective countries.			
Rod	26-Apr-20	56	Working perfectly. Registration for the app started at 6pm sharp on Sunday 26 April	2020. Sign up process was quick and easy	no issues at all. All those 1 star reviews are nonsense since they were trying to sign up before 6pm.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Insert Name	28-Apr-20	6	If you're going to make an app	please at least make sure to at least test it to make sure that everything is set to go before launching the app. It's been over a day now and my phone number is still invalid in your system. Please make an effort to fix this.			
wowee 10	27-Apr-20	Fantastic app for keeping us safe	you can use a different name they said on the news	and it does not take your location only other covid users who have the app	and their phone number	easy simple to install.	
Sarjon Tomma	26-Apr-20	11					
John Tumbridge	29-Apr-20	2	I see the app as vital as many have said. My issue is that it is stopping my Bluetooth headphones from working. Very frustrating as I keep having to disable the app.				
Gareth Narunsky	7-May-20	3	Since installing this app	every other Bluetooth use for my phone is no longer working. I can't listen to music on Bluetooth speaker without it constantly cutting out and I can't use hands free in my car.			
Mel McLean	15-May-20	App downloaded and installed without any problems. Recently updated aswell. I have had zero issues using this app. Does not drain the battery	just sits in the background doing what its supposed to do.				
Peter Walker	15-May-20	Installed app	other Bluetooth wouldn't work especially car connection . Uninstalled app other Bluetooth worked then installed app again and other Bluetooth again not working. Have uninstalled again and Bluetooth devices working again? Thought app didn't interfere with other Bluetooth connections				
David S	26-Apr-20	7	Superb!!! Simple tech like this should be celebrated and championed. I saw someone mention somewhere that has been "opensource"	if it is	and under the GPL	the absolute hats off to our government for doing the right thing!!! One thing I don't quite understand is that we're able to triangulate loca	
David Holliday	28-Apr-20	I have tried to install this but cannot understand how you can get the pin number sent to the phone and still stay in the app. When it comes to the part GET PIN you have to go out and when you log back in you lose that pin. I am confused	can some one help.				
Charlie Giuffre	27-Apr-20	11	This app is not perfected	while talking on the phone the Bluetooth cut me off from talking three times I had to turn the Bluetooth off to continue uninterrupted. Disappointed with this app. Please find a fix.			
Melanie Hand	26-Apr-20	229	All the 1 star reviews - don't give the app 1 star when the real problem is	you don't listen!!!! Registration will open at 6pm. Let's see how many reviews are changed to 5 stars when you get that message that you need to be tested because the app has done its job	and somebody in your family doesn'		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n				
Paul Panayi	26-Apr-20	2	Very simple to install. Just remember NOT to use the starting 0 when you enter your phone number because of the +61 format in the registration process and finally make sure you have Bluetooth ON so it keeps running in the background.					
Tijo Joseph	28-Apr-20	2	Uses very little battery even with Bluetooth on all day! Even though it's running all day	for an entire day of usage	it uses even less battery than my ABC News app that I use just for an hour a day.			
Patricia Rhodes	26-Apr-20	34	Just downloaded the app & registered	no problems	quick and easy! Don't forget when you enter yr mobile	because the +61 country code is there	DONT the first phone i Excited part of this vir control.	
graham schilling	27-Apr-20	61	Some where	anywhere	the media	the app description or the PM just had to mention you couldn't register the app until 6pm EST 26 April. Would have eased a lot of initial bad impressions. For the love of me I can't figure out why it hit the app stores BEFORE the registration process was ready. FFS h		
Lucas Griffin	27-Apr-20	1	I dont trust it with my data but... The tecihcally experts havn't noticed anything out of the ordinary. There are already apps on my phone that take my data and don't tell me what happens with it	at least this one will help us.				
Christopher Harvey	26-Apr-20	35	Took me 30 seconds to install. All done and easy. For everyone whinging about the government and other people tracking you	you may as well delete your Facebook	Twitter	Google	Instagr...	
Jon	28-Apr-20	5	Not a good experience. The app constantly sends notifications so any time I want to quickly check my notifications I will see something but I then have to pay too much attention to see if it is something other than COVIDSafe.					
Jarrod Timms	26-Apr-20	570	Please everyone download and use this app! Yes it currently has an issue on signup	which im sure will be resolved in a matter of hours. Please leave positive reviews so we dont discourage others from using the app. With it	we have a greater chance of beating this virus!			
Whitney May Williamson	26-Apr-20	24	The app notifies me every few hours that it's 'scanning to keep me safe' and the notification can't be dismissed. The instructions say if I turn off the notifications I won't be notified if I come on close proximity to a confirmed case. It's pretty annoying.					
Eve Barnes	26-Apr-20	75	As an IT professional	until the source is released our a security review it is my belief based on the Australian government record (remote assistance legislation) that this software contains a backdoor which *will* be exploitable by hackers to expose more information than we are told it collects. I				
Kristin Flett	30-Apr-20	1	Chews through the battery very quickly. I've been on my phone for an hour and my battery is now 82% and it started at 100%. Never had my battery drain that quickly before. Fix it or I until it					

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Junyan Qu	6-May-20	1	Despite whether this app is actually working	it closed down itself every 30 mins even I have my Bluetooth always on and enabled all permissions it asked. is it just me or anyone else may have this issue?	
Matt	5-May-20	2	Amazing how many people allow Google	Apple	Facebook etc to access data yet will not trust an app that has the ability to assist in saving lifes. Bluetooth battery usage in modern phones is minimal and this app has not affected battery life on my Sony Xperia XZ2.
Anthony Godin	6-May-20	1	If I helps speed the new normality up	then all should use it. If it is privacy people worry about	there is more tracking in things like Maps and Facebook
Andrew McGrath	8-May-20	Good app! Useful. Just one point - there is a type under "I want to Help" page. In the thirda paragraph it says "State of territory"	which should be "State or territory". Just from quality check perspective	no issues as such. Great effort by the government.	
Megan Jeffs	13-May-20	Having to have Bluetooth always on is draining my battery	it is also telling me to turn battery optimisation on when it already is on. Will be deleting as I am not confident in its effectiveness yet.		
Mo Maureen Hunt	20-May-20	Keeps me updated on what's happening with the virus but	fortunately	I have not come into contact with anybody who's tested positive so cannot comment further as to how it would work should that happen.	
Yancey L	27-Apr-20	3	Said my phone number is invalid. So thats clearly a problem. Uninstalled it	reinstated it	same problem. Tried again 4 hours later (7pm) and I'm still invalid. Read the reviews
Harry More	26-Apr-20	38	Seamless registration process (downloaded and registered after 6pm). Excellent explanation of how the app works with links to privacy policies and explanations of the protections in place. Requires location enabled in order for Bluetooth to work properly on Android.		looks like 50% of the users are having the same problem.
Averil Greenhalgh	26-Apr-20	20	Come on	they did say after 6PM	
Catherine Barton	28-Apr-20	2	Had trouble trying to get 6 digit number. Kept saying my number was "Invalid" After making sure Bluetooth	location & battery optimizer was ok & installed & uninstalled	it worked. What a load of ka-baffle to put it nicely. ☹
Lynne McKay	26-Apr-20	8	Very easy and quick to install. For those having trouble with their phone number	you always need to drop the 0 before your mobile number when it follows the country code (+61 for Australia). So nothing wrong with the app!	
Bruce	27-Apr-20	2	Good idea but poorly designed. 1: Battery usage question and selection descriptions are ambiguous. 2: Should recognize stable "home" location and switch off Bluetooth until required by a change of geolocation or status. 3: Released prior to accepting registrations - dumb		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Don O'Brien	29-Apr-20	2	For Oppo users	you will need to change your COVIDSafe Background Running settings from "Smart Restriction of Background Running (Recommended)" to "Allow Background Running" This setting is found at Settings > App Management > COVIDSafe > Power Saver Other users may have similar settings
Mitchell Starrenburg	26-Apr-20	2	Registrations are now open	only took a minute. Poor form on the developers part for the misleading "Invalid Number" error message while registrations were still closed; caused a lot of unnecessary confusion.
Alison Anderson	26-Apr-20	55	I'd like to be able to use this app. However	I can't get the verification PIN because I have no mobile signal where I live. And we're not supposed to go out. Surely some other method of verification could be available for others in the same situation as I'm sure I'm not the only one in Australia w
Sue Fuller	28-Apr-20	The app initially told me my number was invalid	on April 27. Now there is a notification saying "Restart phone if this notification..". unable to read rest of msg. Is this notification common & is it a problem. ?	
Ingrid Gollan	29-Apr-20	Also had issues on Android with mobile phone number invalid even with Wi-Fi turned off and Bluetooth turned on. Persevered and tried again whilst phone connected to Bluetooth device	no problem.	
qwerty ytrewq	29-Apr-20	2	Cant get a pin to verify my mobile ph no. Error message: invalid phone number. Tried with and without 0 before the other numbers. Cant proceed. Stupid product. Developed in haste. Dont get these monkeys to write the code for your space mission to Mars	your space craft will blow up on the way to the
Chris Leach	1-May-20	2	Great idea. Wanted badly to support it	but it has stopped me from answering my phone when it rings. I can't swipe my screen to answer calls so I have had to uninstall. Sony xz2
Liz Carr	5-May-20	The app does not recognise that power saving has been switched off on an Oppo R11s. Even after restarting with the power saver off it will not recognise it being off	as a result the app is not functional.	
cnt barry	8-May-20	The only thing i have herd everyone complain about is the constant notification so just do an update and get rid of it. Spoken to heaps of people that deleted it after day because of a notification that doesn't need to be there.		
Gavin May	14-May-20	Great app! Doing some good! It would be really good if the app provided constant news on the pandemic and was a primary source of information for Australians. I think more people would download it!		
John Stone	19-May-20	1	Waste of time. The app won't send a pin to my phone. I've checked the help section and none are the reason why it won't work. Even uninstalled and reinstalled the app.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Tony Devine	27-Apr-20	4	Have installed the app after downloading "The Coronavirus Contact App Faqs" where it stated the location will not be recorded. WHY THEN IS IT A REQUIREMENT FOR YOU TO ALLOW LOCATION PERMISSIONS WHEN IT IS INSTALLED? Also in the HELP section when the app is open it states LOCATION INFO WILL NOT BE CO				
Gavin Matanis	26-Apr-20	7	Not a big fan of the notification being there constantly and not being able to paste in the confirmation code was a UX faux pas. Otherwise I am hopeful this app can help get us back to some normality.				
Voytek Eymont	10-May-20	Problem on Moto 3G	generally	it seems to work ok	but	on two or three occasions it goes haywire	it come with a r popup "Unfort Bluetoc share h stopped popup l piping faster tl can OK
Greg Pearce	26-Apr-20	7	Great app	hopefully the tin-foil hat wearing Barnaby's of the world will see the benefit for the greater good. One suggestion though	remove the constant 'CovidSafe is scanning..' from the notification shade	it's annoying.	
Lara Connolly	27-Apr-20	I think it's great. Feels more secure than most other apps I have on my phone as it doesn't ask permission for everything. Hopefully most download it and it can work to keep us safe!					
Chris Barnes	28-Apr-20	Installation and registration worked OK	but the app won't stay running. It starts	the sticky notification is there	but an hour later it's just quietly stopped for no apparent reason.		
Zig Zag Wanderer	27-Apr-20	1	Great idea. Does NOT need location data	it just uses Bluetooth to check other phones nearby. Especially good for those who do not have location data and internet access on all the time. Do it to let us all beat this silly hostage crisis!			
Jonathan L	26-Apr-20	46	I wasn't able to get my six digit PIN. I tried again an hour later and the app said my phone number was invalid	yet the app managed to sniff out my number somehow and automatically display my number. Perhaps it's being sorted by the IT guys who are busily working on it.			
Kishor Varsani	26-Apr-20	22	Quick and easy to install. Anything that protects me	my family	friends and the community is worth having. To those who are worried about privacy etc	remember facebook	whatsa
Imesh Kulasinghe	26-Apr-20	5	Registration was very easy . Most negative rating are due to number been invalid. I got the same error the first time because after +61 I dropped the starting zero . Just ignore the +61	type your phone number starting with 04++++++.			
Gabriela M	27-Apr-20	2	If you get the invalid number message just turn off your WiFi	it seems to work that way. Hoping this gets fixed asap as it will stop many people from registering.			
Ty	27-Apr-20	6	Interferes with medical equipment. Installed app and app started to interfere with the communication between my insulin pump and CGM blood sugars are now dangerously high	possible hospital admission if i cant get BG's under control. Will not be using this app	untill this is resolved		
Matt Allcock	28-Apr-20	Tried to out my mobile phone number in	(yes	with and without the zero)	however it says that my phone number is invalid. Cannot get past that step	no matter how many times I retry.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n	
Thi Nguyen	26-Apr-20	1	Downloaded	registered and now leaving it running in the background to keep me and my fellow Australians Covid safe. Pleasantly surprised how little personal data it collected	and how how little control of the phone it requires.	
Imar Mendoza	29-Apr-20	1	Works now... I mean the registration... Concerned about battery life because seems to work in the foreground... After a couple of days	it definitely reduces battery life. Ok you got to do a better version...		
Walter Kaeding	7-May-20	4	Make it available for android 5 and below. Help the older people to stay save too. Our Oppo phones are only 3.5 years old	but have android 5.1.1. I would have to root the phones to upgrade to 6 or better. Wouldn't take that chance it might brick the phones. These Oppo phones are excellent for every		
Michelle Harper	1-May-20	1	Great idea but the app closes down when I turn my phone off and doesn't start up again when turning phone back on so I have to remember to turn the app back on and I have often forgotten so I'm out and about without the app being active			
Rick Hill	6-May-20	4	App is useless for me	start the app	make sure it's working leave phone for 5 minutes	look again and app is closed
Jill L	4-May-20	Very easy to install. No need to have notifications on screen	just in the banner. If you can't download	ask your family or friends and help to keep your loved ones safe by having the app. Let's do this together to get back to normal life.		
Tanya Harich	27-Apr-20	3	Downloaded fine but every time I try to register I get to the 'enter your mobile' section and request the pin only to be told it's an invalid number. I can't see anything in FAQs or a way to report this error other than here.			
Adam Brokes	27-Apr-20	3	The app is from design and architectural perspective very good considering the amount of time the government had. Do I really want to have this app installed? No	not really. Will I install it if there is even a faint chance it might save somebody's health? Any day	anytime.	
Ian Leishman	26-Apr-20	2	Worked straight away	registration process worked even before 6pm on 26/04/20. Matthew Brown	26-Apr-20	10	Yes... Android needs to use location services along with Bluetooth for the app to work. No... It's not a govt conspiracy or that we've been lied to. You'll have to buy an Apple if you don't want to use location services			
Alison Fairleigh	26-Apr-20	2	This is such a wonderful initiative. It was fast and easy to register	and now the app is working silently in the background to help protect me and my community. Contact tracing is absolutely necessary for the containment of this virus. Thank you!		
Monique Huffa	27-Apr-20	Amazing idea but it won't let me sign up! Keeps saying my phone number is invalid so it won't text me the pin	even though I know my phone number is valid because I've been receiving calls on it. Any ideas?			
Alan Chng	26-Apr-20	1	Installed and registered ok. Stay safe people. App run in the background. Data seems stored local as there is a function to "upload data when asked by health official." Not sure how much it will draining the battery yet.			
Mick Tterfmop	28-Apr-20	Installed no issue on mine	but my wife's kept saying invalid phone number. But when i turned the wifi off on her phone and only used mobile data it installed no problem	so must be some issue with wifi causing the invalid phone number.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
kayla edmiston	28-Apr-20	3			
Janeen Bates	28-Apr-20	1	Very good customer service. I had trouble with my phone number being recognised in the registration process. They suggested to turn off wifi and try again and it worked!!!		
David Grocke	26-Apr-20	2	Why is there even a rating for this app? The comments here are not helpful. This app has taught me how to love again! Let us hope when the little pockets of outbreaks continue to happen that this assists us not being locked down as much as today! Signup is seamless across my families devices. Let's		
Isabella Bain	26-Apr-20	50	You should launch the app with out being able to register. Not everyone watches and reads the news and would know it will work after 6pm tonight. Error is	we can not add a mobile number and get the OTP as it says it is invalid. You should have had a pop up/alert message at the start notifying this.	
Simon Bell	26-Apr-20	1	Despite earlier reviews from people trying to register before the process was open this app is seamless. Easy to register	easy to use. Set	forget and protect yourself and those close to you.
Mark Stubbs	27-Apr-20	Very easy to install	not sure why some users are having difficulty with the phone number	it accepted mine straight away (with leading zero). Maybe you need to have your number registered on myGov?	
Dave Briskham	28-Apr-20	1	No problem with installation or registration. Don't worry about security issues. The government has plenty of other ways to keep tabs on you. Thanks for keeping Australians safe.		
Matt Vickers	29-Apr-20	1	Super easy to install. Appears to be working just fine with no hitches. A great initiative	the more people that download this the better our chances of achieving normality.	
Scott Davis	30-Apr-20	Seems to be pretty unobtrusive to me	but my wife's phone is just a bit older and has Android 5 with no update pushed from Telstra. The initial version needs Android 6 or later.		
Jane Oldham	3-May-20	1	I've signed up because it's the "right thing to do" but this thing slows data significantly	to the point where sites time out or return a "you are offline" result; Needs a lot of work.	
Nicole Gardner	1-May-20	1	Constantly disconnects bluetooth headphones	starting to ask myself whether the app benefits outweighs the constant risk of my phone publicly outing my addiction to early Britney Spears. Please fix this bug. Many of us STILL use Bluetooth around others (exercising)	grocery shopping essential pla
Wen D	2-May-20	1	I had to rate to write my opinion I won't accept number after 8 attempts with 04 and just 4 if your reading this and unsure what I mean you will see as you try to register. I have an Oppo so maybe not compatible. Only did this to help every one get back to what ever normal will		
Peter Mingon	4-May-20	1	I'm having the same issue regarding having to continuously approve the battery question. Both our phones are doing the same thing. Time for an update. REMOVE THE BATTERY QUESTION? ☺		
Linda Deys	4-May-20	1	Well I've tried twice. Uninstalling for good now. It continuously turns off my Bluetooth even though I chose not to worry about battery life. And I hear on the news it isn't even turned on anyway!!		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Michael O'Brien	6-May-20	3	I have a Nokia6 smartphone. App downloads; but	after several attempts to generate a PIN (after doing all suggestions like turn off WI-FI and input mobile number with or without the first zero) the APP never generates a PIN for me. Absolutely useless programming			
Rosalie	6-May-20	3	Many phones are not compatible with this app! 3 out of 4 phones we tried to download this app are not compatible.....because they are too old! We have lost confidence in this app doing what's been promised to because not enough people will have it!				
R X	7-May-20	4	New updates renders mire bugs to user. Persistent battery drain and bluetooth pairing totally wrecked. It has mutated to a different variant. Use antimalware and intrusion detection for permission allowed.				
James Clarke	10-May-20	2	Installed no problem on S9	but I have a smart watch BT for tracking 24/7 in case of seizure when away from home & BT headset to make/receive calls	App disconnects headset or watch to handshake other phones all the time. Had to uninstall it.		
Angel Smith	12-May-20	1	Doesnt drain my battery	everyone having a sook	I have a galaxy s10. Works fine. Doesn't drain the battery	and in fact I barely notice the app is there at all. Same data sharing as social media	so no b guys.
CuteNinja101	15-May-20		It won't let me register. Keeps telling me my phone number isn't valid. We have checked several times and all fields are filled with no. in 10 digit form.				
Jamie Munns	26-Apr-20	30	Be Patient It's great that this app is in big demand as frustrating as signing up is. I think it will take a few days before demand settles down. I'm happy to do what it takes to sign up and help my fellow Aussies	i hope you are too.			
Karin Jorgensen	27-Apr-20		Easy to install. The sooner everyone installs the sooner we can get some normality back and safeguard lives. Permissions needed and info requested is minimal compared to a lot of other online activity so shelve the paranoia and get on board.				
Pete Campbell	26-Apr-20	2	That was probably the easiest App ever to install. Remember to drop the first 0 off your mobile number. If this saves one life it is worth it! Sure it uses data but so does every App and Storecard. Let's beat this virus together Australia!				
Adam Thompson	26-Apr-20		Simple and safe	uses Bluetooth not GPS so nobody can know where you've been	only if you've been in Bluetooth connection for 15 minutes with someone who is contagious.		
Jacinta Cox	28-Apr-20	3	Constantly causing other Bluetooth functions to stop working. If using Bluetooth speakers or headphones audio will cut out due to app doing a scan. App now deleted. Caused far too much interference with other Bluetooth functions				
Baxter Archer	27-Apr-20	Annoying	it won't recognise my phone number	tried it every possible way without success. I was already on the fence on the privacy issue	now I'll just give up if it doesn't work		
Brad Irwin	15-May-20	1	If the app is telling you your mobile number is invalid when you try to install	disconnect from WiFi internet connection	then type the number in again. Fixes the problem immediately.		
George Solomos	6-May-20	1	Persistent notification is annoying but I understand the priority is keeping it running to keep the Bluetooth pinging. Reverse-engineering has shown the security of the app to be good but I hope the source is released soon.				

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Giovanni Di Cello	27-Apr-20	1	Just monitoring battery consumption but other than that no issues. Waiting for tin foil hatters to leave a review	frankly	to enjoy some nonsense. Maybe a "i am home" button to avoid battery strain would help?
John Murray	27-Apr-20	1	Simple to setup	then nothing else to do. Requires bluetooth to be on	leaves an annoying notification on lock screen to let you know it's still working.
Magnus Erlendsson	26-Apr-20	21	Easy to set up. I had no issues. If by downloading the app restrictions get lifted earlier I think it is worthwhile. Plus as the one who does the shopping I like the idea of knowing if I have been in contact with someone who has it.		
Grant Evans	27-Apr-20	1	Registration pain. Won't register phone number unless wifi is off. PIN has to be entered as separate numbers	new one needed before trying to remember and type it in. Very frustrating.	
Tim Deverell	26-Apr-20	2	Easy to download and set up. Anyone with privacy issues is clearly listening to too much ABC	every day we share way more of our privacy than this App will share and it will speed up our country returning to some semblance of normality.	
Andreas H	29-Apr-20		Easy to install and register. I am running it since Sunday on a Pixel 3 and have not noticed a decrease in battery life or any other distribution to phone use. Recommended it all our staff.		
Sophia Halse	4-May-20		Overall it's a very clever idea. Might still be useful after covid-19. Be good if 10 million ppl download it and the rest of the functions are completed so it can do what it was designed to do.		
Steven Nikolovski	10-May-20	1	Hmm not sure about this app. Hate that it has a permanent notification. So annoying and pointless	just run in the background. Won't appear in the app store on my parents phone and they are elderly and need it. Once again	not good enough.
Fozzy Foz	9-May-20	1	Hardly noticed that it's running. No battery drain of a noticeable level and no slow downs. Some people report drop outs of other Bluetooth devices but I haven't noticed anything and I use a headset regularly.		
Derek White	8-May-20		I have to disable it when on a phone call because I hear a ticking noise. When I disable this app the ticking sound stops. Using Samsung Galaxy Note 8. Android version 9.		
Melinda Londigan	10-May-20		I had to uninstall temporarily to use my skullcandy headphones as the Bluetooth kept cutting the music out	my husband didn't have the same problem with his Bose Bluetooth headphones	both using Samsung Galaxy S9.
Jacob Brinkworth	15-May-20		Great idea but eats up my phone's battery like no tomorrow	which considering its point is to somewhat monitor someone's surroundings	it's a pretty big deal if it eats up your battery life as a dead phone won't keep anyone safe.
Michael Coppa	26-Apr-20	4	Great app. Easy to set up. If you're worried about privacy	you already have Google and Apple apps that violate it. No point using privacy as an excuse for not getting this app.	
barney flint	26-Apr-20	36	While I understand	and endorse the spirit	the implementation is flawed 1. It asks to grab location data - er - what? 2. It displays a constant notification which you can only get rid of if you disable notifications for it - WHICH DEFEATS THE POINT OF THE APP!

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Din	27-Apr-20	1	Excellent initiative. Minimal information required to set it up	and seems to work without a fuss in the background. Privacy policy is sensible. Please install to protect each other from COVID-19!	
Michael McAulay	26-Apr-20	10	After I put my mobile number in	the app said invalid number but 5 mins later the code was sent to my phone (there must be a lot of people using the app). Then I clicked on my phone notification and gave app permission. Then the app was working.	
Bob Bogisich	26-Apr-20	8	Registration is easy. For those complaining	didn't you read that you need to register after 6pm?? As for dropping the "0"	that's the standard way of entering a mobile number using the international format. It's a wonder some can answer their phone!
shan sitters	9-May-20	1	Easy sign up and was happy to have it but had to uninstall as not working the battery approval keeps turning app off so then it doesn't work have heard other oppo phones are having trouble too please look at fixing as would really like to have it working properly as the idea is good		
Elizabeth B	28-Apr-20	1	Failed to register my details because of 'Invalid phone number'. Why? People call me on this number and it works. I tried 2 number formats - without and with leading 0. Both failed.		
lisakynaston	27-Apr-20	1	Annoying notification stays at the top of the screen and in drop down menu all the time cannot be removed. Uses too much battery for my liking.		
Bonnie Glendon	28-Apr-20	2	I have the app on my Samsung and it won't give me the pin number as it says my mobile number is invalid. Seeing it has the 61+ in front of the box I leave the 0 off but still says invalid mobile number with or without the 0. Can anyone help me with this.		
Steve D	26-Apr-20	1	Phone number registration is active and working now (6pm Sunday). I don't like that it needs Location permission for it to be active and works properly (though GPS location is not required to be turned on)		
Jacob Lovett	27-Apr-20	It's irritating	because you want to do the right thing - but I don't leave my Bluetooth on 24/7. Not for battery reasons but multiple different connectivity reasons. So this is super frustrating. Use my location instead of Bluetooth. ☹		
Gordon Smith	28-Apr-20	Very frustrating to download as could not register. Stuck at message "invalid phone number". After much searching found a suggestion to turn on data instead of WiFi	which worked. Needs more guidance on the app or help page		
Rudo Makuyana	28-Apr-20	2	The app is interfering with my Bluetooth connectivity to other devices. In particular my Samsung Buds	is there an update to resolve this. I can't use the app if this keeps happening	
Raymond White	27-Apr-20	2	Sadly after 8 attempts this app will not accept my mobile phone number that I have held for 39 years. That's right 39 yrs and as a result I will not be able to use this app. Therefore it will get deleted from my phone.		
Theo Kalkandis	27-Apr-20	1	No problems installing but it absolutely chews through battery. New S10+ used to last a full day. I had to charge it at midday just to use the rest off the day. Once again down to 40% after only 3 hours.		
Kevin Francis	29-Apr-20	Great app	great experience especially considering how quickly it was completed. I'm an IT expert and I consider it to be safe to use. Please listen to the experts and download.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n	
Adrian Attard	2-May-20	App seems to work fine. Had no issues setting up. Doing my bit to help our country get back on its feet	reduce wait for easing the lockdown restrictions	and get people back into employment/work. Together we can reduce the impact that Covid-19 has on all of us.	
Kangaroo Inn - Innkeeper	2-May-20	3	I use a separate phone for exercising and I notice the app cuts off the music streaming through my bluetooth headset every few moments. Its an older phone so I think the app places pressure on the phones BT cpu		
Peter Vincent	3-May-20	1	Successfully installed on one phone - all good. Wanted to install on second phone but PlayStore only shows a similar app from the WHO and not this Australian one. There is no choice	just a blue one from the WHO. I do not want anything to do with the corrupt WHO or UN. I wonder how many people downl	
Paddles C	5-May-20	1	The comments here are a case study in stupidity and selfishness. OK	Boomers: 1. It needs your location data because Android requires that setting to be on so Bluetooth can be activated. 2. So what if it uses up your battery life a little faster? Is recharging your phone slightly more often such a b	
Ruben _	17-May-20	Severely disrupts my Bluetooth connection with speakers	headphones	etc. So when I'm playing music on my phone and the app is active	the music skips.
Andy Hanoi	27-Apr-20	1	I like how it doesn't assume you have (or want) internet access and geolocation turned on	and I can keep those turned off to maximise privacy from every other (often uninstalable) personal data hungry app on the phone.	
Joanna Does	27-Apr-20	2	I'm happy to download it but when I try to register it says my ph number is invalid. I've had the same number for over 10 years. I tried uninstalling & reinstalling. Tried dropping the first 0. No luck.		
mathew rushen	26-Apr-20	915	Considering this app is in googles android its more privacy oriented than any commercial app on my phone lol. Doesn't ask for every permission under the sun like google knows less about me than google. And i control its access. 1 star removed because it wants me to keep bluetooths on all the time wh		
Garth Snimmit	28-Apr-20	Apparently my phone number is invalid and I did drop the zero then I tried with the zero and tried both ways multiply times. As other reviews have stated if your number is invalid wait a couple of hours then try again and it will work.			
Mark Stanley	26-Apr-20	28	Great app. Can't wait until 6pm tonight when you can enter details to register. To all the people rating this one because you can't register your phone number	that's because the app is not available for registering until 6pm.	
Ob1	29-Apr-20	I fixed the "invalid phone number" error by not using any digits or special characters in my name....go figure - an error about the phone number due to invalid characters in the name field on the prior screen.			
Traci Goode	26-Apr-20	3	I thought at first the app didn't work because it wouldn't accept my phone number but after reading other review and after a bit of waiting I was able to register. Didn't know about the 6pm thing but good so far		
Paul M	26-Apr-20	39	Allowing bluetooth is a great way to get your banking details stolen. A noble idea for virus tracking	but fraught with security issues. I downloaded only to review but did not complete the install. Go ahead and install with this in mind.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Hazel Brown	27-Apr-20	1	Easy to install	and my privacy concerns are answered. Data is encrypted on my phone and not shared unless I agree. If this helps Is reduce restrictions while keeping us safe	I'm happy.
Sammy Hamadiya	27-Apr-20	2	Invalid phone number message error. Regardless if you include a 0 before the number or not	once it says your phone number is invalid you are stuck. Also why include +61 in the number given that it is only for Australia.	
T W	29-Apr-20	People download Facebook and Google without a second thought but wont download this. Location request is only for bluetooth program to work and does not track your location. Does not use your gps. Great idea. Please download so we can be free sooner.			
Anonymous User	3-May-20	1	Will wait for all the bugs to be ironed out. I love the way it says to restart your phone if the notification disappears. If the notification disappears	so does the message to restart your phone	duh!
Stephen Fulop	2-May-20	I'm unable to sign up. Every time I get to the stage of the pin and I look it up on my phone the app starts the whole sign up process again. It's just ridiculous.			
Matthew Wilson	1-May-20	1	Need this app	as we need to get back to normality. But it is causing interruptions on Bluetooth headphones	occurs every 1-2 minutes. Please fix
Lucia Deiro	5-May-20	Can't get past registration. Unable to get access pin	keeps saying "check internet connection" even though I have connection. Have tried using both 4G and wifi	no luck.	
Shandra Coppard	6-May-20	COVID SAFE APP PROBLEM My partner cannot download the covid safe app as he has an overseas google account and when he tries to download it the response is "this item is not available in your country". He has an Australian sim card in his phone and is in Australia indefinitely. Google only allow you			
Laura Noble	19-May-20	1	Bluetooth connectivity with car	earphones continues to disconnect since using the app. Please look at fixing this if you want people to use this. I use a Samsung s10.	
Anatacia Cabral	17-May-20	1	It wouldn't stay active. It always deactivates every time my phone goes on lock screen. I have to always activate it. I hope they fix it soon.		
Mick Fallon	26-Apr-20	2	Installed easily. As an IT person with a good understanding of cyber security	I am comfortable with using this app in the control of Coronavirus.	
Andrew Morrison	27-Apr-20	2	I'm not keen on government tracking but this is probably the least worst way to help get the virus sorted. Main concern is the potential battery drain. Don't know how it'll affect the battery life		
Paul Lecky	28-Apr-20	Can't register. The app won't accept our phone numbers. Dropped the leading zero and entered the rest of the number. Others in the family are having the same problem.			
John Youngman	27-Apr-20	1	Bluetooth interferences. Continually cuts in over other blue tooth audio systems if streaming. Very frustrating. Force stopped app and interference stopped. Needs to be looked at or we may forget to start it again.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases.
Pann Ei	27-Apr-20	1	I couldn't sign up as it keeps saying that my phone number is invalid. So I couldn't get pin number to proceed registration. Could you please fix the error for this? Thank you.	That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Amy Jonnes	27-Apr-20	I've installed on the 27th	but doesn't accept my phone number? According to other reviews	this glitch was fixed last night..but it's not fixed for me. Why? Is there still issues?
Matt Hilton	28-Apr-20	2	Couple of days in and it's unobtrusive	no noticeable impact on battery life and I assume just doing its thing. Rego was quick and simple. Let's end the lockdown.
Shubham Gupta	26-Apr-20	Very innovative approach to spread awareness	though the option of upload my data is misleading and should only be visible to people who are seeking help for symptoms.	
Thierry Masquillier	26-Apr-20	4	It seems they were glitches at the beginning. It can be expected. Working all fine now	including phone registration...
Michael Jacombs	29-Apr-20	Easy to install. No intervention required once installed. HOWEVER battery usage since my wife and I installed it has been HUGE. Phones now only lasting about 6hours.		
Tim Holder	27-Apr-20	2	Tried numerous times to register and do the right thing. It continuously says I have invalid phone number with or without the 0. As at 1900hrs WST 27/4. Might try again in a few weeks. So much for a tested product.	
Will Pearce	27-Apr-20	App is not letting me register	reason being invalid mobile number. I've had number for 10 years under my name. Has anyone else had similar problem?	
Mr Dr	26-Apr-20	Simple and easy to install. No issues with registration. 95% of the 1 star reviews tried to register before it opened.		
Martin Haggas	27-Apr-20	1	Lightweight and reasonably unobtrusive. The persistent notification is mildly annoying and not entirely sure what purpose it serves	hence only 4 stars.
Hussain Mohammed	27-Apr-20	4	Had issues with registration but it finally worked. Have patience	this is not a commercial money making app. It's for our own safety and whole community benefit.
Kim S Ly	26-Apr-20	1	An excellent initiative. An app that can help us to have a better control of COVID-19 infections is always a helping hand to our magnificent doctors	nurses medical staff and other frontline workers.
Ashish Maheshwari	29-Apr-20	4	App is working	but draining away a lot of battery in phone forcing me to charge in the middle of the day. I have tried restarting as well
Tien Can	27-Apr-20	For those are concerned abt their privacy	have you ever read thru a T&C of any app installed on your phone? Have u ever read T&C of any website that you browsed before? If not	why are you so easy to give away your personal info for those but too harsh for an app of your Goverment trying to protect
Robert Durrant	26-Apr-20	33	Can't register. Has a bug that won't allow you to enter your mobile number during registration. I've uninstalled it and moved on. Perhaps better testing. Doesn't build confidence in this app which is already pretty low.	
Michael Borisenko	26-Apr-20	3	I understand the concerns about privacy	but as a software engineer I'm satisfied with the precautions taken in this app. Please install it and help end the pandemic sooner.
Amanda Ekman	26-Apr-20	Great	simple app. Initial teething issues have been fixed and all is working well. Great initiative and an excellent resource. Well done to the developers.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Maureen Brunn	30-Apr-20	2	Tried about five times this app is definitely NOT user friendly	it kept telling me my phn number was invalid... I gave up in the end. Tried to do the right thing	I cannot be the only one.
Quinn Andrews	1-May-20	The App seems to work fine but there is no way to tell if it's working. Maybe if you had a count of how many 15 minute contact you had a day you could see if it's working.			
Alisha Webb	4-May-20	Have to remove it as it drains my battery. Fantastic idea and very important for all to have but the developers need to ensure it doesn't drain batteries. It drains my battery within 5 hours.			
Paul Gurn	3-May-20	Everyone should use it BUT it absolutely devastates battery life. If you dont optimise it will defeat the purpose as people will be walking around with phones off due to flat batteries or remove the app.			
Daniel Washburn	2-May-20	1	No impact to phone operation. No battery drain. Bluetooth works fine with other accessories while this is on. Other than the icon	you wouldn't know it was on.	
Daniel Burgin	4-May-20	3	Installed the app day one on a Samsung Galaxy S10. No problems to date	though It seems to use slightly more Battery; not enough to be concerned over though.	
Tracy Power	9-May-20	1	It chews through the battery usage. Have to recharge through the day as well as at night. Other than that	it just sits there unobtrusively in the background.	
F Paul	13-May-20	2	App keeps closing by itself after sometime (judging from disappearing logo on top of screen). There's some apps that seem to "deactivate" the app	but other times	still is a mystery.
Tristan Hanslip	16-May-20	Don't wish to see the Australian covid-19 safe symbol on my phone all the time. You know that annoying tick Australian symbol	let alone in the notification bar constantly. Hope in the next update you can remove that feature please!. Remove it!		
Lawrence Glen	27-Apr-20	1	Uninstalling- come on guys	Bluetooth always on and a permanent notification that can't be switched off? Fix those things and use wifi/gps/Bluetooth triangulation and maybe we will have faith in it.	
Gerard M	27-Apr-20	4	Works perfectly. Don't be concerned about it asking for location. That's just an Android requirement for low powered Bluetooth scanning.		
Nihal Albuquerque	27-Apr-20	Covid safe needs to recognizes the house you live in so it can turn of bluetooth and location so it doesn't drain the battery. it should be able tell if you're at home based on your home wifi connection.			
Alby Kramer	27-Apr-20	Easy easy. Easy to install	eazy to register. Other than that	it works by itself. Only need to keep phone on and bluetooth on. No uploads till you are requested to upload by health authority.	
Rusty Chev	26-Apr-20	Very easy to install. Really nothing else to do once installed. Good for Australia. The one star raters are clearly not to switched on to how apps work.			
Fil Kindblad	26-Apr-20	2	Easy install and registration. It would be nice if we could remove the seemingly permanent notification	that is going to get tired.	
Aidan M	26-Apr-20	32	After analyzing this app This app uses 2 separate GPS location requests also pulls wifi access point locations and verify them with the GPS requests to determine direct GPS coordinates Pics and proof can be provided Weres the source code you said you would release last week?	do not install this go	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Simon Leonard	27-Apr-20	1	I'm concerned about the source for this not yet being published and the reports that only partial code may be released in a few weeks subject to security officials approval. It could so easily be done in a private way. I'll consider reinstalling once I can read the source.		
Ken Parker	26-Apr-20	11	Installed a few hours ago but was able to get PIN and activate at 5.05 pm ACST	live in SA. Give the govt. a chance	they've been pretty well spot on
Joe Hovel	27-Apr-20	2	So far so good. Looks straightforward and may save an enormous amount of time and effort to trace community infection. Privacy risks are very very low.		
Van Vincent Casipong	17-May-20	Those Google accounts that had initially been setup from overseas are not able to download the app	though the users are located here in Australia. Please remove the restrictions.		
Lynnette Parsonson	26-Apr-20	No issues registering. Worth having if it means saving lives	Australia is able to regain some semblance of normality	and a restart to our economy.	
Christopher H	26-Apr-20	8	Installed successfully. Give this app a chance people. Don't take any notice of the mainstream media who seem intent on sabotaging it with negativity right from the start. We need it	every little bit helps.	
Alvin Lee	27-Apr-20	It finally works and accepts my phone number. What happened in the last 30mins? We are all trying to help here but it puts people off when you want us all to download app but it does not even let you set it up properly the first time.			
Julian Lunn	27-Apr-20	1	What would be good is a daily or weekly graph of how many people I am having 15 mins face to face contact with. This would give us an incentive to reduce our exposure. Works fine. Doesn't seem to affect the phones performance.		
Williamkinwah Lai	27-Apr-20	1	How come the app NOT accepting my mobile phone number(dropping the leading 0). The same valid number i have been using over the past 10 years!!!. Frustration FRUSTRATION..... HEAPS..... PLEASE FIX THIS GATEWAY.... AL		
Adrienne Farrelly	27-Apr-20	1	Thank you for making registration so quick and easy to follow. I'm not very tech savvy so glad they made this simple	especially for elderly and vulnerable to follow. Let's hope this is a great additional tool to the fight against COVID 19. Cudos to all who developed this. Say home and save lives. Go	
shami sivan	27-Apr-20	1	Great initiative by the govt. If you like the govt or not it's your pov. But this app helps in contact tracing and will keep us alive. People who are too concerned about privacy issues	stop using all the social media and then talk about privacy.	
Samantha Politi	28-Apr-20	2	I think it's a great idea and the app works perfectly fine.....! highly recommend that everyone downloads it because at the end of the day wouldn't you like to know if you have come in close contact with someone that has the Coronavirus.		
Stephen Young	27-Apr-20	1	Setup did not work at first but all working now. This app is the first demonstration that government can respect privacy while building a suitable product.		
Michael Barker	27-Apr-20	1	I have tried to load my mobile number to get a PIN but it won't accept the number	neither in +61 040... form or +61 40... form so it won't send me a PIN via text to confirm. Am using the phone of that mobile number too.	
Bernie Atkinson	27-Apr-20	Hopeless tried to register but app kept on telling me my phone number was invalid. I have had the same number for 20 years so have no idea why this app wrong accept. Gave it 1 star because zero wasn't an option			
John Locandro	30-Apr-20	1	Works fine but really hate being hounded to turn when I am at home and there is no possibility of catching Covid. It does drain battery faster so enough of the hounding already. Apart from this it's fine		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Daniel Borin	3-May-20	Minimal info required to get setup. Has worked solidly for days since installation. Seems to have had minimal to no impact on battery life.					
Prashant	4-May-20	When i enter my phone number to register it pops up a error message saying - please try again. I've been trying this for last 2 days	rebooted my phone but no luck				
Sharlene Welden	4-May-20	App seems fine except for the constant notification that I need to restart my phone if I see the notification. Re-start and the damn thing pops up again!					
SP	13-May-20	3	Needs to be more compatible with older device. Drains the battery	my phone is about 3+ years old. Keep bluetooth off unless I leave the house. Easy to install.			
Chris Henry	6-May-20	1	Surprisingly good. Uses bugger all battery	doesn't interfere with other bluetooth devices. The permanent message is annoying but I have that for my smart watch already so I'm used to it.			
Happy Days	13-May-20	This app keeps inactivating	saying battery is not running in the background even when i allow it to. How is it ment to be useful	very temperamental.. and i have to keep checking it and turning on the permissions.			
Mick Dick	26-Apr-20	Great idea & was easy to install. Only concern is that hopefully bluetooth constantly on doesnt drain the battery too much? Time will tell.					
Mark Price	27-Apr-20	1	All good now	gave up trying on the first few hours but the next day it has installed OK. Hope this helps manage Covid-19 and get us back to normal as fast as possible.			
Nic Robb	4-May-20	17	I'm for a tracing app; great idea. Initially thought Bluetooth was killing my battery life	but it's not. I don't even notice is there after running it for a week			
Tracey Dowswell	28-Apr-20	Won't accept phone number. Maybe you need to do an update. Tried 4 times and keep getting invalid number for my mobile. Not just happening for me but for other people I know too					
Paridhi	27-Apr-20	1	An awesome step taken by the Australian government. This app got installed with no issues	easy to understand interface and guidelines. I urge all Australians to download it and use it.			
John Roberson	26-Apr-20	23	Great app. It gives me a level of confidence that we can stay on top of Covid-19. It should be used by all who leave lock down conditions as a measure of protection for all.				
G Amato	27-Apr-20	Very easy to navigate	this app asks for very little personal info	it is less intrusive than an app download from Google or most social media sites	if this helps keep my self my family and others safe I am more than happy to use it .		
Julie Green	26-Apr-20	2	Works	easy to install	clearly works in background (has a little symbol at top to show it's working) Read FAQs on website if you have any questions		
Roinic Dukat	28-Apr-20	Yes it's anonymous and encrypted! It only asks for your number. If by accident you come into close contact with someone who was affected	the health dept. will call you. That's it. It's a great tool. Download it	so we can be done with this.			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Di Carter	27-Apr-20	1	Won't even let me finish with registration	tells me my mobile number is invalid. It's not invalid when I have to pay the bill every month lol. Not sure what to do from here.			
Brett Worthington	27-Apr-20	In principle I agree with the use of this app	choosing to use Bluetooth though just seems dated: it's easier to break into a Bluetooth connection and a general power drain.				
Geoff T	26-Apr-20	38	Please note App can be downloaded	however	registration is from 6pm 26 April 2020. I think it is good to download ahead of registration opening. Be patient folks	help our vital workers and download. Its a small compromise to make for all our good health and those around us.	
Nina Monger	27-Apr-20	1	I had trouble registering my phone number	the app said it was invalid. I disabled WiFi on my phone	just used my phone data instead	and was then able to register without any problems.	
Ausie IOT	26-Apr-20	5	I was unable to complete the registration because I can't read the pin it sends during the registration	if you go to read the SMS	you have to restart the registration and get a new PIN	and go around the loop again.	
J Rezek	27-Apr-20	Easy to install and setup	takes less than one minute and doesn't ask for endless permissions like most other apps. No issues reported by antispy apps PrivacyScanner or Incognito. Do this for Team Australia people!				
Beryl Irvine	27-Apr-20	3	Keep getting "invalid phone number" Been trying for 24 hours	uninstaller and retried several times. Time they sorted this error out if they want to get the numbers to 40%. Very frustrating.			
Michael Daly	27-Apr-20	1	Got a dual sim phone. Both numbers reported as 'invalid' when attempting installation. If this is because of excessive demand	why wasn't this anticipated by the software engineers? And an appropriate error message presented?			
Bec	28-Apr-20	Great for newer phones HOWEVER	our daughter's phone is 3 years old and apparently the operating system is too old and so is not compatible with this app. Such a shame that she can't participate - we are all now unemployed and not in a position to upgrade her phone at this time. Does anyone know how				
Trudy Van Gestel	27-Apr-20	3	Totally useless! Can't register because it won't accept my mobile number. Keeps telling me the number is invalid. Does the same on my husband's mobile. Just total frustration PLUS!!!				
Bernard Tan	27-Apr-20	1	The registration process works flawlessly. The people who are giving it 1 star don't get area codes. If your still confused	just drop the Zero at the start of your number and put it in the app.			
Jerome Fink	28-Apr-20	2	Easy to install	no negative effect on phone or battery life. Good rollout. Enjoying being part of a very large experiment. Hope the anti-vaxxers don't derail it.			
Carl Kenner	26-Apr-20	10	Excellent. Very easy to use. There are no privacy issues. Everything is voluntary. Lets you know if you have come into contact with infected people. Highly recommended if you want to help with contact tracing in the event you get sick.				
Grant MacDonald	30-Apr-20	1	Good idea	and works as expected. Given the amount of info I give Google	the minor privacy concerns are not bothering me.		
Eddie Saez	18-May-20	2	NEEDS ON/OFF Feature .. No point having it on when I'm home with my wife and daughter it's just chewing up my battery for nothing.. Disabled the App and my battery usage went back normal.. definitely using way more than necessary.				
Robert Munnings	8-May-20	App seems to work well with minimal intrusion and battery drain. I like how I can turn on aeroplane mode to reduce cellphone EMF exposure and keep Bluetooth on.					

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
elizabeth somers	10-May-20	4	I really want to keep the COVID safe app on my phone but it's draining my battery so quickly now I have to keep my phone on charge all day. Not viable to keep the app on if I am going to be out all day - which is essentially when I need the app working....		
Perow Gourlay	20-May-20	I will not install this app	it relies on Bluetooth & I will not leave my Bluetooth on risking my phone getting hacked via Bluetooth. Also as someone that suffers with social phobia	I use my phone's music player to help me keep stress & anxiety levels down when I go out.	
Donna Cam	27-Apr-20	3	Thank you for the reviewer who noted - Wifi needs to be turned off in order for your phone number to be recognised when applying. (No more invalid phone number message - Hooray!)		
Marco Patrizi	28-Apr-20	Very well designed app	love it and its intent	no issues and uses only 0.5% battery past 3 days. 5**** from me all Aussies should install it.	
Megan Y	28-Apr-20	1	Android 6.0 updated fully Samsung 5 unable to register invalid number. With and without zero. Open close Uninstalled reinstalled its 2am Tuesday it should not be busy. So how to use if cannot register		
Jac Hope	27-Apr-20	I had difficulty registering at first but I turned my wifi off and it worked so if you are having problems that might be the cause.			
Fiona Yay	27-Apr-20	Quick and easy to intall. Feel safer now that i can be notified if I come into contact with someone with covid 19 (who also has the app).			
Stella Smith	26-Apr-20	3	Easy registration process. Leave off the 0 that is the first digit of your mobile number. Sad that it doesn't work on android 5 though. Only one of our family can register.		
Stephen Claydon	28-Apr-20	2	I can't register	saying my phone number is invalid. Note: this is at 9:55pm on 27th Can anyone help ? O.k. the app finally registered at approx 12:09pm 28th April 2020. All good so far.	
Ian Bone	26-Apr-20	Very easy to install and register. Explanation on Gov Website easy to read and understand making the decision to use very easy as well.			
Ry Martin	27-Apr-20	Used only 2% battery in 24 hours. Good privacy model in only locally storing the information and you having to manual upload the deidentified data if you test positive.			
David Stevens	27-Apr-20	A few hiccups to start with (I would say due to the mass amount of people downloading)	but now works a treat!		
Chookasaurus	26-Apr-20	Registration works now for those who tried to register before it officially launched. Also remove the leading zero on your mobile number when you register. +61 replaces the first 0 in your mobile number so it's +61 4xx xxx xxxx			
mandy-lee whelan	27-Apr-20	It keeps telling me my mobile phone number is invalid..... in which	I can't proceed to the next step.... I'm sure it will be a good app once these little things are fixed.		
Graeme Butler	27-Apr-20	2	Installing the app requires Android OS 6 onward- so already facing the gap of many in the community having no mobiles- added to this you have to have a recent upgrade which is unrealistic on Android (the most widespread mobile OS)		
Carla Roderick	28-Apr-20	Both my son and I have tried to register this morning. We've dropped the 0 at the start of our mobile numbers. Can't get the pin number to proceed. Has this app crashed?			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Antony Thomas	26-Apr-20	5	Good concept. But won't work if the battery saver option is on. Usually the battery saver option will be on in most of the mobiles. Need an option to disable the battery saver option as most of the users won't be knowing how to disable it.	
Alex Zaia	26-Apr-20	25	I don't mind if it runs in the background	just let me hide the persistent notification. I don't need it to tell me it's running I've already accepted the terms and agree to all the permissions.
Mike S	27-Apr-20	2	Installed it	does exactly what it says on the tin. Based on an open source product and not obfuscated so nothing to hide either which is good.
Jason Newman	27-Apr-20	2	I would Give you more but it won't let me register it keeps telling me my number is invalid has anyone else had this problem could the developers please give me some tips I have left the zero off my mobile number but it still says it is so it won't let me proceed any further	
Maria Heta	26-Apr-20	7	Installed at 6:15pm. Had no issues at all. Anyone having trouble entering phone number remember: +61 represents the 0 at the start of your number and so there's no need to enter it into the number box provided.	
Aiden Sobey	27-Apr-20	1	They say they don't collect location	but then require location permissions..? Other than that I think they're being reasonable and upfront about the privacy implications of the app. Do your bit and install it
Dianne Mullin	28-Apr-20		It keeps telling me I have an "invalid phone number" and won't go any further. I've checked my data and it's correct. Why is this happening?	
John Bauer	29-Apr-20	1	The theory behind the app is great	but it needs to work properly. The notification symbol my phone keeps disappearing does this mean it's not on and working?
Matt Caffrey	30-Apr-20	2	It works and it is safe to use. Code looks clean and data stored securely. Well done to the programmer who took this on.	
Sean Kum	30-Apr-20	Great	no issues installing and setting up. Don't have any problem in using it or privacy concerns. Google	Facebook & Apple have more of your data than this app!
Heather Louise Dunn	4-May-20		Pathetic. Getting the pin number managed to wipe out where the site bead to down load. Now will have to start again. Why isn't this made simpler?	
ArjaxLarjax	8-May-20	Works fine	alot of people are having trouble with "Invalid Phone Number"	I had this problem and closing and reopening the app and re-entering it.
Sanjay Patel	26-Apr-20	2	People who are whining about privacy are biggest dumb on this planet	you are tracked while using your maps phones even your TV / Facebook searches drones or satellite can see you as well deal wi get out
Tony Omes	28-Apr-20	1	After running for over a full day there has been negligible drain on battery noticed. No permissions are requested for any service except Bluetooth.	
Daisy Wang	28-Apr-20	2	Downloaded the app successfully. However	I'm unable to continue my registration using my mobile number. It keep saying invalid phone number after I enter my mobile number several times.
Tristan Ashford	28-Apr-20	2	Well done. I was concerned about having bluetooth draining my battery 24/7	but its been a really minuscule effect. Download and share!

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Dooghan Smith	26-Apr-20	3	No problem with the app install. Registration was painless. The app needs less info than a lot of apps or websites I've signed up to.		
Vaga Bond	26-Apr-20	Good. Clear privacy statements	simple onboarding	flexible (use real name or pseudonym). Also like that it configures my Android settings (bluetooth)	battery location) with one click for each.
Timothy Reesink	26-Apr-20	16	Great app that allows the Government to start reducing restrictions! Any privacy or data concerns have been carefully worked through to make this app entirely safe. It does not record your location.		
Anthony	26-Apr-20	Great idea. Let's hope it works as intended and many people download it. Anything that gets restrictions eased sooner sounds good to me.			
Roger Gillard	28-Apr-20	2	I had a glitch registering as I had Wi-Fi on	when I turned it off I got the SMS. Also is it possible to add an "at home" mode	I usually only turn on Bluetooth when I'm in the car etc?
Jolly	27-Apr-20	3	If you get an error saying your phone number is invalid	turn off Wi-Fi and just use mobile data to set up. Remember to leave the first 0 off your number.	
Jock Duncan	28-Apr-20	1	Seems to work fine so far. Haven't noticed any large battery drain or other issues	which was my main concern with having this on all the time.	
Daniel Toohey	26-Apr-20	Very quick and easy to install. And definitely more privacy oriented than most apps on my phone. Let's all keep looking after each other as we walk this path together.			
James Riesz	27-Apr-20	Great initiative and good work getting it out nice and quickly. Works as described	easy to sign up and appears to consider privacy well.		
harry lenders	27-Apr-20	Invalid phone number every time I try to install on my phone although over 1 million people have managed to install it After about 10 attempts it finally accepted my mobile number.			
Michael Yen	27-Apr-20	Very easy to set up. Today	the app has been running on my phone in the background for more than 9 hours so far	and the battery usage is 0.7% according to the system.	
Peter Stagg	26-Apr-20	8	Easy to register and clear information on the what the app will do for our community. While it's voluntary it makes sense the more people register the more info we shall have on the spread of the virus. That can only be a good thing for us as a community.		
Rebecca Miller	26-Apr-20	6	If you use a virtual IP when you register	make sure it's set to Australia	as otherwise you may find the app won't send a verification PIN to your phone.
The Wolf	26-Apr-20	Easy install	phone number issue has been fixed	give this nothing but a 5 star rating as the more people using this the safer everyone is. If you have given a lower rating	please change it.
Joy Phillips	26-Apr-20	1	The registration and download process was simple. Thanks for creating this app and thanks so much to other Australians for downloading and helping to keep us all safe.		
Max W Klasse	27-Apr-20	1	Good initiative. Easy to install and register; when it asks for your mobile number	don't enter the first 0 then registration would be a breeze.	
Melissa Pratt	27-Apr-20	I'm trying to put my details in (a day or 2 after it launched) and its telling me my mobile number is invalid and its not	very frustrating.		
Kim Preston	26-Apr-20	8	Registration issue resolved. The person who decided to launch and release the app but delay the ability to USE the app for several hours should be nowhere near this	or any other app though.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Shayan M	26-Apr-20	20	Can't sign up because it doesn't recognise my phone number as valid one. Are you serious	how do you miss something as basic as phone number field validation lol. If you had one person actually use the app prior to release	this wouldn't have happened..
Antoine M	29-Apr-20	Great idea but I couldn't register. Error indicates that my phone number is invalid after several attempts! Finally managed to register.			
Steve W	26-Apr-20	4	Couldn't be easier to register. Used A pseudonym	and I don't like having my Bluetooth on all the time	but a small price to pay
Martin Stonebridge	26-Apr-20	12	App downloaded speedily and registration went smoothly. Disregard the people who gave a score of one. They tried registering before the registration process was ready. It's all working now.		
Standardbred Adventures	29-Apr-20	Simple to install. Easy to register. Running smoothly. To the people with battery drain	put battery saver on.		
Alan Whyborn	1-May-20	1	Ever since I installed the app my Bluetooth headset has had issues. The music keeps stopping	restarting	changing volume when I'm out (possibly linked to passing cars).
Felicity Bing	4-May-20	Bluetooth ALWAYS cuts out after 1 minute	no point having if I have to constantly reconnect manually	doesn't track movements accurately as a result.	
Trevor Payne	4-May-20	The app causes Podcasts to keep freezing for a few seconds. When the app is Forced Stopped the Podcasts play OK. This needs to be fixed (phone is Samsung S9)			
Marcus Richardson	6-May-20	1	Repetitive push notifications are annoying	otherwise fine. The app and Bluetooth use bugger all battery. Apparently disabling notifications will disable the app... So my app is disabled	
Simon Cunningham	7-May-20	1	Doesn't work if Google play is not set to the Australian region. Couple of child care workers who can't change the region (non technical reason) are unable to install to do the right thing.		
Faith Evans	10-May-20	this app is great. it us helping keep us safe	so it remains downloaded on my phone. for all of the people complaining about their battery	it is not something that you should be prioritising right now.	
n j	18-May-20	1	Unable to to install in my Huawei P40 pro. If the government cares about people it needs to ensure that its published in all the platforms. Huawei App Gallery is missing this app.		
Pete Sevenlewis	15-May-20	We need this app to work. I've found it affects my Bluetooth streaming and my battery life. At least don't send us pointless copy and pasted FAQs.			
Elza James	26-Apr-20	11	I downloaded it without problems. I put the 0 (zero) in front of my phone number despite the +61 and the PIN came through just fine. I had to delete 2 other apps to make space.		
Malcolm Russell	26-Apr-20	1	Well written app. Easy to use and register. Permissions requested make sense. Hopefully initiatives like this will speed our return to free movement.		
Wendy McMullen	27-Apr-20	1	Org what the heck am I am doing wrong keeps saying invalid mobile number... so dropped the 0 plus as well as tried 04..... and keeps saying invalid mobile number can anyone assist me please....thanks ...read Jollys review of today...did what Jolly said and it worked...yeh		
Jessica Tilley	28-Apr-20	1	Easy to install (drop the '0' from your phone number). Doesn't seem to waste battery. Haven't had my sock drawer raided by ASIO and my PornHub account is still working just fine.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
David Fromoz	27-Apr-20	2	I would rather trust this app to remember who I've encountered than try to remember where I was on a certain day at a certain time. I would rather trust this app than depend on you to remember I was near you for 15 minutes at a certain place	on a certain day	at a certain time. This app is not trac
Derek Harris	30-Apr-20	5	Simple enough. Works ok in background. Not noticing any additional battery drain. Hope it helps us all.		
MarkErin R	27-Apr-20		Tried installing the app. Had the 'invalid mobile number' error that others have had. Can't complete my registration which is frustrating.		
Corey Hanrahan	26-Apr-20		Very clear description of privacy considerations. Easy to set up and well thought out design. Nice :)		
ard de guzman	26-Apr-20	43	Can't get past mobile verification. It says please try again later whenever I attempt to get a pin. Please ensure the has no bugs if you want people to participate. It's hard to cope with the crisis already don't add another one.		
David Gilbertson	26-Apr-20	17	Registration was easy. Well done app	only sends data IF you become infected AND you consent to data being shared - hopefully something very few of us have to worry about. Please everyone install this app.	
Jonathan Couvaras	26-Apr-20		Initially had registration issue (phone number invalid) but at the press release did say you can register from 6pm and since this time all has been working well....		
Ryan Hernandez	27-Apr-20	1	The app works very transparently and the benefits outweigh any issues relating to battery usage or overheads. Savings lives by reducing contact timeframes is a goal that really should matter to everyone.		
Derek Geer	27-Apr-20		On my phone running Android 8 definitely 5 stars. Wonderful idea and no security issues. However only 1 star rating as it won't load on my Wife's phone with Android 5 - and no chance of Samsung updating.		
Stephen Mellor	26-Apr-20	61	Please stop rating this one star. I understand the registration process is not open yet and this is why some of you are experiencing errors. Your negative vote could impact the downloading of this app and in turn public health. Please think carefully before you vote.		
ChopperG	27-Apr-20	1	Install and setup was a breeze. I installed it because the more people that use it	the more effective it will be. Be glad when it's not needed anymore though.	
Rawail Khan	27-Apr-20		This app doesn't work	When I enter my mobile number it says invalid number. And the app keeps hanging on my brothers phone. I have a Samsung s10+ and he has an iPhone. Will this issue be fixed soon?	
Kerrie Russell	26-Apr-20		Happy to be a part of the possible solution to the relaxation of some restrictions. We have to start somewhere. Easy to download. I have no concerns about privacy with this app whatsoever.		
Ingmar M	26-Apr-20		You MUST remove the leading 0 from your number when registering. This should have been made clear so less tech folks don't encounter the invalid number error.		
Jessica Tomkins	27-Apr-20	1	Love the idea of the app	very proactive. However unable to verify phone number after 6 p.m. - I am on a Android device. :)	
Martyn Symes	28-Apr-20	Downloaded	Installed and tried to sign up details but app failed to recognize my mobile phone number I have had for over 20 years. In turn	I got no further!!	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Zoe Hudson	27-Apr-20	1	2 complaints: Why does it need location permissions if it runs off bluetooth? Please get rid of the notification saying it is running. Not necessary.	
Kadek Raheni	27-Apr-20	I just downloaded the app (27 april at 18.50) but it didnt work when i put my phone number	it keep saying invalid number. Does anyone has same problem?	
Colin Hill	26-Apr-20	Registered successfully first time. Not sure why others are whinging about the registration process. Be patient people; this could save your life and the life of those around you.		
Palebushman	27-Apr-20	3	Bit silly the goverment promoting an app that fails in the registration process in order to make it functional. Nothing wrong with my phone number so the dysfunctional app has now been uninstalled!	
Cathal Crawford	27-Apr-20	1	Doesn't work	I get the common 'invalid phone no' error typical gov software screw-up
Lauri Strengell	26-Apr-20	1	If this app helps getting the community back on its feet	I'm all for it. As for security Google has all my info already. And if anyone thinks the Government is spying on them
Jon Lapitan	26-Apr-20	2	App is fine. Simple sign up. Data stays on your phone till you decide to upload it. Records expire after 21 days.	
Nic DB	26-Apr-20	3	Seems like	the system could not cope with demand be patient and come back for another try. (Did not accept my phone number)
Jonathon Alderman	27-Apr-20	1	Super simple and works perfectly now. I couldn't initially register but problems were ironed out very early! Plenty of information on how it works too.	
Mohammed Jitarayah	26-Apr-20	1	I think the way this app work and track is very professional	no location service will be used to track the places I visited just other users who are close to me and using this app.
gill Madhan	30-Apr-20	This app is so important to protect our selves and our loved ones. I hope more people get this app. No problem with it. Doesn't drain my battery as some suggest.		
Wildwood Dryad	29-Apr-20	1	I got to the stage with the PIN	but can't read it from message without minimising the app which then resets and needs a new PIN.
Danielle Connor	3-May-20	No fuss. Had this app a few days. No problems at all. Stop being a conspiracy theorist and install the app. Its a useful tool to track human contact for Covid-19.		
Emily Slinger	3-May-20	1	Quick	easy setup. Seems to be running in the background with no issues (Pixel 3).
Amy Howie	1-May-20	The permanent icon is a little annoying	but just like the software update notification you get used to ignoring it.	
Andrew Luecke	5-May-20	1	He's not forcing us to install this of course.. He's just saying that it will affect the outcome of whether restrictions are loosened. Furthermore	we wouldn't even need this if we went for elimination which we should do. This does not fix the problem entirely. And they didn't release source code a
daniel Rossini	4-May-20	Downloaded the app. But despite having the same phone number for 15 years when I try to register it says my phone number is invalid.		
Rhys Green	4-May-20	2	Working for the government they tell you to turn your BT off when not in use	yet they've released an app that doesn't work unless its on? Seems like they are creating security risks in or to gain access to our info.
Suzanne Reid	4-May-20	This was meant to be only a few steps. Am I missing something? I have put in the verification number and still asking to put in again. Will try one more time then if no response I will forget.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Ashley Lord	6-May-20	3	Unfortunately	due to the overly aggressive battery optimisation built into Oppo phones which users have little control	this app gets forced closed within minutes.
Magenta Southgate	10-May-20	1	Works pretty well. Would prefer it if the symbol would go away from the top of the phone. Type A's hate that. Considering deleting it to get rid of the icon.		
sydneystargazers	20-May-20	This is an app everyone in Australia needs to have on their phone. If a vaccine is discovered in the next 12 months it will take a long time to vaccinate the 7.8 billion people on the planet... so please don't assume the virus will be gone in 6 months. Download the app so you know if you may have b			
Adam Myles	20-May-20	1	Waste of time. The app doesn't work it continually turns itself off telling you that its your battery optimisation	typical of this government really half-baked and useless!	
Richard Raynham	20-May-20	1	Everytime the application does a scan or update it disturbs the sound (music) being run by other applications. Seriously annoying.		
Andrew Doyle	26-Apr-20	2	Such a great initiative from the government to help slow the spread of this virus. Was easy to register and the privacy policy clearly explains how the data is stored.		
Roble Abdikarin	26-Apr-20	1	I guess it consumes alot of battery but that doesn't matter now as long as downloading the app saves lives and making easy to track people who close contact confirmed cases.		
robert law	27-Apr-20	1	Downloaded easily but now phone says "connected to null" then "disconnected from null" continuously.... very annoying. NEXT DAY....uninstalled app then re-installed	annoying "null" messages have disappeared (hopefully). App now gets 4 stars frm me.	
Marcia ALLEN	29-Apr-20	1	Very happy SUGGESTION - Can you have something to let it know I'm at home because the Only problem is it uses a lot of battery SO - I'm turning Bluetooth off while at home & will turn it back on when I go out This will END LOCKDOWN GPS access not stored		
Dan Power	27-Apr-20	3	I tried to load the app on my wife's phone but it said it was not compatible. Her phone is about 5 years old and she has no plans on upgrading as it still works fine so she won't be able to participate.		
Sandy Crombie	28-Apr-20	1	Am still unable to complete registration....I have uninstalled & reinstalled a number of times but cant complete each time I try to do my phone number it says "Invalid Phone Number" & that is using the 0 or leaving it off		
Michael Lyons	27-Apr-20	1	Tried unsuccessfully for three hours to register and all I got repeatedly was an invalid mobile phone number - and I can assure you	it's a valid number.	
John Hilton	26-Apr-20	1	Easy to install	easy to register. If it help us get back to normal quicker	I'm all for it. They are very clear as to how the data is kept and when it will be accessed
Chris Smith	29-Apr-20	Simple to install and setup. Unobtrusive. After running it for a few days I'm not seeing any real hit on battery life.			
Ben Walsh	27-Apr-20	1	Simple install and registration. Wants to know less about me than Facebook. Putting that data to much better use. I hope enough people get on board so we can start to claw our way back to normal		
terrance murphy	27-Apr-20	7	App requires use of Bluetooth so others with the app can be notified someone else nearby can be alerted. Big security risk for users as phones can be hacked by an enabled Bluetooth regardless if it's visible or hidden. Do not install if you don't want your phone hacked		
Lachlan Slade	27-Apr-20	4	Ive had the same message 3 times saying that I need to restart my phone. Surely this can't be right	please fix it.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Daniel Colliver	27-Apr-20	3	Easy to register and was pretty straight forward with how its supposed to work. Hope it makes a difference.	
James	27-Apr-20	It's working and I'll keep it on there a little bit longer but the battery drain is probably about an extra 30% daily on my phone.		
Sanket Meghani	27-Apr-20	1	Excellent step by Australian Health Department. Quite easy to register and designed keeping in mind privacy of Individuals. Thank you Australian Health Department for the app.	
John De Freitas	27-Apr-20	If it keep people safe why not. I wouldn't be worried about tracking. There alot of other app that do this more eg google	what app	facebook etc.. with here own hidden agenda's.
Sandra Wilson	28-Apr-20	1	I cant type in my number even if I do drop the 0 at the start. I've uninstalled the app and then down loaded again. Still cant do it. Its a new mobile phone . So very up to date.	
Christopher Beggs	29-Apr-20	3	Causes other Bluetooth devices (eg speakers) to glitch and drop out. Have tested with and without this app running - it's definitely causing some kind of issue.	
Bindoon Bogan	29-Apr-20	Difficulty registering my phone number at first (probably due to traffic). Closed it and tried again later no problem. Works fine		
Karen White	12-May-20	1	Easy as to install. But doesn't stay on. Something to do with battery optimisation	even though I've turned it off in my settings. Android.
Shirley Ryce	4-May-20	Have tried to register my phone and it's rejected each time. My number is not recognised. So I can't receive a pin no.		
Jacob Heard	6-May-20	Good premise... But since installing my phone has slowed right down. Cuts out other apps and disrupts Bluetooth connections with other devices.		
Steve	17-May-20	Have son with diabetes so installed but it is a battery hog. Disable bluetooth while at home. Battery usage showed 47% usage was by this app while all other apps negligible.		
baggi sandhu	14-May-20	Installed it. And now my phone won't send files to my laptop via Bluetooth. Have to connect cables. Again. Please fix		
Girish Ranade	26-Apr-20	It's looking good and easy to use / install	in current condition	looking rest of the countries it's better to stay safe and help each other.
P J	27-Apr-20	1	Please remove it from the notification tray it is annoying	the small symbol above like wifi bluetooth ect is fine. Happy to help fellow Aussies. 5 stars if that is fixed.
Hayden Faulkner	27-Apr-20	1	Good initiative	and great app execution. The best government app I've used by far. Well developed
Mike Lawson	26-Apr-20	2	If you have a virtual private network enabled	you might have to turn it off to register. We did have to for one Samsung phone with Android v 10.
Sue Stackhouse	28-Apr-20	1	I have been asked to update my data	and asked to put in the pin number they have given me. I did that and it's saying invalid. So I am not sure what is going on. Please send me a new pin number to my mobile phone please
Samantha Addison	27-Apr-20	2	Useless. Don't bother. Could not recognise my phone number. Tried with and without the leading zero. My daughter had exactly the same problem. Too bad if you do actually want to help.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Annika Victoria	27-Apr-20	1	If you're having the issue of it saying your number is invalid	try the following: turn off Wi-Fi (this worked for me)	or reset the app (worked for my friend).
James Bowering	26-Apr-20	5	Ideally the app shouldn't have been available to download before the system went live as advertised at 6pm Sunday. Anyway	a great cause and something that I'm happy to support.	
Brendan Nech	27-Apr-20	1	This app is such a great way to protect the vulnerable even if you're not that interested in coronavirus this is this is a perfect way to get us out of lock down and keep us out locked down the government can effectively contract Trace disobey excellent		
Ben W	28-Apr-20	1	Just need to somehow make it available for users who's app store account isn't Australia because lots of foreign friends in Australia are reporting that it's not available for them.		
Julie Keast	26-Apr-20	Its fine. Easy to register and as long as its used for the intended purpose then realy I don't see any issues.			
Jenni Casey	26-Apr-20	5	Easy to install with only small hiccup. App kept on saying invalid phone number. Then I switched off my Wi-Fi to use mobile data and the app accepted my number immediately.		
Karen Henderson	27-Apr-20	4	If enough people utilise this app	you can be assured of notification if you come into contact with a person who tests positive. It makes sense to me!	
Laraine Webb	27-Apr-20	Downloaded the App when I put in my mobile number to register	it says it is invalid. I tried putting in the whole 10 digits after +61 and then left off the 0.		
Mark Northcott	27-Apr-20	21	Simple and easy to register (after the 6pm start). Moved to Samsung setting to exempt app from low battery settings. For the time they had to set up	well done.	
Steve Hogg	27-Apr-20	Installed and opened app	filled in the requested info but it keeps telling me my mobile no. is invalid. So the app is a great idea..... or would be	if it worked.	
Kevin Locust	29-Apr-20	Strongly recommend everyone to install the app for the best interest of our community. The easier and earler we can control the pandemic	the sooner the restriction will be eased. Please support the app.		
Luke Jacobs	2-May-20	Please show a count of how many contacts are logged within the app. That would then make this a tool that will let users identify if they are having a lot of contacts and better self manage.			
Jason Derby	4-May-20	Works as intended. No battery drain	no interference with Bluetooth. Unobtrusive despite the constant notification banner.		
Mary T	2-May-20	Works fine on S10. Took less than a minute to register and not alot of info asked for. Google knows way more about me.			
Pheak Chao	5-May-20	I don't see why people complaining about to keep themself and other safe.. Only downloading woundnt cost you anything much.. People are concerning about their personal data	and don't don't see how they got a bunch of their data on social media apps	if government want their personal detail track t	
Ryan Webb-Johnson	6-May-20	I can't believe people are whining about the notification being on all the time	the possibility of their battery being drained	about having to turn Bluetooth on and off etc. This app might help to save lives	including your own... that's a pretty fair trade for the minor inconvenience...
Dennis B	6-May-20	Would be good to have the status bar icon display when Bluetooth is off. Like the previous version did!! It was a v helpful reminder...			
Kess L	13-May-20	Needs a way to be turned on and off easily - if im staying home for the day it doesnt need to be in the background. Otherwise works fine			
Claire Baylis	14-May-20	1	Haven't touched it since I downloaded it but it drains my battery and messes with my Bluetooth whether I'm in my car or walking with wireless earphones. If it wasn't the reason I could go out	I'd delete it.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Thomas Boulton	26-Apr-20	12	Well I got to the third registration screen and it appears I don't have a valid phone number. A simple field value check should not be beyond the app. I am surprised that this got through testing.		
francis weir	27-Apr-20	6	Unable to get my pin during setup (please try again later). Then it said my phone number was invalid. Now it's back to saying try again later. Update; finally let me register.		
Adrian Kosch	27-Apr-20	A great way to get the country moving again. Most service providers and other apps collect infinitely more data.			
Shallan	28-Apr-20	1	Very annoying that the icon keeps showing that it is running in the background. And banner	which i tried to remove. We dont need to constantly see this. Please remove.	
Dr David Randall	26-Apr-20	1	If privacy is a concern	then as someone that spent 5 years writing secure finance apps and as someone that no longer installs social media apps and some Google apps	I have no reason not to install this app due to privacy concerns.
Laurence Wade	27-Apr-20	Encountered the problem with 'invalid phone number'	solved by turning off Wi-Fi on my Android and trying again. It then worked		
Lloyd	26-Apr-20	Seems pretty straight foward	needs bluetooth running all the time	small price to pay. **Pros outweigh the cons on this app.**	
David Anderson	28-Apr-20	1	I keep my bluetooth running all day for this app	it has hardly affected my battery life. My phone still lasts the whole day.	
Wudderpudd	26-Apr-20	Very easy to set up	and asks for very little info. Doesn't even need you to give your exact age	let alone birthday. It'll save lives but only if you and many others get the app.	
Tahereh Talebi	27-Apr-20	1	App was great and installed and verified me very fast without any problems. I hope it helps to get live back to normal asap. Thanks		
Wal Trees	26-Apr-20	11	No problems installing and signing up. For those having problem with the mobile number after the 61 do not put in the ZERO but put in all numbers from 4 and onwards (International format).		
Lee Meredith	28-Apr-20	If you have trouble verifying your phone number	try turning off your wifi. Worked for me. Bizarre.		
Luke Murray	28-Apr-20	Tryed multiple times to register	unfortunately my mobile number is apparently invalid . Yes i tried full number and dropping the zero. Please rectify this problem. Thanks		
Bill Bolton-Wade	19-May-20	1	Plays havoc with Bluetooth devices. Headphones keep cutting out every 10 or twenty seconds. Uninstalled	restarted phone and everything works. Might reinstall later but this needs some work.	
Nigel Leivenzon	26-Apr-20	58	Everyone should load this so we can get back to 'normal' as soon as possible. This only stores data locally until you get the virus and give consent to access your data.		
Matthew Martin	29-Apr-20	Better than expected for something quick	would like to see source code. Satisfied with third party reports re personal data security.		
Peter Pan	29-Apr-20	Installed and setup in minutes. Works well in the background. Hope more people will join in so that the government can lift the lockdown sooner.			
allen s	4-May-20	Why does the app request location tracking? I have this disabled so I don't know if the app is working. It would be good to have this made clear.			
Ben W	2-May-20	2	Bugs bugs bugs....Needed to upload data but there was never a verifiable code sent to me. Plus no button or link to get a resend. Dont download til they fix the app. Doesn't work.		
Ariel Wigdorowitz	1-May-20	Fantastic app. If enough of us download it	the restrictions will be lifted and the economy will bounce back more quickly.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
miles	17-May-20	6	It's a POS!!! won't stay on despite Bluetooth on & tracking app on in the background.	Yeh download the app they keep telling you	well fix it up and we will !!
Robert Harding	9-May-20	1	Have been running this since it became available. Not happy as my battery had been draining very quickly without me using my phone. Not happy time to uninstall		
Mick Wells	16-May-20	Edit - Seems fixed in latest update. Causes my Sony Xperia Xa2 to blank screen during a call	making it impossible to hang up the call.		
Steele Alexander	15-May-20	Invalid phone number with and without leading 0 so I can't sign up. Really poor not being able to progress past such a simple stage.			
A Google user	16-May-20	1	Still waiting for my verification code after requesting it 5 times and tried all the help issues. I will not bother	I was sceptical before anyway.	
Jason Wismer	27-Apr-20	Very easy to install and for me personally	the good of Australia outweighs any issues about my privacy.		
Augustin Deplante	27-Apr-20	1	Easy to use	no bugs so far. For those saying it should geolocate instead of Bluetooth handshake: that would make it totally useless indoors	
Michael Eardley	26-Apr-20	6	90 second download process	done 6.45pm Sunday 26 April. No issues at all. Now Barnaby Joyce + other right wing loonies	what are you up to that you don't want anyone else to know about? Oh apart from google/apple
Nilhan Uduwarage	28-Apr-20	4	Government keeps boasting about number of downloads. But the app has lots of flaws especially in registration process. I'm stuck in PIN stage	never receiving it.	facebook
Daniel Buckley	26-Apr-20	13	The COVID app was released early but you could only register after 7pm. Hence the bad reviews below. Seriously it's a good app	fast and easy to register. If we all download this app! The quicker Australia can come to normal again !	Twitter those o apps yo hypocri use wh whingir
Beatrice Lucas	27-Apr-20	1	I'm trying to sign up	but when I enter my phone number +61 ... I receive the message "invalid number" even though the number I enter is correct.	
Peter Bright	27-Apr-20	Works as expected	registration easy and doesn't require personal information aside from your name and postcode.		
Taio Darkstrider	27-Apr-20	Simple and easy. Yes it keeps you're Bluetooth on but if you use wireless headphones or a smart watch you're basically doing that anyway			
A Google user	26-Apr-20	2	For those having problems with their phone number	do NOT enter the first zero of your number. It is not required. Easy registration.	
Linda Britten	27-Apr-20	No issues at all. Easy to jump on board... Other apps ask for much more information and require many more permissions. Let's get back to normal asap			
Andrew Lynes	27-Apr-20	Installed as advertised. As advised	I waited until 6pm on 26/Apr before trying to register. Who knew that following instructions would have worked out so well?		
Julie Wilcox	26-Apr-20	1	A great concept which allows the Health Dept to see who has been close to us without tracking our location so that we can get tested early if someone with Covid19 has been near for a period of time. Well done!		
Tamara Gregoric	27-Apr-20	2	Keeps telling me my phone number is invalid. I have tried installing and reinstalling. Tried both with and without "0" first. I give up.		
Robert Byrne	26-Apr-20	1			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Vasily Ivanov	14-May-20	1	Really great app	I hope enough people install it	and it'll come in handy to keep Australia safe from the second wave of the virus.
Simon Crooke	29-Apr-20	18	Easy to set up and appears to be moderate on power consumption. Requires a leap of faith to trust the Government won't be Machiavellian or incompetent. On balance the risks are worth it for the public health benefit. Sign up and let's crush this virus. Several days of use shows that this app account		
Karl Wetzler	29-Apr-20	2	I can't get past the first screen. There is a button that says 'I want to help' but no other options. I'm trying to find a skip option	but there is nothing. I'm not doing this because I 'want to'.	
Jo-anne bader	2-May-20	2	This can't be installed on many Android devices. Yo gov! Not everyone in Australia has the latest iPhone or Samsung. I know multiple people who can't have this app.		
Roberto Nungaray	3-May-20	Installed it the day it came out. Have had no issues. SEEMS to be working fine on the background.			
Matthew Reid	1-May-20	1	Seems to function in the background so long as I keep my Bluetooth turned on with the only intrusiveness being a persistent notification bar icon.		
Kady Schottler	14-May-20	This app is a major drain on phone battery and is very disruptive to Bluetooth headphones (cutting connection 2-5 times each track).			
Jin Oz	15-May-20	The installation and registration process was easy. Running the app is a small contribution to having the pandemic under control.			
Jevarah Lunam	20-May-20	1	Doesn't even work	as of 20/05 officials aren't even able to use the data. Almost a month after its release.	
Michael Nicholson	20-May-20	2	Unable to get past putting my ph number in as it says it's invalid. Update	I didn't realise you need to remove the 0 from in front of my number. Maybe they should mention this in the setting up instructions	
Ganquan Chen	26-Apr-20	1	It is hard to remember all the contacts. Even	I don't even know the contact details of some people that I have been close to. This app helps a lot.	
Bijesh Balakrishnan	30-Apr-20	3	All good but it keeps interfering with my other Bluetooth devices (headphones and speakers). I frequently loose connection to them.		
Damon Opacak	26-Apr-20	6	For all those that complain about not being to sign up	although the app doesn't mention it	ABC News mentions you'll be able to sign up with mobile number after 18:00AEST
Gideon Whibble	7-May-20	Easy to install. No invasive questions. Edit: Have used since release with no bluetooth or battery issues. The single icon in the status bar is clutter but not annoying.			
Marther A	27-Apr-20	2	My mother and her friends are elderly. They have old phones because they are used to them. They cannot get new phones because they would have trouble learning the new technology. This app doesn't work on their old phones. They are in the most vulnerable age bracket to die of the virus. The governmen		
Karen Wilkinson	27-Apr-20	3	For those of us having the invalid phone number problem	the trick is to turn your wifi off and then it will send you the pin code.	
Bob Hickson	28-Apr-20	The app continually says invalid phone number. Have tried with both Bluetooth and WiFi on	off and combined	also deleting the zero from phone number. The phone has Android 7.	
Joe Lewis	27-Apr-20	2	Making Battery Optimisation a mandatory permission means I can't use this app. If I don't have my phone on at least Medium power saving	I can't get my job done. Fail.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Ess Grubb	26-Apr-20	4	Easy to install and complete. No issues. For those struggling with invalid numbers remember to drop the 0 at the begining of your number as it has the +61 prefix		
John Austin	27-Apr-20	Installed easily	to those that give 1 star because they are stuck somewhere please read the instructions and use a little intelligence.		
Robert Macpherson	27-Apr-20	2	Hopeless. The pin code showed momentarily. I entered it on the phone and pressed verify. Nothing happened. Have tried numerous times. 1 star is too generous.		
Simon Merrifield	28-Apr-20	Won't accept my phone number	says number is invalid. Not sure why. Will try again at a later date. Does the app need an update for this as i see a few reviews with the same issue		
Rob Harvey	27-Apr-20	App says my phone number is invalid. I typed it in 5 or 6 times	got someone to confirm it was right	tried it with and without the leading 0	it still reported my number as invalid.
Peter M J Conrad	28-Apr-20	Invalid phone number? Entered minus the 0 & with the 0 several times. Double & triple-checked my number with same result. Hit a road block so unable to activate.			
ben brown	26-Apr-20	This app is vital to our country opening sooner rather than later. I have no concern about data security issues	as smart phones already track far more data than this app		
Ellen Hazelton	27-Apr-20	No problems with installation after 6pm 26/ 4 when it was fully available . Happy to be part of the necessary 40% to help with managing the pandemic in Australia.			
Rohan Herring	27-Apr-20	1	Tried registering numerous times and everytime I enter my mobile number it comes up with invalid mobile number?? How am I meant to join and help out when this app doesn't work properly??		
Ross Kenneally	29-Apr-20	Loaded easily	registered and done	it's running in the background	battery life seems normal.
Gehan Somanader	2-May-20	Every time I check in the morning the app is turned off. It only works if it's running in the background but it gets turned off by the OS			
Ant L	5-May-20	10pc battery drain on a Google Pixel 2xl per hour	while at home.. Having this app on my phone over the next 12-18m required for a vaccine to be discovered also means charging this phone 2-4x instead of the usual 1-2x per day. This will severely impact the expected life of my phone and also	my usag	
Ross Cameron	13-May-20	App does not start after turning phone off for several hours. I have to go into the app to restart it. I don't always remember to do it.			
John Wright	15-May-20	My wife has a 2year old phone that is a system5 she cannot download the app very disappointing why wasn't this looked at before creating this app how many more are out there that cannot download the app			
Michael Pemberton	26-Apr-20	10	The app forces the IR LED used by the iris scanner on my phone to be always on. This drains the battery and produces enough background IR light to jam the IR signal from my TV remote.		
Chris	27-Apr-20	1	Seems to be working well. If you rated this app badly because you tried to register before its release	you deserve a medal.	
Ashley Moore	26-Apr-20	8	Pretty smooth running so far. Google Play	the platform I downloaded the app from	already has more of my information than the government will through this app so I thought I might as well give it a go.
Jonathan Hill	26-Apr-20	4	Unfortunately the phone number (which mine has been filled in correctly) Does not work	I've restarted the app however the initial set up with contact details is fine until you get your number to enter. I'm using a Pixel4XL	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Tom Meumann	27-Apr-20	Simple and straightforward to use. Gives you a rundown of what it will do with your data before you sign up. Good work!		
Christopher Chin	27-Apr-20	2	Great initiative and good use of technology. The privacy concerns of AWS are ridiculous when our bank data is shared every day and no one bats an eyelid! Well designed app.	
David Valentine	27-Apr-20	3	Can't sign up. It's rejecting my mobile number with or without the leading zero. Fixed it by turning off WiFi and trying again	
Tan R	28-Apr-20	Is anyone else getting a "Please try again later" message when trying to enter mobile number? Has been the same message for about 12 hours.		
Ozan KÄ¼ÅŞÄ¼kbÄ±ÅŞak	26-Apr-20	5	The App is legit and working. Low rating is because of some people trying to activate the app before the government's announced take off time. Download it now to keep track of possibly contacting infected people!	
Colin Bakon	26-Apr-20	Downloaded and installed without any problems and then registered without any issues. This will help us bust this virus. Download it and use it.		
The Cobra Ward	28-Apr-20	In the first 24 hours have had to restart my phone 3 times ad the internet stops working. Hopefully this is a bug that can be fixed?		
Tim McArdle	26-Apr-20	2	Neat and clean app. Set and forget. Everyone should install this	there is no reason not to. Could do without the permanent notification that needs to remain active.
Colin McKay	27-Apr-20	1	A good use of technology to help reduce the spread of this disease. Leaving bluetooth on sure drains the battery though.	
Joshua Niland	26-Apr-20	8	Ignore the low score naysayers. This app was easy to setup and is a fantastic utility to help slow the spread of Covid19. Installed for the whole family.	
Sarah Chaplin	27-Apr-20	1	Just need to turn WiFi off to register your phone number. BTW Google knows more about vwhat you do via location services	smurfs and tracking than the Australian Government will learn from this app.
Garry Dukes	26-Apr-20	6	Cant get code to open . . . told me my mobile phone number was "invalid" (# entered with and without the first zero) If registrations are overloaded why doesn't it just honestly say that instead of saying your # is invalid! Very poor IMO!	
Ruairi Hardy	26-Apr-20	2	For those getting "invalid number" issues	just drop the 0 at the start of your number as it uses the international calling code
Phil Newman	27-Apr-20	I tried to help	seriously	but each time I added my mobile number it said it was an invalid number went back and tried half a dozen times even tried dropping the 0.
Christine Burnett	27-Apr-20	Terrible. I put in my mobile number in several times and it kept informing me Invalid number. Frustrating. Have tried many times same result. What else can I do.????		
Kit Marshall	27-Apr-20	1	The app won't accept Norfolk Island mobile numbers. Norfolk is part of Australia and should be able to use the app as well.	
Louise Thorne	26-Apr-20	Easy app to install	just make sure when you are putting in your mobile number that you omit the 0 at the start.	
Rob Clarke	27-Apr-20	Quick and easy to install	zero problems. Did it first evening it was available.	
Deb Davies	28-Apr-20	I want to use this app but cannot register as it is saying my phone number is invalid. I wonder how many others are having the same problem.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Jonathan Jones	27-Apr-20	Install was straightforward. Have used it for one day now and haven't had issues with battery life.		
Cheryl Stevenson	2-May-20	I believe in this app 100% but annoyingly it stops Spotify every time it scans. Is there a way to turn off scanning if you're staying home and not leaving the house?		
Marilyn Roach	3-May-20	Works perfectly fine for me. Running in the background	haven't noticed an impact on battery	
Kourt QueenBee	3-May-20	Everyone needs to install this app otherwise it won't detect if someone's been in contact with you that is diagnosed with covid-19. Genius app!! ☺		
steven parker	5-May-20	1	App is fine except that it uses bluetooth which I have off all the time normally. All good if it helps prevent even one granny from getting really crook.	
Abhi Verma	6-May-20	3	The latest version is closing itself every 10 mins. The 0.11 version was stable.	
Jaye Parks	6-May-20	2	The app is constantly accessing proximity sensor	it's flashing all the time. This app shouldn't need to endlessly activate that sensor
Geoff Jones	6-May-20	1	A great idea	but it keeps interfering with my Bluetooth headphone connection making it drop out regularly :(
Paul Mcpherson	12-May-20	2	Bluetooth issues on android device	have found that the app is causing my Bluetooth to drop in and out for a split second at a time very annoying.
Stan Karasinski	16-May-20	App switches itself off! Need to continually monitor the optimisation battery section and switch on for it to function!!!!		
M Bryant	27-Apr-20	1	straight forward registration didn't ask exact age	only a post code & bluetooth connection ... good on aus Gov for coming up with such a great idea ☺
Paul Williams	27-Apr-20	1	Just a quick update if possible. That it can detect when home and auto Bluetooth off when there? Save battery.	
Colin Pilkington	28-Apr-20	Installation steps lacked help when invalid number occurred. Needed to search for a solution after many unsuccessful tries. Turns out that WiFi needed to be off.		
MeYelling	27-Apr-20	1	3 times it closed and I had to redo my details First try I never got my pin to enter and now it doesn't recognize my phone number. We were guaranteed this would not happen.	
Josef Ravenscroft	9-May-20	2	Essential! Only problem seems to be with Apple phones and running in the background.. Can't really think how the app could be improved otherwise!	
Lyn Hingston	27-Apr-20	2	It says my mobile no. is invalid. It also says my husband's mobile no. is invalid as well. How many others are experiencing the same problem.	
Stephanie Topfer	26-Apr-20	14	There is nothing wrong with the app. The negative reviews are from people who didn't read that registrations only opened from a certain time. They have now been opened and it works perfectly fine.	
Jose Carvalho	26-Apr-20	App is up and running smoothly	registration took less than a minute.	
Phillip Martin	28-Apr-20	The app does not accept my phone number regardless of format. Have tried uninstalling and reinstall to no avail. There is no "help" link so I could get this sorted.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases.	That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
RenÃ©e SzÃ©csÃ©nyi	27-Apr-20	Love the idea and want to help but would be great if I could switch it off while at home to save battery and not have a notification sitting there all the time.			
Philip Fowdar	27-Apr-20	4	Easy registration process. The app has been cleared from a privacy perspective but you can even enter fictitious personal information for those who are paranoid. Everyone please download and support this initiative so we can all get back to normality faster and reopen the economy whilst keeping ever		
Ross Goldfinch	26-Apr-20	Very easy to install	does better than commercial apps in protecting privacy	especially as it will probably save lives	
sue mcarthur	27-Apr-20	Can't add phone number. I want the app but it needs to iron out some bugs. Early days			
William Butcher	27-Apr-20	Simple to set up! Uses pretty much zero battery	and about 60kb of data every 12 hours. 66mb of RAM used. Very happy!		
cha w	27-Apr-20	3	Great idea. I'd hope anyone with concerns is unable to read this as they shouldn't be online at all. If they are then they should make themselves useful to their fellow Australians and get this app so we can get out of iso sooner.		
Steve Danielsen	27-Apr-20	1	I'm sure the app is great and I know it's working in the back ground	but surely you can remove the constant notification on the screen and in the notification drop down. Please remove this feature	
Local Coaster	27-Apr-20	1	App still wants to stay on when your at home . Why ? Can you install an option to switch it off when you get home nobody wants their bluetooth to stay on wasting your battery power for nothing . I uninstalled it due to this annoying factor please fix.		
Aidan Hodges	28-Apr-20	Had problems with an "invalid phone number" until I turned off wifi	after that it worked perfectly.		
O Azzam	27-Apr-20	No effect on battery life	not intrusive	very easy straight forward. Thank you	
Michelle Barnett	26-Apr-20	Easy took a minute to register	privacy is so good compared to all other apps on my phone	let's keep us all safe.	
Pallara Zara	27-Apr-20	Will not take international version or normal version of mobile number	even with restarts. Can't register.		
Linda Backus	28-Apr-20	It won't accept my phone number. Have been trying for days. Great intention. Useless app.			
thegasgrenade	29-Apr-20	What??? This app is saying I'm positive but I've never did a check up nor have I ever used my phone number for any medical reasons such as when doing an appointment or what not			
David Little	27-Apr-20	Will not accept my mobile number	have tried about 15 times	with and without the leading zero	but shouldn't need the 0 with the +61 prefix.
Ben Castles	30-Apr-20	2	This app runs so much stuff in the background it's slows the entire phone down and plays havoc with simple things like messaging... absolute rubbish! Straight after uninstalling phone back to normal		
Carly Wilson	3-May-20	I can't even register for it	as apparently my phone number isn't valid ðŸ˜· I've tried a few different tricks recommended in other reviews and it still doesn't work.		
Alex	1-May-20	This app is easily closed without any warnings. Make it so it runs always in the background to provide the tracking coverage specified. Thanks.			
Chris Mac	4-May-20	Easy to download and set up. No issues with power consumption after one week of use.			
Cleveland Ryan	6-May-20	Simple design. Works great. It's reassuring to have that notification constantly on because then I know it's working			
Natalie Anderson	6-May-20	3	I can't keep getting my phone out to give it permission to work. The app stops working	I haven't closed it. Please fix this.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases.	That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n			
Ian Barber	7-May-20	It would be nice to have an auto update. I just manually updated from 1.0.11 to 1.0.16. I have no security issues as Siri and Alexa have more information						
Kim Wilkinson	9-May-20	1	Want to have this app but it interferes with Bluetooth devises like headphones and speakers	causing them to glitch regularly while trying to listen to things.				
Katrin S	16-May-20	Initially didn't recognise my phone number	5 attempts later accepted it. It then took 9 PIN requests because it never sent the PIN before the 5 minute time out.					
Gregory Rice	16-May-20	It seems as though my battery runs flat quicker than usual since installing	and my screen is always warm.					
John Caimotto	27-Apr-20	1	If you switch on airplane mode it will turn off Bluetooth. You need to manually turn on Bluetooth. Stay safe Australia.					
George Hong	26-Apr-20	2	Ensure ppl can find your app by allowing search for "Covidsafe". At the moment it's only discoverable if you search for "covid safe" two words.					
warrior queen	26-Apr-20	2	Very easy to use. Signup worked without issues. Hoping enough sign up to make it a workable tracker!					
Karen Thompson	27-Apr-20	I've tryded to register but it won't except my mobile number	it keeps saying invalid number. Is anyone else having this problem					
Carol Burns	27-Apr-20	1	I have tried atleast 10 times with gaps in between and it keeps telling me my ph. No. Is invalid!!!!that is BS. As ive had the same one for 27 yrs.Not impressed!!!					
JÅrgen Smith	27-Apr-20	Great engineering effort; has been analysed by independent Android engineers as transparent and secure. Kudos to the dev team	and for AusGov for not creeping the scope (semi-pun very much intended).					
Russell Stewart	26-Apr-20	1	Easy to install. I think a lot of people are problems because they are entering the leading zero. Not necessary when you see +61. :)					
Winston MacCracken	27-Apr-20	Easy to install. Shame app has to be left open to work	many users will likely close it unintentionally on Android devices when clearing apps.					
Nicole Masson	26-Apr-20	1	Easy and quick to install. Great initiative	I hope many will get on board and download it. This could save lives! Thank you.				
Isreal Mathew	28-Apr-20	2	I've read through everything and am satisfied that they've done everything to mitigate our concerns. The pseudonyms	basic demographics	two hour ID's	21 day retention	explicit approv: to acce and legal/cr conseq if it is u/ any oth purpose actually impres:	
David Ahern	27-Apr-20	2	It will not verify my phone number. Says its an invalid number. I have had the same number for over 20 years.					
Jake Drayton	28-Apr-20	1	App works fine on Galaxy Note 10+ 5G. Ignore all of the nutters wearing tin-foil hats on Facebook. The app can be uninstalled once this is over.					
Sue Cooper	28-Apr-20	Gives invalid phone. Turned off WiFi Turned off Bluetooth Restarted phone Tried 0 and 04 Result still invalid phone After spending over 30 minutes trying various combinations I have uninstalled. Sue						
Hugh Macfarlane	27-Apr-20	6	In now. Sign up was simple once they fixed the PIN bug or scaling issue they had yesterday. Bare in mind how little time the regulators	designers and developers had to get this up. Well done!				
Ruby van der tuuk	27-Apr-20	I have tried about 6 times & it keeps saying invalid phone number I have had to the same number for over 20 years.						
Peter Rixson	26-Apr-20	2	Easy to set up its clear what you share and when. Good all data only kept for 21 days. Please install it.					

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Pete Andersen	27-Apr-20	Quick to download and very easy to use. Watching battery drainage while keeping Bluetooth on but ok so far on android.		
Richard McNeill	26-Apr-20	Easy to install. We need to get the economy moving again and this tracker will be a valuable tool. Great that we can all do something useful as a community!		
mgr bkk	30-Apr-20	1	As a user I would want to know if someone who tests positive has sneezed near me. This takes less than 10 seconds. Not sure why the digital handshake is set at 15 minutes. I would rather it be 2 minutes or less	
Jesse Bugden	29-Apr-20	When the app is running my Bluetooth headset glitches out every few minutes. Force closing the process resolves it and it came back straight after I restarted the app.		
Michel KOwalski	30-Apr-20	1	Tried downloading the app and having the same issues as many purple with invalid number. If the government wants people to download this app then this problem needs fixing!	
Barry Fleming	30-Apr-20	2	Having unsuccessfully tried to enter my mobile number using my 18 month old Nokia 8 phone	I have now gone to the conclusion that for many the app will simply not work.
Lauren Neidig	2-May-20	No issues on my phone. Easy to set up and I love the idea that I will be notified if I come into contact with a Covid19 carrier.		
andy cunningham	4-May-20	Someone will allow a random Facebook app access to all their account data to do a quiz on "what colour toast are you" but they won't download an app that helps the government fight covid19. This app is a great step in the right direction to helping us get back to normal		
val enright	4-May-20	I tried to enter the pin sent to me	but it was rejected. I was sent another pin and it too was rejected! Why not make this thing a bit easier! I have tried repeatedly but I'm ready to give up. One more try. 11:55pm!	
Namal Kulathunga	14-May-20	So far so good. Havent had any issues. Was expecting to drain the battery. But even this is not noticeable. So why not help the community to get out of this pandemic...		
Wendy Collinson	28-Apr-20	Uninstalling as it keeps telling me my phone number is invalid. I've tried three times. Now I just couldn't be bothered. Very unimpressed.		
Mike Hughes	27-Apr-20	1	Pretty good so far ... simple	clear and not intrusive. Would prefer an Android Adaptive icon though.
Michael Kosiol	28-Apr-20	1	Wouldn't take phone number	so had to uninstall it! A lot of room for improvement left!
Brett Hevers	29-Apr-20	1	Okay	it's good but I absolutely hate the constant notification on the home screen and notification bar. I don't need to know it's working just work. Get rid of the constant notification
N E Kostraby	27-Apr-20	1	easy to install and register I wish the notification was not on the screen and was just running in the background.	
Darren Austin	27-Apr-20	1	Super easy to sign up. I love that we have the technology to automate contact tracing.	
steve green	26-Apr-20	8	Seems like a well thought out app. If it helps us get on top of this pandemic it is well worth the minor intrusion. So far it seems to work well on my phone.	
Moose Hezza	26-Apr-20	Easy to download & get going. But needs to be simple and straight forward to serve tracking purpose.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Bernadette Prasad	27-Apr-20	1	Good idea but unfortunately murdered my battery via Bluetooth. Will try to remember to put Bluetooth on when out for essentials.				
Hez E	26-Apr-20	Fantastic app to help manage this virus and work out people that have been in contact with confirmed cases.					
Rebecca Campbell	11-May-20	2	Easy install and sign up but it is ruining my connection with other Bluetooth devices that I need to use.				
Matthew Sands	27-Apr-20	1	A great initiative backed by robust privacy legislation. Sadly the same can't be said about the government's metadata collection and encryption backdoor programs.				
Andrew Roe	26-Apr-20	1	Easy and straightforward to setup. Very clear about what it does and how it uses data.				
Chris Australian Art For Sale	10-May-20	2	App closes every time the screen locks and I have to restart the phone over and over. If this is to work it needs to be reliable.				
Hamish Cross	30-Apr-20	2	people who hate the government are saying this is a good idea	you have an independent code review who decompiled the app and said it is safe	and you have a chance to make your life	and those around you safer	you have aside y fears. I worried data los
Vera Metallum	2-May-20	App itself is alright but ever since I installed it	other apps are randomly shutting down and generally malfunctioning.				
Louiza Nutt	27-Apr-20	1	Works as expected	thanks. Handset: Google Pixel 2. Android version: 10. Network Provider: Vodafone.			
Sam Wahala	28-Apr-20	1	Doesn't let me register. My phone number doesn't get recognise. I own this number since 2011. App says invalid phone number				
Rob Van Dongen	27-Apr-20	1	I haven't been tested yet for "Beer" virus. BUT Worked on wife's phone	but apparently my phone is invalid. Now considering I've had it for more than 2 years	I believe this could be another F@!# up by our government.		
Simon Delaney	26-Apr-20	4	Super easy to install and register. The early 1 star reviews were due to the app not being live but it's all working now,				
garry greenhill	26-Apr-20	2	Took a while to get registered probably because I tried it before 6. However all up & running now	only to willing participate can't understand all the naysayers. We're beating this virus because we're responding intelligently to it and this is another clever initiative			
andrew cusack	26-Apr-20	1	Easy to use. I don't really like having that notification there all the time though	so got rid of that.			
Sylvia Pereira	28-Apr-20	The app gives pin numbers which are then rejected consistently Going through this exercise repeatedly is a waste of time. No stars for now. Sylvia pereira .					
Dan	27-Apr-20	1	Very easy to use	no noticeable battery drain. Highly recommended!			
Holly Michelsen	27-Apr-20	1	App won't accept my mobile number. Saying that it's invalid number. A help system in the app would be nice for these problems				
carl Boyd	27-Apr-20	1	Random bursts of outbound network traffic from my device since installing this. Somehow I don't believe that this is all legit.				
Angie Martin	29-Apr-20	1	For this to work it requires location and while this app doesn't store the location google samsung and everybody else does and i suddenly get swamped with location advertising. Thank you but no thank you blue tooth i will agree to not location.				
Carol Wen	26-Apr-20	1	Signed up after watching the news about it	easy and quick	will wait to see how well it works. Anything that can help relieve the pandemic is worth doing.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Anthony Evans	27-Apr-20	Unable to register. Will not accept phone number. Not impressed. Tried all possibilities			
Greg Matthews	27-Apr-20	18	What happened to the 6pm registration time? 8.15pm still getting the invalid phone number message. How many people will now not sign up after 20 plus attempts? UPDATE 27/4/2020 try to enter you number and send without Wi-Fi on allowed mine to connect straight away.		
brian g	29-Apr-20	1	Entering the pin number for some is not easy. Had to help some as you have to go to messages to get pin so app closes. Catch 22		
Gia Kelly	30-Apr-20	This is important and if you are hesitating	know that it isn't tracking your movements... Also that it is going to give you an early warning if you've been in contact with an infected person so you can isolate and get tested and keep your family and community safe.		
Pietro Pinna	29-Apr-20	Works ok and has not had any noticeable affect on battery life. Download it	stay safe.		
Kara Stariha	4-May-20	1	Doesn't work on Oppo phones - the app keeps reverting the background battery saver setting	stopping it running in the background.	
Lachlan Theobald	1-May-20	1	Also having the issue where the app will disconnect Bluetooth devices	although it is a really good initiative	
Zain Soemya	1-May-20	Great App and has had little to no effect on my battery. Please download it to help stop the spread! We need around 10mil to download for it to be effective			
John Louis	4-May-20	Installed on Samsung Gala	y S8 - Constantly flashing up a pop up notices "Connected to Null" / "Disconnected from Null" Very annoying	Have force stopped this app. Please Fix ASAP.	
Prism Presley	4-May-20	2	Asks for location information	hasn't released source code	data is held by Amazon won't work on older phones and requires Bluetooth constantly (opening a back-door to your phone). Typical government funded project.
Lin Fielke	4-May-20	1	Found it annoying to see if the apt actually activated. Got lost in the process. Lacked positivity to go to the next step.		
Marie Mac	9-May-20	Motorola 15 mths old no problems. Leave Bluetooth on permanently because also run Fitbit & hearing aid through it. Only 1% drain on battery. Recharge every 1.5 days.			
Inder Sabharwal	15-May-20	Is this a joke? Can't go beyond registering your phone number - "invalid phone number".			
Karen Carter	27-Apr-20	Happy to use something that will help set us free. Simple to register and non intrusive will allow government to trace the virus.			
Norm Anderson	27-Apr-20	Keeps claiming my mobile phone number is invalid. Another person I know who installed it has the same problem			
Kevin O'Sullivan	26-Apr-20	Easy to install and use explained clearly. Better privacy than anything else I use.			
ed m	27-Apr-20	I had "invalid phone number" issue	but abled to sign up once I eliminated special characters with my name !? I had a full stop in my name.		
Paul Kelly	30-Apr-20	1	Always comes up with invalid phone number. Tried with and without leading 0. Fixed by turning off wifi or getting good cell signal		
Leah Birkett	28-Apr-20	2	Keeps telling me my phone number is invalid. I entered my husband's and it said the same thing. So I can't use it.		
bradley verity	28-Apr-20	Keeps telling me my phone number is invalid	if tried entering it with and without the 0 in the front. Both ways tell me my number is invalid.		
J Augustus Smith	19-May-20	4	No way of turning it off when you're not outside. Wastes battery power with persistent notifications. Security issues still haven't been fixed		
Mark Engels	28-Apr-20	2	App reports an invalid phone number. No matter if it's entered in a 9 or 10 number variation.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Deborah Green	27-Apr-20	2	It tells me my phone number is not valid so won't send me a pin . Have tried with and without the 0 as the +61 was in the front.	
Lisa Lonergan	27-Apr-20	Easy to load. Working well. Don't hesitate to download people. It may save a loved one!		
Stephen Vivash	27-Apr-20	2	Multiple issues: GPL without source code	open unconnected BT battery drain many users report the need to turn off WiFi to register phone number.
dane archer	27-Apr-20	1	I think this app is far less malicious than many other apps. Happy to provide minimal data if it means we can get back to some form of normality	
Stephen Lawson	29-Apr-20	2	No problems installing. A very good idea. I understand how this app works and it will work best if everyone installs it.	
David Asten	4-May-20	A good application. Somewhat tedious to complete the entry process.		
Vivek Manchiraju	4-May-20	Even though I restart my phone for 100 times	push notification still comes up asking to restart. Please fix this asap	
Clark Anderson	4-May-20	Site would not identify my mobile phone number	after many attempts. Very frustrating! Please remedy this problem! fm8	
Jared Leslie	5-May-20	Whenever I play music through a Bluetooth music	It keeps jumping and the only thing that's also using my Bluetooth is the COVID-Safe app. So fix your bloody app government.	
Jonathan Gomez	15-May-20	Please optimise the app for battery. Heavily draining battery and myself and others are thinking of removing this app if this continues as phone is required work purposes.		
Cheryl Goulden	20-May-20	1	Keeps telling me that I am not connected till I tick the battery box. I do it and then then next time I go in it says the same thing	
Tania Paget	26-Apr-20	Easy to set up. I work in retail and want to be able to be notified if there is someone in the vicinity with the virus so I can take additional precautions. Hopefully enough people will sign up so further travel restrictions can be eased		
Peter	Maureen Smart	28-Apr-20	1	Why does it need my location information if it is only using bluetooth? Edit; Apparently this is an android thing. I don't know why they didn't explain this in the documentation
Lawrence	27-Apr-20	As others have said	you've probably given more permissions to some dodgy app you've downloaded that sends you cat memes daily. It's a great initiative	and if it means a faster road to recovery
Carol Wilks	27-Apr-20	1	The App does not work on my phone. Google Play says "installed" but went no further than that. I am not able to enter my details. USELESS	great!
Adam	26-Apr-20	It's works 100% fine. Easy sign up process. Didn't have an issue.		
Theo Galanakis	27-Apr-20	7	App is not working and stuck on phone number verification. Certain I have entered in my phone number correctly yet it still comes back as invalid phone number. Giving it five stars as I whole support the initiative.	
Victoria Redwood	26-Apr-20	8	Android asks for location for Bluetooth but the next screen allows you to turn off location tracking so don't worry. Shame about people not knowing you leave the 0 out if a phone number has +61!	
Kylee Hastie	27-Apr-20	3	I have tried a few times to register	but tells me my mobile is invalid. My husband also had a go on my phone for me and he still couldn't get it working.

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Nicholas Jones	27-Apr-20	3	The validation of the mobile phone number didn't work. I then tried turning off the wifi connection so that only mobile data is being used	it then accepted my mobile number and I registered successfully	
Andrew Sabo	26-Apr-20	1	Simple installation	minimal personal information sought and the SMS notification came through in 5 seconds. Keep safe people.	
Inkie Moyse	27-Apr-20	Feels easy enough to run	only worry I have is it sucking my battery power but then it's not like I'm going anywhere away from my charger anyhow.		
Stephen Cowell	29-Apr-20	Easily downloaded and working in the background. I have no problems or concerns with using the app.			
Reza Parsaee	3-May-20	1	Such a smart idea from department of health to make tracking possible while respecting people's privacy. Thanks!		
gra woz	3-May-20	Would be great if covidsafe ask for confirmation before being switched off. People might switch off all apps and forget to switch covidsafe back on			
CircusSide ShowFrea	4-May-20	I'm not receiving the pin to verify. Tried five times. So absolutely useless.			
Nawal Xxx	4-May-20	I downloaded the app	but very frustrated that it didn't work on my mobile. I don't know the reason	probably it requires certain version.	
Dion McKay	4-May-20	1	Causes streaming to Bluetooth Speaker problem	music pauses every 30 seconds or so	stopped app
Michael McSherry	6-May-20	3	Battery optimization on the app needs to keep being switched on or app doesn't run	even if there's no power saving mode on.	music plays fine again
Nicole M	19-May-20	Since downloading this app	I've been getting device warnings that some apps are overloading the cpu and to restart.		
Luke Snelgar	21-May-20	Causes Bluetooth audio skip. I'm having to kill the app task when I'm not out and about.			
Lydia Prince	16-May-20	I wish it would remind me to enable Bluetooth when I leave the house. I usually turn off Bluetooth to save battery.			
Alexey Akulov	7-May-20	8	Initially didn't recognize the phone number. Now requires permissions which most likely will ruin my battery very quickly. Was it the only practical way to achieve the purpose?		
Mel Wu	30-Apr-20	2	Kept saying invalid phone number !!! VERY Frustrating ! Got through eventually after a few days. Difficult to get and enter PIN with only 4.50 mins.		
Paul & Lesley Earner	28-Apr-20	I tried to activate the app but it keeps telling me that my mobile phone number is invalid.(whether I include the initial zero or not)			
Warren Whittaker	28-Apr-20	I can't get access. The system will not accept my mobile number on my Android phone. Installed and uninstalled three times. To much effort so I give up.			
Ryan Cooley	26-Apr-20	2	Registration was fine. Just had to wait a little. People need to dial the whining back	it was only just released today. Sooking for the sake of sooking.	
John Mahoney	17-May-20	3	Lates version has battery usage issues that earlier didn't. It would appear that the app only needs Location permission	with Location turned off the app works. Earlier: I would like to contribute but I never have Location on so will not use this app.	
Simon Fearby	27-Apr-20	1	App is broken on Android 10. Bluetooth only works while the app is open (not in the background). Also not optimised for Huawei Mate 20 Pro.		
shane taylor	26-Apr-20	Smooth registration no issues at all. So important for all to do.			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Jami Godfrey	27-Apr-20	2	Please sort out issues with login. Cannot login and says my mobile number is invalid. Tried both with and without preceding 0		
Tero Jelekainen	28-Apr-20	So everytime I try and put the security code from my txt messages in it takes me back to the opening screen. I then need to put my details in again and of course you need a new code and I'm back where I started?			
Andrew Whitbourne	26-Apr-20	Works fine. Waited until after 6.00pm and logged on with no problems. Everyone needs to do this.			
Darcy Maine	27-Apr-20	8	I've downloaded	sooner we all download this sooner we get to the otherside. You can delete at any time. You might just save a life	even your own or your kids! Conspiracy theorists paranoia peeps and paranormals
Belinda Honeyman	28-Apr-20	I can't get past the phone number stage. Keeps telling me my phone number is invalid. I have had the same number for donkeys years. I even tried without the zero. Unless someone can help me this app is useless to me.			
Sean B	26-Apr-20	10	If it "doesn't need to track your location" according to ScoMo	why did it just ask for permission to access my location. No thanks Jim.	
Ronald Ng	26-Apr-20	2	I've had the app installed for 5 minutes and I still haven't contacted COVID-19. This app definitely works	would highly recommend	
ayodhya peramuna	29-Apr-20	1	If you are having troubles while registering saying your number is invalid	try to change your username.	
Judy Vardy	29-Apr-20	1	Not enough time to find and enter pin. Took me at least 10 times kept saying invalid as time ran out.		
M O	5-May-20	Just ridiculous. Setting up is complicated	connecting is complicated	operating is complicated. Oh come on! Give a nice juicy slap to the app creator from me!	
Tim Gilgen	16-May-20	I get the pin number to my phone after the time expires to enter it. After 3 attempts I'm now removing it. Epic fail scomo			
Matthew Marks	14-May-20	It's trying to pair with my colleagues Iphone every few minutes. Very annoying having this request pop up repeatedly.			
Voni de Lussanet	18-May-20	It's draining my battery on Android. Had to turn it off. ☹ Might try to remember to turn it on while in public places though.			
Andrew Wotton	27-Apr-20	If the app only uses bluetooth to connect to other phones to keep a record of interaction with others. Why does it require Location permissions when it is installed?			
Sandra Torr	28-Apr-20	Why won't the app recognise my mobile number	it keeps saying it's an invalid number. I have tried uninstalling a couple of times but still the same		
Stephen Iacono	26-Apr-20	2	Took all of 60s to download and register. For those of you rating this app 1 star you must be doing something wrong. This app works fine.		
Jonathan Day	27-Apr-20	Easy to setup and use. Does exactly what is needed while protecting privacy. Good work			
Nick Nemet	27-Apr-20	2	Didn't work.. Apparently I had an invalid phone number.. Until I turned off WIFI. Then worked immediately.		
Joe Feng	26-Apr-20	2	Whoever said it is not working needs to know the app is up for running from 6PM. It is all good now. Although I am not sure why they put it up so early.		
Doug Mennie	26-Apr-20	Had no issue registering	maybe those with trouble are not leaving the 0 out as you don't include it after +61.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Anita Martlew	27-Apr-20	So easy to install and totally worth it to get restrictions lifted. Happy to have it.					
Philip Clark	26-Apr-20	7	Please disable the always-on notification. If you want people to actually keep this app active and keep notifications on	enforcing an always-on notification is the quickest way to discourage that.			
rahrah_rah	29-Apr-20	2	Easy to install	hardly know it's there	no noticeable battery drain and now a little peace of mind.		
Nom Deplume	26-Apr-20	Painless	simple install. A great way to fast track contact tracking. Please join for friends and family.				
Michelle Hanley	27-Apr-20	Could not complete registration. Get pin button is not sending to a 6 digit to my mobile number. Is this not working yet?					
leo perez	27-Apr-20	1	I try to download tha app and when i put my ph number say invalid number	so what i did is i disable the WIFI and them the app work perfect and after that enable the wifi on my ph			
Simon Queen	28-Apr-20	2	App is good but it interferes with my Bluetooth handsfree and my BT ȳŽš. can't receive calls via normal BT.				
Debbie Ranty	28-Apr-20	2	You NEED to TURN OFF WIFI to register. Or else you will get the "invalid phone number" message.				
Don Ferdinands	26-Apr-20	Simple setup and easy to get going. Don't see any privacy issue. Use it and possibly save a life.					
Paul Riley	27-Apr-20	1	App doesn't recognise my phone number during registration	doesn't matter how I try to enter it. Fail.			
Luke Martin	29-Apr-20	2	Chews power & constant notification that can't be cleared. Remove the notification as it should just run in background.				
Byron Brasier	30-Apr-20	1	After installing app Bluetooth earphones get disconnected every 10mins then reconnected seconds later. Better fix the bug or many people will uninstall app because it's annoying.				
Scott Caporn	29-Apr-20	It has run seamlessly since being installed with no noticeable impact on battery life.					
Graham Barlow	3-May-20	The pin number is not displayed long enough to record it. The app is therefore mot user friendly for elderly people.					
Jeremy Rigby	1-May-20	The key to pubs	clubs and community hubs! Forget the hype and just download the app so we can all move on!				
Nick Orr	2-May-20	Using the app because I want to go back to the pub. Please fix it so it doesn't mess up other apps using Bluetooth					
Craig Donaldson	3-May-20	App does not work unless it is left open and the phone unlocked with the screen on. It either force closes or just disappears					
senays playlists	8-May-20	2	App causes music to be interrupted every few seconds on blue tooth heaphones. And extra battery drain.				
Fergus Barrett	13-May-20	Works perfectly	no battery drain and runs in the background.				
Safy Saeed	26-Apr-20	Dev. Need to look at the registration issue of invalid number	other wise looks like a very well designed app				
J E	27-Apr-20	Not working	kept saying my number is invalid. I tried few hours later	it is still not working.			
Elisabeth James	26-Apr-20	9	Great App	tried 3 times to sign up	but keeps telling me my phone number is invalid	WHY.....Has anyone else got this problem? please help as I would like to sign up.	
Angela Van Mastrigt	28-Apr-20	App is saying mobile number is invalid	it's not. No trouble shooting or number/email for issues. If the govt wants citizen to participate then get the app working properly.				
Jase The Ace	26-Apr-20	20	I tried to help but my mobile phone number which I've had for 20 years was "invalid". Fundamental flaw that won't result in me trying to register again.				

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Terence Venes	27-Apr-20			
Alex Le Fevre	28-Apr-20	Apparently my mobile number is invalid and there are no instructions on how to fix the issue to progress my registration.		
yvonne sharpe	28-Apr-20	It didn't work well for me. have android phone you put phone number in it sends you a pin back you go to your text messages retrieve it same all over again different pin so gave up. stuff it.		
Ben Walden	28-Apr-20	I can't even get started	keeps telling me my number is invalid	I can put the number in with or without the 0 and still doesn't work
deb henderson	26-Apr-20	Very important in this unprecedented time	to have an app that can assist health officials in controlling and containing this devastating disease. Thank you.	
BC ME	28-Apr-20	8	Downloaded and answered a few questions. App up and running so quick. No issues other than some of the losers who rated this app poorly because of their political view. Stay safe all.	
SandgropersWA6000	27-Apr-20	So I have just found out the mobile number I have been using for ages is invalid. So much for using the app.		
Ryan Souwer	27-Apr-20	Easy to install. Simply explains the data sharing and storage.		
Lachlan	26-Apr-20	8	As soon as I get to the part to put my phone number in	it says invalid number. I've tried 04 or just 4 at the start. and if I get rid of both 04 I can't get the pin because I don't have enough digits.
Matthew Graham	28-Apr-20	Installed fine	uploaded all my information correctly including phone number. Not sure how it will go with battery life. Samsung S9. I'm an interstate truck driver so figured it best I get this.	
Duy Huu Nguyen	26-Apr-20	23	I can't register. I entered my correct phone numbers but it kept saying something like 'invalid numbers'. I've tried registering 3 times	all failed. So frustrating!
Bartosz Ornatowski	29-Apr-20	No crashes. Set up an account	allow it to run in the background and forget about it until things get back to normal.	
Amanda Chidiac	29-Apr-20	1	Finding myself and my family much more safer when needing to go out and are worried about 'Covid-19' contact with a possible confirmed stranger...I think the 'Australian Government' has set this platform up very well	in order to keep all Australians Safe even at home. I've read about this App very
Sarah Callaghan	2-May-20	Download and registered without any issues. Simple registration process.		
David Sin	4-May-20	Updates the 3 may update. App doesn't work at all. restarted phone. Doesn't work. Uninstall attempted to reinstall...freezes during install. CBF anymore.		
Ruhi Yaman	15-May-20	Falls off for no reason. Need to check and restart often which defeats the purpose.		
Jacob Lindquist	16-May-20	2	When you finally reply to my emails just let me know when you fix the app. No customer service at all. Have been trying for nearly two weeks to get in touch with someone. If only we could rate zero stars....	
David Purcell	28-Apr-20	1	Took less than two minutes to install and register. The only permission it gets is location.	
Jordan Coggins	26-Apr-20	11	Works and easy to use. Now it's after 6pm	your phone number will work - ignore all the one star reviews from early on. Glad to contribute to keeping our community safe. Get around it!

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Tyson Kleesh	26-Apr-20	16	I'm fine with signing up with this but it says my phone number is invalid - I've checked my input several times. I've done it right but it still says invalid	no way to access support...
Helen Jackson	26-Apr-20	1	Great app but it won't accept my phone number so I can't register. Have tried all ways to put in,	
Yang Liao	26-Apr-20	The registration was smooth and I hope I will never try its "upload my data" function.		
Rob Tibbett	2-May-20	1	Easy to install	will save lives and will help get all our lives back to normal more quickly. No problems with privacy. Thank you.
R Binskin	27-Apr-20	3	Easy to install on my newer Android phone. My partner has an old ver 5.1.1 android phone and the app is not available to download.	
scoobie doo	27-Apr-20	1	This doesn't share as much as Facebook so what is everyone worried about? I for one do not want to pass this on to anyone else (or get it myself) so if this can help stamp out this Pandemic I am all for it. I don't use Facebook & had no hesitation in using this. ☺☺	
Mark Sanderson	26-Apr-20	2	Registration was easy	no password to remember. All good so far.
Joel Chong	27-Apr-20	1	Great job Australia. I wasn't sure we'd be able to make the strides we've made with COVID-19 with a strong privacy policy...but here we are. Thanks to everyone who's made this app happen!	
Tom Kuhn	28-Apr-20	1	For everyone struggling with the invalid number issue	disable wifi and continue the registration process via 4G/3G.
K R Ravichandran	27-Apr-20	1	Good initiative. Use technology when you can for greater good. People share their data with hundreds of other apps without a thought	but when government asks for it they have a million concerns. I don't do any criminal activity
James Catt	27-Apr-20	1	Cannot enter my mobile number	so cannot register. Using Samsung S7 (I know old phone!).
Harold Shaw	26-Apr-20	Great idea. Easy to use. Hopefully will enable earlier easing of restrictions and keep people safer. Get into it everyone ☺		
Andrew Pelly	28-Apr-20			
david wong	27-Apr-20	I have downloaded the app and everytime it gives me an error message when I input my mobile number	is there anything that I have missed out ?	
Cameron Bain	27-Apr-20	2	Says my phone number is invalid when registering. Then I read the advice to wait until 6pm today before downloading as registrations have been disabled until then. Will try that.	
Rita Turton	26-Apr-20	50	My samsung J3	2016
Bob Markcrow	26-Apr-20	5	This will save lives. READ the registration problem feedback. Wait to register but when it goes live register!	
Kate O'Callaghan	28-Apr-20	I am unable to sign in to the app as I keep getting an 'invalid phone' error message...I am not entering the wrong number		
paul bozza	27-Apr-20	How can you put pin code. Everytime go to retrieve from messages the app resets. Check your app before launching to market!		
Indy Indie	27-Apr-20	Nearly 24 hours after its release and it failed in the registration process. Keeps saying my mobile number is invalid		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Hyphen	29-Apr-20	I had to manually disable battery optimisation for the app	but other than that it works fine	
Darryl King	29-Apr-20	1	App will not accept my mobile number. This with and without the leading 0. Ststes number is invalid.	
Stacey Counsell	2-May-20	1	Has made my S9 infuriatingly slow	even a lag when typing messages! This app needs work if they want us all to have it on our phones coz I'm ready to delete it.
craig m	2-May-20	3 stars if it gets us out of god damn lock down. 4 stars if it keeps us out and reduces transmission. 5 stars if theres no privacy breaches. Worth a try. I gave it 5 cause im blindly hopeful. We will see.		
Mohamed El nakib	2-May-20	1	Keeps interrupting my Bluetooth connection to my Sennheiser 4.50HD R and no way to turn the program off without forcing it to stop.	
Brendan Terrett	1-May-20	1	Working well for me. No problems with installing and signing up.	
David Padbury	2-May-20	2	Seems to requiremy bluetooth be on at all times. What a drain on the battery life. Surly there is a work around	
Steve Blk	6-May-20	2	Not good enough 17 new cases	this apps dont flash that in text automatically to alert residents or visitors to Westmeadows Vic. It expects people to browse thru news might as well use ABC news apps.. no diff
Fish Whistle	7-May-20	1	Great initiative by the government! Works perfectly. Great tool for gather information about the spread. Especially after the lockdown ends.	
Tatang Clan	18-May-20	Seems to be working just fine	but I wish it would automatically turn on when I started the phone.	
Pete O	27-Apr-20	1	Working fine for me. Took a few hours though to get my pin	guess it was just congested.
Leslie Macnaughton	26-Apr-20	3	Quick & easy to install. Hope this helps us all. Google already knows who	where why and how; so no biggie.
Kevin Shen	27-Apr-20	Simple and great app. UI is clean and polished. Go give it a crack to help stop corona		
Ben Lamont	30-Apr-20	28	App seems like a good idea and functions with minimal battery usage in a privacy-conscious manner as far as anybody can tell.	
Paul Tondo	27-Apr-20	1	Like many others...invalid number...but found issue is with internet service ie Wi-Fi..used data and then registered OK....A PAIN. !!!	
Nikki Lambourne	28-Apr-20	App won't recognise my mobile number - states invalid number. Tried with and without 0	uninstalled and reinstalled. Nothing works. 6mth old Android phone.	
Theo Pronk	27-Apr-20	Great Bluetooth will work even if you are out of reception areas.		
Terry READ	27-Apr-20	Cannot proceed pass entering my mobile number	no matter if I enter with or without '0' in front	it says 'unvalid mobile number'... !
Kaivalya Jani	27-Apr-20	As a health care worker - I find it's a great initiative. Please support this initiative. The app data is more secure than any public profile such in social media.		
Si	26-Apr-20	104	Doing my bit for eliminating COVID-19 in Australia. Bit embarrassed for all the people that downloaded the app and tried to sign up before registration was open and then gave it one star.	
26-Apr-20	2	Straight forward. No problems installing and registering. (6.20pm - 26.04.20)		
Janie Iwanec	27-Apr-20	1	Get the pin # was a nightmare. The number was in small script and did not provide enough time to even write it down. More time to absorb number.	
Trisha Colotto	26-Apr-20	9	I'm attempting to register but it does not accept my mobile number... Saying its not a standard number???? It has +61 so I remove the 0 and only enter the rest easy	can't see what the problem is.

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
vikkie Hollander	27-Apr-20	I found getting pin while keeping open a little difficult	perhaps keeping code to four characters would help.	
Lachlan Palmer	27-Apr-20	1	Seems pretty benign so far	not invasive. If it helps keep the virus under control I am more than happy to use it.
Catherine Denehy	27-Apr-20	Easy to sign up. Feeling the aussie spirit doing our bit to help keep info flowing to help assist stopping the spread. Everyone worrying about privacy	I think our everyday lives on smartphones has already shown our priorities with this issue. Well done.	
Michael Gribble	27-Apr-20	1	Quick and easy to install. Needed very little personal details.	
Daryl Ung	28-Apr-20	1	Really doesn't use much battery on Android. WhatsApp and Facebook running in background uses twice as much!	
Don MILLS	27-Apr-20	Very easy and fast to instal - this App will save lives. Excellent no problems.		
Graeme Wilson	27-Apr-20	Very easy and user friendly. Everyone should participate	even those paranoid about their privacy.	
Tracey Newman	26-Apr-20	I guess the glitches the one star reviewers mentioned are fixed because it took me about a minute to install.		
Bhappiikhat	1-May-20	Did not accept my phone number	claims i have a "invalid phone number" when it functions perfectly.	
joey scicluna	28-Apr-20	When registering. If notified "Phone number invalid" when trying to receive your pin. Try turning your Data on	then resending.	
Chris De Weyer	1-May-20	2	I registered after 6pm	no issues. Quietly working in the background.
Tyler Osborne	4-May-20	3	Please get this if you want to to keep friends and family safe. Benefit = you know if someone was infected and you risk passing it on Risk = someone hacks the government and gets your mobile number	
Lisa Lambert	26-Apr-20	2	Super easy ☺ Such a shame to read so many bad reviews based on the fact that phone numbers were INVALID - Remember to drop the first 0 when using +61 format.	
Aaron	1-May-20	3	Extreme battery drainer on Android. Needing to recharge every 9 hours 15 minutes. Your info gets sold to overseas 3rd party companies for government profit. Error in notifications being sent out. Uninstall time	
Toby Charlton	2-May-20	Drains battery. Please give option to only activate and use Bluetooth if you're away from the house.		
Shivanthan Balendra	30-Apr-20	So far so good. App is table and tested to be clear of any security issues. Encourage everyone is install and support the government in further containing the outbreak		
Ben Southwell	3-May-20	1	Government has stated that the app won't collect location information but it tries to do so.	
Cameron Byfield	1-May-20	1	can't register. stupid thing keeps saying my phone number is not valid. you want us to register and keep Australia safe then fix the app!	
Rachel Bird	4-May-20	Now working. Couldn't get the PIN at first	somehow it started working after fixing the permissions.	
Jo Barkworth	20-May-20	It would be good if the app could alert you to the fact that you have been in close contact with another person to REMIND people about social distancing.		
Tony Sharpe	27-Apr-20	8	Two words.... CAPACITY Planning. I guess their sms server is receiving heavy traffic right now	but no PIN received and option to resend greyed or until I've waited for a timeout of 5mins. And you want an update of 40% (so 10 million people)? Bzzttt... Thank you for playing. Next contestant please.

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n	please get on board with this	the qui can def covid19
Naomi Franich	26-Apr-20	1	Easy to set up	only took a minute to download and register	everything worked perfectly. Everyone	please get on board with this	the qui can def covid19
V M	28-Apr-20	2	Why does the description says the app is not tracking users location and yet when we start using the app it asks for permission to use location services. Else would have been a 5 start				
Bradley Potenzi	26-Apr-20	1	Registration worked for me	was pretty simple. Hopefully enough people get on board for it not to be a waste of time.			
Rowan Wyborn	1-May-20	10	Have not noticed any impact on battery life	all fine. Security seems well thought out. First time I have seen such a well made gov app.			
Mike Parfitt	26-Apr-20	1	Installed and registered easily. Hope the messages are few and far between!				
Raj Poonia	27-Apr-20	1	The app is not accepting my correct mobile number which i have since 2006. Unable to proceed further in installation.				
Denis Voochichi	27-Apr-20	1	As a software engineer	the implementation of this from a data privacy is exceptional!			
A Google user	27-Apr-20	1	Apparently my phone number I've had for over 8 years is invalid. Tried 14 times	couldnt recieve a pin therefore couldnt register. Deleted app.			
Marg Williams	26-Apr-20	12	I have installed but it needs access to location services. As I understand it this should not be necessary!!! Probably won't use it now.				
Lincoln Ramsay	26-Apr-20	1	Quick and simple to setup. No nasty permissions. Do your bit to help us ease restrictions.				
David Radnell	27-Apr-20	1	I am happy to download the app if it helps keep the virus in check and allows the government to relax restrictions.				
A Google user	27-Apr-20	1	Make sure your Wi-Fi is turned off to register. I installed and uninstalled twice and it wouldn't recognise my phone number until I turned wifi off.				
Barbara Staite	27-Apr-20	1	Won't accept my mobile ph number. I tried it without the leading zero and several other ways.				
Peta Osborne	28-Apr-20	1	It would not work even after turning off Wi-Fi so I switched off my phone and restarted it. THEN it worked!				
Peter James	26-Apr-20	1	Easy to register. Pleased to be doing what I can to get beyond this pandemic asap. Great app to assist this goal				
Influential Missions	27-Apr-20	1	Is it possible that this app interferes with the Google Maps App? Mine crashes	and I cannot use it anymore.			
Hossein Zounubi	26-Apr-20	1	Installed easily. Registration is straight forward and transparent.				
Maureen Smith	27-Apr-20	1	Very easy to install . I feel it's a good idea	so will feel safer when I'm out shopping ect.I			
william Burke	29-Apr-20	1	Keeps connecting and disconnecting for nearby Bluetooth sources extremely annoying as it pops up on my screen all the time i will be uninstalling hopefully they will fix it soon				
Grant Doran	29-Apr-20	1	Easy install and configure. Doesn't seem to chew through as much power as I thought it would.				
Lucinda Hossack	30-Apr-20	1	It's a clever app but if you put a thing in where you don't need blue tooth on when at home to save power				
Peter Bon	3-May-20	1	When you get to point of entering PIN that is sent via phone it locks up and install will not complete. Tried reinstalling	using 4g only still no go.			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
PIN-WEI TU	4-May-20	I wanted to help but i failed registration. It keeps showing my mobile is an "invalid number" and of course i have tried both without putting the first number 0 or with 0 but all have been denied?		
Justin Foley	5-May-20	1	Everytime the app handshakes with another blue tooth my Bluetooth headphones drop out. Not world ending but annoying particularly if I am on a phone call.	
Nathan Locke	8-May-20	Works fine I guess	just wish I could turn off the app while I'm at home. No need for it to be running 24/7 if I'm in my own home.	
frank saunders	13-May-20	For oppo Reno z users turn battery selection to running background from app management don't use the opposition from covid permission screen I have oppo and had the same issue as Jon Smith		
Craig Ringer	13-May-20	1	The update description is "bug fixes". Seriously. Changelog link or release notes please? You're expecting trust here. Show some. You also continue to violate open source licenses and fail to release source. I reluctantly installed this in the hope you could do better. Show me you can.	
Araluen Ekala	15-May-20	Battery optimisation option constantly flagging every time the app opens regardless of how many times I select allow.		
Cameron Krook	26-Apr-20	4	PIN not received (twice) within 5-minute time out	and resend PIN link doesn't work. Hard to understand how such a simple but important app can be faulty on release.
justin hanley	27-Apr-20	I'm hoping in the future this app will feature reviews from Barnaby Joyce on where to find the best happy hours and will alert me via Bluetooth when I'm close to one.		
Lachlan Turnley	26-Apr-20	A really good public health measure	and has run real smoothly since opening registrations	
Norman Mazlin	28-Apr-20	1	Simple and easy to load. Runs totally in the background.	
KA	27-Apr-20	Quick and easy step through process. No issues on sign up.		
Alan Lipman	27-Apr-20	1	Simple to load	works in the background doesn't eat up much power.
Hannah Farmer	28-Apr-20	I have tried to sign up but it says my mobile number is invalid I have tried multiple ways of putting it in but nothing has worked. Ughhhh		
Arthur Labiris	4-May-20	4	App hangs on startup with new update for a long time. Eventually wakes up after a while and goes to next screen.	
Elly Byrne	26-Apr-20	Easy to install and register. Hopefully a great tool to assist the health department		
Susan Fischer	26-Apr-20	4	When I go to get my pin (in messages) it takes you back to the beginning and you can never get to put the pin number in!	
Brett Reilly	26-Apr-20	1	So easy to register if you have an IQ above 0. If +61 precedes the mobile number you drop the first 0. Great initiative brilliant idea!	
David Mathieson	1-May-20	2	Reinstall a few days later worked	but why is it needing location approval. It's a contact information not a location information app.
Clara Crompton	27-Apr-20	1	Apart from the hiccup with initially not being able to register all is good now. Doesn't seem too heavy on battery usage either.	
John Paget	26-Apr-20	Easy to install. If everyone was to do this I would feel a lot safer. Bluetooth runs all the time on my phone to connect with my car. Do not see any more battery use than normal . Sign up everyone and let's get this country out of quarantine		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Punam Moorjani	26-Apr-20	Easy and smooth registration! All done in under a minute.			
John Rouse	28-Apr-20	The app does not recognize my mobile number. Update. Finally managed to have it recognize my phone number.			
Gail Woodcock	28-Apr-20	Can not get my PIN as it is saying my phone number is invalid. Dropping the "0" from the phone number is not helping. Still saying my number is invalid			
David Bowden	27-Apr-20	Simple and secure	great app. Anything to assist in the safety and well-being of myself and others.		
Michelle Kenworthy	27-Apr-20	1	Great app, Easy to install. Register, Let's hope I never get a phone call!		
Mohd Hussain	26-Apr-20	15	Good initiative. We might not know whether we got in close contact with a COVID patient until some one informs us or when we start showing symptoms. I would definitely recommend the app installed on our phone to save our lives as well as others.		
Olivia H	29-Apr-20	When out and about in certain areas it fails to run e.g undercover car parks in shopping centres when getting groceries and other necessities. Please fix			
Sze Yen Tan	30-Apr-20	1	It says this app doesn't collect location info but it requires you to enable your location service on the phone. Not sure why.		
Ian Caughley	1-May-20	1	This kind of contact tracing is a great idea	and my research indicates next to no privacy issues.	
jo by	4-May-20	1	Samsung S5 Gt-19507 smart mobile phone cannot download this app. Must be millions of Australians with the similar issues.		
Sally Stephenson	15-May-20	Storing the encryption key(s) with the data seems crazy? As for protecting our privacy by legislation	I'm so reassured and comforted ... :-(
Dale Richter	27-Apr-20	Didn't have any problems downloading or registering. So far all good.			
Jo Coleman	26-Apr-20	Very easy to use	registration took less than 1 minute.		
Simon Hunter	28-Apr-20	1	I can't connect my phone to my Bluetooth headset in the ute with this application installed. Country music > staying safe from Kung Flu.		
Boyd Moody	26-Apr-20	2	Quick to download and easy to register. Great initiative to help alert potentially infected people.		
Tom Zappala	28-Apr-20	App runs fine thus far with minimal hit to battery life on Pixel 4XL. Happy to be a team player!			
Todd Jenkinson	26-Apr-20	1	Easy to install and set up	no problems. This app will help get us back to a semi normal life.	
Helen Jeong	26-Apr-20	1	It doesn't accept my mobile so I can't get the PIN. Read the other posts this isn't an issue anymore. Was easy to download and is running on my phone now:)		
Anthony S	26-Apr-20	FYI: you can turn off the notifications if you want. Just go to Application manager>COVIdsafe>Notifications and then turn off "Allow notifications".			
Julia Morison	28-Apr-20	1	Unable to use as says my phone number is invalid. Tried to It a couple of times	with and without the 0 but still says invalid.	
Jason_Mate _	27-Apr-20	Apparently my mobile number is invalid? Anyone else have this issue?			
Anthony Adamo	28-Apr-20	1	The app doesn't chew battery at all	full day of use and not noticeable difference in my battery use.	
David Hart	28-Apr-20	1	Simple	probably does what it suppose to in the background	but would be nice to see some feedback like how many contacts you've had in 24hrs and last 5 days. Etc

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases.	That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Stephen Engwicht	27-Apr-20	Easy install and registration. Minimal personal information required.			
Keith Harrison	30-Apr-20	1	Could of used the MyGovId app for verifying rather than pin. The app seems to interfere with comms to other Bluetooth devices such as headphones		
brad sawford	26-Apr-20	2	Simple	it's new with lots of traffic so use patience when signing up	pro active way of keeping us and our country safer
Stephen Thornton	27-Apr-20	Unable to register despite several attempts. Why should I have to keep on trying.			
Ross Graham	28-Apr-20	Tried to download... couldn't get past the phone number... even though I put in the correct number it kept coming up invalid number...			
Brendan Gooden	26-Apr-20	38	Good initiative	everyone needs to get on board and download the app so we can relax the lockdown measures. Those concerned about privacy likely have other apps on their phone that collect more data than this app (think Apple Google maps etc)	
Claire West	26-Apr-20	1	Not sure why available before you can register..however that doesn't make it worth a 1 star review... giving it 5 stars as will save lives. Available after 6pm to register. Just wait everyone....		
Justin L.	26-Apr-20	Seems to work well	signup was straightforward and phone number verification worked.		
Glen McDonald	28-Apr-20	3	Causing major issues with Bluetooth connectivity to other devices. Also a massive battery drainer.		
Ben	27-Apr-20	1	Seems good! Great initiative	glad to see the government taking a technology-first approach. Great stuff.	
David Phillips	27-Apr-20	1	Like everyone else easy to use	and we may get out of jail faster if we do it. Plus when outside it is a comfort knowing it is looking out for me	I have chest problems and do not want this going after me!
Diego Felipe Beltran Garcia	26-Apr-20	1	Not issues at all with my phone number. Just waited to register after 6 pm as PER GOVERNMENT INSTRUCTIONS and worked without issues.		
Misho Lad	27-Apr-20	Doesn't work	keeps telling me my number is INVALID	when its perfectly valid... unlike this app.	
Dhaval Dubal	27-Apr-20	1	Other Bluetooth connections started playing up	please fix the bug. Uninstalling now.	
Pawan Narayan	26-Apr-20	Everyone should download this. Simple to set up and data usage policy has been made very clear. We should all be doing our part to prevent an outspread and this app goes some part of the way.			
Arief Secahusada	27-Apr-20	3	Easy to install and it has been running for the whole day without any issues on my Android phone.		
Todd McFarlane-Smith	26-Apr-20	5	I am really looking forward to the opening of the registration process. This is yet another example of the innovative and technically advanced IT industry that we have in Australia.		
Max and Maree Hume	29-Apr-20	4	The app interfered with the bluetooth phone connection between my phone and my car. I couldn't make or receive calls on handsfree.		
Martha Rossiter	8-May-20	Keep on getting notifications but cannot determine why. Cannot fix it.			
Trevor Preston	8-May-20	1	Why does it keep telling me my phone number is wrong I have tried to down load this app 20 times (help).		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Kim Koshekin	16-May-20	Cant register. This app is garbage. Cant get an sms verification number. Thanks for nothing Australian government.			
nathan mansell	26-Apr-20	5	Easy sign in. If it initially says come back later just keep refreshing until it loads. It will let you progress to the next stage		
Grant Tebbutt	27-Apr-20	1	I does not work. It will not accept a phone number continually says try again later. It does not work.		
Walid E.	27-Apr-20	2	I tried to put my phone number more than 10 times	uninstalled and install 4 times	still telling me invalid mobile number...
Chris Welsh	26-Apr-20	11	Considering this as volunteering for the "Great War" of 2020	as I work in the medical world. Install was easy and registration worked (6:06pm) as advertised. I will continue to review and provide feedback moving forward. Feedback for the developers: Re signup. Not everyone in the community will und	
Daniel Gooding	28-Apr-20	2	App opens and registered no problem. There is interference with using Bluetooth speakers intermittently which only started after installing this app		
Kate Heathcote	27-Apr-20	1	If your getting invalid phone number switch off your wifi and Bluetooth on your mobile and try again.		
Brendan Hawken	26-Apr-20	46	Right idea	wrong execution. It will notify if there is "Close contact" - within 1.5m for 15 minutes. What about workers dealing with customers	interactions of less than 15minutes but still a strong chance of transmission. Can't see how such a lenient rule will help anyone detect their exposure to
Dennis Creighton	26-Apr-20	Great concept. So far it works as expected	no problems.		
Elizabeth Smyth	28-Apr-20	1	Didn't recognize my number at first- try uninstalling them re-installing the app	it let me complete the process the second time.	
Cameron Way	26-Apr-20	3	Start with dropping the first zero of your mobile number	the rest is So easy & feeling part of the community in beating this virus...	
john Mac	26-Apr-20	12	Can't register. When I get a pin it won't take me back to enter the pin it starts the register process again. Over and over and over!		
Ben Alex	27-Apr-20	1	Very easy to setup. No concerns with privacy - rather my data is stored securely on AWS	than onshore.	
Kt	26-Apr-20	Downloaded and registered quickly and easily without a problem.			
Peter	29-Apr-20	1	Turn off wifi when registering in the app. Wifi seems to cause issues with phone number registration sometimes		
Jeannie Williams	29-Apr-20	1	Easy to install and register details. No problems at all		
Wil Barrett	29-Apr-20	2	It's fine	but I really dislike having a constant notification that I can't remove. Please add an option to remove it	
Josh Wilko	14-May-20	Total rubbish. A repurposed "find my dog" Bluetooth app. NOT use GPS or location data. Only Bluetooth. It will not track your location. WILL NOT MAKE YOU SAFE.			
gachagirl_roblox1	1-May-20	Easy set up	does take up about 20% more battery with the bluetooth on.		
Carl Hade	8-May-20	1	My issue is my Bluetooth is cutting out disconnecting me from my watch every 10 seconds... only since i've installed this		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Annette Lynch	14-May-20	This is a great app just wish a few more people would download it if it keeps you safe people use your head I would rather be safe then be sick and maybe not make it if free it not going to cost you it will keep you safe thankyou for this app		
Andrew M	18-May-20	Haven't had any issues. No noticeable battery drain. The new notification icon is much better		
Peter Davidson	26-Apr-20	12	Doesn't work. It says "invalid number" at the sign up stage	in the request PIN page. So uninstalling. Big fail. Stupid Govt cant make a app that actually works.
Rob Webber	26-Apr-20	55	People will give up at the first post if they can't put in their mobile phone number. Keeps telling me mobile phone not valid. Have tried numerous variations.	
Peter Sheehy	27-Apr-20	1	Cant get past the point of putting my number in. It appears to be a common problem as all the 1 star ratings are complaining for the same reason	
Ron West	27-Apr-20	1	How can you rate this app it is not accepting phone numbers. And wont allow you to register. Im the 3rd person in our group to try. Monday 27 04 2020 .	
Andrew Leathan	26-Apr-20	1	Great app easy to setupI've seen the one stars reviews don't forget to remove the ZERO off your number	
peter homolya	27-Apr-20	1	No problems downloading or registering	just hoping more people take this on board so it can be even more effective and hoping I never get a call
Reid Clan	27-Apr-20	2	Done and have spread the word. Went into notifications in Android settings to disable the top bar notification from constantly being on.	
Wil Lehmann	27-Apr-20	The app had problems with my phone number but now it is fixed.		
Lisa Kitromilidis	26-Apr-20	15	I like the idea of this app but I tried to sign up and it keeps saying invalid phone number no matter which way I put it in with or without the 0... I'm going to delete the app for now	
Maree Shelly	27-Apr-20	It says I have an invalid phone number and doesn't let me register. I have uninstalled then re-installed but still no joy.		
Ken Eley	26-Apr-20	Easy to install	vital to help tracing and with little security risk imho.	
Maulik Ghetia	27-Apr-20	I tried to complete. But it says a invalid mobile number and didn't let me go further. It works now.		
Craig Colnan	26-Apr-20	3	For those that can't work out how to register your phone number	just leave off the leading zero. Pretty standard stuff when using +61. Good health to everyone.
Jaime Bowler	26-Apr-20	1	Im putting my mobile number in but it keeps saying invalid number	I don't understand why
Manpreet Singh	30-Apr-20	2	Since I installed this app the bluetooth connected speaker skips/pauses the audio for 2-3 seconds after ever minute. This is a **bug**.	is the registration still down. Have now registered ðŸ˜\\$
Jun Zhang	29-Apr-20	2	Done my part to install it after some studying of how it works. Maybe should give out vouchers for toilet papers for people who have the app running for every certain time to encourage more people to join.	
Patricia McKay	2-May-20	Can't get it to work. Put in my phone number and tap get pin but nothing happens.		
Mihai Kaszab	3-May-20	Not ready yet ever since I downloaded the app when I use other Bluetooth device they keep on disconnecting will disable until this is fixed		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases.	That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Michael Burr	26-Apr-20	16	If only people would stop and read for a moment instead of complaining	they would realise you have to wait until 6:00 pm to register. Stop giving the app one star when it is you who have failed!	
Ryan Gossink	26-Apr-20	1	Easy to register	hopefully the app will help locate	trace and control infections.
Thanh Nguyen	26-Apr-20	1	Download it and do your part to help. Ignore the muppets who gave it 1* because they couldn't register it before the service was even activated. Takes less than a minute to register.		
27-Apr-20	Light app	it's transparent with its objectives and privacy measures. I'm pleased to do my part to help control the virus			
George Bekiaris	26-Apr-20	It takes 30 seconds to download	install	and register your phone. Straightforward.	
Hey My dudes	26-Apr-20	13	I cannot register as it continually says my phone number is invalid. I have uninstalled and reinstalled the app twice	but I have the same problem	
Peter veltman	26-Apr-20	10	When trying to add my phone number it keeps saying this is invalid and now I find that this is the same experience of thousands of other people.		
James Edmond Spicer	26-Apr-20	1	Checked background of app	it does do as it says	it's safe and is okay
Paula DEHOMBRE	26-Apr-20	1	For your mobile number to be accepted	drop the 0 at the beginning of your number and then you can proceed.	
Has AITaiar	26-Apr-20	1	Love the creative design that respects privacy and solves a complex problem	well done	
Thomas Rees	29-Apr-20	I was not able to obtain the pin number in time to enter it on my application before I was taken to this screen.			
GEOFF EBB	3-May-20	Installed OK but if it's not tracking me	why does it ask to turn on the location? I usually leave this off.		
Juliana Ramos	5-May-20	I live in Australia for 14 years	and last year went abroad and changed my account residential country	but now back in Australia since December I can't download the app because is not available for account out of Australia. What can be done and how many others might be on the same situation? Thanks	
Kaitlyn Kirkwood	17-May-20	Constantly turns itself off due to the battery optimize setting	making it pointless.		
Michael Watts	19-May-20	1	Downloaded but unable to register as it will not recognise my own phone number as a valid mobile phone number.		
David Lannan	27-Apr-20	1	Very easy to register and protect Australia. Let's all use it so the pubs can reopen!		
Andrea Ratcliffe	26-Apr-20	1	What a fantastic app. I've had to input a lot more personal information for online stores and other app accounts than I have for COVIDSafe.		
Tom Woodcock	27-Apr-20	Seems like if your not directly with the telstra network like I'm through Aldi which uses telstra network it doesn't recognise your phone number therefore can't set it up. Real handy δΥΖ			
Lynette lee	26-Apr-20	Important to download going forward. It may be a problem ticket to freedom.			
David Poon	26-Apr-20	1	Looking forward to registering later this afternoon. Great to see a tech solution to a significant health problem		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Alan Clarke	27-Apr-20	It's a bit annoying complaining that Bluetooth isn't on. I only turn it on when I'm going out in the car.		
Paul Godwin	28-Apr-20	No issues with this app . Anything to help a sense of normality returning		
Nicola Greve and David Ballantyne	27-Apr-20	Straight forward and easy to set up. Crucial to keeping our population safe through this pandemic. Please download.		
Mark Edwards	27-Apr-20	Worked first time and easy to setup. Just asked for name and mobile number.		
John van der Linden	27-Apr-20	Get error messages such as try again later to get PIN Or Switch Screen Overlay OFF	how do I do that.	
Joe Malik	26-Apr-20	12	Do the right thing	download the app. Your privacy isn't being invaded no exceptional permissions are being asked for and at the end of all this you can just uninstall it.
Alexander Galkin	29-Apr-20	2	Great	very useful and easy to register app! I encourage all Australians to install it
SATISH VERMA	27-Apr-20	4	It is a great step by the Australian government. I dont have facebook	instagram tik tok or we chat app. Those apps collect way more data and are actual threat to your privacy. So please ask your friends
Nicole Briguglio	27-Apr-20	1	It would be good to use if it could accept my mobile number. How on earth am I going to use it if it states my mobile number is invalid.	
Jeff Parker	26-Apr-20	3	I would like to use it but I use a NZ mobile while here in Australia and cannot register it as the app only allows Australian numbers.	
Jason R	28-Apr-20	Saying my mobile telephone number is invalid	tried having the 0 at the start and also without	keep getting invalid number message.
Znil	26-Apr-20	3	Registration worked immediately no problems	clear explanations of how it works during setup.
Ruchi Sharma	27-Apr-20	I get an error invalid mobile number. This is on 27/04 at 10:06pm AEST. Anyone having this issue?		
Darren Allen	27-Apr-20	Says my phone number is invalid. I double checked my phone number. Still comes up as invalid..		
Jabin Shrestha	26-Apr-20	1	The installation and registration process went smoothly.	
Tony Richardson	27-Apr-20	2	Great concept. Simple process to install and verify. Install the app.... Save lives.	
Tracey Symons	10-May-20	Everything seems to be working except it's not showing up when doing a scan to find it.		
Keith Povey	4-May-20	When I go back to get the pin number then go to the place to put the pin number it won't accept it.		
Vicky K	10-May-20	I like that it has the constant notification to remind me to use the app. Otherwise I'd forget to switch it on when I leave the house.		
Matt Szlazak	13-May-20	Latest update causes bluetooth audio to cut out every 20-30 seconds.		
Mackle	19-May-20	1	Bit disappointing that it constantly glitches my bluetooth music in the car. Everytime i pass a car with someone with App.	
Wayne McMahon	28-Apr-20	2	Poorly configured Invalid phone number error does not allow me to register. Does not work with or without leading zero.	
Michael Dunn	27-Apr-20	Great idea... Let's all download and squish this virus flatten the curve and get our lives back to normal... Cause man I can't wait for an ice cold beer at the pub again		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Thomas Knight	26-Apr-20	1	Registration is not currently open	you will get an error message. Registration is expected to open after 6pm on the 26th of April	
Anastasia Voinou	26-Apr-20	So far so good. App installed and registration process worked without issues			
Adam Keane	29-Apr-20	To those complaining about not putting the number in correctly	drop the first zero. That's what you do after an international extension.		
Brett Hodgman	27-Apr-20	Frustrating. If you want people to use it make sure it works first. Won't accept my phone number.			
Neil WJ	27-Apr-20	5	Registration doesn't work. What a joke. Who ever tested this should be fired. Government software projects..never cease to amaze		
Phil Stoddard	27-Apr-20	Unable to install because I'm not receiving authorisation code by text. No assistance available via website			
Jayne Robinson	26-Apr-20	Easy to upload. Is working in the background. Hope everyone gets on-board. Stay safe			
Neil Daly	26-Apr-20	Easy to load	easy to register and easy to use. Well done guys!		
Caitlin	27-Apr-20	So easy and simple to install and turn on! Thanks to all who built it. Feeling safer already			
Tony B	26-Apr-20	8	What a massive balls up	obviously couldn't deal with the amount of registrations so they've stopped killing the initial massive download. Ffs. Get it together.	
Ash W	28-Apr-20	3	App asks to ON battery optimizer. I checked all the settings and given permission to run on background. But still no good. Pls help to fix my issue. Tks.		
Henry Mitchell	26-Apr-20	Looks like a great idea to simplify a manual tracing process	if someone gets COVID-19.		
Tristan Johnson	26-Apr-20	Very simple and works fine now that the registration process is open.			
Dr Michael Black	26-Apr-20	Previous glitches fixed. Effortless registration. Glad to assist with this initiative.			
Gerry Dempsey	28-Apr-20	When it tells you that the mobile number is invalid. Turn your WiFi OFF	and go again and the secret squirrel 6 digit code will come through. Install instructions are not adequate.		
RobyQuantum	26-Apr-20	6	This app uses wifi and mobile network to track your location. They said they weren't going to do this and it even says in the app but it's not true.		
29-Apr-20	6	Requires location permission. Requires my phone number. DESTROYED my battery life. Disconnects my headphones and hands free. What a complete and utter FAILURE of an app. UNINSTALLING.			
Rachel Garaldo	26-Apr-20	4	Can't even register. Won't recognise my mobile number that I have had for 20 years. Dropped the 0 and still not recognizing.		
paul haigh	28-Apr-20	5 attempts to get past Invalid Phone Number screen. Unsuccessful. It is my correct phone number. So no pin sent and unable to activate			
J B	26-Apr-20	1	Easy to use. Literally took a couple of minutes to register.		
Rav S	28-Apr-20	Had a glitch yesterday with Phone number invalid error .. reinstalled the app and seemed to work this time.			
Phillip Johnson	27-Apr-20	Ok for those that have "invalid number" appear	turn OFF your Wi-Fi.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Solita Lightfoot	26-Apr-20	1	Easy to install and activate. Took less than a minute. All the one star's were just too keen and jumped the 6pm registration gun.	
Hugh Grady	29-Apr-20	No problems	no sign of excessive battery drain.	
Liana Sheehan	29-Apr-20	I download the app on my phone and it won't accept my phone number I always do it right but still no luck ðŸ™“ what can I do to get this app to accept my phone It should work with the Reno 10 mobile phone so why I'm having troubles		
1400GTR Rider	29-Apr-20	2	Easy to install and setup. Just enter name dpb and mobile number including the leading 0	
Lynette Bradbury	1-May-20	Could not complete registration as there was no way to enter the 6-digit pin number.		
Stewart Adam	5-May-20	1	Works to trace infected contacts. Not a tracker! There's no such thing as privacy ... Get over it!	
flying manes	16-May-20	I don't receive a pin number on my android phone despite following all the advice. I therefore cannot register.		
Gary Coe	16-May-20	Light. Doesn't interfere with performance of the phone. Remember to update regularly		
Sonya Stewart	28-Apr-20	It won't accept my mobile number	even without the 0 at the front	frustrating
carlfitchett	28-Apr-20	This app will not accept my mobile phone number irrespective if I include or omit the first zero.		
anthony vandenberg	26-Apr-20	Very good & easy to set up	nice piece of mind to get us back to normal!	
Sonny Gilbert	28-Apr-20	1	Not that I don't trust it works but it would be nice if you could at least verify it does connect as it should to another	
Luke Jackson	27-Apr-20	Great and smart way to fight coronavirus. Honestly took less than a minute to get everything thing done.		
Michael Fairweather	26-Apr-20	69	Same problem as the other users. Unable to get the PIN code. If the Government wants people to use the app then they better make damn sure it works before making it available.	
dione HART	26-Apr-20	Easy to sign up. No personal details provided. Just name	age and phone number.	
Rob Thurling	26-Apr-20	2	Easy to install and set up. Let's hope it helps to get our country back to near normality again :-)	
Angus Johnson	27-Apr-20	Errors... indicating invalid phone number. Dual SIM device.		
Chris and Elisabeth Poole	27-Apr-20	1	Keen to use it but won't send me a text with my pin	now telling me invalid ph no. Uninstalled and tried again but same issues. Can anyone help?
Pham Luat	27-Apr-20	Installation was easy and seamless. 4 steps and it's done. Do it for your country and do it for yourself. Come on people.		
Diana Giordano	27-Apr-20	I can't get past entering my phone no. Tried with and without the leading zero.		
Steven Li	26-Apr-20	1	Please keep up with good work and fix the registration issue.	
Farq Narkle	26-Apr-20	10	Easy installation and registration. We owe it to ourselves and others to use this app to help overcome this terrible Wuhan Virus.	
Tom Rothwell	26-Apr-20	1	Brilliant concept	can't wait to do my part in helping restore things back to as close to normal as possible
ruffy boy	27-Apr-20	Works fine on my S8. Do you have it for Samsung SMJ320ZN ? My partner can't get the app	it says 'NOT COMPATIBLE WITH YOUR PHONE MODEL' She's a health worker and would like it asap	
Wilfrid Li	27-Apr-20	1	Installation and registration successful once past the 6pm launch time	no problem what so ever

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Cameron Hamill	29-Apr-20	1	Great idea! Glad I downloaded it just after 6pm on launch day! An extremely important initiative and I'm glad to play my part.	
Hemir8969	2-May-20	2	Watched a ABC article say that it doesn't work atm because the states and territories need to agree on data security mumbo jumbo. So what information is it currently gathering?	
Chris Newman	30-Apr-20	Minor problem with DtNo1 watch but turning off messages in the watch app for this app fixed the problem.		
Don Klein	1-May-20	1	Too difficult to get pin number at the same time as filling the pin number into the verification window.	
Michael	17-May-20	1	S10 5G App doesn't appear to have any impact on performance or security. Your irresponsible if it's not installed!	
Clint Ellis	27-Apr-20	Easy to use	hopefully everyone gets onboard	so we can get this virus isolated and eventually eradicated.
Gaza Chil	27-Apr-20	fine for me but oldies cant grasp the 040 to +61 thing when doing phone number. great app have no issues running it if it helps		
Shannon Hewett	27-Apr-20	3	Great game but I'm stuck on the level where I get the pub to reopen.	
Greg Whalley	27-Apr-20	Keeps telling me my phone number is invalid	yet I've been using that number for over 20 years. If the gov wants our help get the app to accept my ph #	
Paul	26-Apr-20	It just runs in the background. All the whingers who left bad reviews	Try registering again. Let's stamp this virus out!!	
Paul Beezum	27-Apr-20	I kept getting invalid phone number. I have tried so many times. My phone number is with telstra		
LO FLYT	28-Apr-20	2	I have an invalid phone number allegedly... At least I installed it so I can't get coronavirus now. Amazing what they can cure these days with technology. ☺	
neville tisch	26-Apr-20	3	PLEASE DOWNLOAD FOR EVERYONES SAFETY. Works perfectly from what we can see. Failed if you tried to register before 6pm. After 6pm no problems.	
Adam Cornell	26-Apr-20	1	Was easy to upload and register etc. There were some bad reviews left when registration wasn't open yet ☺	
Harrison Asmar	28-Apr-20	1	Does what it says it should. Doesn't drain battery. Just shows a notification to make sure it doesn't sleep	
Jon Cusack	26-Apr-20	Now the launch date happened it works and was easy to set up. Thank you!		
Martin Phillips	26-Apr-20	2	Ignore anyone giving a 1 star rating	as they are part of the Dunning-Kruger Family. This App was quick to download and it was very easy to register.
Dylan Freeman	26-Apr-20	2	This will be a fantastic way of getting life back to some sort of normality and a good safeguard to instantly recognise if you have been in close proximity to COVID-19.	
Emily D	27-Apr-20	1	Stopped my other Bluetooth devices from working - I can no longer access my car multimedia to safely call someone or answer calls from my car	my battery on my phone is wearing thin very quickly too.
Deb Macfie	26-Apr-20	2	Once I was able to validate my phone number which took 4 attempts but got there in the end. Anything to help covid fight so let's give it a go	
Chris Poynter	27-Apr-20	Won't accept valid phone number	no advice on entering phone numbers. Why does it have to have +61 ???	
A & L D	26-Apr-20	The app doesn't allow registration of Australian mobile number. Need to fix this bug		
Jon Bate	27-Apr-20	Will not accept phone number after multiple attempts over several hours.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Debbie Marchant	27-Apr-20	1	Ironic - I have to leave home to get a text! There's a 5 min window to enter a PIN but it takes 15 min for a text to come through here in rural NSW.	
NewValve2019	26-Apr-20		Quick and easy registration process. Everyone should download to flatten the curve ☺☺	
A Google user	27-Apr-20		Can't sign up. Ap keeps telling me my phone no is invalid. I've tried both with or without the first "0" digit.	
Renton Parker	26-Apr-20	1		
Marco Fernandes	26-Apr-20	4	Easiest thing ever. As mentioned for those who have this a one star review if say registering issues are you. Just don't write the 0 at the start of your mobile number. And done	
Pa Whitfield	30-Apr-20	3	Installed the app but discovered location permission is required. This is a google/android requirement not govt requirement. I trust the OZ govt but I don't trust google or android. App will be uninstalled. Shame because the govt initiative is good.	
Daniel	2-May-20		Easy to use. Great way to keep others safe while respecting you privacy.	
Luke Grunenberg	4-May-20		i update the app but then the Playstore says that a new update is available	straight away.
Lory Lavers	5-May-20		Why can't the app turn the Bluetooth off when it's clear the phone isn't moving anywhere?	
Peter S	15-May-20		No problems	battery usage low thanks to all the fantastic healthcare workers hope this helps
Christian Bryant	16-May-20		Exceptional user interface. No bugs. Very slick work	
Daniel Vlahovic	26-Apr-20	1	Installation and registration was smooth for me. Good initiative if people adopt it ☺☺	
Donna Bowers	27-Apr-20		Unable to register with error message 'Invalid mobile number' even when number is definitely correct.	
Jason Beutel	27-Apr-20	2	Keeps saying my mobile number is invalid. Can't sign up. Tried both ways without the 0 then with the 0 neither worked.	
Andrew Murphy	26-Apr-20	16	Unable to enter my phone number. Not instilling me with much confidence. Nevermind read other reviews	should be fixed soon.
A Google user	26-Apr-20	11	I'm receiving the 'invalid phone number' error and haven't been able to register. Another example of government incompetence.	
Noelly Agius	27-Apr-20		Great & essential App. Keep your bluetooth on. Be a life saver	DON'T be a Barnaby
Nathan Smith	27-Apr-20	2	I'm fine with having this but my phone battery ain't happy my phone lasts maybe like 6 hours and I have a Samsung A50 maybe make it use less battery thanks	
Marty Pinkstone	26-Apr-20	8	I get an error "invalid phone number" every time I try and sign up. Tried ten times to register. Given up.	
Rebecca Steinke	26-Apr-20	2	Easy to register. Anyone having trouble with their phone number	have you tried dropping the 0 from the start?
Bjorn Cura	26-Apr-20		Very straightforward. Only requires your name	age and postcode.
Mary Howe	26-Apr-20	4	If I am just at home and not going anywhere why does bluetooth need to be on? I am happy to switch it on when I leave my home but otherwise I will turn bluetooth off.	
Steven Goodge	7-May-20	1	It stuffed my Bluetooth it disconnected my fitbit and anything that is connected by Bluetooth download it if you don't need Bluetooth	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Peter McLennan	26-Apr-20	1	It works for me	but my wife can't install it because her phone isn't new enough. That's an unfortunate limitation.	
Jason Bennetts	27-Apr-20	1	Easy to install. Dropped the leading 0 in my mobile number and she installed fine.		
Philip Stafford-Jones	27-Apr-20	Can't register	says phone number invalid and no way to get installation assistance on android 9.		
Carl Webster	26-Apr-20	1	Works great. Easy to install. It just runs in the background		
charlotte dean	27-Apr-20	Unable to register - downloaded the app and it does not recognise my phone number as valid - note: I did not put a 0 in front.			
Iain Anderson	26-Apr-20	Very easy to set up an account and get it activated. Great to see the government using technology to protect us			
Simon Hoby	27-Apr-20	1	Good app and it protects your data. Everyone in Australia should be using this for contact tracing.		
Santiago Clausse	26-Apr-20	Easy to install with clear and informative content. User friendly!			
Danny Bradburn	28-Apr-20	2	Apart from bluetooth CovidSafe requires location switched on my Note4. Why? Does not work on Android lower than 6.0.		
James Wilkie	27-Apr-20	2	If you're happy to use any Apple/Google/Facebook products on a daily basis but won't download this app because of 'privacy concerns' then you are being hypocritical	simple as that. This app doesn't even store your exact age and the only verifiable piece of data you enter is a phone number	not even
Ian Palangio	26-Apr-20	Registration was quick smooth and error free. Looking forward to doing my part to help all of us			
lil brick	30-Apr-20	It's cool	but once i've turned the bluetooth off	it stays in my notifications and is annoying af.	
Peter Littlefield	6-May-20	1	Make it work without the push notifications. It would also be nice if it didn't attack my battery like a bloodthirsty vampire.		
Lisa and John Wood	11-May-20	1	Keeps turning off my music in the car when playing from my phone through Bluetooth. Please fix this bug		
Rex Morrow	11-May-20	Update with the icon showing green when working on notification bar is great. Will help everyone save battery life if they have to turn Bluetooth off			
Sacha Trube	19-May-20	2	Drains battery	causes issues with Bluetooth headphones connection.	
Pink Paws	27-Apr-20	3	WARNING TO ANY DIABETICS WHO USE A CGM APP VIA BLUETOOTH. This app interferes with app being about to connect with sensor. Uninstalled ap and now dex is working again.		
Michaele Mary Clifford	27-Apr-20	Poor ~ : "invalid mobile number"! Not impressed! Can't progress any further!			
Gavin Smith	26-Apr-20	Installed the app and registered my phone number without a problem.			
Steve M	27-Apr-20	Wouldn't accept my phone number. Must turn wifi off to accept phone number. Need better instructions to avoid people's confusion			
Deb	27-Apr-20	It's not letting me register as it's saying my mobile number is invalid. I'm hoping this is only a glitch			
Richard Servadei	28-Apr-20	Excellent app . Install it	and keep the device with you. Save lives by isolating the contagion now.		
Ian Roxy	27-Apr-20	1	Can't register. App saying my mobile number is invalid. Have tried with and without the 0 at the front.		
Corey Brown	27-Apr-20	Needs something fun to do on the app	like the dinosaur run on Chrome	or a quiz comp. I mean	why not have some fun while you're there?

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Scott LeBlanc	28-Apr-20	1	Tried 3times to install this app. Every time i go to my messages to get the pin the app closes and I go around in circles		
Cheral Rattray	28-Apr-20	1	Issues with entering mobile number.. Drop the first 0 (zero) and make sure wifi is OFF.		
Ben Hoogenboom	26-Apr-20	4	Says invalid phone number	even though it's mine and been around for over a decade. Glitch maybe?	
Kehani HANCOCK	26-Apr-20	The app installed fine. Registration was not open until 6pm. Hopefully this app will help Aussies beat this virus.			
Alex Webling	28-Apr-20	Having the app running seems to cause my bluetooth headphones to stop playing after a few seconds.			
Tom Rayne	10-May-20	1	There is an annoying notification banner that you can't disable that only says it is working. Let us turn this off.		
Amanda Shaw	28-Apr-20	Not sure if there is a glitch but it will only allow me to proceed so far with the set up. Im not able to use. Dissapointed			
Keith Cohen	26-Apr-20	Mobile phone number entry fails while registrations are inhibited. Mobile Phone Number Entry should either be totally inhibited or be permitted but submission inhibited. Indicating the number entered is in error when registrations are inhibited is incorrect.			
Barry Ross	27-Apr-20	The app is saying I'm registering an invalid phone number when in fact it is my number	how can we help when the app won't except numbers		
Michael Stubberfield	28-Apr-20	1	App is a little heavy on battery because of bluetooth use but other than that it seems fine		
Cristina Jones	29-Apr-20	This is a great app! Keeping everyone safe and is very trustworthy! Thanks.... Keep Safe Everyone! :)			
Michael Cecylia	4-May-20	2	Problem on my Oppo phone	needs to be optimised all the time to work.	
Jim Lowrey	2-May-20	I have Samsung s10. Can not download the app. Found problem. Signal strength too low.			
Rebekah Rai	4-May-20	1	Thankful to be living in Australia and for this amazing app which will protect me	my family and my community. It runs in the background and you barely know it's running whilst it doing all the hardwork to keep us all safe.'S	
DEBORAH ABSLER	6-May-20	3	Can't get it operating because every time I request a pin I have to complete all the sections afao & the pin is incorrect. Worst design I have ever encountered		
Rosemary M	9-May-20	4	I have an Android phone and the app keeps dropping out due to battery optimization even though this has been disabled in settings		
Rohan Roylance	26-Apr-20	An essential app to help us eventually get back to normal. Download it now.			
Sandi	27-Apr-20	1	Fix for invalid phone number error: turn off wifi on the phone while setting up the app.		
Nick Saunders	27-Apr-20	1	Super easy to setup	from download to setup finish in only a few minutes	
Ashley West	27-Apr-20	1	This app has been looked at by independent app reviewers and found legitimate (Google it)	so no need to put on your tinfoil hat that it is gathering any more info that it claims.	
Htet Myat Lin	27-Apr-20	Mobile number invalid and can't go further. Same as others. Update: tried again at different time and registration works.			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Greg James	26-Apr-20	Easy to install & get the pin. If it means we get back to normal quicker- why not use it			
jon	26-Apr-20	15	Rubbish. Wont even recognise a phone number... Why would we trust an app that cant get a simple procedure correct. And why force location recording whilst ensuring no gps tracking?		
A Google user	26-Apr-20	Downloaded	registered within 5 minutes. Quick	easy & straight forward!!	
Jumbles Cook	26-Apr-20	4	Works exactly as described. Don't listen to the brain dead morons who say otherwise. They probably think they're perfectly visible driving a grey car	on a grey road	on a grey day when it's raining.
Kerry Smith	26-Apr-20	8	Staff please note	I cannot add my mobile phone number. Says it is invalid. It is valid	I'm using it now! Have tried with and without first '0'
Coz Rock	27-Apr-20	Great initiative	easy to install and register.		
Peggy Misztal	29-Apr-20	Downloaded and installed within 5 minutes with no issues.			
General Account	29-Apr-20	2	Don't rate the App 1 star if you are not smart enough to register something so easy. Maybe rate yourself 1 star?		
mohit raghav	30-Apr-20	1	Disconnects my Bluetooth headsets (Samsung buds	Sony XM and Microsoft surface headphones) all have problems	
Leo Blackman	1-May-20	2	I turned off permission to access location info. Still waiting for promised access to source code before re-enabling.		
Aussie Lass	30-Apr-20	1	Tried to load this app on a 4yr old phone	NOT COMPATIBLE. So that problem needs sorting.	
ketti pezzin	30-Apr-20	There is no edit facility to enable a change in recorded information why??????			
Ju Wong	3-May-20	Cuts out my Bluetooth headphones every time it does a handshake with a nearby app which makes listening to music in a mall almost impossible. Minor inconvenience but nevertheless ☺			
Mike Hare	4-May-20	Filled out the form to get a verify pin and get told to try again later.			
Joe Mancuso	4-May-20	Just downloaded and doesn't work. Just opens a page with no buttons or anything else to do. Uninstalling.			
Marcellin Chee	27-Apr-20	Download app could not get past registration as it did not recognise my mobile number. Kept saying invalid mobile number.			
Elliot Weber	26-Apr-20	2	This is going to be a wonderful app once registration is open later tonight. Rate this app highly so it doesn't deter people away from downloading it.		
Dianne Hoogendoorn	28-Apr-20	1	Can't get in. It won't accept my mobile number with or without the 0 in front. Tried 6 times now. Forget it!		
Ralph Morgan	27-Apr-20	Very low battery drain on Samsung S9. Everyone should install and register.			
Michael Borella	29-Apr-20	2	Just a great idea and I hope it's very effective. Very simple to use. Well done Scotty.☺		
Leigh Fleet	26-Apr-20	Quick and easy registration	no problems at all.		
26-Apr-20	1	No issues with installation or registration	if the app can help even one person then im 100% for it. Saving lives are important.		
Jamie Cook	26-Apr-20	2	This is a good concept but would only work if absolutely everyone uses this app and actually says that they're positive in it.		
Patrick Patel	27-Apr-20	Works as described and tracks as intended via Bluetooth.			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
A Google user	27-Apr-20	2	It's won't let me join	it says my phone number is invalid.? Have deleted the app restarted my phone and still can't join. If anyone can help that would be great.	
Chiranjit Majumdar	26-Apr-20	10	Cant generate the pin!! Man someone please tell the IT to do performance testing before going to prod. After centrelink	even this one is also facing performance issue.	
Evgeniya Mikhaylova	27-Apr-20	1	Could not finish registering	says my mobile phone number is invalid while it is definitely valid.	
claudio lee	2-May-20	1	I thought it would not track location	but just who was near you. However	it requires permission to track location
Wendy Gaimo	4-May-20	Drains battery and my phone hasn't worked properly since I installed it.			
David Pugh	7-May-20	1	I have downloaded this app for the sake of keeping myself very much in contact away from people who might have tested positive to the virus but Mr Morrison I have fully downloaded The covid safe app to keep myself away from other people who might have tested positive		
Saurabh Kc	28-Apr-20	i cant register my phone number. Tried with the 0 and without. still doesnt work.			
Michelle Curnow	27-Apr-20	Considers privacy a lot more than other Android apps and works well in the background.			
Cristopher Pizarro	26-Apr-20	58	I can't verify my phone number	so I'm stuck in that step and is not possible to finish the registration... also my partner has Iphone	and the app is not available yet... how much time we have to wait for it's works?
Clarence De Silva	27-Apr-20	2	Can't install on my Samsung Galaxy 10. Wouldn't take the phone number to get installation pin. Stuck! Reinstall didn't work either.		
JenniB	2-May-20	Sends too many notifications. Likely to ignore them and may miss something important.			
Bruno Tomadon	27-Apr-20	Great concept. They've gone to great lengths to ensure privacy and security			
Adam Leggo	27-Apr-20	2	Working after the back end was enabled. Hope it allows quicker tracing.		
Chris Ellis	26-Apr-20	5	App doesn't think my phone number is valid so can't progress past this point of install/setup. Will try again once you've ironed this bug out.		
Gregory J Smith	26-Apr-20	2	Easy. Some seem to be having delays in registration. Not me. Glad to do this very small thing to help keep people safe	and avoid the need for further lockdowns.	
Gay Anderson	26-Apr-20	6	It wouldn't accept my mobile number both with zero in front and without zero. Said invalid number! Tried numerous times with same result.		
Miriam Johnson	27-Apr-20	1	Cant load wont accept phone number. Reloaded	switched off Wi-Fi still nothing.	
Andrew Humpherson	26-Apr-20	Very quick and simple. And important! For others!			
P Greenup	27-Apr-20	3	Cannot register	phone number "invalid"	attempted in various formats ???
Debra Cadogan-Cowper	27-Apr-20	Hopeless. Cannot get it to register my mobile phone number. Tried at least 10 times			
Bradley May	26-Apr-20	7	Concerns aside	probably more secure and private than 75% of everything else on my phone. Pity it doesn't accept my very valid Australian phone number.	
Huy Tran	26-Apr-20	1	Wish it wouldn't leave a permanent foreground notification icon in the shade. But this can be hidden.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Nick Barr	26-Apr-20	Easy as registration. Guessing everyone having problems was trying before 6pm.		
Kevin Ngo	8-May-20	Works fine	however the current design is uglier than the original.	
Keith Scott	19-May-20	1	Unable to keep the app open on my Oppo phone. What's the point of the app if it can't be kept open unless you have an iPhone.	
Allister Hunziker	27-Apr-20	5	Registration is busy	seems it might be the bottleneck. Works well now after 6pm.
Alex Kouznetsov	26-Apr-20	6	It says my phone number is invalid. Maybe it requires a singapourian phone number	who knows. Obviously they released the application without any tests.
Shorne	10-May-20	Minor issue with Bluetooth headphones cutting out in crowded areas.		
Trevor Wuoti	28-Apr-20	2	Working as expected	seamless not sure if contact for 15 minutes is realistic.. Want to test or find more candidates should the time be less?
Jan minchin	26-Apr-20	Mobile glitch has been fixed. Quick response	now very easy to install	
Wally Anglesea	26-Apr-20	2	A quick install. Easy to understand	and there's nothing to be afraid off. Naysayers take off your tinfoil hats
Michael Wilson	27-Apr-20	Just get the damn app. Privacy policy and stuff seems pretty good. You can technically sign up with whatever name you want which is a win.		
David Jeffery	27-Apr-20	1	I try to put my mobile number in so I can be a responsible citizen but it keeps coming up my number is invalid so I can't get to the next step. Very frustrating	
Jude Obrien	28-Apr-20	I've entered my phone number with the zero and without the zero at the beginning both ways say invalid phone number. Why????		
Al Crystal	26-Apr-20	36	Download and use and help save lives! Don't give it a one star because you can't signup before it officially launches. Only stupid people do that!	
Brian Grindley	27-Apr-20	Stupid buggy app. Says my phone number is invalid and I can't get my pin.		
Tish Thomas	27-Apr-20	Won't accept mobile number. Tried at least 10 times Annoying		
Peter Whan	26-Apr-20	24	Initial poor experience with no information given about delayed registration process. Wait and see how it performs from now on.	
Michael C	27-Apr-20	1	Registration seemless once product went live	happy to participate in any small way I can
Bev Whittle	27-Apr-20	Can't even log in to it as it won't accept my mobile no. and tells me it is an invalid number		
Ollie Hermans	26-Apr-20	18	The registration issue will be sorted shortly	at the official release time - 6pm. Please leave positive reviews so you don't scare away the idiots who are considering not getting the app. #dontbeaparoid
Wix tinguish	26-Apr-20	Cant login either but am sure it will be fixed soon. Stop complaining people.		
Byron Gough	28-Apr-20	Couldn't register as it says I have a invalid phone number. Will need to be fixed before I can get it.		
Darko Raskovic	27-Apr-20	1	Registration not possible. In short. Idiots putting such an important app in place.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Lisa Lewis	27-Apr-20	invalid phone number error	despite my entry being correct. Therefore cannot use this!	
s7535294	1-May-20	Loaded and operates without any hassles. Loves chewing through the battery though...		
Michael Earendil	2-May-20	1	Could you add the ability to turn it off	say when you are home. Also could you add the ability to add people who live with you to an ignore list.
Walter Vollert	5-May-20	Does what it is supposed to do	only notifications are when Bluetooth is off obviously	as it requires Bluetooth.
Darren Ryan	7-May-20	1	This seemingly taking over my Bluetooth and stopping other apps and devices such as my garmin watch and connection to my cars system. Please fix	
Natalie Quinn	20-May-20	1	Keeps turning off even though I have turned off battery optimisation settings.	
Adam S	26-Apr-20	6	Not liking the idea of having to have permanent notifications. Should only display when information needs to be provided.	
George Curran	27-Apr-20	24 hours after release still cannot register because saying invalid phone number. Uninstalling!		
Kyle Sheldrick	27-Apr-20	1	Works fine	not much info requested low battery usage.
Duy Vu	26-Apr-20	Smooth installation and registration	no issues.	
Yak Sox	26-Apr-20	I'm onboard with this but it'd be great if I didn't have to have a banner across my lockscreen all the time.		
Rakibul Islam	27-Apr-20	1	Great effort to keep everyone save. Also this app does not seem to chew up my battery so that a 5 star.	
Graeham Rice	27-Apr-20	2	Wouldn't let me have a pin with message " try again later " but all happened when I turned off my VPN.	
Matthew Allen	26-Apr-20	3	It stopped at the enter mobile number and get a pin step. Fix this ASAP! Wasn't this tested properly before release?	
Theo Clark	27-Apr-20	Straight forward	minimal battery use	and will hopefully end this sooner rather than later.
Richard C	27-Apr-20	1	No issues installing & running. Happy to download to help my fellow Australians	so for the knockers....get over it & get a life.
Jane Bounds	27-Apr-20	Hard to find. Searching for COVIDSAFE does not bring up this app. Must use space: 'COVID Safe'. Why so difficult to find?		
David dore	27-Apr-20	1	Really needs an option to turn it on and off for when you need to save battery or go to your dealers house	
richard sawicki	26-Apr-20	4	Rejecting phone number. Invalid phone number msg. keeps coming up. Tried three times. Given up. What's going on?	
Eli Lowinger	27-Apr-20	This app breaks my Bluetooth headset when on a call it keeps on resetting the channel to the earpiece		
Tongxing Liu	27-Apr-20	it says 'invalid phone number'. I don't understand why my phone number is invalid.		
Yillup	26-Apr-20	4	Worked perfectly. Got my pin straight away. All set up in less than a minute.	
michael eade	26-Apr-20	9	Can't even register got as far as entering mobile phone and tells me it is invalid.. and the govt of Australia wants to flatten the curve. With this stupid app	
David Douglas	28-Apr-20	Interesting	the app doesn't recognise my mobile number I've had for 30 years wow.	
Shamira Rochford	26-Apr-20	4	Did this on husband's iPhone ok but on my Samsung the pin code is not sent for me to put in. Tried a few times. Anyone else with this problem?	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Ben Moore	28-Apr-20	3	Can it be a coincidence that my Bluetooth headphones have stopped working since I installed this?	
Gabriel Osmo	26-Apr-20	Once the registration thing was working properly I didn't have any issues Glad to have it now		
Fiona van Leeuwen	2-May-20	Works for me. Needed to put pin on and delete it a few times and it then worked		
lollipop	6-May-20	2	No need to share location constantly nor do you need the constant use of Bluetooth	if I could I'd give 0 stars
Scott Ragg	6-May-20	1	Kept on crashing my phone through Bluetooth Share issues. Sucked the life out of the battery too. Have uninstalled.....	
Fred O'Leary	10-May-20	1	It doesn't recognise my mobile number as valid. Followed all the instructions to fix it but no dice.	
Dave Wheeler	7-May-20	2	I want to help despite the dubious usefulness of the app	but my phone is now useless due to massive battery drain. I've had to uninstall.
Felix Holmer	9-May-20	Absolutely fine	seems to use little battery	its a no-brainer.
Garrett Ferreira	27-Apr-20	1	Good but if i switch off or restart my phone the app doesn't start automatically i must open the app for it to be scanning	
Rebecca Wroe	26-Apr-20	No issues whatsoever. Happy to do anything that helps the cause,		
James Luttrell	27-Apr-20	Downloaded the fixed app. Clear communication	no issues with rego process now.	
M K	26-Apr-20	Very easy to set up and install	well done. I support the Australian government in their efforts.	
Maria Scott	26-Apr-20	48	Refuses my phone number.. Invalid phone number error message keeps appearing. Initially I was asked to try again later.. now with or without the zero I get invalid phone number	
Brian Jefferies	26-Apr-20	2	Easy to install and setup	all in under two minutes. Hopefully we can all beat this insidious virus
Michael McAuliffe	27-Apr-20	Easy to install	happy to participate	but why did we have to contract Amazon for data storage?
Regan Tippett	26-Apr-20	2	Doesn't work. I tried to enter my number to start using the app and it kept telling me my number was invalid.	
Jason Bateman	26-Apr-20	1	Very easy sign-up. Small download. Doing my bit so we can get these restrictions lowered	
Ivan Wunderlin	26-Apr-20	Important; only realistic way (apart from a vaccine which might be many months away) we can get back to some sort of normal.		
Tanya Miller	26-Apr-20	I waited until after 6pm as advertised and had no problems at all	completed process very quickly.	
Daniel Waldron	26-Apr-20	4	Ohhhh - it's not accepting registrations until 6pm. Why not say that in the app? What is the point in releasing an app that doesn't work?	
BRISBANE NURSE BENNETT	26-Apr-20	Easy to install and easy to add details. So glad we have this app. Hopefully it'll save some lives.		
Paul Baker	26-Apr-20	Quick and easy to set up. No issues using this app.		
Sean Crummey	26-Apr-20	Easy to install. Registration is working just fine.		
siva sankar	27-Apr-20	Easy to register and increase safety measures.		
Alan Jowett	26-Apr-20	1	Extremely easy	setup in less than a minute.
Steven McCullough	27-Apr-20	This would work great with sick weather	once covid19 has stopped this app will become useless you should be able to have all other illnesses on this not just covid	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n	
Michael Sharp	29-Apr-20	2	I was all for this app but after learning our data will be stored in a foreign owned public cloud service hosted in a Chinese owned data centre. What was the department of home Affairs thinking			
Ken Page	5-May-20		Insisted on having my private silent number to register. No way! Will uninstall. Big FAIL. :(
Julia Irving	4-May-20		I uninstalled it initially because i felt it was draining my battery	i have now reinstalled and will see what happens.		
Margaret Ward	18-May-20		Hard to keep the battery charged for long enough for the phone or app to be useful			
Paul Pichugin	19-May-20		Other than chewing through my battery quite quickly it works just fine.			
Subas Sitoula	26-Apr-20		Great concepts. Easy to install and use...			
Kylie Flack	26-Apr-20		Easy to install and get verified. I'm ready to use to support us getting back on track.			
Emily Walker	28-Apr-20		I can't register as the app constantly tells me my phone number is invalid	help!		
Timothy Moffitt	26-Apr-20		Easy registration process. Hoping this works as intended to minimize community spread.			
Celestee Arex	26-Apr-20		Very easy to register and set up. Let's hope this helps!			
Kym Watkins	26-Apr-20	1	Easy smooth registration	minimal info needed to be given. Keep Australia safe pls download.		
J Purslow	27-Apr-20	1	Great idea and great execution	all these people rating it one star probably have trouble opening a book as well.		
Tony Lee	27-Apr-20	1	As fast and simple to set up as it could possibly be. Even Barnaby could probably manage it without too much help			
John Underwood	28-Apr-20		Depends on the quality and frequency of testing by others Depends on sustained proactivity by a majority Can lull users into a false sense of security			
Dinh Duong	27-Apr-20		The app stops music from playing on a bluetooth headset.			
Nicole Major	27-Apr-20		Does not recognize our mobile number. Husband has the same issue on different device			
Madhu Alasyam	26-Apr-20	1	Mobile number screen says invalid number. I tried without 0 and with 0	same result. Android OS		
Jeff Kay	26-Apr-20	1	Instal & registration... too easy FYI when entering your mobile number in +61 format remove the leading 0			
Andrew Redmond	26-Apr-20	1	Easy to setup and no issue registering. I hope all Australians use this app..			
Tyson Beard	28-Apr-20		Invalid phone number Was working. But uninstalled and try to reinstall now get invalid phone number.			
Serge de Clerk	26-Apr-20		Easy registration	no problem to install & use at all		
David Collins	26-Apr-20		Great initiative	if you want to get back to normal faster use it!		
Brandon Lyon	26-Apr-20	4	Sucks the life out of battery pretty quickly! Only downloading this so pubs open sooner!			
Steven Bruce	3-May-20	2	Installed	registered	uninstalled. Am I counted as one of those who is "using the app"? I am not using the app. I noticed that the rating is slowly dropping...from 4.2	now down to 3.8!
Margaret S	26-Apr-20		Super easy to install. Let's get back out there to the cafes and gyms and stay safe.			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n	
blasphemouslibel	28-Apr-20	4	Literally went for a 4 km evening run just then with 35% battery on my phone. Phoned died in 15 minutes. Sorry government I'm deleting it. I think it's more dangerous roaming in public without a phone in case of an emergency.			
Niki B	26-Apr-20	2	Would like to install but this version isn't compatible with my Mobile Samsung S4 device... please fix so everyone can access... not just on tablets etc.			
Trish Kartman	27-Apr-20	Great app	except when my partner try to download app it said not compatible with this device....			
Matt Anderson	29-Apr-20	1	Hey	this is cool and all... but it needs an off button - I come home often	because I am self-isolating	but this is only useful when interacting with the community so can please a way c turning when I home? point
Jarrod Adam	1-May-20	2	Repeatably displays a messae 'disconnected from null' and then 'connected to null'. Interferes with mobile usage			
Anna Haygreen	1-May-20	I can't register. The pin is not being sent through within the 5 minute limit.				
Jeremy Lai	5-May-20	Interferes with Bluetooth streaming on my headphones and Google home. Constantly cuts out				
Morangup 6083	5-May-20	This Bluetooth Connected App is a poor functioning 'Battery Killer'.. Needs rethinking. Halved my near new Samsung's battery time.				
Melodie McGovern	16-May-20	The app is still saying it is not active unless notifications are allowed despite the app updated claiming this is no longer the case				
Gudarz Gudarzian	27-Apr-20	2	This is how we can see the virus movement around us. Let's support the app and in this way we can get our economy back up to speed again.			
D B	27-Apr-20	1	Hopeless says invalid phone number with or without the 0 at the beginning. Woftam. Typical govt rubbish. Also not accessible for low vision			
Christopher King	26-Apr-20	4	You will have to do better than this. unable to register getting the pin is clumsy and loses inputs when changing screens to retrieve the pin			
Bob Millar	26-Apr-20	1	Couldnt upload the codeword. App seemed to be frozen. Might try again later and watch the complaints on morning TV.			
Trevor Watson	28-Apr-20	Keeps saying my phone number is invalid	regardless of whether I drop the leading 0 or not			
Tomas Stejskal	27-Apr-20	3	The app is stupid as frick! First of all one shouldn't be allowed to input a false name you idiots. Secondly it is telling me "an invalid phonenumber". Do you know my number? No you don't. I know it. It is valid believe you me! Twice it happens out of 2 tries. Pretty bad!			
Tony Vu	26-Apr-20	No problems with installation and registration.				
Gwen Cornelius	27-Apr-20	2	Easy to install. No problems with registration.			
Thomas Dobbie	26-Apr-20	2	I want to be able to go to gym classes and travel domestically or NZ for a short break. I hope this app will make that happen sooner.			
Gerard Cupples	26-Apr-20	4	To the people who are having trouble with registration the app is not available until 6pm give the government a chance?			
Elle Kay	29-Apr-20	Can't set up account. I can't leave the app to access the pin number sent to my messages without the app resetting itself.				
B H	4-May-20	Latest update has bricked the app. Gets stuck on splash screen!				
Vinicius Carneiro	6-May-20	It interrupts my bluetooth speaker every minute or so.				
Philip Kruger	26-Apr-20	3	Just released and it doesn't work	tried to sign up and it told me my mobile phone was invalid	tried it twice now I will just uninstall the app	
Issy F	27-Apr-20	Great idea	can't wait till it goes into practice - I want to go to parkrun again.			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Jodi Bird	28-Apr-20	Phone number invalid (regardless of whether you have a 0 in front or not)		
Melissa Merritt	26-Apr-20	1	Installed and registered	all worked fine on Samsung galaxy note 8
BigBoyMemer	26-Apr-20	2	Great idea but the app icon is dumb ugly and stupid dumb. Too complex for such a small image. I hate it. Absolutely despise it. 5 stars	
Space Man	29-Apr-20	2	Invalid number?!? Switch off wifi and try again. Bam	
Tim Jones	27-Apr-20	1	Easy to install and works with Bluetooth automatically	
Michael Sullivan	27-Apr-20	Read lots of problem reviews	but my experience was very smooth.	
Neil Mckinnon	27-Apr-20	Predictably infuriating. Won't accept mobile number	can't register.	
Petra Arkian	26-Apr-20	Wonderful initiative and from a privacy perspective very well done. I have worked in data anonymization and privacy and can give this my full endorsement.		
Kaylie Simpfendorfer	28-Apr-20	Still saying my phone number is invalid. You'd think this would have been fixed by now.		
Ian Davidson	28-Apr-20	1	App now works as expected	great work developers for getting bug fixes so quickly!
Peter B	28-Apr-20	2	Haven't seen much change in battery use. Happy to do my bit for Australia	
Stephen Woods	27-Apr-20	1	Had it on all day and so far app is reporting 0% battery usage. So far so good.	
Balaji Thimma Jothiram	1-May-20	1	Best use of technology to eradicate unseen enemy. Government of Australia has helped to curb the spread in a great way	and I trust the government sponsored App when compared to any Third party App which could control our phone.
Ashley Smith	4-May-20	Need to be able to close app while at home. My battery is taking a beating!		
Isobel Kimball	27-Apr-20	3	Won't accept mobile number. Keeps saying invalid number with or without the zero in front. Can't complete registration	
Pete J	27-Apr-20	1	Doesn't accept phone number	so fairly pointless at the moment.
Paras Bajracharya	28-Apr-20	3	Simple sign-up process and clean interface.	
Peter Robson	26-Apr-20	11	The mobile number doesn't work.. invalid phone numbered entered. Doesn't give me much faith if the basics can't be fixed	
Danielle Parker	26-Apr-20	96	OMG...I can't believe you would release the App without fully testing it. Gives me an error that my mobile number is invalid. Now people wont use it because it wont work. You have just blown your chance with the population	
Robert Bulley	28-Apr-20	It will not work on my phone. It just tells me my phone number is invalid and then won't let me get my pin number.		
Kim R	28-Apr-20	Says my mobile number is invalid. Not very well designed or tested. What's the point of asking people to join if you can't use it.		
Irene Sheridan-Miller	26-Apr-20	Easy to install	may help us be more free in Australia if everyone downloads. I hope so.	
Amy M	26-Apr-20	Easy installation	easy registration after 6pm	all good no issues. Thank you
Ben Bartlett	27-Apr-20	Would be nice if it gave a simple summary. Like how many people it has recorded being more than 15mins in proximity to you.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Tom Morley	27-Apr-20	Public health and safety is bigger than the individual. You can find more info about someone by googling them. No issues installing this and happy to support the effort.		
Ben Cave	27-Apr-20	Doing what it says on the box. I'm happy to try and get on to of COVID-19 by using this app.		
Justin Kuiper	27-Apr-20	Easy to setup and use. No number issue for me		
Ana Alvarez	27-Apr-20	The sign up finally works. Hopefully this turns up to be an effective tool		
Graham Wimsett	1-May-20	Entered details	was not emailed pin to verify unable to complete the install	two covid apps not sure this is the right one
Meysam	1-May-20	The verification code does not get sent to me. Attempted 26 times so far		
Patricia Tickle	4-May-20	Will not work on my phone. Can not get the pin	then it will not recognise my phone number..	
Grant Howell	11-May-20	1	Did not auto update to become live go back to play store to get the update the symbol should be a green australia this needs a fix	
Bharat Patel	10-May-20	Every time i try to get a pin it tells me to get the internet. But it was download through the net.		
Matthew Z	27-Apr-20	2	Facebook (an American Public company) collects more information on me than COVIDSafe. Happy to support all Australians and get back to work sooner. If this is a way to do it	so be it. The least I can do is install another App and run it in the background to protect my family & friends from COVID-1
Tony Rogers	26-Apr-20	Excellent idea. Installs easily. Only asks for the permissions it needs		
Rob Cook	26-Apr-20	1	Says my phone number is invalid	and won't proceed to register. Obviously not tested properly!
Peter Carrigan	27-Apr-20	Rejected my phone number	both with and without the leading zero Edit: it works if you disable wifi	
N Ross	28-Apr-20	Perfect	it wil help slow the spread and flatten the curve	
nicola byrne	27-Apr-20	My phone number is invalid? Not sure if anyone else is experiencing this?		
Tom Armstrong	26-Apr-20	Works well now that it's accepting phone nos. Hope it helps save some lives.		
Laio Fonseca	27-Apr-20	1	Less than 1% battery use after a day running in the background.	
Laco Vosika	27-Apr-20	Seems working fine	not requesting permissions that are not needed	
bronia nowane	26-Apr-20	3	It is saying that my phone number is not valid. I can't register. They have fixed it. Now lets see how we go. I am hopeful.	
Marty NP	27-Apr-20	2	Great initiative. The app is very unintrusive and easy to use.	
Ally Coutinho	28-Apr-20	Severely drains the battery	almost dead by lunch time with minimal use.	
Mark Manion	26-Apr-20	1	The app is simple to install and register. Great idea!	
Sarah H	27-Apr-20	Easy to use and set up. No concerns. Helps us keep safe.		
Nick Love	30-Apr-20	3	Beware!!! This app uses your LOCATION. This is contrary to everything the Government has told us. Revoke that permission from the app before registering yourself.	
Daz Rox	2-May-20	1	Keeps trying to handshake with other bluetooth devices like headphones.	
you wops	3-May-20	Runs in background fine no problem or extra data use great it uses bluetooth		
Ross O'Meara	1-May-20	Doesn't work on my phone	keeps freezing my phone when it connects to my car . I couldn't even turn my phone off. Moto g3	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Ikky	5-May-20	1	Drains battery like crazy	not sure how it keeps you safe when your phone can't even turn on	
Gary Hunter	5-May-20	Continually shuts down on me	saying I need to optimize	but am already optimized	
Blake Royle	5-May-20	1	Won't let me sign up	we are told we need to download the app	but we can sign up what's the point. Total waste of time.
Richard Jaworski	7-May-20	1	Brilliant. Will never understand the paranoia surrounding this app or any app where the Government has our data. Should be mandatory.		
Callum Macdonald	12-May-20	2	App seems to block other Bluetooth connections so cannot connect to headphones	car or speaker	
Nigel Senior	15-May-20	As expected hard on batteries but generally works well and may save lives			
Andy Chan	26-Apr-20	4	It simply doesn't accept any of my phone numbers. Perhaps the app caught COVID-19 itself?		
Christopher Ball	26-Apr-20	Great app! Hope it continues to keep everyone safe and healthy.			
Johanne Green	26-Apr-20	1	Easy to register. Hope lots of people download this app and don't politicize this.		
Paul Kotz	27-Apr-20	Will not allow me to input my on one number	telling me it's an invalid number	please fix	
mathew maxwell	28-Apr-20	1	Need to turn wifi off during registration	otherwise it says phone number invalid.	
Sarah Calverley	27-Apr-20	Keeps saying my phone number is invalid. Tried with the 0 and without.			
Dirk Visman	28-Apr-20	It won't accept my mobile number	even after leaving off the first '0'. Any other suggestions?		
Mike H	26-Apr-20	4	Working fine. Gave it 5 stars to offset the twits who would rather give 1 star and whinge than work out why and provide constructive criticism. Too quick to judge		
Aaron Aardvark	26-Apr-20	112	Hold off with the harsh one star reviews people. It won't take your phone number until after 6pm AEST when registration opens. This app will be downloaded by millions of Australians so show some patience.		
Leeon McMahon	28-Apr-20	Can't register	keeps coming up as invalid phone number. Can someone help?		
gian salvadori	1-May-20	1	Smartest tool. Because we need as many tools to protect and inhibit the spread of the virus.		
Rodney Tung	2-May-20	1	So if it doesn't require location data why does the Android version ask for location permissions?		
Cherylyn McArthur	30-Apr-20	Fine on my phone... but it doesn't come up at all on the Play Store on my husband's phone and I don't know why?			
Gerard O'Connor	20-May-20	1	Keeps turning itself off. Good concept	badly executed.	
Gary Jones	14-May-20	Had to update manually and it is still saying "not active" very confusing			
Stacey McDonald	26-Apr-20	3	Very easy to register. Very informative privacy statement		
David Furmark	26-Apr-20	1	Great initiative	please share and encourage your friends and family to download it ASAP. For those 1-star reviewers complaining about registration.....every news article about the app advised registration would be available from 1800 EST. Idiots.	
Garry Rossiter	26-Apr-20	6	Can't register when I try to get pin I loose the app and have to start again and just go in circles		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Mark Lin	27-Apr-20	it's a very good idea and hope everyone will install it and it will be much more effective to track all cases.		
Trevor Prendergast	28-Apr-20	Keeps turning off when display turns off. Have to keep restarting the app.		
BRUCE CHRISTISON	27-Apr-20	Wouldn't recognise my phone number. Tried three times!!!		
Scott Cappellani	3-May-20	CommBank tap to pay has stopped working since installing this app.		
Leigh Norman	4-May-20	Are they trying to inflate the figures? I filled out my details and it immediately came back and said I tested positive	yet I have never been tested and have not been in contact with anyone for over 4 weeks.	
N1GHT5TALKER 3	8-May-20	1	Excessively drains battery even when BT not in use.	
Jo Seppelt	27-Apr-20	1	Says I have invalid phone number!! My number is not in valid. Tried dropping the '0' but still says invalid. :(
Simon Connolly	28-Apr-20	Invalid mobile number keep popping up when I attempt to set up		
Adam Sampson	27-Apr-20	Does what it's supposed to do. Quick easy registration	get behind it...	
Rob Slack	4-May-20	Would have rated 5 stars if data contract went to AUS company rather than "make America great" USA. Have to keep installing and deleting as it interferes with my training monitor.		
Gayathri Arnold	26-Apr-20	I registered after 6pm AEST and the app worked just fine.		
Andrea Paola Griselli	27-Apr-20	Can't register . It doesn't take my phone number. Ok After reading others review turns out you need wifi off for it to work . So poor.		
Erin	28-Apr-20	1	Really need to get rid of the constant notification symbol. Annoys me all day and it makes me want to delete it. Pls change so we can hide it and it still works in the background.	
Heather Shearer	27-Apr-20	Easy to install	doesn't chew battery	helps keep us safe
Michael Burke	28-Apr-20	The app refuses to let me register because regardless how I enter my phone number it always tells me it is an invalid phone number		
Trent Eames	26-Apr-20	8	Sign up is simple but didn't accept the code I was sent and will not resend code and keeps coming up with try again later.	
Tamika Biddlecombe	26-Apr-20	2	Apparently everyone is getting an invalid phone number and can't register. Try again later maybe?	
Shane Brunette	26-Apr-20	Works as expected. Hopefully people are not turned off by initial one star reviews.		
Brendon Andersen	26-Apr-20	Initial issue signing up. Waited a couple of hours and alg now. Easy as.		
Matthew Bressington	29-Apr-20	2	Slows your phone down so much it becomes a brick. . I wanted to help but after 3 days had to uninstall	
Andy	14-May-20	1	App runs well and simple to use just wish it didn't drain my battery so much	
Graham March	4-May-20	Won't accept mobile phone number	can't complete registration.	
Steve Cuckson	7-May-20	1	Drains battery very quickly when left permanently active using bluetooth.	
Andrew Bundschuh	8-May-20	Can't get pin even after trying all methods they suggest in the FAQ to troubleshoot		
Sally Kerrigan	28-Apr-20	Can't get past verification of mobile. No text message sent		
Gayle Wilson	27-Apr-20	3	Easy to install and use. Hope it helps when the second wave hits. Fingers crossed it doesn't.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Gary Jiear	26-Apr-20	1	No dramas getting on and installing. Easy as. Remember to drop the zero at start of your mobile number.		
Rod Woolley	26-Apr-20	19	Hopeless...wouldn't even accept my mobile number when trying to register. This is basic stuff!		
Andrew	27-Apr-20	1	Easy to setup. Seems to work well with minimal battery impacts.		
Natalie Vardy	27-Apr-20	I had to uninstall and reinstall the app. Now when I set it up	it says invalid phone number. How do I fix this please?		
John B	27-Apr-20	Tried to register. Said my mobile number is invalid???? I can't get past the sender code bit.			
Christian Bertram	28-Apr-20	3	Collects minimum identifying information. No birth date. Even accept a screen name/pseudonym. Great way to demonstrate that personal information is almost irrelevant. What's relevant is the ability to contact me via phon if I've been close to someone infected. Let technology do the mundane ground wo		
Gary C	27-Apr-20	So far I'm thinking that I've now got it working	it only took 9 hours	hope it works and helps from spreading the virus ðŸ˜.	
Sophie Burnham	27-Apr-20	Its a fail for me - wouldn't accept my phone number and nowhere to report that.			
Australian Wanderer	26-Apr-20	5	I have made the decision to download the CovidSafe app in the hope it could accelerate our pathway out of this mess. I am conscious of the possibility that my increased trust in Government institutions to not misuse my data is a result of myself working within a Commonwealth Department for almost a		
Aslan Mesbah	27-Apr-20	The app has a bug that keeps stopping my podcast app which also uses bluetooth.			
Lys Karagun	1-May-20	1	Set up	smooth and running. No issues.	
Laura De Nuntiis	1-May-20	Frustrated.....It sent me one code but when I try to upload data	it won't send me another code.		
Ray Sting	2-May-20	1	If this app is not tracking my location	why does it need location permission? When you remove this feature I will then be able to activate it.	
Ryan Kerin	5-May-20	1	Interferes with Bose 700 Bluetooth headphones so had to disable location permission.		
John Protheroe	6-May-20	1	Constant bluetooth drops and inability to scan. Had to delete to allow earbuds to work		
Jacki Sangster	19-May-20	Turns inactive on its own all the time No point in having the app if it disactivates itself all the time			
D PJ	17-May-20	The way it drains my battery is may as well be permanently plugged in			
Bill Dowell	26-Apr-20	2	Loaded quick enough	another hour before registration starts.	
Xavier Lo	26-Apr-20	registration went through without a problem.			
kagu	1-May-20	2	Broke multiple services	Bluetooth and caused unexpected reboots. I want to use the app but it makes my phone useless and unreliable	
Brett Lamond	26-Apr-20	1	Works as advertised. Easy to install once they started accepting registrations!		
Alan	26-Apr-20	2	So easy to install	people that have had problems must be complete dipsticks.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Luan Vannithone	26-Apr-20	2	The government should consider incentivizing Australians further with say a \$50 for each user download	via some claiming procedure. It's a small cost considering the great potential for opening up the society more and more	and speedy economic recovery. The higher the level of take-up the greater t
Peter Campbell	27-Apr-20	Australian government app for tracing contacts when someone tests positive for COVID-19. Five stars when source code is released.			
Russell Smith	27-Apr-20	Doesnt work	thinks my phone number is invalid. Tried with/without leading zero		
John Nudle	26-Apr-20	5	Written by a bunch of INDIANS! Can't sign up - "Invalid Phone Number" error! Tried different combinations of different numbers.		
Mats Animation Studio	26-Apr-20	Setting up app won't accept my mobile phone so can't register. Once it's fixed I'll be happy to use			
D.J. Moynihan	26-Apr-20	This simple app will help our Gov with tracking and tracing efforts to control Covid-19.			
Anthony Gavin	30-Apr-20	1	Awesome idea	download so we can all get back to work. DOESN'T have any impact on battery life	
Alexander Solntsev	3-May-20	Works well	doesn't require unnecessary permissions.		
Glenn Bickford	3-May-20	Can the app please remove the message telling you it is running. This is very very annoying.			
Mateusz Malzacher	4-May-20	Good idea	but the minimum 15min contact window makes this app largely obsolete.		
Dhanya K	4-May-20	Stops running in the background	even with all the necessary permissions		
LJ Cruickshank	6-May-20	1	Interferes with other Bluetooth apps especially connection to car. Deleted.		
Bertrandization	12-May-20	1			
Julie Leeson	15-May-20	I find the app places significant drain on my battery. I'm using a Samsung s7			
June Cleverly	26-Apr-20	Its a great idea. App is easy to upload. Brilliant			
Mark Hafner	26-Apr-20	1	Says my number is invalid when it isn't. Seems to be a common problem	we've got no hope	
Sds Perth	26-Apr-20	4	I'm not giving my phone number. If we need to speak	broadcast an alert to my app. I'll call you. Maybe less efficient	but more effective as more people will use it.
Bradley Britton	26-Apr-20	15	Not able to install it on my phone as it is Android 5	so I can't participate. So	I am unable to support this process due to the lack of android support for older phones.
Kyle Marshall	27-Apr-20	3	It tells me my phone number is invalid and I'm unable to locate any support resources that address this. Therefore I'm unable to register.		
Lucas Preston	26-Apr-20	3	Leaving the app running and battery life may be an issue.		
Harold Balmer	27-Apr-20	Keeps saying that my mobile number is invalid and I have tried many times. I'm			
Tuki	26-Apr-20	It's saying 'invalid phone number'. I've tried it with and without the 0. Not sure what's going on			
Malcolm Adamson	30-Apr-20	3	Limited user experience ... that's good! Car Bluetooth connectivity ok.		
Leonie Bailye	27-Apr-20	The app won't accept my phone number. It keeps saying "invalid number"			
Morry Iffland	26-Apr-20	3	I tried 3 times t get this app could not get back in time t pur number in so failed VERY VERY ANNOYING I FAILED T GET THIS DONE.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases.	That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Sarah Elizabeth	26-Apr-20	Easy to set up	so glad to have this extra level of help during these unforeseen times.		
Naeem Khan	27-Apr-20	Mobile number validation now accepting .y number and giving invalid number error.			
Kathy Lange	27-Apr-20	2	No problems registering last night. Very easy		
Robert Barton	26-Apr-20	2	I think most people know what this app does. Wish there wasn't a constant notification on my phone. A bit annoying.		
Emma Tonkin	26-Apr-20	Install and registration flawless at 7.10pm AEST. Great work.			
Ti bi	26-Apr-20	10	Like everyone else	I can't get past the mobile number input. But we all need to just be patient. It will be started in due course...	
TheUnknownjustice	3-May-20	Phone screen constantly keeps popping up with connected to null and then disconnected from null			
John Wallis	12-May-20	1	If you have a oppo reno z do not bother downloading it as the phone is not compatible with the app. Very annoying.		
Will Bailey	16-May-20	Causes skipping and buffering issues with speakers and earphones			
Mark Banks	28-Apr-20	1	Great idea but the app will not register my mobile number.		
Ashley Leared	26-Apr-20	30	Excellent Idea. Will register at 6pm wen registrations open. The 1 star reviews forget 1 things the mobile number forms part of the rego process. Hence why the issues		
Stuart Palmer	27-Apr-20	Easy to register	great to see an app with real purpose		
Rafael A	26-Apr-20	Painless installation. Will update when battery usage information is available.			
Andrew Thomas	30-Apr-20	299	Super easy to set up and could well save lives. It is indeed excellent to live in Australia.		
Craig Sayers	27-Apr-20	This app has had much more testing than any social media app. Get over your thinking the government will track you. If you want to be tracked go to China and see how they operate.			
Marrion Saunders	27-Apr-20	1	I don't know if I have registered correctly. The second place for pin number said 'error'. I don't know how to correct this		
Tatham Oddie	27-Apr-20	Quick and easy setup. Unobtrusive app.			
Anneliese Elizabeth	30-Apr-20	2	Works well. Surprisingly doesn't drain battery.		
Rae Dowd	26-Apr-20	5	Mobile number the app will not except +61 you loose the 0 still will not accept it may as well uninstall the app do not have a home phone		
Patrice Guillou	26-Apr-20	2	The closest version of what herd immunity 2.0 should look like. Please install	register and protect. Thanks.	
Lita Adams	27-Apr-20	Easy to download. Minimal personal information necessary. Easy opt out if wanted. Personally I'd like to know if I have come into contact with covid 19.			
anna midgley	29-Apr-20	1	It won't valid my number and my mum can't even download it. Very disappointed I hope this app gets a lot better.		
Annie Tran	1-May-20	Download and registration was done very fast and easy on my Android phone. Australians should try our best to get the economy reopen asap and fight back this CCP pandemic.			
Frank Cristiano	1-May-20	Download is difficult for very odd seniors. You should keep it = Simple = KISS it.			
wubieful	9-May-20	Why does the app now require location setting to work where before it only required Bluetooth?			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
stoller haugen	15-May-20	2	The app keeps shutting down every day. It must be something in the settings that does it---? I give up. GRRR.		
Travis Smith	26-Apr-20	1	Easy to setup and a great initiative to help keep people safe. Thanks		
Robert Profke	28-Apr-20	1	Frustrating. You keep telling me my phone number is invalid. How do you know? Telstra manage to send me bills every month.		
Andrew Lewan	26-Apr-20	2	Tells me I have an invalid phone number. Had the same number for 15 years. Tried without the leading "0" and with. No luck. Fail.		
Ross Easey	26-Apr-20	4	Useless	it won't accept my phone number	tells me it is invalid. Same now with my wife's number.
Deborah T	29-Apr-20		You need to have bluetooth on or it says your number is invalid. App should have clearer instructions		
Laura Kuskopf	26-Apr-20	2	Very simplistic welcome and permissions process. Good layout. Let's do this Australia! ☺		
Kays Prower	26-Apr-20	8	Doesn't work	won't let you get past pin stage. I wasn't holding out much hope for them to get anything tech related right anyways I tried	
Owen Gale	26-Apr-20	6	App requires location permission	government only said it needs bluetooth	they are hiding something! App removed.
Charlotte Thomas	27-Apr-20		Turn off Wi-Fi while registering	this gets round invalid number issue	
Drew Poli	26-Apr-20		Easy to set up. Registered first go. No concerns. Phone number accepted first go.		
Rob	27-Apr-20	1	Open source	all reasonable safeguards in place. Simple to use and a benefit to team Australia	especially as social distancing restrictions are relaxed.
Jason Holt	26-Apr-20	7	Mobile number error. App does not allow registration for 0487/486 or 0482/482 prefix mobile numbers		
Ligia Touron	28-Apr-20		Great idea but the app doesn't recognize my phone number. Fix bug please		
Neil Ennis	28-Apr-20	2	Works fine. No battery drain on my pixel. Do it. You might save someone's life.		
Matt Doble	26-Apr-20		Can't sign up. Get error message saying please try again later. Won't send code to phone. I'll change review once app problem is rectified.		
Simon Szmerling	30-Apr-20		Easy to download and register. Took 1 minute.		
Lee Tischler	30-Apr-20	1	Wont accept my phone number so cant sign up. Tried with 0 and without and makes no difference.		
Ruth Klein	1-May-20		Cannot see pin number at the same time as trying to put it into verification window		
Alex Gunawan	1-May-20		It's disconnect and reconnect my other Bluetooth device.		
Theresa Saldanha	3-May-20		Big issue...it makes my phone laggy...I can't pair to any other Bluetooth device		
Aaron Spooner	2-May-20		Excellent	download and get on board the train to normality!	
Chris Le Brese	12-May-20	1	Screen comes alive every 10 mins as the notification refreshes on Android 10.		
Douglas Rogers	10-May-20	1	Spent over 30 mins	got issued with 4 "6-digit codes" - NONE of which were acceptable ie none "worked". SO! thanks but no thanks	get your System to work not just for Astronauts!! WHAT a waste of time this was!!

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Kolo Sam	28-Apr-20	1	Unfortunately	this app is not compatible with some older phones eg. Samsung Galaxy Note 3.
Erin Thomas	27-Apr-20	Says my number is invalid. Tried taking off the 0 and taking off the 04 and leaving them in. It is buggin out		
Tim McCredie	26-Apr-20	1	Leaving feedback for a friend. His iTunes account is registered in the UK but lives here. App not accessible for him	
Leonel Bernardo	27-Apr-20	Hopefully we get a good uptake with this app. Helps the government keep us safe. Not really concerned with privacy etc.		
Pasan Eriyagama	27-Apr-20	2	Great effort guys	appreciate it. Seems running good. Suggestion: if someone is positive may be good to get consent and get their google/apple recent location history from mobile and Google fit health reading for recent past. Statistics may be helpful. Cheers!
Mike Ahern	28-Apr-20	1	It won't accept my mobile phone number. I was trying to download at 4pm on Sunday but it did accept after 6pm.	
Jack Webster	29-Apr-20	Works fine	minimal impact on battery life.	
Cameron P. Thannhauser	29-Apr-20	The app is not accepting my mobile number ... I will try again soon.		
Roy Lehmann	4-May-20	1	Seems all good to me. No issues with a Samsung Galaxy S7 edge.	
Sally Edwards	3-May-20	Thought this was optional download	now your bribing us	â€œif you want to go to the pub download the appâ€œ.
Colin Heussi	9-May-20	2	When running in the background battery optimizer keeps dropping out and app stops working	
Anna Stack	13-May-20	Notification always on and app won't work with push notifications off.		
Australian Hunting Podcast	12-May-20	1	As Archie Luxury said. You'd have to have rocks in your head to download this app and open it. Big big brother and government tracking at its finest!!	
Michael	27-Apr-20	1	Straight forward and smart	putting health and privacy concerns first
Bernice Porter	27-Apr-20	NOT able to register for this app! Keeps rejecting my mobile number		
Daniel Berry	29-Apr-20	Looks like the SMS gateway is down	can't set up the app	
Ann Ward	27-Apr-20	Can't register. It keeps telling me that my mobile number is invalid. Help please		
Mark Senft	26-Apr-20	Took less than 30 seconds to register. The better informed the decision makers are the better the response to this crisis	well done to everyone that signs up.	
Michael Williams	26-Apr-20	1	Keeps coming up with an invalid phone number when trying to register.	
Jason Russell	26-Apr-20	10	When I receive my PIN it tells me the PIN is incorrect then when I retry the registration it tells me my phone number is invalid.	
peter lynch	26-Apr-20	1	So easy to register what's all the noise?	
Happy Wren	26-Apr-20	Downloaded and registered in less than a minute. Great way to help our nation fight this virus.		
Anirudh Parthiban	29-Apr-20	1	If you use Google and Facebook you already have no privacy. Just get the app so we can get back to a bit or normalcy	
Gabriella Simpson	5-May-20	Hard to get between pin and verify...but not digital nativeâ€œ		
Sean Gallasch	26-Apr-20	Very easy to install. Download it so we can all get back to our lives as best as possible anyway :)		
Vinay S	26-Apr-20	1	Doesn't recognise the phone number. Get an error saying Invalid phone number. Please fix.	
Suzie Von Der Burg	27-Apr-20	Unable to Register	keeps telling me my mobile phone number is invalid	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
PhasePolarizor	26-Apr-20	1	Easy installation and provides peace of mind should I come in close proximity to an infectious person.		
KAY ZEE	26-Apr-20	2	Not sure why there are so many whingers. You download it. You follow the simple steps. You register. Allow permissions. Sends you a text. And bobs your uncle. Leave it alone. Not that hard. If it still doesn't work for you then you have an old phone. Sorry.		
Terry Jenner	28-Apr-20	1	It appears to impact my other bluetooth connected devices from connecting.		
Andy Bown	26-Apr-20	Easy to register. Teamwork can save lives.			
Nick Colebatch	26-Apr-20	Very easy to sign up to and happy to participate.			
Blake Riley	11-May-20	Zero difference in battery life. Took two seconds to set up.			
Atomic Electron	13-May-20	App closes for no reason and asks to disable battery optimisation on every launch of app			
Sue Perry	27-Apr-20	4	Was only able to register after connecting via mobile network instead of wifi. Odd.		
Lesley Marks	27-Apr-20	Easy to download and hopefully will support the community to be safer.			
Adrian Wong	1-May-20	1	Registration works fine and was super easy.		
Rhys	27-Apr-20	continues to call my phone number invalid. yet I've never received a six digit pin as if some random individual has used my number			
Bernard Spence	26-Apr-20	23	Try to add my mobile number a number of different ways. The app says invalid pin everytime.		
Bethany Gardiner	28-Apr-20	It seems my phone number is invalid....emailed support - no reply...yet. Uninstalled....maybe next time δÝ%			
Jase Ford	27-Apr-20	Not sure if I'm doing something wrong but chewed up 70% of my battery in an hour and a half			
Ben Kelley	27-Apr-20	1	Great	works fine	easy to register.
Andrew McClenaghan	27-Apr-20	2	Working great since I was able to activate my account. :)		
Stephanie Boydell	27-Apr-20	Easy to install and safe. Just do it. If you wont use this app you should equally take yourself off all social media	email and turn your smart phone off		
Jason R	27-Apr-20	2	Great use of technology. No problems installing.		
Kristen Cummins	27-Apr-20	Doesn't accept my phone number...have tried 2 different ways...comes back stating its invalid number. Cannot go any further			
Verity Manning	27-Apr-20	Will not accept my mobile number so cannot install the app. Tried 3 times!			
Greg O'Brien	27-Apr-20	Will not accept my Australian mobile phone number. Tells me it's invalid. Needs to be better than that.			
Pete Dee	29-Apr-20	2	Unable to add my phone number so can't use the app. Says number is invalid.		
Arafat Tehsin	26-Apr-20	2	This app looks neat with a clear intention of maintaining privacy. I have signed up.		
alan Fallah	26-Apr-20	1	We should all be downloading this app to make contact tracing more streamline and accurate.		
Mark Skanes	26-Apr-20	1	Easy to download	no problems on my Samsung.	
Bhavika Patel	27-Apr-20	1	If location is not recorded than why app need location access? Please explain transparency is very important to gain people trust.		
Sharon M	29-Apr-20	Good app	I've been out and it didn't detect anyone near me with the coronavirus19	worth getting	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Juliet Rydell	2-May-20	1	My airpods no longer automatically connect and the disconnect spontaneously since I installed this		
Michael Grace	18-May-20	1	Interrupts Bluetooth connection to music streaming device intermittently		
Steve Close	2-May-20	1	It's tracing not tracking people	there's no GPS location active.	
Andrew Cooper	28-Apr-20	1	Easy to install. Helps to protect me and others from the virus. A must have app.		
Rommel Luzares	27-Apr-20	1	Registration error - the app doesn't recognise my number.		
S Jackson	28-Apr-20	1	It states I have an invalid phone number	and didn't accept it with or without the 0 in front. I wonder how many people will try to help out but can't even register.	
Brad Baker	26-Apr-20	1	How about a page in the app where businesses can offer discounts and incentives for active users. The more people who download it the faster businesses can reopen.		
Blanche F	26-Apr-20	1	I don't use many apps and am extremely careful about what I sign up for but this was a no brainer. I have more concerns about my work sine on app than this one.		
Michael Hill	27-Apr-20	1	Everyone should have this installed to make us all safer. But I can't stand the constant notification on my phone saying it is running. Please allow me to remove this.		
Catherine Blick	27-Apr-20	1	Can't give this app stars at the moment	it keeps telling me my mobile number is invalid so I can't register	
Stephen Sable	26-Apr-20	4	I want to sign up	downloaded from google play. It won't accept my phone number	and yes I have dropped off the first 0.
Annie Rentos	1-May-20	1	Easy to install	non obtrusive and helps get us out of lockdown sooner - Get on board Australia! ☺	
Shirley Valentine	5-May-20	1	Pin number could remain on screen a little longer.		
Jeff	9-May-20	1	All good	sign up was a problem but all good now. Only use letter not dashes or numbers in name	
Ana Delevska	20-May-20	1	Keeps deactivating itself on my Oppo phone. No point.		
Wendy Dickson	26-Apr-20	10	Useless keeps telling me my mobile number is invalid Luca Natoli referring to this Muppet hereunder	no one is a muppet. Speaking for myself I only found out about this app an hour ago WHICH WAS WELL AFTER 6 PM when I installed the app. So I will give a 1 star rating because it doesn't work	
Joshua Moody	26-Apr-20	8	Hahahaha More money spent on a app that they released quickly and didn't test it. Phone number is invalid....		
Sarah Carter	27-Apr-20	1	Says phone number invalid! Unable to complete process.		
Edward Stephens	26-Apr-20	1	Wont let me input my mobile number	tried entering it in different formats. So far its a fail.	
Simon Green	27-Apr-20	1	Sign up was easy	and explained it purpose well	
Peter Donahue	26-Apr-20	1	As stated	app is now working normally and registrations successful. Get it now!	
Michael Krimmer	26-Apr-20	1	Up and registered in under 60 sets! Excellent work		
Kevin Kai C. D.	27-Apr-20	1	Please hide the app scanning notification. It should just work in the background.		
Rachael Hetherington	26-Apr-20	1	Super simple and will help make a difference!		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n		
Dean Breedt	27-Apr-20	Super easy to install and register.					
Tim Lee	26-Apr-20	Easy to install. Great initiative to help keep everyone safe.					
Sheriff FPV	27-Apr-20	I deleted the app and signed up re installed it now I can't login again with same mobile number??????					
Thomson Tam	28-Apr-20	4	Unable to register	said incorrect phone number	tired with and without leading 0.		
Philip Rochecouste	26-Apr-20	Easy to install and register. Hopefully this helps everyone.					
Scott Kelly	26-Apr-20	Easy install. No problems for me at all.					
Justin McErvalle	26-Apr-20	Great idea and easy to install. Thank you to government and all involved. Guessing we won't see Kristina Keneally on here.					
Matthew Silk	26-Apr-20	Easy to download and minimal data inputs.					
dennis c	26-Apr-20	2	my mobile number keeps coming up as invalid	even my wife's number	so I can't register!!!		
Tej Sidhu	2-May-20	1	Should be able to turn off bluetooth/app when ur at home.				
Brett Born	1-May-20	Excellent app	does its job and hardly uses any battery				
Cameron Young	4-May-20	Works and just runs. No issues with so far. ☺					
Ryan Clayton	5-May-20	A small app that runs in your background to help Australia get back to some form of normality.					
Chris Pascoe	11-May-20	It doesn't start itself during the phones start up process.					
Claire Dahl	1-May-20	2	Not received pin number after 6 attempts using correct mobile number and all details requested				
Keith Linard	26-Apr-20	1	Cannot enter mobile phone number (says invalid number) so cannot complete registration.				
Brian H.	27-Apr-20	Refuses to accept my phone number	tried several times and now guess will just delete the waste of time				
Timothy Wilson	27-Apr-20	1	Could you please make this available in more countries? My relatives who are stuck in Aus cannot download it!				
Hannah Travaglini	28-Apr-20	1	Why can't I get a pin number tried all day yesterday and today				
Paul Youman	26-Apr-20	Great initiative to help manage this virus and hopefully relax the lockdown sooner.					
Leischa Bevan	26-Apr-20	Easy to install. Happy with privacy issues					
Dave Mathers	27-Apr-20	1	At a loss	have advanced and received pin number	says wrong phone number .?????. I do want the app.have now uploaded.		
Gary Paul	26-Apr-20	1	once i type in mob number	hit get CODE	just say to try later	i will give it one more shot	if not bu
Nathan Paterson	26-Apr-20	Super easy to set up	doesn't even ask for much info.				
Dundee Downunder	26-Apr-20	2	Waste off time says my phone number is not valid. Tried lots of different things combinations and more. Not doing it now...				
Adam Wale	26-Apr-20	1	Registration went smoothly	battery usage seems minimal			
Jess L	26-Apr-20	Works great	I am now safe from Covid	it's true because this app says so			
phanonamass account	26-Apr-20	1	Amazon product yea I've probably got no issues with the data.				
Keren Frame	26-Apr-20	So simple to install and register my 80 year old parents could even do it by themselves					
Prasanna Gopal	26-Apr-20	1	Doesn't recognise mobile phone number to get a pin. Glitch in the app.				
Adele and Roger Ladyman	28-Apr-20	2	Continuously says our phone numbers are invalid and can't find anywhere for assistance!				

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Grace Glover	29-Apr-20	Since downloading - my apps keep shutting down and my phone freezes.			
Elysia Mc	3-May-20	The app has slowed my phone right down to the point where I can no longer use my phone.			
Bob D'Guye	7-May-20	1	I love it! It's keeping me COVIDSafe. Much love to the developers.		
RICHO	20-May-20	2	what a joke has to run Bluetooth all the time and uses battery up like nothing else		
Noel Mathison	26-Apr-20	3	If the app is downloaded I can't send texts. It doesn't exist on my wife's phone with Android 9		
Iain Gorry	26-Apr-20	Easy and quick to install and register			
michael cross	29-Apr-20	1	Easy to use. Does not drain battery on samsung s10plus5g		
Renee Austin	27-Apr-20	2	What a no-brainer! Everyone should download this app to help protect the vulnerable in our community	help save lives	and allow us to get back to normal Aussie way of life!!! So so grateful I live in Australia maybe those who don't see the value in it or are concerned about the supposed privacy is
jono	27-Apr-20	4	Turn off WiFi during registration to have mobile number accepted.		
Larry Detlefson	30-Apr-20	Difficult to register not enough time to verify and number disappears too soon.0			
Edwin Flynn	5-May-20	Very heavy battery use. I switch it off at home to preserve battery.			
Scott Boreham	14-May-20	1	Keeps glitching my music players	soundcloud and Spotify. Not happy Jan!!!! If you want people to use this it can't mess with simple stuff like this. I'm out till it's fixed. (Will keep washing hands and socially distancing)	
Richard Tait	17-May-20	Works well	stable	does not crash.	
Peter McCrindle	26-Apr-20	1	Easy to download. Set up from 6pm 26 April. Great protections to data. Please do this for others.		
Queeny Yu	27-Apr-20	It won't let me register. It says my mobile number is invalid.			
Russell King	27-Apr-20	3	Simple to install. Stores my data locally. If it can save one person from dying it is worth it! Stay safe!		
Leah Barreto	27-Apr-20	Should try and potentially find a way to allow people to upload geo locations from Google maps.			
Brenden Jacobson	27-Apr-20	Cant register. Keeps saying my mobile number is wrong.			
Catweaseloz	27-Apr-20	needs a button for "im at home and haе the bluetooth turned off stop telling me ive got the bluetooth turned off".			
Fiona Ramsay	27-Apr-20	The App is not accepting my mobile number. States its an "Invalid phone number"			
Daniel Smith	27-Apr-20	Good initiative	haven't noticed any extra battery drain		
Craig Pendlebury	26-Apr-20	1	Registers quickly	no fuss. Looks really good	
Eric Koch	4-May-20	After reinstallation the app did more than just the splash screen.			
Chris X	5-May-20	Error 'please try again later' when I press 'get pin' pixel 2 android 10			
Benny L	6-May-20	The location requirement is for Bluetooth not actually used for GPS	uninformed people =(
Martin Chatfield	11-May-20	1	Can not be loaded on Samsung Galaxy J1 2016.		
Cain Davidson	12-May-20	1	Breaks bt headphone connection intermittently every few min.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once sooner rather than later. Will do whatever it takes to get out and about quicker. This app is a great idea. so we can end lockdown safely and be able to isolate and contain all future outbreaks. The app is simple and easy to register for. C'mon Australia	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n we can do this. All for one and one for all ðŸ˜‰ðŸ‡;ðŸ‡º	
Denise Lees	26-Apr-20	Easy to install. No issues. Brilliant idea.				
Yvonne d	27-Apr-20	3	Need to get over this thing			
kyle	27-Apr-20	2	Let's all do this			
Nell A	27-Apr-20	Says my phone number is invalid. It's definitely valid :(
Eric Greene	27-Apr-20	All I get is invalid phone number when signing up.				
Cheng Charlie	26-Apr-20	1	The same experience as other people that showed invalid mobile number. It defeats the purpose of the push for everyone who wants to help.			
Sue Mittermair	26-Apr-20	Simple to register. The more people who register	the quicker we can enjoy some life again. This has been used in Singapore successfully.			
Tracy Mills	26-Apr-20	Easy to sign up. A bit difficult to understand whether it's active or not.				
Paul Mitsakis	26-Apr-20	12	All of you stupid idiots who are complaining about the registration process not working	it has been made clear that registration is not available until 6pm AEST today. Morons.		
Michael Rundle	4-May-20	1	Anther tool in the against Covid-19 and easy to use.			
Bruce Masterton	6-May-20	1	Works well. No problems at all. It runs in the background.			
Glen English	11-May-20	wanted location turned on. location is not required.				
Chris Fortuin	10-May-20	2	Well intended purpose but app drains battery so unfortunately can't be use my phone throughout the day without recharging			
Albert Shim	27-Apr-20	Impossible to proceed because of phone number verification error.				
Paul Rosser	26-Apr-20	1	Can't configure due to invalid phone number error. Telstra mobile.			
Tarna Barton	26-Apr-20	1	Simple to activate. Does not ask for much information at all.			
Tricia Piper	27-Apr-20	So easy to download and a must if we can go out sooner.				
KARMA Serendipity	29-Apr-20	It won't accept my phone number so I can't get far on the app	I uninstalled it and re-installed it and still won't except my phone number			
Ernesto CalderÃ³n	3-May-20	Seamless function. Great app. Let's kick the nasty bug in the nuts!				
Lambo Blair	2-May-20	Great initiative and runs smoothly in the background				
Antony Topic	4-May-20	Hurry up and open the pubs up	just want to sink bulk tins at the local			
A Google user	4-May-20	U cannot do this on Samsung 10 as u have to close app in order to get the code	then when u go to put that code in it says incorrect codr			
Bronwyn Casson	11-May-20	1	Keeps disappearing to continuing to download constantly painful			
Bob Colson	7-May-20	1	When partners retire with their mobiles on the bedside table the phones "talk" all night disrupting my podcast and flattening the battery.			
Richard Ramshaw	27-Apr-20	Simple app that could help save someone's life and tracks way less than Google	Facebook	Apple or just about any other app you may use. Staff safe people.		
Spam 4mobile	27-Apr-20	2	Quick install. Hasn't messed up battery life. I feel safe. Privacy no concern...you give up your privacy the moment you tell someone your name. So chill relax and contribute to community safety and health.			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Liam Scanlon	26-Apr-20	Honestly anyone who any issue with privacy has no need to worry with this app	it's designed for total security! Do your part in stopping COVID!		
Christian Mengler	26-Apr-20	6	Installed and ready for when the signup issue is resolved! ☺		
Warren Bryant	28-Apr-20	1	Lots of trouble getting phone number kept coming up invalid		
Ivy Liang	26-Apr-20	Very easy to download. Please download the app and help each other to fight the virus.			
Stephen Povey	26-Apr-20	Earlier issues have now been sorted out and works well			
Joy and Tony Warren	27-Apr-20	Won't recognise my phone number says invalid. Have tried 2 ways. Without first 0 and with. Useless			
Tara Cheyne	26-Apr-20	4	For those commenting on registration	at the press conference they have said it will be open after 6pm today.	
Paolo Villaflores	26-Apr-20	I am trying to upload data	and it won't let me. It's asking for a pin and it won't accept what I have.		
Lou S	26-Apr-20	26	I've put in my mobile number. Says not valid which is incorrect. Already bug issues. Heaven help us.		
D NIC	27-Apr-20	1	Once this is installed and using Bluetooth it will not connect to my car's Bluetooth		
John Rapley	27-Apr-20	A little piece of mind to help shorten the lockdown. Priceless			
David Stothard	26-Apr-20	Easy to use and peace of mind whilst out and about			
Noah Yue	26-Apr-20	1	Easy to get and set up. If you've had registration issues maybe give it a go in a couple of hours?		
Dylan Hansen	1-May-20	1	The fact it needs to run constantly in the background is a real pain		
Monica Watts	2-May-20	Keeps telling me my phone number is invalid ! Grrrr.			
Benjamin Williams	26-Apr-20	Easy registration. Nice interface.			
Michael Ing	26-Apr-20	Easy enough to install and register.			
Oliver Minter	27-Apr-20	7	Currently (2:40pm 27/4/20) experiencing a lag in getting sent the PIN via SMS.. maybe too many people are trying to register.		
Michael Russell	26-Apr-20	1	Not at all useful if it refuses to accept a valid phone number.		
David Kirby	28-Apr-20	Unable to register phone number no matter what combination I use			
Ivan Simmonds	1-May-20	This is a good app that is absolutely required to let us get out of our houses.			
Alisha Frith	4-May-20	Open the app and nothing happens. Doesn't ask for anything just stays on the home screen.			
Malcolm Lloyd	7-May-20	2	My Bluetooth keeps turning off for no reason.		
Rob Willis	16-May-20	Disable the annoying notifications and the app says not active. Please fix that.			
Kwaku Brefo	27-Apr-20	Great app	going to keep us safer during these trying times.		
Katherine Harris harriskatherine6	27-Apr-20	1	Will not accept my mobile number. So pointless if you can't sign up		
Matthew Randell	26-Apr-20	Installation and registration was easy.			
Malcolm Lambert	28-Apr-20	1	5 stars for intention. Pity they chose a foreign company governed by foreign laws to manage personal information of Australians. I would understand if people chose not to install for that reason.		
Sameer Deans	27-Apr-20	Cant register as it fails at Get PIN despite putting in a valid mobile number			
Allison Slee	27-Apr-20	I keep putting in my mobile number and keep being told it's invalid..			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Gary Bruce	26-Apr-20	3	Would not accept my mobile phone number. Could not complete registration		
Eoin Coghlan	26-Apr-20	19	Epic fail. Did not recognise my phone number. Invalid number. That's a shame. Thought it was a good idea and would work.		
Nicole Hedley	27-Apr-20	No issues so far	pretty straight forward. Happy to take this step to nail the COVID-19	and to protect my family and fellow Australians.	
Queen Dee	29-Apr-20	1	Can't download data because I don't receive sms text to upload my data.		
Lenny Le Roux	2-May-20	1	No issues	runs quietly in the background	
Charles Niautou	27-Apr-20	Easy to install and registered within 4 minutes			
Richard Jackson	27-Apr-20	Easy to install and if you are at all interested in safety you should have it. The gov't know everything anyway!!! LOL			
Bung Eye	26-Apr-20	As advised uninstalled and reinstalled the app now it registers my number	all good.		
Hannah Walters	26-Apr-20	3	Has a persistent notification that is super annoying.		
Siu Pang Tommy Choi	28-Apr-20	1	Stuck at registration	saying invalid phone number.	
Richard Batson	30-Apr-20	1	Seems to make the podcast player stop working intermittently		
David Rutledge	28-Apr-20	2	Set up was seamless	no issues.	
Nat Whelan	26-Apr-20	1	Easy to register and get going. Please	everyone	download and do your bit.
Richard Sexton	27-Apr-20	So far	so good. Not much to rate unless I get a contact tracing call	in which I'd give it 6 stars if I could.	
WY Ken Leung	5-May-20	In interrupt my Bluetooth earphones. Please fix.			
Charles Webster	27-Apr-20	Downloaded	installed only to be told my phone number is invalid! Oh well...delete.		
Jake Cockle	27-Apr-20	1	Can't load my phone number	App says it's not registered?? How do we enter our mobile number? Just 9 numbers in a row?	
T A Khoo	27-Apr-20	1	Cannot go past mobile number	app says it's INVALID!	
John Mitchell	27-Apr-20	Can not install my mobile phone is stated as invalid no way to get code. Very frustrating.			
mxclubman	27-Apr-20	Unable to use as keeps telling me my mobile no is invalid!			
A Google user	27-Apr-20	Keeps telling me my phone number is invalid had this number for 10 yrs			
vicki copp	28-Apr-20	1	App won't stay open in background and keeps closing will be uninstalling		
Grant Schmidt	26-Apr-20	1	Works as described.. anyone who doesn't download this app deserves to cough up a lung and be locked inside		
Greg Comerford	26-Apr-20	1	You can't register yet!! Opens up for registration at 1800 peeps!		
Luke Brouwer	30-Apr-20	I have the bluetooth headset dropping out bug please fix.			
Annie DOMOTOR	1-May-20	1	Once I managed to download it I was very glad to see it doing its job. I am very pleased with you guys in Government. So glad to live in Australia XX		
Marlene Spear	20-May-20	Terrible when I get to pin nothing can't be bothered tried numerous times			
Robbie Cahill	2-May-20	2	The only antivirus app that can protect you if you're exposed to a virus		
John Gunner	26-Apr-20	16	Unable to register. Message received stating phone number invalid. It is not invalid		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Brisbane Gal	26-Apr-20	11	REGISTRATION OPENS AT 6PM. Idiots. Stop down rating it. The lower the stars the harder it will be for people to find this app	the longer we all have to bloody isolate.	
ian wilcock	27-Apr-20	Doesn't accept my phone number on set up. Tried different forms			
John Young	27-Apr-20	Simple and easy registration.			
Luke James Gilbert snr	27-Apr-20	2	Works well	no problems with this app	keep up the good work. God bless.
Barry T	26-Apr-20	1	Very easy to install and register.		
POLLYFODDER	29-Apr-20	Great app! Love the way our 'sugar daddy' (Scomo) is looking after us all ☺			
David Prichard	29-Apr-20	Fast and easy to download and set up. Well done ☺			
Lynne MacLachlan	4-May-20	Makes me feel safer having the app on when I walk my dog and when I take her to the vet hospital.			
Patricia Hayne	18-May-20	It seems ok but my battery drains very quickly			
Maria Davis	26-Apr-20	It is a very useful app and was very easy to set it up! Thank you for all concerned in creating It! We are in this together			
Gifford Hatfield	27-Apr-20	1	The app tells me my mobile number is invalid whether I use 0 or not. How can I complete connection please		
Andrew Forrest	28-Apr-20	Easy to set up and doesn't have any noticeable impact on my battery life			
Chris Parker	4-May-20	1	Can't register. Invalid phone number issue (Telstra	+61408 prefix)	
Katrina Hare	28-Apr-20	1	I dropped the 0 and still saying invalid phone number. Not easy to use at all.		
Andrew Dumas	26-Apr-20	A great app. Very straight forward.			
Peter Slowiaczek	27-Apr-20	1	Excellent use of technology to assist in a public health emergency.		
Kim Roberts	27-Apr-20	1	A fantastic initiative to assist contact tracers in their work. This is what technology excels at.		
Charles Phillips	28-Apr-20	2	Requires location services on which is at odds with the assurance that it does not store your location.		
Chris Watts	27-Apr-20	Try to register	app keeps telling me my phone number is invalid.		
Anton Marcus	27-Apr-20	Tried loading the app 4 times and it keeps on saying Invalid Phone Number.			
Mr3358629	26-Apr-20	2	Impossible to sign up to. Does not recognise mobile phone numbers!		
Dinesh Rethnasamy	26-Apr-20	1	Works as expected. But permanent notification is annoying		
Travis Holland	27-Apr-20	The app refuses my mobile number so I can't register.			
david wang	3-May-20	I cant even register . I have enter the right phone number . But it keep saying phone number invalid			
Robert White	5-May-20	1	Useless badly programmed can't get back to app once I haved accessed the 6 digit pin		
Linda Williamson	16-May-20	1	Unable to register because I cannot get a PIN.		
Michael Hoeboer	27-Apr-20	Nothing to hide so why worry about tracking when all your other apps are already doing it.			
Les Watt	27-Apr-20	Cannot enter phone number. App is joke!			
Tony Moore	26-Apr-20	5	I want to believe in this app but don't understand why it is asking me to give permission to my location. This aspect needs correcting as the govt's said location is not required.		
Marney Jane	26-Apr-20	1	App won't allow me to register. Says my phone number is invalid.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Felicity O'Neil	28-Apr-20	It won't accept my phone number claiming it's invalid. I've tried with and without the zero in front of my number - any tips??		
Paul Kapp	27-Apr-20	Validation of mobile number throws Invalid mobile error		
Sarah Davey	1-May-20	1	Keeps interfering with my Bluetooth headphones please fix!!!	
Ross Attrill	5-May-20	1	Installed easily. No impact on my phone. :-)	
Rauli Kumpulainen	5-May-20	1	Sent pin failed. Press resend pin	does nothing. Stop wasting my time.
Peter Baker	28-Apr-20	1	App doesn't accept phone number	claims it's invalid.
Sandeep Kumar	26-Apr-20	Unable to register. Getting error while sending pin to my number		
Mick B	27-Apr-20	1	Question- what is to stop everyone from tapping the button confirming they have corona? Wouldn't this be counter productive to have this feature?	
Daniel	26-Apr-20	Very quick and easy to setup. Please do this so we can all get back to living our lives.		
Barry Jacobs	26-Apr-20	1	Downloaded app but when I tried to register it indicated my phone number was invalid. Useless unless this gets rectified	
Lynne Davies	27-Apr-20	Keeps coming up invalid phone number. Cannot get pin		
Mark Santoro	26-Apr-20	1	Won't recognise much photo number	so can't register!!
Don Williams	10-May-20	Installed and works ok on Samsung Galaxy J5 pro with Android 9.		
Joanne Roomes	26-Apr-20	1	So glad to be part of this was easy to download and sign up	
Picadilly Lane	5-May-20	2	Why are some phones unable to load this on. With android version 5 it will not load	
Matty Ross	30-Apr-20	2	Just installed app	but annoying to have the notification sitting on top of the phone permanently please fix
Ric Turner	15-May-20	1	Since latest update it won't stay on. Keep having to reset.	
J.R Shiels	28-Apr-20	3	Data is stored in servers around Australia using Amazon. Your data can be accessed by the US through the CLOUD Act. Your personal data is NOT safe.	
Steve Baird	27-Apr-20	Make sure you turn off WiFi during set up or you won't get your 6 digit PIN		
Luca Natoli	26-Apr-20	420	Bloody hell	you muppets giving it 1 star because it won't accept your phone number are illiterate... Registration doesn't start until 6pm muppets. Did you not read the rest of the articles to see it clearly states from 6pm therefore you can not register until then. So stop 1 staring it because you
Me Me	28-Apr-20	2	28/4/20 have now given it a 5 rating. Issues resolved	easy to install. If everyone adds this app then maybe we will be able to release the country from lockdown. Your welcome all those who are resisting. Thank you to everyone who is participating. Thank you to Govt for the app and doing the best t
Ann Hass	1-May-20	Cannot access pin and get back to app to enter it the app disappears		
Mike Kangaroo	7-May-20	1	Perfectly behaved. No issues no loss of data or battery	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Scott McK	8-May-20	Great idea. Install it to help keep you and your family safe. Battery usage is bugger all.			
Vickie Muldoon	12-May-20	I had trouble try to get the pin number but get it third time			
Jet Cat	16-May-20	1	Using on a Samsung Galaxy S10+. No problems whatsoever ☺		
Ben	15-May-20	Sick of the constant taskbar notification. Stuff this			
David Catling	26-Apr-20	Registration ran smoothly for me.			
Kerry W	26-Apr-20	1	App won't accept my phone number. Tried every format imaginable.		
Brendon Annand	26-Apr-20	Great initiative from the Australian Government	a well thought-out app that considers users privacy		
Sam Palmer	26-Apr-20	Pretty straightforward. No problems.			
Highlander Downunder	26-Apr-20	2	Keep getting an error saying that my mobile number is not a valid number		
Neville Kingdom	26-Apr-20	3	Registration starts from 6:00pm tonight so you have to wait till after that to complete installation questions.		
Malcolm Bell	4-May-20	Tried to download but failed every time gave up.			
Samuel Jaschke	20-May-20	Important step to being able to safely ease restrictions			
Ian Saunders	26-Apr-20	9	How many times have we been told by the Government that this app will not track your location. If you do not grant access to your GPS the app will not register and the Government wonders why we don't trust them. Will our media keep them honest?		
Kit Emett	27-Apr-20	2	Apart from the testicular cancer the 5G feature gave me the app works great.		
Amber Evans	26-Apr-20				
Percy Allan	27-Apr-20	Can't download it - too complex so have given up. Will now not bother.			
Jonathan Zhao	26-Apr-20	3	Unable to recognize my mobile number	keeping saying invalid. Unable to sign up.	
Meredith Sneddon	30-Apr-20	2	Chews through my battery which normally lasts 3 days but since getting this app im down to 9% by night.		
Philip Flanagan	7-May-20	1	Awful the pin number is only on for about 3 seconds		
Sponder Ninking	27-Apr-20	Why does app require location to beacon to register if it does not use location data?			
garth collingwood	27-Apr-20	1	Easy enough to set up once registration opened up		
Khiem Luu	26-Apr-20	1	Supporting this app to help the Health practitioners keep Australia safe	I'm comfortable the security and privacy controls put in place will protect my data.	
Ingrid Szikla	26-Apr-20	Here! Use my personal info! Take it! If my having this app installed could save a life	how can I not? I trust my personal data is perfectly safe anyway	but even if I didn't trust? Well	if my having this app installed could save a life
Fred Dalleau	27-Apr-20	1	Wanting to help but getting invalid phone number when trying to register.		how can I not?
Shane Williams	27-Apr-20	Doesn't accept my mobile number	so makes it useless.		
Jim K	26-Apr-20	29	Great app - everyone should get it. Let's beat COVID. Addresses all my privacy concerns - great work Australian Govt.		
Keith & Jenness Hemburrow	26-Apr-20	3	did not work on oppo u11 or a couple of other phones. i want in. please make it compatible.		
brendan wall	26-Apr-20	2	Great initiative to keep us all safe! Very simple to register. All one star reviewers please try again.		
Daniel Meissner	26-Apr-20	12	The persistent notification is super annoying. Uninstalled the app immediately.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Reagan Gruenthal	26-Apr-20	Easy set up	simple to use.... Oh and saves lives.	
Shane	e	Vining, Brown	16-May-20	Finally was able to get onto it As some mobiles can't download.. Including the one that are not updated Or upgraded
Mallee Boy	26-Apr-20	Easy load	essential app to help us all.	
Fiona Rowaro	26-Apr-20	1	A great app that is not jeopardising our privacy	yet keeping my family and the greater community safer during these unprecedented times.
Stephen Gee	27-Apr-20	1	Easy to install. This is one way to keep people safe and relax the restrictions so we can get back to some form of normal life. Also protecting front line workers	nurses and doctors.
Phil Ross	27-Apr-20	1	Real good privacy thinking and engineering behind this. Easy decision to install.	
Linda Reeb	27-Apr-20	Easy set up. Glad to play my part in controlling this virus & keeping everyone safe.		
J W Miller	26-Apr-20	1	Easy to install. I hope most Aussies install so we can continue to protect each other.	
Rod Doyle	27-Apr-20	When I try to register it says my phone number is invalid.		
Lesley Bunting	27-Apr-20	Site will not accept my phone number	unable to register	
Fran Ce	27-Apr-20	Keeps telling me my phone number is not valid.		
Aimee Moore	12-May-20	2	Battery optimisation keeps automatically affecting app usage.	
Raygrance	26-Apr-20	5	FYI to everyone who is unable to register be aware that registration opens at 6pm AEST Sunday 26th April.	
mat foley	26-Apr-20	4	asks me for a pin sent to my mobile	so I have to exit the app to check it return to app and it restarts? so I can't put the pin in....
Kate Mandalov	26-Apr-20	2	It doesn't chew the battery	you leave it running in the background. Don't panic and help your community!
snitz C	26-Apr-20	Worked fine after 6pm	easy install. Everyone get it !!	
Elizabeth Richardson	26-Apr-20	2	Easy to install. Secure. Happy to help.	
Tim Byrnes	26-Apr-20	1	This has an amazing privacy policy. Whoever wrote it is a genius.	
Gillian Woodstock	27-Apr-20	Keeps telling me my phone number is invalid so unable to register therefore not much use		
Slav	26-Apr-20	Easy to register and install.		
Brian Hornsey	27-Apr-20	1	My phone number comes up as invalid. Waited an hour and all was good	
Kirrilly Barnard	27-Apr-20	Dosnt work. Keeps saying invalid phone number when I tried to register		
Wendy Chandler	8-May-20	1	Found it too hard to understand for a person like me and my age plus not particularly tech savey to install. Have given up will take my chanced.	
David Ross	26-Apr-20	9	If this saves one life it's totally worth signing up. Could not obtain pin number to sign up.	
carney26	27-Apr-20	1	Just downloaded and it says invalid phone number when I tried to register to it.	
Phill Cameron	26-Apr-20	13	Requires precise gps permissions to run. Misleading description	
Frosti80	27-Apr-20	1	Battery went down extremely fast. Had to uninstall.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Chris Hicks	4-May-20	1	Keeps closing down when in background on my Oppo phone		
steve whittlecroft	1-May-20	Works fine	we all need this App so we can return to some normality.		
Joe Gubbay	26-Apr-20	Straightforward	easy to install		
Nicole Dance	26-Apr-20	3	As they said waited until after 6pm and registered no worries. Such a great initiative!		
Livio Corsaro	26-Apr-20	Works. Easy to download and register			
Chris Hall	27-Apr-20	1	A breeze to register. As long as it does what they say it does it will be good..		
David Bannister	26-Apr-20	10	20% power drain in 90 minutes	not using phone and screen off. Oh dear ☹☹☹	
Kevin	28-Apr-20	1	Registered successfully with no issues.		
Mike Channon	27-Apr-20	Will not accept mobile phone number and therefore cannot register			
Samir Abdullah	26-Apr-20	1	I cant register with my phone number even though my number is ok. Saying invalid number.		
Stephen Green	28-Apr-20	1	Don't be paranoid just install it. the more people that have this the quicker we can get back to normal		
Stacey Sharpe	1-May-20	I can't get it to accept my mobile number even after turning wifi off			
Kylie McNamara	4-May-20	Well it should detect the virus not when just registered for it to late then			
Hayden Baumann	14-May-20	Interrupts connection while bluetooth tethering music to Bluetooth devices			
Stan Edwards	17-May-20	No problems with the app as far as I am concerned. Better to be safe than sorry.			
Brian Kelly	28-Apr-20	Doesn't recognise my phone number. Says it doesn't exist. I didn't use the 0 in my number.			
Reema A	28-Apr-20	Invalid phone number...cant get it working and not sure which number to call			
jacqui houston	27-Apr-20	I couldn't enter my ph no. Said it was invalid- tried without and with the leading zero			
Chris Wareham	28-Apr-20	Co fusing sign on. Kept going in circles. Otherwise okay			
Julie Kelly	27-Apr-20	4	My phone had a spac attack when i installed it . Was saying the time was 6am at 11.15pm and the date was saying the 5th May I turned off bluetooth and it went back to normal so I uninstalled the app..my phone didnt like it ☹		
Deanne Smith	28-Apr-20	App will not accept my phone number as valid	why?		
David McDonald	26-Apr-20	3	Incompetently implemented - insists valid mobile number is invalid		
Pam Connell	26-Apr-20	1	Won't accept my mobile phone number - says it's invalid.		
Ian Conlon	27-Apr-20	1	Doesn't recognize mine or my wife's phone number. Invalid number and yes	I left the zero out.	
Jennifer Stavely-Alexander	27-Apr-20	1	Phone became very hot and sluggish poor performance after install. Uninstalling now		
Paola Nunez	28-Apr-20	2	Good enough for the purpose of it. Of course always room for improvement		
Alan Bunting	27-Apr-20	Hopeless. It doesn't accept my phone number. Says it is Invalid.			
Eva Sarah	26-Apr-20	1	No problems with installing it	let's all do our part with this virus.	
Ben Keen	3-May-20	Download and install without a hitch. These muppets complaining about tracking and information have given more details of their life to their bookface pages			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Brett Smith	3-May-20	Great initiative	only uses bluetooth not location		
Mark Atkinson	4-May-20	Constantly showing as needing an update.			
Ian Coleman	5-May-20	1	Seriously	you need more detail in your release notes. If you've snuck something in that utilises geo-coordinates without telling me	I'm going to be apoplectic in the moments before I uninstall the app. If you want usage we want transparency!
Dennis Lee	5-May-20	1	User friendly to register	a must have for the country.	
Caroline Dwyer	26-Apr-20	I managed to register just fine. Here's hoping this helps get us back to a normal life ☺️.			
Jave Ivanovski	27-Apr-20	Works for me. Hopefully restrictions ease soon.			
Shona Vice	26-Apr-20	Works fine now they have enabled the log in process			
Lorraine Ord	27-Apr-20	Pin verification impossible to work out.			
Alabi Omooseparo	26-Apr-20	1	I cannot go beyond the phone number. I tried both 45**** & 045*** but it keeps saying invalid phone number. Any help?		
Peter Bentham	26-Apr-20	Simple and easy to install We all in Australia should download this app it so life will return to normal sooner.			
Ashleigh Lister	27-Apr-20	It keeps saying that my mobile number is invalid!			
Wayne Lawrence	26-Apr-20	Just installed and registered ok. Just remember to drop the 0 from your mobile number			
Tomas Ratoni	26-Apr-20	1	Easy as and Aussie as! Stop whinging and just download it so we can get moving safely again!		
Peter Rowswell	27-Apr-20	1	Leaving Bluetooth turned on flattens your battery..		
Efendi Lucas	30-Apr-20	1	Cannot even register my number. Saying invalid number.		
keith hillier	1-May-20	Terrible Unable to enter the code Waste if time for me Not going to try anymore			
Craig Shelton	9-May-20	Just works.. in the background (batt could be issue)			
Ian F	14-May-20	1	Does the app need to take up space in my notifications? To me that's a bit like the kid who cried wolf. Please just give me notifications that matter not a constant space waster at the top of the screen.		
Patrick Prosper	26-Apr-20	1	Made sure my phone was up to date and everything worked straight off the bat.		
Lukegamingfever to cook and play game	26-Apr-20	Having issue signing up can't get past adding mobile number			
Sarah Beaman	26-Apr-20	Easy download. Registered no problems			
Richard Egglesfield	26-Apr-20	2	It does not install the app stops when getting a pin Typical of a gov app a non installable app		
Doug Tufrey	26-Apr-20	No problem downloading or registering.			
Colin Byrne	14-May-20	1	Had to uninstall and reinstall - I wonder if anyone else had to do that and if they take those into account when disclosing 5m people have installed it?		
Gabi Picard	26-Apr-20	Registration was quick and easy :)			
Brett Duncan	26-Apr-20	16	I have the same issue with registration however greg hunt just said on the news that you can register after 6pm.		
Jennifer Molnar	27-Apr-20	Unable to register it won't accept my phone number			
Adam Rosewarne	26-Apr-20	2	I signed up at 6:18 PM and it was easy as. Most of the complains seem to be from people who jumped the gun.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Rob Angus	26-Apr-20	1	Super simple and straightforward.	
lord Larko	7-May-20	2	I will delete this app if it keeps messing with my Bluetooth connection to my hands free car system. It's pissing me off	
Phillip	26-Apr-20	Installs and works expected. No issues		
Steve Robinson	27-Apr-20	1	Rejected my 15 year old phone number as being invalid. Tried 3 times with and without first zero.	
Jane Allen	26-Apr-20	1	When go into phone number it will not accept it and says its invalid.	
Paul Joswig	26-Apr-20	1	Installation	setup and registration all straight forward. All good so far. Thank you to everyone involved.
Andrew McCann	26-Apr-20	2	If you leave one star reviews less people will install it. Save the ski season give five stars!	
Shane A	26-Apr-20	Installed and registered easy peasy.		
Peter Willis	30-Apr-20	1	Dropped out due to weather ??? And now the app wont turn my blue tooth on..	
Anthony K	29-Apr-20	Becareful as the app sapped my battery. I have a phone that is a year old with 4000mah battery and sapped it.. Help would be great.		
Amalia Pahlow	7-May-20	1	I can get past entering my detail keeps telling me to try later. Have tried 4 times over last 3 days....	
Stephen Kolmann	8-May-20	That logo is obnoxious. FIX IT OR I WILL UNINSTALL.		
Debra Smith	27-Apr-20	Dowloaded but still not sure about bluetooth being on all the time		
MARGY THOMSON	27-Apr-20	When I enter my mobile number I get message "invalid phone"		
Simon Freeman	27-Apr-20	2	The only app on my phone without popup ads. 10/10.	
Angus Greenhill	28-Apr-20	2	Why does it request location access when the Government are advising it only uses bluetooth strength to determine vicinity?	
d b	26-Apr-20	1	Wont allow to register mobile number. Says invalid number.	
Rhonda Beohm	27-Apr-20	1	Could not register as kept saying phone number invalid	
Barbara Howarth	27-Apr-20	Easy to register and set up.		
Cheryl Reddan	30-Apr-20	Easy installation. No problem running.		
STACY Mitchell	3-May-20	I wonder how many of the required downloads of this app	will still be operating when users find it chews through battery power?	
Bill Stanley	3-May-20	I have had no problems with this App. It works fine.		
Darcy	4-May-20	1	Most recent update broke app entirely. Note 10+	
Helen Cygan	26-Apr-20	Very easy to install and register. Do it now		
The General Intimidator	26-Apr-20	3	Trying to register and this stupid app keeps telling me that my phone number is invalid.	
Roberto MA\ller	26-Apr-20	Easy to install and register.		
Peter Tan	27-Apr-20	1	Will not accept phonenumber. Hence useless for published usage	
Lauren Rethnasamy	26-Apr-20	4	I cannot use this app. It tells me my phone number is invalid when trying to register.	
Jack Cox	27-Apr-20	Such a fantastic initiative and simple app to use. Well done.		
Debbie Tsagatos	26-Apr-20	Easy to install. Privacy safeguards good.		
Ann Poots	28-Apr-20	2	App is easy to use and a great tool for all Australians.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Andrew Shen	5-May-20	1	I downloaded this app today and immediately starting getting advertisements to join my local pentacostal church? I'm not religious and I HATE geometry. This app is sucks		
Game Over	7-May-20	3	Drains the battery worse then any other app. Achieves nothing		
Liam Young	17-May-20	Says doesn't track you but requires location permission? For the app to work seems legit.			
Elizabeth Tall	27-Apr-20	Keeps saying my number is invalid and can't go any further. Please help			
dpmotors1	27-Apr-20	Say my phone number is invalid cannot complete the registration.			
Gary Weng	27-Apr-20	SMS takes toooooo long. Please extend the expiry			
Georgie Stewart	26-Apr-20	2	Won't even let me get passed signing up	it won't recognise my number and says it's wrong	
D GWALT	28-Apr-20	1	It is a real fault that this is not compatible with older phones such as my parent's phone. Many older people have older phones.		
leslie morrison	27-Apr-20	Can not get sms to move on to next stage			
Mohammedusman Kadiwala	26-Apr-20	2	In the phone number part	it is unable to validate my phone number	
Acejd	26-Apr-20	Easy to use simple basic info required.			
Mike Hasler	27-Apr-20	1	covid safe app does not show up in google play on my wife's Samsung Galaxy phone. Is there an android version required? She has bluetooth and everything else on google play.		
Troy Patching	27-Apr-20	Seems simple let's get this try it and hopefully our normal can start sooner			
Catherine Williams	27-Apr-20	Easy to install	less permissions than any other app I have.		
Jason Astill	27-Apr-20	Can't add phone number - this app is useless			
swapnil Jain	26-Apr-20	Very easy to install and seems very safe			
Robert Lance	28-Apr-20	2	Doesn't send a pin ... So without that I can't go any further ... So looks like I won't be downloading it.		
Ai Kojima	27-Apr-20	Downloaded and installed. Did everything I can to spot the virus and help the community.			
Vila Moura	26-Apr-20	Why do I get an invalid phone number during verification an can't register.			
Peter Ross	28-Apr-20	App won't allow me in "invalid phone number" dropped the first 0?			
Bronson Muscat	27-Apr-20	Doesn't work for me	it tells me I have an invalid phone number.		
Tommy Z	27-Apr-20	Can't register because it says my mobile phone is not valid			
Joanne Tinkler	27-Apr-20	Issues with not recognizing mobile number	any advice		
Chris Henry	27-Apr-20	1	Followed direction ...easy to register.		
Janine Tomkins-Celin	28-Apr-20	2	Installed yesterday phone fully charged overnight by 11am battery at 15%not good		
Suraj Maharjan	29-Apr-20	Good app surprisingly consume very less battery.			
Sharath Menezes	20-May-20	1	As much as I want to use this app but I had to uninstall it	as it interupted with my music app.	
Gil	1-May-20	1	Yea it's a good idea and easy to install on Samsung Gil		
Jillian Grant	4-May-20	Tells me it's loaded in one section but in another it says my device is not compatible despite receiving txt telling me to download it...I'm totally confused now!?			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Tommy Segoro	26-Apr-20	2	Can't even get pass the PIN validation. It kept saying mobile number invalid ??	
Michael Telfee	26-Apr-20	2	Annoying push notification that cannot be removed	
Tim Wilkinson	27-Apr-20	Would be great if it could only activate when going out of house area		
Massimo Meli	26-Apr-20	Easy to register and was quick.		
Lincoln Coutts	26-Apr-20	9	Earlier registration issues fixed... Let's make it work...	
Yvonne	26-Apr-20	Easy to install & register.		
Cath Munns	26-Apr-20	2	Keeps telling me my mobile number is invalid. Cannot register?	
John Barker	27-Apr-20	1	Disable wifi if you receive invalid mobile number error	
Raquel Diaz	26-Apr-20	I try to get code for my mobile and it says try again later so it won't let me finish downloading all the info to register		
Thomas	26-Apr-20	The more people that use this the more effective it becomes and the faster we can start removing lock down restrictions		
John Mitchell	26-Apr-20	I cannot enter my mobile number. Keeps telling me it is invalid		
Sarah Bell	28-Apr-20	1	It don't work.waste of time.keep on saying my phone number wrong.bs app don't work	
Rach Ritter	26-Apr-20	2	App doesn't work will not let me register just like any government app overloaded and doesn't know how to cope	
Amanda Biggins	26-Apr-20	4	Wont accept my mobile number! Says invalid. Please fix asap.	
Ditty Kunjukunju	27-Apr-20	Really helpful to fight Covid and easy to use		
Yvonne Rochester	26-Apr-20	Very easy to set up. No problem at all.		
Jack Cross	26-Apr-20	Great initiative. A lot of fear-mongering around this app but those concerns were addressed long ago. Everyone should be using this.		
Bronson Coutts	27-Apr-20	3	Brilliant	and SO EASY! I shared concerns about information privacy and security as I am sure many have. I have an IT background and can say that I am thoroughly impressed with the technical and legal security measures in place. So you're mad if you don't and a Tru Blu Aussie if you do!
Paul Monnington	26-Apr-20	1	Keeps saying invalid mobile number and cannot get past that point	
Peter Ford	26-Apr-20	does not accept mobile number to register.		
Chris Russell	26-Apr-20	Easy install. Clear conscience. Good to be able to contribute in a small	but concrete way to stopping the spread of the virus and hopefully moving towards resumption of our precious	'normal' Australian lifestyle.
A Google user	26-Apr-20	1	The mobile phone field is not working	says invalid format. Great initiative
Tim Harper	29-Apr-20	1	Saving lives	one low powered bluetooth connection a time
Ian Harding	8-May-20	Do you want to stay safe and alive and help our elderly population. If you have nothing to hide then there it's a great app. It's all about keeping Australia safe. Short term pain for long term gain.		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Robert Onishe	28-Apr-20	Can't get access	keeps saying my mobile number is invalid.	
Kim McLeod	27-Apr-20	Keeps saying my phone number is invalid!!! So how are we supposed to register!		
James Jones	26-Apr-20	5	Its not accepting my mobile number... says its invalid...hmhhh..... ok read some reviews and I have to wait until it is launched	
Joanne Monsalve	27-Apr-20	Keeps saying my phone number is invalid. Can't complete		
Vicki Mills	28-Apr-20	Can not access. Showing my mobile number is invalid.		
Andrew Fudge	26-Apr-20	Easy to install and register		
Alex Wilding	27-Apr-20	1	Easy to install and stays out of your face.	
margaret brandon	7-May-20	The best app to prevent COVID. It will help with keeping Virus in check.		
Ben Davis	26-Apr-20	1	Rego was easy and simple. A simple thing that everyone should use as it may save someone's life	
Alex Pullar	27-Apr-20	Far fewer privacy concerns about this than 100 other apps we readily sign out lives away for.		
Shruti T	26-Apr-20	1	The registration opens at 6:00pm AEST. Please download the app and hang in there. Let's be COVID Safe.	
Paul Adams	27-Apr-20	1	Great app. Great initiative. Not sure i like the icon in my notification bar.	
Alan Kirby	27-Apr-20	When registering turn off wifi and make sure you drop the first 0		
Keoni Kidner	28-Apr-20	Will not accept my mobile number	cannot sign up for app	
gregandemma	29-Apr-20	1	Great product to help with contract tracing	
Jonathan Watson	4-May-20	I haven't got Corona since downloading the app. So far so good. Didn't smash my battery as bad as I thought it might either.		
Dianne Dolman	5-May-20	Trying to get the pin number.. writing it down.. For someone 77 the pin is not up long enough.		
Dylan Munyard	20-May-20	I downloaded this app two weeks ago and I haven't got Covid-19! A++ would recommend.		
Renzil Dsilva	26-Apr-20	Great initiative by Australian leaders and Congratulations to the team that worked on this. Privacy is definitely the biggest concern but to keep everyone safe if this is the sacrifice we need to make so be it.		
David Apelt	26-Apr-20	They said what it does and it does what they said. We live in an amazing time that this technology can help solve this insane problem.		
Daniel Ball	26-Apr-20	1	Can't register - App says that my mobile number is invalid.....	
Lio Hebert	28-Apr-20	2	Great anti-virus app: I haven't been contaminated since installed ;O)	
Dee Maree	26-Apr-20	1	Trying to sign up and I keep getting Error message saying my number is invalid ☹"	
Beshoy Ezak	26-Apr-20	1	Simple and quick setup. A great idea.	
bobby dunn	27-Apr-20	Keeping safe for the future I hope for many more apps like this to track all viruses like the flu.		
Ashley Coleman	26-Apr-20	1	Simple and easy. Took 2 minutes.	
John Hanna	27-Apr-20	Works fine ... I was able to register in seconds		
Daidre Davies	26-Apr-20	1	Unable to register as keep getting message PHONE NUMBER IS INVALID.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Abhisar Deshpande	27-Apr-20	2	Let's trust a bit in our govt	we can always fight data privacy violators when we stay alive. Although if you care so much please use a pseudo name	and with a phone number?? Yes you can buy a new one when this is all over. And if you still care much much more about your privacy then dont download t
Tim Kempton	7-May-20	2	Uses too much power drains battery at a ridiculous rate and I have serious doubts about its security.		
Peter Winkler	26-Apr-20	1	Simple and easy to register		
john ribeiro	26-Apr-20	Easy to use and a great way to help your fellow Aussies to stay safe			
Damien	27-Apr-20	If installing this app helps get life back to a little bit of normality while helping minimising the zombie covid19 virus I'm all for it!			
Craig Oliver	26-Apr-20	59	This app has undergone much more scrutiny than any commercial app and collects much less data than social media apps. And having it may save people's lives if it helps stop the spread. If somebody had Covid19 near me I would want to be informed to self isolate so as to protect my vulnerable family a		
Evie Aus	27-Apr-20	Invalid number error message even after reinstall			
Brad Clarke	26-Apr-20	Quick and easy to download and setup			
David McArdle	26-Apr-20	App says my mobile number is invalid and therefore I can't register.			
Jon Vb	26-Apr-20	Poor as at 5pm Sunday still cannot do registration please fix asap			
Matthew Carter	26-Apr-20	1	Fairly easy and straight forward.		
James Fan	27-Apr-20	1	Easy to register and highly unintrusive		
Max Printz	10-May-20	1	When active the app interferes with connected bluetooth devices.		
Gigi B	26-Apr-20	1	People - Don't panic if you can't register yet. Registrations start after 6pm today.		
Matthew Shorthose	28-Apr-20	1	Drains battery. Phone now only lasts 8 hours with minimal use		
Charles Johnson	27-Apr-20	5	Why is it that morons bang on about invasion of privacy	by an app that saves lives? These are the same people that freely give away their privacy to retailers such as Google and Amazon	by providing far more information than this app collects. Where is the sense in trusting these mega companies wit
Tam Pavelic	28-Apr-20	It doesn't accept my phone number. I am using the international format ie. I dropped the 0.			
Mihai	26-Apr-20	25	After removing and re-installed the app is working.		
Simon Victory	26-Apr-20	Now works fine after verification service was turned on			
Alan Abbes	26-Apr-20	1	Relax people registrations are not open yet!		
David Laursen	28-Apr-20	2	Says Invalid phone number! Can't get PIN. I have a dual Sim phone. Is that a problem?		
Jim Donald	27-Apr-20	Says my mobile number is invalid	had it for 2 years		
t. emeklier	26-Apr-20	If this app can help others and health workers I'm happy to use it.			
Richard Knight	9-May-20	All good team	happy to help	my data is available when you need it	and appreciate you asking in bold print. let's face google and Apple have it and hide the request in 1000000 words of 2 font terms and conditions. Go Gov just please bring back the footy Ffs

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
TLHang Nguyen	26-Apr-20	Simple and only ask very general and non intrusive information			
Gaby Atme	26-Apr-20	Very easy and straight forward			
Lynne Kenworthy	26-Apr-20	1	The app won't accept my mobile number	I will try again later.	
BRANCO RÂ©mi	26-Apr-20	Our best bet to keep Covid under control ! Works fine so far.			
Graeme Spurr	28-Apr-20	Fantastic advance in preventing spread.			
David Button	27-Apr-20	1	This app is not compatible with my wifes Huawei phone. Pretty poor really as she is high risk. Over seventy	high blood pressure with heart and lung disease. Again	overall pretty poor.
Jordan Fuhrmann	26-Apr-20	3	Took 30sec to set up. For all the idiots complaining	you couldn't register until 6pm (which was abundantly obvious). All of your negative reviews were from earlier in the day.	
Gary Chang	26-Apr-20	3	App works now! Good information in the app that assuages my fears re: privacy.		
Sean Booth	1-May-20	2	Had to uninstall after a week. Kept shutting other apps down also using Bluetooth. Headphones mainly		
Ian Morrow	27-Apr-20	1	Easy to install for an impostant issue..		
Ivan Mysiv	26-Apr-20	1	Installed. Thanks Australia for keeping us safe. Hope it will help		
Gary Willis	30-Apr-20	Did not ask for name or number so dont now if installed or not	phone says installed.		
Trevor	8-May-20	1	Power hungry. Flattens battery in several hours.		
Daylight_Dude Tokyo	17-May-20	I love it. It feels like having an added layer of protection when I go into Coles.			
Paul Cahill	27-Apr-20	Public Health protection versus ratbag privacy concerns? It's a no brainer as far as I'm concerned. If it saves only one life it's worth the effort. Recommend everyone use it.			
Sarah Gregg	26-Apr-20	3	Encourage all Aussies to use this app! Registration now works. Together we can get rid of this virus faster	and get back to some normal things in life sooner!! Thankyou AusGovt	
Peter Smith	27-Apr-20	1	I honestly don't understand why you have to be so close to someone for 15 whole minutes before it sends data. Ok if your sitting next to someone on a bus or train or something	but other than that	how will it work? If you bump into someone who is infected in a supermarket your not going to be with
Wobbly Bob	27-Apr-20	No change. Blame me and my phone. Go ahead. Would love to run this but it's a POS. Invalid phone number. Invalid phone number. Invalid phone number. Please try again later. Please try again later. Please try again later. Please try again later.			
Ashley Russell	26-Apr-20	I tried to sign up but it keeps rejecting mobile numbers			
Darryl Clarke	27-Apr-20	Changed phones and won't register on new phone.			
S Z	27-Apr-20	1	Great	easy and smooth app!	
Kanak Chapa Karmaker	27-Apr-20	Can't be registered. Saying invalid phone number			
Chris Parry	26-Apr-20	2	Won't accept my phone number. Tried different formats but rejects as invalid number		
Chris O'Connor	26-Apr-20	Its not perfect but these are unusual times. Let's just get on with it			
Trevor Van Der Linden	29-Apr-20	keeps stopping and doesn't auto start with phone start.			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Julie Forsyth	4-May-20	I got a prompt as failed to install this morning as my NBN was down.		
Catherine Glenn	5-May-20	No issues. Easy to install.		
Laura Webb	8-May-20	1	This is draining my phone battery to quickly. I cant make it through a full work day without needing to charge	
Anvilsoup Mobile	27-Apr-20	Amazing. After installing this app I gained the ability to fly and cook like a pro chef. Thanks Aus Gov!		
Angelina Lurvink	26-Apr-20	2	It doesn't work keep saying that my phone number is invalid	
Aaron Jones	27-Apr-20	Trying to do my bit but the app says my mobile number is invalid. Good work Australian government another tech fail.		
deanna velthuizen	26-Apr-20	Downloaded. Registered. Easy. Happy to participate if it helps keep us safe		
Ayman Habib	26-Apr-20	1	It doesn't work refused every mobile number as invalid	
Kylie Robinson	27-Apr-20	1	Says I have entered an invalid phone number and won't work	
Gary Lowe	27-Apr-20	Straight fwd....no problem registering.		
Courtney Turner	27-Apr-20	1	I can't add my mobile number it keeps telling me it's invalid	
Max Power	26-Apr-20	Easy and Please download - had no issues downloading the app		
Trent Gibson	27-Apr-20	Registered fine. No issues.		
Sharon Ledwith	26-Apr-20	Really quick and easy to set up.		
The Surgery	26-Apr-20	3	Phone field has a glitch. Cannot register	
Courtney McDonald	27-Apr-20	1	Unable to register as says phone number invalid.	
Barkavi Mohanasundaram	27-Apr-20	Unable to register.. it says invalid phone number		
Grant Botha	26-Apr-20	1	Does not allow mobile number registration. So bad	
Steve Delnawaz	11-May-20	Works fine and has minimal battery issues		
David Stephenson	27-Apr-20	The quicker everyone downloads this	the quicker we can all go to the pub. Come on - be a team player!	
gayle oconnell	27-Apr-20	Down loaded the app entered my info in an it wont go through		
James Andrew	28-Apr-20	2	So far so good	installed it and set it up don't even know it's there! Perfect.
Christina Pavlov	26-Apr-20	Very quick and easy to install and set up		
Joanne Knight	27-Apr-20	1	Have put all info in and it won't except my phone no. Error message invalid phone no. Well it's not and sick off trying want to help but how can you if it won't let you in	
Ian McCready	27-Apr-20	Have tried 9 times can't get past phone number.		
Zarra Forster	29-Apr-20	1	Chews up all the battery in my phone would b better if my battery doesn't run out while i am out because the app would b useless without the phone.	
Andrew Gallagher	29-Apr-20	App won't work on either of our phones only on pad which is always at home		
Amin Ahmadi	27-Apr-20	Easy to use and intuitive.		
Lee	28-Apr-20	Is it just me or does this app use a lot of battery power?		
Victoria Stephenson	26-Apr-20	1	Doesn't accept my telephone number. Vodafone!!	
Andrew	26-Apr-20	Easy	literally a minute to register	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
David Wild	27-Apr-20	I've had this nearly 24 hours and the sky hasn't fallen yet.			
Balraj Kahlon	26-Apr-20	Very Simple to install and use			
Linda Mckenna	26-Apr-20	6	Have just watched news report and registration starts at 6pm this evening. Of course there will teething problems but the more tracking of this virus the better chance people can return to work and vulnerable people can be protected. Lets look after each other.		
Graeme Ruby	28-Apr-20	Useless cannot get pin number to logon keeps saying my number is invalid			
Allan Ballagh	26-Apr-20	Keeps telling me that my mobile phone number is invalid!			
Lindy Schmidt	7-May-20	I found it easy enuff to download. I found a peace of mind came with the app coz I now know that if I do come near someone with it	I'll be told.		
Lachlan O'Shea	11-May-20	1	No longer able to connect to vehicle bt		
Jason McCracken	20-May-20	Spastics are scared of it but my google home	siri and Alexa are way more insecure than this.		
Emma Becke	26-Apr-20	It won't let me register	saying my phone number is invalid.		
Grant Simmons	26-Apr-20	What's all the fuss about security	the app asks for your name	mobile number	age bracket and post code....seriously people you give more info to Google Microsoft
Peter Mclean	26-Apr-20	1	Easy setup.. no issues at all.		
Sadiq Hussain Syed	26-Apr-20	Unable to register. Keep saying invalid number			
David Hadley	27-Apr-20	2	We all have a duty to download this app. Remember most phone locations are tracked via Google maps and satnav so no big deal. If you want things back to normal especially for all those people/business's that have lost employment or business then let's not be selfish and get Australia back on track.		
Luke Melville	27-Apr-20	1	Works well. Easy setup process.		
Alex Albans	30-Apr-20	Do I trust the Australian government? No. Not in the slightest. Do I trust this app though? Enough I'll use it for the time being at least. Would be nice if they were more transparent and open about this app and precisely what it does but other than that I don't think there's anything to panic about			
P Nabsie	1-May-20	Never seen my and my partners phone battery deplete so quick			
Shane McEvey	26-Apr-20	After 6pm registration worked without a problem. So far so good. Let's see whether I get a phonecall?!			
Aaron Brown	26-Apr-20	Easy to set up and is to use.			
Peter Gibson	26-Apr-20	Registration failed	says my mobile number is invalid.		
David Cowley	27-Apr-20	needs to be available for smart watches like samsung and Apple watch as I don't always have my phone but I do have my watch			
Ryan Patterson	26-Apr-20	C'mon everyone	download the app	I want to be able to go to the pub again	
Kathleen Cameron	4-May-20	It's a shame that this app can't be used with Android 5	so people with older phones (like my parents) can't use it...		
Rachel Reynolds	26-Apr-20	Registration now working fine. Be patient everyone	so important that we do anything we can to help stop the spread.		
Rhys Chapman	26-Apr-20	Works fine	no issues post launch		
Mitchel Sosa	27-Apr-20	1	App keeps telling me incorrect nu.ber when signing up. Deleted stupid app immediately		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Darin Griffin	28-Apr-20	1	Invalid phone number... And I'm not the only one.. so how do you trust an app they can't even get right	
MR.P	26-Apr-20	Easy to sign up	good for some peace of mind.	
Ash Simpson	26-Apr-20	Does Google have access to my application data and contact trace data when it backs up my phone to the cloud ☹"		
Carl Pettersson	27-Apr-20	If I end up near someone with Covid 19 for more than 15 minutes and they get diagnosed I get warned	so long as they had done the right thing and INSTALLED THE BLOODY APP!	
Trevor Lawrence	30-Apr-20	1	Works perfectly. No problems at all	
Geoff Heyblom	14-May-20	Chews through the battery power - I will now disable it unless I am out in public.		
Neil Baker	26-Apr-20	Very easy setup happy to help. Hope I don't need it. Aus Gov got our backs thanks.		
John Milone	27-Apr-20	35	Necessary tool in the fight against the silent enemy	
jay -	28-Apr-20	2	Outsourcing an app to poos what could possibly go wrong. What a joke of an app. Bluetooth 2.0 can't tell if you're 1.5m away or 10m away. No one questioning their lies.	
Oliver Forbes	27-Apr-20	2	Brilliant app	thanks Australian Government for going to such measures to keep us safe and save lives.
Nick Armstrong	27-Apr-20	Easy to setup	took less than 1 min. Keeps people safe	what is the downside?
mell webb	27-Apr-20	My device isn't compatible it is an oppo r7 could this be fixed please		
Jamie D	26-Apr-20	It says my mobile number is invalid. Why is this?		
Chris Johnson	27-Apr-20	1	I've tried to register on the app but it does not accept my phone number. Any advice?	
David Ryan	28-Apr-20	1	Cannot install	wrong cell number????.
Hilary Metcalf	26-Apr-20	Repeatedly get invalid phone number msg. Useless app.		
Bill Simpson	27-Apr-20	Fairly easy to register!		
Sam Jones	27-Apr-20	Keeps telling me my phone number is invalid. Well damn. If scams can find me why cant the government		
Dieter	27-Apr-20	1	Saves lives just download I dont know how people use Facebook who were prosacuted for privacy infringement but yet dont trust a government certified app that saves lives.	
Rebecca Kelly	1-May-20	Easy to install	no issues with this app.	
Daryl South	27-Apr-20	Cannot get a pin to register. Tells me my phone number is incorrect.		
Trina Macleod	26-Apr-20	Very easy to register		
Mick Doerfling	26-Apr-20	Can't register	says my mobile number is invalid.	
Paul Francis	26-Apr-20	Installed smoothly	working fine so far...	
Nancy Diaz	28-Apr-20	I downloaded it but says my mobile number is invalid. Entered it with and without the initial zero		
Trevor Michie	5-May-20	Tried entering my mobile number using International standards but ap says invalid so given up @#\$%&		
Phillip Russo	5-May-20	Well built. Secure and reasonable to use in this crisis. Well done team		
Clive Conway	7-May-20	Works perfectly on Android. Go on	install it.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Catherine Hay	13-May-20	Very easy to follow the instructions..		
Lud Krastins	29-Apr-20	Errors on installing. Won't accept pin		
Filip Bogacki	7-May-20	Stop whining and bloody use it. Is it perfect? Hardly	but it totally beats the alternative.	
Kimberlee Jones	7-May-20	2	Draining my battery. Yes its ment to keep me safe but if my phone is dead how is that gonna work.	
Tegan Keizer	11-May-20	2	Please switch off the continuous notification that the app is running.	
Lachlan Whittle	26-Apr-20	Works as described. 1 star ratings were posted before registration opened. Let's kick Covid's arse		
cboc77	27-Apr-20	1	It keeps telling me my mobile number is invalid.	
Douglas Mair	26-Apr-20	1	On registration it will not accept my mobile number.	
Shaun Mason	27-Apr-20	It keeps telling me my mobile number is invalid.		
Jennifer Peardon	4-May-20	Unable to get past verify. ??		
tom clahsen	8-May-20	2	Won't stay on Stays active for only a few minutes then turns itself off	
Nicholas Pereira	27-Apr-20	Won't accept my phone number	says it is not a valid number	
Kate Edwards	26-Apr-20	100% great app	but do I really need to have notifications on? I cannot deal with that.	
Darren Hallesy	27-Apr-20	10	Easy to install. We all need to do our bit to beat this crisis. Those who are carrying on about privacy pull your heads in. Facebook knows EVERYTHING about you	focus your anger on them not an app designed to save lives. We can do this Australia!!
Rahul Khanna	26-Apr-20	1	Getting an invalid phone number error.	
colin hoffrichter	26-Apr-20	Come on everybody	install it for everybody sake	it's very easy to install.
Tirtha Sfdc	28-Apr-20	1	Easy registration. Neat app.	
Claire Eckhart	26-Apr-20	Happy to have this but keeps telling me my mobile number is invalid. I know it isn't		
Samuel Tuwaidan	28-Apr-20	Amazing make a little bit less worry when go out		
Ben Joe Vianzon	26-Apr-20	1	It looks like I have an Anti Virus Installed on my Phone. Cool! Covid go away. I hope more people will install to keep us safe.	
Kerry Chester	26-Apr-20	Very easy to install. We can all help each other by downloading this app.		
Dale Flynn	3-May-20	Unable to clear notification its a pain in my backside		
A Google user	7-May-20	1	Easy to install. Helps keep us all safe.	
Komang Wiryani	27-Apr-20	1	Easy to download and to register	
Nicole Miller	26-Apr-20	Stupid app. Keep telling me invalid mobile number.		
Kai Chong	26-Apr-20	Unable to register details.... invalid phone number		
Joel Kenyon	26-Apr-20	1	Can't enter my phone number. It says it's the wrong format.	
Tanvir Mahmud	26-Apr-20	1	Great initiative. It will definitely Help our healthworkers quickly trace contacts and notify them.	
Irene Tsimos Diolaso	29-Apr-20	2	Easy to set up with no fuss	
Geoff Agnew	27-Apr-20	Been using this app all day and haven't got COVID-19 once		
Warwick Smith	26-Apr-20	1	Says my phone number is invalid so can't use it. Tried entering it with and without the 0.	
Abbe Mock	26-Apr-20	No problems with registration		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Carolyn Atkins	27-Apr-20	I can't log on. Won't accept my phone number. ☹			
Heidi Cotton	26-Apr-20	Had trouble with entering my phone number tried a few times			
A Google user	30-Apr-20	1	Easy peasy way for C-19 to stay away!		
Alfonso Pasquini	1-May-20	1	Battery drainer. Not yet a sustainable app		
Pat Nolan	1-May-20	2	I found this app so easy to install and I am in the older age group hope everyone downloads it because if you have been in contact with Covid 19 you will be notified and you won't pass it on to people you love ☺		
Pauly Rush	6-May-20	Runs on me Chinese fone no problems ☺			
Cherrie PingNam	6-May-20	Absolutely nowhere to assist in changing my contact details!!!!			
Craig Snoad	26-Apr-20	Brilliant! Please download and help keep Australia safe.			
Paul Kershaw	27-Apr-20	Quick and easy to set up.			
Michael Barrett	28-Apr-20	1	Won't accept my valid phone number with or without the zero		
Alan Wallace	26-Apr-20	60	Registered no worries. Drop the 1st digit off of your phone number. I understand no information is uploaded unless a health official contacts me and requests me to upload data. For all you doubters	you're in control. Get over it! The sooner everyone's involved the better.	
Stuart Coad	26-Apr-20	1	Easy to get running	for me at least	thanks for making this happen
Jack Watson	28-Apr-20	1	Good work Australia! Clear and simple to set up. A great tool to fight the Covid 19 virus and keep our country safe. ☺		
Dianne Power	26-Apr-20	1	Will not let me enter in my phone number says incorrect number? Starting with +61 out side the box to fill in?		
Ann Hastie	29-Apr-20	Having this app installed should be a condition of getting government assistance,i would like it to mandatory	great idea.		
Brett Thurbon	1-May-20	Interferes with Bluetooth earplugs			
Georgie Baird	1-May-20	1	NEEDS BUG FIX- Interrupts Bluetooth headphones		
Terrence Brennan	27-Apr-20	Cannot download as I cannot get my phone pin number to verify			
David Lucas	27-Apr-20	9	It works so far. It let me register. Come on Aussies	help each other out. There are people suffering from this pandemic	health wise and financially. The sooner we can get to the other side
Kylie Watkinson	27-Apr-20	1	Unable to register as states my mobile number is invalid		
Henry Read-Spinks	26-Apr-20	1	Works fine	would rather get tracked than cop coronavirus	
Rahul Datta	27-Apr-20	Why does it say invalid phone number. Cant register			
Ripley Douglass	28-Apr-20	I can't see the point when our politicians and senators are sceptical. They have obvious concerns. Deleting now.			
mitchell early	26-Apr-20	1	Can't register. Already app has failed !!		
Norma Bishop	4-May-20	I put in my mobile number and was told it was an invalid number and it is not			
Alan Findlay	8-May-20	1	Turns itself off after one minute		
Scott Reeman	28-Apr-20	Invalid number stilhehen trying to register... Its now Tuesday			
Tina Smith	26-Apr-20	Easy to register. Keep safe people..Great work to the Australian Federal Government. Thank you.			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Barry Boehm	7-May-20	2	Can't register as keep getting invalid number	
Gary Grewal	26-Apr-20	1	Unable to register. Says invalid phone number	
Stephen Kress	27-Apr-20	1	Good blend of safety and technology	
Carlo Medrano	26-Apr-20	1	its not working cant register	i already uninstall the ups them redo the stop and still not working
darryloulou	26-Apr-20	1	The app won't accept my phone number so I can't complete registration	
John Bone	26-Apr-20	1	Works without any problems.	
Hayden Dam	27-Apr-20	2	If it doesn't keep location data	why is it a required permission?
A Google user	26-Apr-20	1	Easy to set-up	took less than a minute...
Paul English	26-Apr-20	1	1	Get on board and lets help stop this horrible virus. Super easy app to use.
Yoke Chong	26-Apr-20	1	As long as this helps our safety than this is a great app.	
mary kavanagh	30-Apr-20	1	I'm trying to download the app but it tells me I have entered an incorrect phone number.	
David Williams	2-May-20	1	Difficulty in transferring PIN to the app	
Robert Li	5-May-20	1	Contributing my share. no problem noticed since installation.	
Jim Deakin	26-Apr-20	1	Simple and easy to install. Thank you	
Jessica Dempsey	27-Apr-20	1	Won't accept my phone number. Unusable.	
Robyn Brown	27-Apr-20	1	1	It won't recognize my number ? No good if you can't install oÝ¤"
you what	26-Apr-20	1	Phone number invalid can't get past it please fix	
Sean Mullins	26-Apr-20	1	Simple to set up. Let's hope everyone gets on board and it helps us quash this virus.	
Art Key	26-Apr-20	1	Great privacy measures. Awesome purpose.	
mickey evans	26-Apr-20	1	It keeps coming up invalid mobile number... please help	
Dave Hart	26-Apr-20	1	1	Easy sign up
Craig Murphy	26-Apr-20	5	great concept hopefully gets us out of this sooner!	You won't be able to register until 6pm EST today. Still not working.
stephen	28-Apr-20	1	App wont accept my phone number. Says phone number is invalid	
fluffy gordon	27-Apr-20	1	It says I have an invalid phone number. It is a prepaid mobile with Belong	
Rose Meyer	30-Apr-20	1	1	Constant notification icon is so annoying!
Lee Cornell	1-May-20	2	Extra star if this app would say how many downloads or subscribers it has. THE PUBLIC WANTS TO KNOW!	
Torie Gordon	27-Apr-20	1	My phone number is invalid. Have tried it with and without the 0.	
MÃ³a JesÃºs Zafont	26-Apr-20	4	1	The app claims my mobile phone number is invalid. But I am pretty sure that I introduced the correct number. Any help?
Kylie Pym	27-Apr-20	1	1	Can't register as keeps saying my number is invalid
Justin Grossbard	26-Apr-20	1	Works fine. Needs sms verification	
Warren Gorringe	26-Apr-20	1	Enter mobile number and it comes up as invalid.	
Con Argiratos	27-Apr-20	1	1	Works well. Easy to install. Hope it saves lives.

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Lynn Jarman	27-Apr-20	Four attempts and still not registered		
Kiril Nikolovski	29-Apr-20	1	Easy as 123 abc. To put it in perspective you could be notified of a possible issue before you take the virus home to your family. Use it. This virus kills.	
Cat Armstrong	29-Apr-20	1	I really want to support this app but it is a huge battery drain.	
paul windsor	15-May-20	No issues what so ever.		
Jeffery Coulter	26-Apr-20	Can't get past mobile number says invalid		
Geoff Moroney	27-Apr-20	Registered	easy as.	
kerry viney	27-Apr-20	1	A friend living here from the UK can't find or download this app any solutions?	
Adam Watt	27-Apr-20	1	Invalid phone number?! Dodgy app	
John Iacono	27-Apr-20	Unable to register says my mobile is invalid		
Daniel Ominski	27-Apr-20	1	It knocks out Gmail completely.	
Libby Brook	26-Apr-20	Easy to download and register		
Jeffrey O'Keefe	4-May-20	The app seemed to reject my phone number!		
Shirley Jones	4-May-20	Easy to install & understand		
Rudy Moury	28-Apr-20	1	If it can help to save lives and get a normal life faster	just download it and activate it!
David James	26-Apr-20	Never release an app till it is ready and 100% functional. If this were private business they would be crucified.		
Warrick Howell	26-Apr-20	1	Simple and easy setup. Will help to keep me and my family safe.	
Liran Piade	26-Apr-20	I know that there are security and privacy concerns and even risks	but it doesn't matter. It's all going to be worth it. Get this app and share it with everyone. Please. We all gotta do this.	
Jason Armstrong	26-Apr-20	7	I was going to give it 1 star as I am too dumb to know registration is after 6pm but changed my mind.	
Helen Backshell	27-Apr-20	1	Have been trying to register since yesterday. Wont allow download	
David Bishop	4-May-20	Great idea but if a person with confirmed covid19 should be self isolating by law so will they have the app and take it out and about with them		
Matthew McCarthy	27-Apr-20	Registered easily enough	great work by the Morrison government unlike the naysayers of the communist greenies and socialist labor party.	
Angela	26-Apr-20	Very easy to sign up. Please use this app	we are stronger together.	
Haydn Taela	28-Apr-20	2	Simple to install and set up. Unfortunately since installing it my phone battery wont even last until lunch time so I think I'll be uninstalling it.	
Robert Forster	26-Apr-20	1	Easy to load work no issues	
david brackenbury	28-Apr-20	1	I have my wife's phone Samsung SM-J105Y app covid19 is not in Play Store and not compatable	
Nasim Kari	26-Apr-20	1	Please to be able register soon and stay safe	
larry searle	27-Apr-20	1	I am unable to enter my phone number. I am told it is an invalid phone number. NO IT'S NOT. Connected now	27/4/20
Dirk Ludwig	27-Apr-20	1	Can't register	pin is not sent through.
Simon Williams	26-Apr-20	Very easy to sign-up		
Robert Kear	3-May-20	Cannot get through to next register		
Peter Martin	30-Apr-20	2	Install was effortless	don't even know its running.

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Graeme Doherty	5-May-20	1	This app is not compatible with older devices. Do you think people with older devices won't be spreading this virus?	
Ben Sender	26-Apr-20	easy and fast to install		
Darren Gay	27-Apr-20	1	Only anti vaxxer or flat earther wouldn't download this app. Everyone else should download it. Absolutely no reason not too unless you fall into the two groups above in which case you should seek help.	
Andrea Willis	26-Apr-20	It seems I'm not able to sign up it won't accept my phone number		
Jenny Everson	26-Apr-20	Easy to install & set-up		
Neil Day	27-Apr-20	Easy to set up. Saves jobs & lives!		
DJ Nige!	26-Apr-20	All good - registration is working now.		
Jake Edwards	26-Apr-20	2	Registration worked after 6pm AEST ☺ Hoping this gains traction. Help guide has detailed information about how it works	ans what permissions are required and why.
Gowri Chatradi	26-Apr-20	No feature to "allow always" in latest android. Please add it.		
Nick Daughenbaugh	29-Apr-20	2	Doesn't work on my Samsung 10plus. Guess I'll die then	
Colin Roberts	2-May-20	Won't send through pin code to activate. How are we supposed to get out of lockdown if the app doesn't work		
Michael Barritt	26-Apr-20	2	Don't have the app available TILL REGISTRATION IS AVAILABLE! Don't get ABC to message everyone till you have it all working. Fgs!	
Peter Wypych	27-Apr-20	Does not recognise my mobile number...COVIDSafe to be deleted.		
Azriela Kilner-Lee	27-Apr-20	1	Brilliant idea. Let's hope that others will jump on board with it. People need to drop the fear of privacy and trust the experts once in a while. It could very well save your life.	
Vishva Wijesekera	26-Apr-20	1	Very easy to install. Excellent	
Ross Davis	26-Apr-20	1	Great idea.. Let's hope it works and saves lives!	
Pete Carroll	12-May-20	1	12.5G of mobile data gone in three hours. Not happy Jan!.	
Aaron Chuah	26-Apr-20	1	Installs fine but doesn't recognise my mobile number as valid	
Stephen Kriz	26-Apr-20	Very easy to sign up..go for it!		
Cathy Ray	26-Apr-20	Easy to install and so important. Just do it!		
Allen Scott	27-Apr-20	I am unable to access as the application will not accept my phone number		
Alon Symons	26-Apr-20	App now works fine	download and register	
Sam Seignarack	27-Apr-20	Installed and registered without a hitch.		
Graham Lauriston	26-Apr-20	I would install it if it recognized my mobile number	keeps telling me my number is invalid.	
Peter Drinan	1-May-20	1	Working fine and as expected.	
Duncan Jessep	26-Apr-20	Great app made possible by AWS.		
Irina Lubomirska	26-Apr-20	5	Registration now working and is easy	
Darin Allan	28-Apr-20	1	Installed fine	no problems since...
Sharon Garofeletti	27-Apr-20	Unable to register. Tells me my phone number is invalid.		
Nigel Stanbridge	26-Apr-20	Phone number wouldn't load for a while		

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
John Soldatos	30-Apr-20	3	Not Working on older phones e.g Samsung S4...some older people have older phones.	
Ricky Maroney	29-Apr-20	1	There's nothing wrong with the app! It works as intended	
Sharon Hobbs	4-May-20	Not impressed that US law enforcement has legal access to all our data through the Australian government using US company to handle our data! Dumb move!		
Peter Pelzer	5-May-20	1	Not sure why the app requires location services to work.	
Barry Baldwin	26-Apr-20	A bit frustrating to set up at first	but i look at it this way	anything to save a life is sometimes worth a little sacrifice.
Charitha Mohottige	26-Apr-20	Invalid phone number error. Unusable.		
Gaz and Pen Stevo	27-Apr-20	Easily loaded and registered. That's it	nothing else to do.	
Ute Donaldson	28-Apr-20	Telling me I have a invalid phone number have had it for more than 20 years		
Stu H	26-Apr-20	works fine now. registered successfully.		
Anna Russell	27-Apr-20	I wanted to sign up	but couldn't. I can't get the sent code.	
Patsy Ok	6-May-20	2	Willnot accept my mobile no. Have tried repeatedly to get through	
Gabriel De Figueiredo	18-May-20	Interferes with SBricks and latest Lego Technic bluetooth devices	making them inoperative.	
Michael Morgan	26-Apr-20	Does not accept mobile phone number.		
Karyn Jarman	26-Apr-20	Don't know whether it will do much	but if it helps get this country up and running again	gets our domestic borders open so we can reunite with families interstate why wouldn't you download it.
Paul Coghlan	27-Apr-20	Says my mobile is invalid when using 0 or not with 0 do cannot set up the app		
Andrew Hilliar	26-Apr-20	Easy to login and use		
Dan Rowley	26-Apr-20	Cannot verify my phone number no matter what I try		
Miguel Austral	26-Apr-20	Any effort to help public health in this time of need should be commended.		
Anne Peeris	27-Apr-20	Why is it not recognizing my phone number??		
Alex Smith	26-Apr-20	1	Going to be a game changer for tracking COVID. Will uninstall as per instruction until later tonight/tomorrow am when registration is allowed.	
Tristan Boland	28-Apr-20	1	Would be better if I didnt have a continuous notification while it's on.	
Joe longlux	26-Apr-20	11	The data is stored by Amazon	which means the USA can access the data and no one will know. Not even the Australian Government.
John DanUnder	26-Apr-20	On registration	the process tells me that my mobile number is invalid	
Deng Monychol	6-May-20	Good way to stay alert and safe.		
Dr Nelly Buckman	12-May-20	2	It is a requirement to load this app	so far I haven't been able to load it successfully
Tony Hunt	27-Apr-20	5	Not clear if the persistent notification has to stay on. Also would like to see more of what its recording on me.	
David Jones	26-Apr-20	20	When I go to get the pin	it tells me number is invalid. I have had it for 15 years?

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Claudia Palmisano	26-Apr-20	Easy to install and setup			
Adam Brown	26-Apr-20	Easy to install and setup			
Vishal Sidhu	26-Apr-20	1	People do yourself and others a favour and please download this app. If you can download and have account on FB	insta and other social media mehemoths and not worried about privacy then all these worries about this app are just B.S....	
Elizabeth KALAITZIS	27-Apr-20	1	Find it so easy to join		
Fiona Dew	26-Apr-20	3	Easy to use	Great work!!	
Rusty J	26-Apr-20	3	Requires Accurate Location Permission (Gov told us this was not needed)		
Sriprad Masetty	26-Apr-20	2	Though egistration is not successful	I would recommend this app to everyone to get it downloaded n use.	
Andrew McGinlay	6-May-20	1	Impossible to sign on after 4 days		
Luke Andreadakis	13-May-20	An app that will help minimise the spread and the second wave is 5 stars in my book coming from a small business owner.			
Colin Appleton.	26-Apr-20	Says my mobile number is invalid! Not a good first impression!			
Ivan Webb	26-Apr-20	Very straightforward process			
Dane Grant	26-Apr-20	1	All setup and easy to do		
John Fuller	26-Apr-20	I cant get the app to accept my mobile phone number	so no sign up yet		
Kezza021961	27-Apr-20	I can't register	it's not accepting my mobile phone number ðŸ˜~		
Manuel Bayram	26-Apr-20	Quick and easy to set up			
Culbookie Burra	27-Apr-20	1	Good	easy to register	
Stephen D'Arcy	28-Apr-20	Nice work oznerds. Transparent	simple	safe.	
Rob Puise	30-Apr-20	1	Interferes with my blue tooth devices. Otherwise I would use it		
Matthew Smith	26-Apr-20	Can't enter my phone number	says it's invalid! Lolz		
Rosalie Fuller	28-Apr-20	Useless as it doesn't recognise my mobile number....slightly important			
Brendan O'Mahony	26-Apr-20	1	Remove the first 0 of your phone number and put it in. That is common sense.		
H Macca	27-Apr-20	I cannot sign up...it tells me my phone number is invalid			
Vignesh Shashidhar	26-Apr-20	Invalid Phone Number error eventhough my number is accurate.			
Vic Marshall	28-Apr-20	Hi it won't let me as its saying invalid phone number I do know my phone number how am I meant to sign up to this app if its saying my phone numbers wrong what can I do			
Peter Neumeister	26-Apr-20	1	Easy to install. Works well. Will save lives and our economy.		
Ann Doyle	4-May-20	Keep having problems with the app			
A Google user	27-Apr-20	1	Tells me my phone number is not valid. Newsflash	it f***** is valid	I've used it for 13 years now..
Alex Blaikie	27-Apr-20	2	Source code seems good. Ignore all the tinfoil hats	we've proven as Australians we're already better than the rest of the world in common sense	no problem downloading this to continue that.

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
candice patrick	26-Apr-20	Seems good so far. Download it and help keep everyone safe.		
Shannon Gower	26-Apr-20	3	It's a decent app. I hope it works in helping people and not doing other things.	
Rosanna Hough	27-Apr-20	Doesnt recognisise our mobile numbers!		
Steve M	26-Apr-20	1	So many idiots rating this app 1 star because they didn't wait until 6pm for registrations to open.	
Clarence Law	1-May-20	2	Reboot your phone if you can't register your number	
Gai Clifford	5-May-20	Not sure if I have been successful in down loading the app.		
Rebecca Jepson	18-May-20	Please remove the constant notifications and only send one if advice needs to be specifically given. I don't need constant reminders that it's on.		
patrick orourke	26-Apr-20	Great app. We need this to go back to our normal lives.		
J Feng	27-Apr-20	2	Please allow an option to turn off the app when not needed at places like home.	
Andrew Holt	26-Apr-20	1	Simple and effective and safe	
Christina Hunt	28-Apr-20	So far the App tells me my mobile number is invalid.		
Paul Hayes	26-Apr-20	1	Hopefully this will help restrictions end sooner.	
Huiyan Smidro	13-May-20	Chews through the battery like an alcoholic on a binge. Only turn it on when leaving home.		
Rosemary Helwig	27-Apr-20	Can't register my phone number. Tells me its invalid.		
Melinda Clay-Gibson	26-Apr-20	Easy to download and add phone number		
Lindsay Down	26-Apr-20	Easy set up	up and going now let's get these restrictions lifted!!	
Chris McCourt	27-Apr-20	My phone number was seen as invalid so I couldn't sign up		
Wayne Robinson	26-Apr-20	Invalid phone number down load and use they say be GOOD if it worked		
Lee Frake	26-Apr-20	1	Not compatible with my wife's phone with Android 4.3	
Quang Le	26-Apr-20	fantastic concept! I 100% support this app and the government		
Nathan Brown	4-May-20	Anything that helps save lives. I'm looking forward to reading the conspiracy theories in the reviews!		
A Google user	27-Apr-20	1	Really easy to use. PLEASE do this and save lives. It might just be someone in your family that it saves!!!!	
B W	4-May-20	Using too much battery.		
Jim Marshall	12-May-20	1	Fantastic app	can literally save lifes. Maybe yours?
Peter Moore	26-Apr-20	Can't get past phone number/pin page		
Tony Koch	26-Apr-20	Easy to register.		
stan nguyen	27-Apr-20	Simple app. Installed in 2 min. Hope it works.		
Adil	26-Apr-20	Doesn't recognize phone number can't sign up		
Vijay Santhana	27-Apr-20	Easy to register.		
Brian Man	26-Apr-20	Signed up in less than 1 minute...		
Andrew Walker	26-Apr-20	1	Very well setup for easy install.	
Gloria Malvicino	27-Apr-20	Easy to install	hopefully it will be able to keep us all safe.	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Mike Chye	27-Apr-20	Fantastic app and easy to set up			
Matt Scanlon	26-Apr-20	2	Great initiative by the Australian Government. Thank you for caring for your people during this crazy time. I'll gladly have this app if it means it will slow the spread and save lives. 10/10		
Justin Smith	26-Apr-20	8	Not great	I downloaded this app and still have the virus despite using the app?? And additionally I've been injecting disinfectant so I'm doing everything right.	
nick van heeswyk	3-May-20	Battery use way too high	uninstalled.		
Annaliese Rowney	26-Apr-20	Easy sign up process.			
Morgana Prior	26-Apr-20	Issue registering - says mobile number invalid			
Suzanne McMillan	26-Apr-20	1	Simple and straightforward		
Martin Kolarik	26-Apr-20	Simple	straightforward and will help everyone. Thank you to those who provided this.		
Rob Heard	3-May-20	First time I've had a flat battery in awhile 60% to flat overnite. So I built a bridge and leave it on charge overnite.			
Judith Dietzsch	4-May-20	I had trouble getting from the pin you sent to me then back before you changed it again			
edward Matulaitis	4-May-20	Is my kovid safe even when the optimising always in red			
Sean O'hagan	10-May-20	Doesn't seem to drain the battery too much			
Andrea Hallett	26-Apr-20	7	Easy to install. This app is a must install if we are to return to normality. Doomsayers get a life.		
Josh Button	28-Apr-20	1	Hoping this can help us get back to more normal behaviour sooner than later		
Andrew Drummond	27-Apr-20	Sounds like it will help save lives. Yet the phone number I have had for 15 years is "Invalid".			
Linda Page	29-Apr-20	Tried to install but like others it said my phone number invalid. Can the govt please stop payment to the U.S. developers			
Jayne Willett	4-May-20	I have put in my pin & it tells me it's the wrong pin			
Janeece McKenna	4-May-20	Great idea and easy to install			
Damien Turner	27-Apr-20	2	If you love and value your family	friends and health care workers download this app. If you worried about privacy	have you ever thought about how much information you give to foreign owned social media companies ie. Facebook etc. Do the right thing and download this app to fight this deadly virus
Mark O'Brien	26-Apr-20	Falls over on entering a valid phone number			
Damien & Jonnie White	27-Apr-20	1	Easy to install. Will help us keep out of shutdown and save lives and livelihoods.		
sam rowaro	26-Apr-20	1	Let's all help each other out and get through this together. Easy to install and register.		
Kim Cachia	26-Apr-20	Does not accept mobile number please fix			
Sarah Horton	26-Apr-20	Easy as to set up now they opened it for our use.			
Clara McGinty	27-Apr-20	Easy to follow and use			
Ken Fuller	27-Apr-20	It does not accept my phone number	saying my phone number is invalid		
Peter Rafter	26-Apr-20	App won't register my mobile phone number.			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Ming Liang	4-May-20	Please add setting function to let people allow this app start automatically. Thanks.			
Jennifer Collett	27-Apr-20	Couldn't download. Said mobile number invalid			
Jan Patterson	26-Apr-20	1	Easy to fill out less than 2min		
c s	26-Apr-20	1	Finished registration within one minute.		
Peter Hamilton	27-Apr-20	keeps telling me I have an invalid mobile number!!			
PETER MICHAEL VOUSSEM	6-May-20	If i could see(get feedback) what the actions/logs of my app on my phone are	i would be much happier		
Philip Wilson	11-May-20	Lots to learn..good tech to easily self help!			
Pam Mcdonald	13-May-20	Cannot complete App freezes			
Atletico Wanka	18-May-20	Drains too much battery power			
Jon Gad	26-Apr-20	Easy to install and activate			
Jonathon Rau	26-Apr-20	1	Great initiative and needs less permission than most other apps on my phone! Really hope everyone gets amongst this to make our day to day activities safer.		
Phil Lawrence	27-Apr-20	Does not send pin to correct number			
Gagandeep Singh	27-Apr-20	1	Good initiative by Aus govt. Urge all people to download this app. It's completely safe and doesn't effect your battery usage.		
John Coates	26-Apr-20	C'mon Australia - don't listen to the BS. This app collects less data than what the authorities already know. Guess what - my name	phone nom and age are already on plenty of gov databases - what's the drama?		
Owais -	26-Apr-20	1	Does not recognise registered phone numbers		
Caroline Africh	26-Apr-20	100% support for the app. Download	get your freedom back and stay safe!		
Elton Treloar	26-Apr-20	As a techy	I am happy with the privacy policy.		
Dean Gillett	27-Apr-20	2	Doesn't recognise my phone number. Uninstalling app		
Peter Fletcher	28-Apr-20	Does not accept my Mobile number used both with 0 and without hopeless öÝ-			
Ken Griggs	26-Apr-20	Won't accept a valid mobile number			
David Steele	26-Apr-20	2	Not yet able to register	will open up at 6pm. But the concept is 5 stars.	
Andrea Prickett	26-Apr-20	2	Great initiative and I am certain it is safer than 99.9% of every other random app downloaded from places all over the world including China	Russia and India	you get my drift I am sure öÝ;å€¤â™€í, ö
Josh O'Loughlin	2-May-20	Says invalid phone number regardless of format			
A Google user	2-May-20	Not able to get pin not able to resend			
Phil Healey	26-Apr-20	Reasonably easy to set up.			
deb pietrzak	27-Apr-20	Its great	easy. Saves lives		
3liteChicken	27-Apr-20	2	Non intrusive cant hurt to download		
Manfred Penzhorn	27-Apr-20	Sensible approach to a difficult problem. Well done.			
Luke Conlon	8-May-20	Great idea to help those vulnerable to virus			
Shellie H	14-May-20	This is draining my battery severely!!			
Sebastian Marten	27-Apr-20	1	Keeping an open mind for now. If it isn't open sourced as promised	or at least some other iron clad assurances given	off it goes.

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Andrew Macneil	26-Apr-20	We have to use every piece of technology and medical knowledge available to us to fight this virus. More than happy to play my part.		
Brad Law	26-Apr-20	1	Quick and easy sign up	
Naroth Sin	27-Apr-20	1	Great initiative by our government to keep everyone safe. Thank you for making this app happen so quickly.	
Sue Callow	27-Apr-20	super quick to upload quite a small app- #savelives		
Rebekkah Johnson	4-May-20	It does work i just get covidsafe safe symbol		
Jane Dalzell	26-Apr-20	Easy to install and set up.		
Charles Porter	26-Apr-20	We need to get on top of this virus.... I hope the app works as it is intended.		
Dwayne Honor	27-Apr-20	Easy to setup	simple and hopefully effective	play your part and download today #covid19 #inthistogether
Tracey Caldwell	26-Apr-20	Doesn't like my phone number so I can't complete registration		
Gene Qbcc	27-Apr-20	won't work keeps saying that my mobile is not valid		
Ieeanne crowhurst	27-Apr-20	Won't let me put my pH no in not working for me after 3 attempts		
Rob Champion	29-Apr-20	1	Seems to have no significant impact on battery life.	
STEVEN GEORGE	3-May-20	Clever App from our Government.Every person that walks on Australian soil should have this App	if you don't then you should not be here.This App can help us to save lives by being 1 step ahead of COVID	
David Clarke	5-May-20	1	Good idea if this works and being notified if you have been possibly exposed to get checked and self isolate to help stop the spread.	
Marie-Josee Mill	26-Apr-20	No problem registering ☺		
James C	26-Apr-20	2	Not able to get the pin number as giving me invalid phone number. How can I trust the app now?	
Sunyata Megha	27-Apr-20	Easy to register and set up. Let's all do our part to get Australia moving again while keeping everyone safe.		
chris joseph	26-Apr-20	2	registration available only from 6pm today	
Steve Hall	26-Apr-20	Does not accept mobile phone number.....		
Victoria Moore	2-May-20	I quite don't understand What is required. I gave my details and then suddenly stop. Asking for a pin code. Never arrived. I do not like confusions not in this chaos time that the world and our Australia Is suffering Thanks and bye		
Cedric Crabbe	14-May-20	App does not stay on for morethan ten minutes		
Lyn Hoswell	15-May-20	It keeps turning off says not active ☹		
A Google user	26-Apr-20	Keeps saying my phone number invalid!!!!		
Rony Howley	26-Apr-20	Pls download it to stop the spread so we can return to some form of normality. Privacy shouldn't matter in a pandemic (to an extent) and this app doesn't even jeopardize your privacy.		
Lyn Armstrong	27-Apr-20	2	Can't get it to download been trying since last night what is going on?	
Mario Martinelli	26-Apr-20	1	Anything that helps track down and squash this bastard gets my thumbs up.	
Robin Leonard	29-Apr-20	1	Easy to upload and safe. I welcome this opportunity to help keep Australians safe	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
trina sabine	29-Apr-20	1	So painless and yet will provide essential tracking for the virus. Well done to the authorities.	
Pat Keane	4-May-20	Great idea and easy to use.		
Phil Morris	26-Apr-20	3	Easy to install	note you don't need to give your real name. Wouldn't you like to know if you have recently been in contact with a person with Covid-19?
Craig Dallie	26-Apr-20	Easy to install and very safe		
melinda renouf	27-Apr-20	Quick and easy to install		
Rahul Patel	1-May-20	Benefits r not known yet	hope privacy will not be destroyed. but happy to support my government. Love Aus.	
Ros Rayner	4-May-20	I think this app is a good thing. I hope everyone downloads it	not only for their own safety but for the safety of their friends	their loved ones and their country.p
Troy Palmer	27-Apr-20	1	Unobtrusive. Simple and effective.	
Jason Khan	26-Apr-20	2	Won't accept mobile number. Fail	
Mark Collinson	26-Apr-20	3	All good. Simple install. Will wait and see what battery drain is like.	
Henry Delfino	27-Apr-20	Very usefull app to trace covid		
Kobi Rogers	27-Apr-20	I love that the government is doing what every they can to make out lives safer and more normal and if this is one thing that can help I'm happy to download it		
Kean Ballard	27-Apr-20	After a few hiccups got it to work		
Alexander Burakevych	27-Apr-20	An important app to help reopen Australia earlier.		
Anthony Earle	26-Apr-20	2	Easy to install and will save lives!	
Beth Phillips	26-Apr-20	1	IThis app says my phone number is invalid. Go figure!	
Paul Todd	26-Apr-20	2	Awesome app. Saving lives and livelihoods!!	
Sam Sydney	26-Apr-20	Does not accept phone number	says invalid number	
Peter Scarth	2-May-20	Simple. Unobtrusive. It just works		
Hazel Dusk	26-Apr-20	86	Don't download this app. It's just another way for the government to track you and monitor you that people like Dutton have been trying to do for years. Stop selling your privacy to the government where they've been shown to abuse it time and time again.	
Gary Wittingslow	27-Apr-20	Just leave the zero off your mobile no and it works great		
Troy Jones	26-Apr-20	1	My mobile number is apparently invalid... well unfortunately I can't change my number so guess I won't be using the app...	
Jarrahd Muller	27-Apr-20	I downloaded this app so I wouldn't need to wash my hands so often. So far it's working. 5 stars	would download again.	
Guy Bowman	3-May-20	Since i downloaded this i can only access my wifi security cams when i am in flight mode???		
Hossein Rashidi	3-May-20	Good and reliable...		
David Gill	27-Apr-20	This app has protected me from coronavirus by blocking the affect of 5g. 5 stars		
John Simons	27-Apr-20	Saying my phone number is invalid	so cant get a pin	

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Grant Robertson	26-Apr-20	1	Hey	everyone in Australia should download this app to help keep us all safe and make sure we can get any outbreaks under control quickly.	
matthew johnston	2-May-20	Works just fine	no issues!		
Martin Williams	26-Apr-20	Constantly says invalid phone number. I give up.			
David Rock	27-Apr-20	Can't authenticate			
Felicity Walker	29-Apr-20	Easy to install and use.			
Mr S.C. Hussey	26-Apr-20	1	A great thing to do and no security fears. This will assist keeping everyone safe going forward.		
Pablo Serazio	26-Apr-20	1	Well there you go. It is working first time. I feel sorry for this country when so many people cannot read simple instructions.		
Hari K	3-May-20	Stops running in the background.			
Trevene Leonard	4-May-20	Works fine. No issues here			
Shannon Lindsay	10-May-20	1	Competley drains the battery life on your phone		
Ian Thompson	8-May-20	Update appears to have jammed at 96%			
Vivienne Wallace	26-Apr-20	Easy to download and install			
Bruno Fabre	26-Apr-20	Easy to register.			
michael mccarthy	27-Apr-20	2	Easy to download and worthwhile		
Rod F	27-Apr-20	1	Rejects my mobile number consistently. Huge waste of time.		
Keith Lord	29-Apr-20	Fantastic app wish everyone will download and install it to make Australia safer ☺			
Richard Healey	27-Apr-20	A great way to share together to ensure the safety of the whole community.			
daniel webster	26-Apr-20	3	Invalid phone number...you can't register until after 6pm tonight 26/4		
Alex Draper	27-Apr-20	Invalid phone number no matter what way i try and put my number in -_-			
Lore	27-Apr-20	Great app to prevent the spread of covid 19			
Tom Pearson	27-Apr-20	2	Not very user friendly my 80 yo mum has given up with it already Can't enter her pin		
Antonio Morales	26-Apr-20	Can't register my mobile number.			
the RedMan	29-Apr-20	1	Not mandatory. BUT.... work place or buisnesses can require you to have app.		
Mary Stafford-Smith	26-Apr-20	All ok. The more people who sign up the more effective this will be so encourage everyone. Let's get back to normal as quickly as possible.			
Richard Anderson	26-Apr-20	1	Turn on Bluetooth and it will accept your phone number		
Paul Raymond	26-Apr-20	1	Simple	easy setup. I have faith in this system.	
Andrew Adams	26-Apr-20	1	Great idea	I have downloaded it	Will register after 6 tonight when registration opens
Alan Stalker	16-May-20	A bit difficult to obtain and use pin			
Frances Bartholomeusz	2-May-20	Clear	Easy	instructions	
Christopher Burke	3-May-20	No issues on android			

Sam Stainsby	19-May-20	54	The app seems to be working OK	but with a heavy drain on the battery. The source code has been published once	but is not being updated with subsequent releases. That's simply not good enough! Feedback from the technical community about vulnerabilities and other bugs is being largely ignored. For n
Phil LEACH	4-May-20	I got part way through the installation and everything stopped.			
Carlton Murray	26-Apr-20	Cant sign up	says phone number is invalid		
Chris Smith	27-Apr-20	says i have an invalid phone number. the logic of the app and questions are poorly thought out			
magicpanda101	28-Apr-20	1	Easy to install and use		
Justin Fox	27-Apr-20	Easy to use and worth it.			
Joe Silvestri	27-Apr-20	Lets find solutions rather than complain about problems			
Christine Hodson	11-May-20	Easy to install. Gives some peace of mind			
A Google user	27-Apr-20	Easy and straight forward download ☺			
Kazza	26-Apr-20	It was totally easy to install.			
Jason Mc	26-Apr-20	8	Love the idea if "EVERYONE" gets on board	guess drug dealers etc are scared	but it is doing the same as many others with invalid mobile number. FIX THE PROBLEM!!!!
Arlene Limongan	19-May-20	It was active yesterday and now i have to register again?!			
Mike Hawryluk	27-Apr-20	1	No issues	let's squash this bug!	
megatron S	26-Apr-20	3	a waste of taxpayer money....why in hell do you need Bluetooth on for this thing... uninstalled and 1 starred....		
Aaron Robinson	26-Apr-20	Easy to register!!			
Dominique Zehe	5-May-20	Not working after update!!!			
Traci Milner	27-Apr-20	Stupid app says my number is invalid!!
